As the rise of pressure did not extend far south, the result was that pressure become higher in Bengal than over the Bay and in part of Burma. A second depression therefore appeared and its development was accelerated by a brisk fall of pressure in Burma while there was still a rapid rise in the north-western districts of Bengal. The difference from the normal on the 5th varied from excess of ·05 inch in the West of Bihar to defect of ·08 inch in the south of Burma. During the next two days small unimportant changes followed except in the northern districts, where a brisk fall of pressure caused a slight depression near the foot of the hills. This change was of some importance because it led to heavy rain at first in North Bengal, and afterwards in Bihar, the rainfall being accompanied by a large fall in temperature. On Thursday, the 7th, Jalpaiguri received 7 inches, and on Friday nearly all the northern stations reported more or less heavy rain. Meanwhile the depression was slowly developing over the Bay, and the indraught towards it kept weather fine and almost rainless in Lower Bengal, Chota Nagpur and Orissa. By 8 A.M. on Saturday it lay over the north of the Bay, the area of lowest pressure extending from Arakan to Orissa. Defect within this area was nearly a quarter of an inch, and the depression extended over the whole province, and the north of the Bay. The cyclonic circulation of winds was then very regular, squally weather was beginning in the east of the Bay, and showers were almost general in Lower Bengal, but the rainfall in North Bengal and Bihar had almost entirely stopped.

The commencement of this second depression was probably caused by the large increase of pressure, which forced the first one westward with such unusual rapidity, and the check to the southerly winds which came from the same cause must have led to the heavy rainfall which accompanied the second depression throughout its development and advance.

Pressure—Changes have been very large, and means for the week are considerably below the normal. Defect varies from a little under a twentieth of an inch in the northern districts to more than a tenth in part of Orissa. On Sunday, the 3rd, changes varied from a rise of ·08 inch in Assam to a fall of nearly ·2 inch at Balasore and Chaibassa. On the 4th there was a rise everywhere, varying from ·05 inch in Bihar and Assam to ·323 inch at Balasore. The rise continued with moderate rapidity in Bengal on the 5th, but there was a slow fall on the 6th, the greatest changes being at the northern stations. The fall continued till the end of the week when there was again a considerable defect.

Temperature—Was low in the south-western districts in the beginning of the week, and a rapid fall prevailed in Assam on the 7th and in North Bengal and Bihar on the 8th, but at other times there was excess, greatest in the middle of the week, when it averaged about 3.° Means for the larger divisions are all above the normal, excess varying from a quarter of a degree in Orissa and South Bihar to about 1° in Lower Bengal and Chota Nagpur.

Rainfall—Heavy rain fell in the south-western districts in the early part of the week and in Bihar and North Bengal towards the end. The rapid rise of pressure on Sunday and Monday led to fine weather over the greater part of the province, and very little rain fell anywhere on Wednesday, the 6th. On other days, with the exceptions mentioned above, comparatively fine weather was general with light local showers. South-West and East Bengal received less than half the normal, North Bengal about 60 per cent., while the average fall in the other divisions was above the normal, by more than one inch in Chota Nagpur and more than half an inch in Orissa and Bihar.

The following table gives the summary of the temperature and rainfall data of each of the seven meteorological divisions of the province for the week ending Saturday, the 9th of September 1893:—

Meteorological Divisions.	Temperature.						Rainfall.									
	Highest observed during week.	Lowest observed during week.	Averages for week.			Average mean of week above or below normal mean of week.	Of week.			Rainy days.			Since 1st of month.		Since 16th May 1893.

The total fall from 1st January to 9th September 1893	69·77
The average fall of the corresponding period for 24 years, Surveyor-General's Office	52·24

The mean pressure, temperature, &c., are deduced from the traces of the Barograph and Thermograph and from observations made at 6h, 10h, 16h, and 22h.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed open at the sides and are suspended four feet above the ground.

The barometer readings are corrected approximately to those of the standard, Newman's No. 86, formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed in the Meteorological Office, and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground.

o, overcast; g, gloomy; d, drizzling rain; p, passing temporary showers; t, thunder; lr, lightning reflection; △, dew.

RESOLUTION ON THE REPORT OF THE ADMINISTRATION OF THE STAMP DEPARTMENT DURINGTHE THREE YEARS ENDING THE 31ST MARCH 1893.

FINANCIAL DEPARTMENT—SEPARATE REVENUE—No. 96T—F

Darjeeling, the 15th *September* 1893.

RESOLUTION.

READ—

The Report of the Board of Revenue on the Administration of the Stamp Department during the three years ending 31st March 1893

This is the second report submitted under the triennial system, statistical information with brief explanatory notes having been supplied for the two previous years 1890-91 and 1891-92. The revenue for the period under review was collected under the Indian Stamp Act I of 1879 and the Court Fees Act VII of 1870, as modified by subsequent enactments. The changes made during the past three years in the law and in the rules issued by Government, hough numerous and important from a departmental point of view, are not of sufficient general interest to call for special notice in this place.

Stamp revenue.

2. The financial results of the administration of the Stamp Department during the past three years, as well as during the previous triennium, are shown in the following table, the figures being based on accounts furnished by the Accountant-General:—

Year.	Stamps under Act I of 1879.			Court-fees under Act VII of 1870.			Total.		
	Receipts.	Refunds and other charges.	Net revenue.	Receipts.	Refunds and other charges.	Net revenue.	Receipts.	Charges.	Net revenue.
1	2	3	4	5	6	7	8	9	10
	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.
Average of three years 1887-88 to 1889-90	37,30,357	2,73,676	34,56,681	1,02,33,909	3,47,208	98,86,611	1,39,64,266	6,20,975	1,33,43,291
1890-91	41,17,887	2,84,119	38,33,768	1,01,88,707	3,35,623	98,53,084	1,43,06,594	6,19,732	1,36,86,862
1891-92	41,49,842	2,38,644	39,11,198	1,09,50,620	3,43,922	1,06,06,698	1,51,00,462	5,82,566	1,45,17,896
1892-93	43 47,067	2,75,506	40,71,561	1,11,97,772	3,61,849	1,08,35,923	1,55,44 829	6,37,355	1,49,07,474
Average of three years 1890-91 to 1892-93	42,04,928	2,66,090	39,38,838	1,07,79,033	3,47,128	1,04,31,905	1,49,83,961	6,13,218	1,43,70,743

The gross average annual receipts under the two Acts during the triennial period under review amounted to Rs. 1,49,83,961, against Rs. 1,39,64,266 in the previous corresponding period, showing an increase of Rs. 10,19,695. The increase occurred in both classes of stamps—judicial and non-judicial. As in other years, the receipts during 1892-93 were highest in Calcutta (Rs. 22,96,940), which provided more than one-seventh of all the stamp revenue in Bengal, and lowest in Singhbhum (Rs. 17,890). Mymensingh and Dacca contributed more than 7 lakhs each, the 24-Parganas nearly $6\frac{3}{4}$ lakhs, Backergunge over 6 lakhs, and Midnapore and Tippera nearly $5\frac{1}{2}$ lakhs each. The general incidence of stamp revenue on the population was 3 annas and 4 pies per head.

Stamp rules.

3. The following table shows in greater detail the receipts from sales of the different descriptions of stamps during the triennial period from 1887-88 to 1889-90, and the similar period under review. The figures which have been compiled by the Superintendent of Stamps, however, differ from those given in the previous statement, inasmuch as they do not include miscellaneous receipts under the Indian Stamp Act, or receipts from the sale of plain paper prescribed by the High Court for use with court-fee stamps under the Court Fees Act. They show stamp sales only; but apart from these differences, there is a small discrepancy, amounting to Rs. 19,632, with the Accountant-General's figures, which is under adjustment.

Year.	Sales of Non-judicial Stamps used under the Indian Stamp Act.										Sales of Judicial Stamps or Stamps used under the Court Fees Act.			Total of both kinds of stamps.
	Impressed sheets, including certificate stamps, salt bond bills of lading and kabuliat form stamps.	Impressed labels.	Receipt or one-anna revenue stamps.	Share transfer stamps.	Foreign bill stamps.	Hundi or bills-of-exchange stamps.	Notarial stamps.	Advocate, vakeel, and attorney stamps.	Impressed one-anna stamps for cheques, bills, &c.	Total of non-judicial stamps.	Adhesive and impressed court-fee stamps.	Stamps for copies.	Total of court-fee stamps.	
1	2	3	4	5	6	7	8	9	10	11	12	13	14	15
	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.
Average of three years 1887-88 to 1889-90	25,57,959	6,16,879	2,30,034	34,714	46,343	1,08,880	3,140	11,917	48,260	36,60,725	94,75,068	5,66,883	1,00,41,951	1,37,02,676
1890-91	26,60,471	7,41,403	2,61,977	60,420	43,783	1,03,653	3,003	7,600	61,749	39,52,958	94,95,478	4,96,225	99,91,703	1,39,44,610
1891-92	28,53,786	6,68,654	2,92,327	21,206	40,219	1,08,655	2,780	19,500	54,567	40,01,694	1,01,92,845	5,40,757	1,07,33,602	1,47,93,296
1892-93	30,80,457	6,59,825	3,09,803	37,097	36,464	1,12,871	2,661	19,750	55,710	48,14,638	1,04,09,652	5,61,076	1,09,70,728	1,52,85,366
Average of three years 1890-91 to 1892-93	28,67,905	6,89,961	2 88,036	39,574	40,155	1,08,393	2,815	15,588	57,342	41,09,763	1,00,32,658	5,32,686	1,05,65,344	1,46,75,107

As compared with the triennial period between 1887-88 and 1889-90, all classes of stamps with the exception of Foreign Bill, Hundi and Notarial stamps, and stamps for copies, contributed to the increase in the sales during the period under review.

Non-judicial stamps.

4. The improvement was most marked in the case of impressed sheets, which are the most important of non-judicial stamps. Forty-three districts participated in this improvement, the largest increase (Rs. 18,000) being observed in Backergunge. The improvement is generally attributed to the execution of a larger number of documents, such as deeds of sale, mortgages, &c., consequent on the failure of crops in certain districts. The increase in impressed labels, which are in use only in Calcutta, is normal. There was an improvement of nearly Rs. 60,000 per annum in the income from one-anna revenue stamps, commonly known as receipt stamps, which may be ascribed to the facilities afforded for obtaining them through the agency of the post-office, and to the stricter administration of the law which had hitherto often been evaded with ease and impunity. A fresh cause at work was the action of the Board in inviting the attention of local officers to the standing orders under which assessors of income-tax are vested with powers to impound instruments not duly stamped. The Lieutenant-Governor trusts that the Board will not relax their efforts to protect this branch of the revenue. Another class of instruments, on which the stamp duty is said to be frequently evaded, is the Hundi, the result being attributed to defects in the stamp law The clauses that affected the sales of different kinds of stamps in different districts are given in detail in the Board's report, and need not be repeated here.

Judicial stamps.

5. Under the head judicial stamps are included adhesive and impressed court-free stamps, High Court service stamps, Calcutta Small Cause Court stamps, and stamps for copies. The total average income during the period under review amounted to Rs. 1,05,65,344 per annum, or an increase of Rs. 5,23,393 over the previous corresponding period. The extent to which each description of stamps contributed towards the average annual revenue is exhibited in the following table:—

	Rs.
Court-fee stamps	96,72,718
High Court service	9,500
Calcutta Small Cause Court	3,50,440
Stamps for copies	5,32,686
Total ...	1,05,65,344

Thirty seven districts show an increase and nine a decrease. The largest increases were in Calcutta (Rs. 1,22,124); Nadia (Rs. 41,389); Faridpur (Rs. 40,702); Burdwan (Rs. 32,795); Rangpur (Rs. 25,399); Patna (Rs. 23,342), and 24-Parganas (Rs. 21,734). The largest decrease occurred in Howrah (Rs. 5,533), and Shahabad (Rs. 5,520). An increase or decrease in the number and the value of suits is the main cause to which the fluctuations in the sales of court-fee stamps may be attributed. It is significant that Singhbhum and Manbhum, to both of which districts railway communication has been effectively extended during the period under review, show a very large increase in stamp revenue, both judicial and non-judicial. Taking each denomination of court-fee stamps sold during the period under review, there was an increase of over $3\frac{2}{3}$ lakhs in the sale of eight-anna stamps, $1\frac{1}{4}$ lakhs each in that of one-anna and one-rupee stamps, nearly 1 lakh in that of four-anna stamps, while on the other hand there was a decrease of nearly $1\frac{2}{3}$ lakhs in that of twelve-anna stamps, Rs. 34,000 in that of two-rupee stamps, and Rs. 17,000 in that of four-rupee stamps.

Levy of penalties.

6. The following statement shows the number of cases in which deficient stamp duty and penalty were levied by the Civil and Revenue Courts, and the amount realized

during the period under review as compared with the previous corresponding period:—

Year.	Number of cases.		Amount of duty and penalty realized		Total.	
	Civil courts.	Revenue officers.	By civil courts	By revenue officers.	Cases.	Amount.
			Rs.	Rs.		Rs.
Average of three years 1887-88 to 1889-90	1,308	2,139	10,728	22,930	3,417	33,658
1890-91	1,218	1,986	11,[illegible]72	28,992	3,204	40,264
1891-92	1,370	2,298	11,653	21,095	3,668	35,748
1892-93	1,417	2,446	11,174	22,810	3,862	33,984
Average of three years 1890-91 to 1892-93	1,333	2,241	11,365	25,314	3,574	36,679
Average increase in the triennium under review compared with the preceding triennium	25	102	637	2,384	127	3,021

7. The average number of prosecutions instituted annually for various breaches of the stamp law was 646 against 815 in the previous triennium. The average number of persons brought to trial was 740 against 929, of convictions 584 against 739, and of acquittals 125 against 116. The average amount of fines imposed by Magistrates was Rs. 5,439 against Rs. 6,658. The average amount of rewards paid was Rs. 1,339, against Rs 1,751 in the preceding period. The fact is brought to the notice of Government by the Board that during the three years covered by the report, not a single rupee was paid as reward in twenty-eight out of the forty-five districts in the province, viz., in the whole of the Orissa and Chota Nagpur Divisions, in four districts of each of the Burdwan and Presidency Divisions, in five districts of the Rajshahi Division, in two districts of the Chittagong Division, in three districts of the Patna Division, and in three districts of the Bhagalpur Division. These results, as the Board remark, are not creditable to the district officers concerned, for it should be borne in mind that activity in the detection of evasions of the law must largely depend on the encouragement afforded by a liberal distribution of rewards, and where these are awarded with a sparing hand, it is almost certain that the stamp law will be broken with impunity, because no one will be at the trouble of bringing the offence to notice.

Prosecutions.

8. Several cases of fraud and defalcation were detected during the period under review. One of the most serious of these occurred in the subdivisional treasury at Bishenpur in the district of Bankura. Court-fee stamps to the value of Rs. 3,593, and impressed non-judicial stamps to the value of Rs. 32, were abstracted. The enquiry disclosed a defect in the system of keeping accounts and returns, and orders have been issued to place matters on a better footing. The greater part of the loss is being made good by deductions from the pay of those in fault. Another extensive series of frauds was disclosed in the Subordinate Judge's Court at Jessore, which consisted in removing both punched and unpunched stamps from the records, substituting punched for unpunched stamps, and misappropriating the latter. The guilty parties have been punished.

9. The Lieutenant-Governor desires to thank the Board of Revenue for their careful administration of the Stamp Department during the period covered by the report. The names of the officers favourably mentioned by the Board will be noted in the Appointment Department.

By order of the Lieutenant-Governor of Bengal,

J. A. BOURDILLON,

Offg. Secy. to the Govt. of Bengal.

RESOLUTION ON THE TRIENNIAL REPORT ON THE ADMINISTRATION OF THE REGISTRATION DEPARTMENT IN BENGAL FOR THE YEARS 1890-91, 1891-92 AND 1892-93.

No. 57P.D.

RESOLUTION.

REGISTRATION.

Dated Darjeeling, the 18th September 1893.

READ—

The Triennial Report on the Administration of the Registration Department for the years 1890-91, 1891-92, and 1892-93.

The statistical returns for the years 1890-91 and 1891-92, with the remarks thereon.

The second Triennial Report on the Administration of the Registration Department for the years 1890-91, 1891-92, and 1892-93 has been punctually submitted by the Officiating Inspector-General, Nawab Syed Ameer Hossein, C.I.E. Mr. Holmwood was in charge of the Department during the whole of the triennial period, and he has left notes on points of special importance, which have been embodied in the report now under review.

2. The following table shows the total number of registrations, as well as the receipts and expenditure, and the number of offices open during each year of the triennial period under report as compared with each of the three preceding years:—

Year.	Number of Registrations: Affecting immoveable property. Compulsory.	Optional.	Other registrations.	Total.	Total receipts.	Total expenditure.	Surplus.	Number of Registration offices.
					Rs	Rs.	Rs.	
1887-88	495,599	95,464	126,930	717,993	10,21,982	5,79,266	4,42,716	301
1888-89	534,510	113,470	135,482	783,462	10,93,472	5,99,176	4,94 2·6	304
1889-90	594,933	147,191	161,484	893,608	11,98,801	6,27,434	5,71,367	307
Totals ...	1,625,042	356,125	413,806	2,395,063	33,14,255	18,06,876	15,08,379	304 average.
1890-91	600,413	148,755	148,148	897,316	12,40,481	6,29,359	6,11,122	322
1891-92	650,026	173,701	155,736	988,463	13,33,736	6,84,204	6,49,532	333
1892-93	732,259	207,395	162,667	1,102,321	14,35,541	7,26,771	7,08,770	346
Totals .	1,991,698	529,851	466,551	2,988,100	40,09,758	20,40,334	19,69,424	333 average.
Increase ...	366,656	173,726	52,655	593,037	6,95,503	2,34,458	4,61,045	29
Decrease ...	...	...	...	...	...	...	...	...

The most noticeable feature in the above statement is the steady advance in the number of registrations of all kinds during the last three years. This is attributed by many District Registrars to the badness of the seasons and the consequent scarcity, but the explanation is one which is brought up year after year to account for any fluctuations, however slight, that may have occurred, and is not sufficient to explain the steady increase in the work of the department. As pointed out by Mr. Holmwood, years of real scarcity have been marked by the increase of small bonds and mortgages, but the total number of registrations and the actual receipts have not been materially affected by them. The Lieutenant-Governor believes that the true explanation lies in the growing confidence of the public in the Registration Department, which every year attracts an increasing proportion of the large number of transactions that may be registered to our offices. The increase in the number of optional registrations, and the

opening of 29 new offices during the last triennial period, are indications of this. The Lieutenant-Governor is glad to observe that the financial condition of the department is satisfactory, and that the surplus at the close of 1892-93 is larger than in any of the preceding years.

3. The number of perpetual leases registered shows a steady increase from 76,390 in 1889-90 to 82,251 in 1890-91, 89,024 in 1891-92, and 90,989 in 1892-93. The increase in 1890-91 and 1891-92 is mainly accounted for by the larger number of registrations of this class in Chittagong, due to the settlement operations in progress in that district. The increase in 1892-93 was not so marked, and in Chittagong there was an actual falling off of 1,553 in the number of perpetual leases registered as compared with the preceding year. The districts in which the greatest number of perpetual leases were registered in 1892-93 are Chittagong 25,970, Faridpur 11,135, Backergunge 8,634, 24-Parganas 7,098, Noakhali 6,073, Jessore 5,879, and Khulna 5,527. These are all the littoral districts of Bengal proper, where there are many grades of tenure-holders between the zamindar and the cultivator, and the profits derived from land are distributed more than in any other part of the province among the masses of the population. The number of permanent leases registered in one year in these seven districts amounts to 70,316. In the seven districts of the Patna Division during the same year only 982 permanent leases were registered, and these figures afford a marked illustration of the difference of the land tenure systems in different parts of this province. In the deltaic tracts, which are the most prosperous portion of Bengal, the interests in land are infinitesimally sub-divided and sublet, but they are mostly fixed and permanent. In Bihar, where the peasantry are worse off than elsewhere, there are middlemen with temporary leases only between the zamindar and raiyat, and fixity of rent and tenure is rarely known. In the deltaic tracts agrarian wealth is distributed in the hands of many until all are comparatively prosperus; in Bihar it is confined to the hands of few, and the masses of the people are steeped in poverty.

4. There was an increase of 66,668 in the total number of leases, other than perpetual, during the last triennial period. In 1890-91 the number fell from 218,515 to 209,726, the decrease being most marked in Central Bengal and North Bihar. In the former it is attributed to the high inundations which led to a failure of the crops, and in the latter to a falling off in the number of *zar-i-peshgi* leases which had been abnormally large in previous years. In 1891-92 and 1892-93 the registrations of temporary leases showed a further increase, the numbers being 219,455 and 239,921 respectively. The increase is attributed to fresh settlements made by landlords with their raiyats, and in a few districts also to the operation of section 85 of the Tenancy Act.

5. The number of instruments of mortgage of the value of Rs. 100 and upwards rose from 77,555 in 1889-90 to 108,214 in 1892-93. The increase is common to most districts, and has kept pace with the general advance in the number of registrations of all kinds. There was a considerable increase in the number of mortgages of less than Rs. 100 in value, the figures for the past year being 185,947 against 130,007 in 1889-90, and 154,840 in 1891-92. The increase last year occurred in almost all districts and is attributed generally to bad harvests, but in Muzaffarpur it is said to have been due to the raiyats of Piprahi in Sitamarhi having been obliged to raise money by means of mortgages in order to carry on litigation with their maliks. In Chittagong many of these documents are said to be mere paper transactions for the sole purpose of showing some sort of right before the Settlement Officer. The number of obligations for payment of money, including bonds, rose from 103,962 in 1889-90 to 108,403 in 1892-93, the largest number of registrations being found among those from Rs. 25 to Rs. 100 in value. It is satisfactory to note that there has been a steady increase in applications for copy and searches, the number having risen from 30,683 in 1889-90 to 36,107, which may be accepted as an indication of the increased efficiency and popularity of the department.

6. As in former years, the number of counterparts largely exceeded the number of leases registered. The following statement (which includes

perpetual leases) shows the proportion of pattas to kabuliyats during the past four years:—

		mpulsory.	Optional.	Total.
1889-90	...	23·54	11·06	23·03
1890-91	...	22·60	11·28	22·07
1891-92	...	29·98	9 89	29·37
1892-93	...	29·18	10·03	28·58

Although there was a slight decrease in the proportion last year, it will be seen that the number of kabuliyats taken from raiyats still far exceeds the pattas given to them. Various reasons have been assigned for this, but there can be no doubt that in many districts the zamindars are disinclined to grant pattas, partly on account of the expense, and partly because they think that it would be contrary to their interests to do so, while the raiyats themselves are not strong enough to insist on pattas being granted.

7. The aggregate value of property transferred by registered documents last year, amounting to Rs. 17,73,50,008, shows an increase of more than half a crore of rupees as compared with the preceding year, and of nearly three crores as compared with 1889-90. There was an increase last year of 53 lakhs in the value of immoveable property transferred, and of 3½ lakhs in the value of moveable property, due in both cases to the increased number of registrations.

8. The total number of transactions involving the transfer of estates or tenures rose to 97,920 in 1892-93, against 94,894 in the preceding year, and 90,691 in 1889-90. The percentage of purchasers in such transactions during the past four years is as follows:—

		Mahajans, traders, and money-lenders.	Zamindars.	Intermediate tenure-holders.	Raiyats.	Others.
1889-90	...	9 9	15·3	29·6	24·1	21·1
1890-91	...	9·4	15·6	27·9	24·9	22·2
1891-92	...	9·8	15·6	29·1	23·3	22·1
1892-93	...	10·4	15·2	30·6	25·3	18·5

The number of raiyati-holdings transferred by deed of sale during each of the last four years, as well as the number and classes of purchasers, are compared in the following table:—

Year.	Raiyati-holdings at fixed rates.							Raiyati-holdings with right of occupancy.						
	Number of transactions.	Purchasers.						Number of transactions.	Purchasers.					
		Mahajans, traders, or money-lenders.	Zamindars.		Raiyats.	Others.	Total.		Mahajans, traders, or money-lenders.	Zamindars		Raiyats.	Others.	Total.
			Landlords of holdings transferred.	Other landlords.						Landlords of holdings transferred.	Other landlords.			
1889-90 ...	35,342	5,161	1,181	2,515	20,396	8,396	37,649	77,373	10,029	2,060	5,198	54,234	9,277	80,798
1890-91 ...	30,090	5,338	1,391	2,927	20,348	8,735	38,730	84,921	9,919	2,777	5,700	60,913	10,246	89,555
1891-92 ...	37,519	5,098	1,374	3,282	20,383	9,945	40,080	1,03,777	13,068	2,839	6,776	75,263	10,891	1,08,837
1892-93 ...	43,749	7,881	1,232	4,777	23,760	9,456	47,106	1,25,250	16,135	3,241	7,889	87,460	12,729	1,27,454

There has thus been a steady advance in the number of transactions of both classes, but the increase is most marked in the transfers of raiyati-holdings with rights of occupancy, the number of which is nearly three-times as large as the number of transfers of holdings at fixed rates. As usual, the raiyats were foremost among the purchasers of holdings with rights of occupancy, being 68·6 per cent. of the whole number.

The number of sales of raiyati holdings at fixed rates in 1892-93 is largest in the 24-Parganas, 5,536, Midnapore 4,006, Bankura 3,905, Chittagong 3,885, Bhagalpur 3,261, and Backergunge 3,129: the sales of holdings with rights of occupancy are most frequent in Midnapore, 14,484, Tippera 12,911, Rangpur 8,756, Dinajpur 7,859, Mymensingh 7,374, and Champaran 6,590. The mahajan purchasers are by far the most numerous in Midnapore, amounting under the first class to 1,933, and under the second to 4,770.

9. The number of registrations under sections 12 and 18 of the Tenancy Act fell from 26,780 in 1889-90 to 20,391 in 1891-92, and to 20,351 in 1892-93. The system of levying landlord's fees under these sections continues to be as unpopular as ever both with the landlords and tenants—with the former, because they believe that their acceptance of the fee will be construed as an acknowledgment on their part of the status claimed, and with the raiyats, because they are not exempted by the payment of the fee from paying it over again as *salami* in getting their names registered in the zamindar's sarishta. The total number of operations under the Tenancy Act during the past year shows an increase in 19 out of the 35 districts in the province. The Lieutenant-Governor has no doubt that, as reported by the Inspector-General and the majority of the District Officers, the provisions of the Tenancy Act have indirectly led to an increase of registrations, especially in sales and mortgages of raiyati-holdings.

10. The number of documents impounded by the registering officers during the past year was 2,091, of which 1,625 were declared by the Collector to be insufficiently stamped, and 227 were declared as properly stamped. Excluding 55 prosecutions on account of documents insufficiently stamped, the total number of prosecutions instituted was 88 as against 83 in 1889-90 and 70 in 1891-92. The number of persons put on trial in these 88 cases was 147, of whom 24 were acquitted and 69 convicted, and the remainder were pending trial at the close of the year. The total receipts of the Department rose from Rs. 11,89,840 in 1889-90 to Rs. 13,33,735 in 1891-92, and Rs. 14,27,000 in 1892-93. The surplus of receipts over expenditure for the same years increased from Rs. 5,71,366 to Rs. 6,49,532 and Rs. 7,08,770 respectively.

11. The Officiating Lieutenant-Governor is glad to observe that the number of inspections made during 1892-93 exceeds the number made in any of the preceding six years. In addition to one inspection made by Sir Charles Elliott, and 33 by the Commissioners of Divisions, the number for the past year was 1,039. The number of inspections made by Special Sub-Registrars, rose from 300 in 1891-92 to 414, but this is partly accounted for by an increase in the number of Special Sub-Registrars appointed. In the districts of Mymensingh, 24-Parganas, Muzaffarpur, and Murshidabad the number of inspections made by Special Sub-Registrars fell far below the required standard. In accordance with a proposal made last year by the Inspector-General, the Lieutenant-Governor has directed that failure in inspection duty without adequate reason will be followed by proportionate loss of pay, and the defaulting Sub-Registrars have been called upon to show cause why this order should not be enforced in their case.

12. In an interesting note which has been included in the report, Mr. Holmwood has enumerated the administrative changes that have been introduced by him during the last triennial period. Among the most important of these are the opening of 29 new offices, and the appointment of additional Special Sub-Registrars, which is reported to have resulted in a marked improvement in the work both of the sadar and rural offices. Wherever possible, the readjustment of Hindu and Muhammadan Sub-Registrars with reference to the classes of the community which preponderate in the tracts of country concerned has been carried out, and the rules and circulars of the Department have been revised and incorporated in a complete manual. Increased accommodation has been provided at various head-quarters, and at Calcutta the appointment of an additional Sub-Registrar as well as of several ministerial officers has been sanctioned. Since the close of the year the sanction of the Government of India has been obtained to certain alterations in the table of fees under Act III of 1877. The *ad valorem* charge for documents under the value of Rs. 50 has now been reduced to 8 annas, and it is believed that this will lead to an increase in the number of registrations, especially of documents of small value, and will eventually prove a gain financially to the Department. The proposal to introduce Sir William Herschel's system for securing the identification of parties and their witnesses in the registration of deeds by means of finger prints was sanctioned in May last as an experimental measure in the districts of Calcutta, the 24-Parganas and Hooghly, and the Inspector-General has been asked to submit a report at the end of the present year on the working of the scheme.

13. The following table shows the working of Act I (B.C.) of 1876 for the voluntary registration of Muhammadan marriages and divorces during the 17 years since its introduction:—

Years.	Number of districts in which the Act was in force.	Number of offices open on the 31st March.	Number of marriages registered.	Number of divorces other than *kholas* registered.	Number of *kholas* registered.	Total number of ceremonies registered.
1876-77 ...	14	77	2,585	402	161	3,188
1877-78 ...	14	103	7,391	1,404	595	9,390
1878-79 ...	14	103	8,161	1,705	771	10,637
1879-80 ...	14	107	7,137	2,097	623	9,857
1880-81 ...	14	106	5,777	1,874	779	8,430
1881-82 ...	14	107	4,951	2,239	667	7,857
1882-83 ...	14	112	5,068	2,247	766	8,081
1883-84 ...	14	112	4,273	2,315	895	7,483
1884-85 ...	14	112	3,913	2,540	957	7,410
1885-86 ...	14	112	3,993	2,422	1,109	7,524
1886-87 ...	14	112	3,926	2,179	1,147	7,252
1887-88 ...	14	112	4,100	2,478	1,090	7,668
1888-89 ...	14	113	4,527	2,819	1,113	8,459
1889-90 ...	14	113	3,959	3,119	1,137	8,215
1890-91 ...	14	115	4,063	3,154	1,234	8,451
1891-92 ...	19	151	5,442	3,260	1,474	10,176
1892-93 ...	19	151	6,780	3,853	1,542	12,175

From the above statement it will be seen that there was a satisfactory increase of 1,338 in the number of marriages registered last year, while the total number of ceremonies registered was larger than in any year since the introduction of the Act. The increase was shared by 13 districts, and in three only, viz. in Chittagong, Bogra, and Noakhali, was there a decrease. The Inspector-General looks upon the general results of the year as satisfactory, and he believes that in the majority of districts Muhammadan Registrars are gradually gaining popularity, and that, where they have failed to do so, the failure is due either to their own action or to the active opposition of interested headmen and zamindars. The introduction of the Kazis' Act in all districts in which Act I (B.C.) of 1876 is in force is said to have had but little effect on the registration of marriages under that Act, and only a few marriages have been solemnized by Kazis or their Naibs appointed under Act XII of 1880. The Inspector-General does not believe that the Act will ever gain much ground as the machinery is not popular, and it is generally reported that the services of the village mollahs are preferred to those of the Kazis appointed by Government.

14. Mr. Holmwood held the office of Inspector-General from the 16th March 1890 up to the 17th May 1893, on which date he made over charge to his successor. His administration has been highly successful, and the Lieutenant-Governor is glad to place on record his appreciation of his efficient control of the Department. The names of the officers specially commended by the Inspector-General will be noted in the Appointment Department.

ORDER.—Ordered that a copy of this Resolution, be forwarded to the Inspector-General of Registration for information and guidance.

Ordered also that extract paragraph 9 of the Resolution, and extract paragraphs 48 to 61 and 76(11) of the Report, be forwarded to the Revenue Department for information.

Ordered also that a copy of the Resolution, together with a copy of the Report, be submitted to the Government of India, in the Home Department, for information.

Ordered also that the Resolution be published in the *Calcutta Gazette*.

By order of the Lieutenant-Governor of Bengal,

H. J. S. COTTON,

Chief Secretary to the Govt. of Bengal.

RESOLUTION ON THE ADMINISTRATION REPORT OF THE COMMISSIONERS OF THE PORT OF CHITTAGONG FOR THE YEAR 1892-93.

No. 2168Marine.

GOVERNMENT OF BENGAL—MARINE DEPARTMENT.

Dated Calcutta, the 16th September 1893.

RESOLUTION.

READ—

The Administration Report of the Commissioners of the Port of Chittagong for the year 1892-93.

Financial.

THE financial position of the Chittagong Port Fund on the 31st March 1893 is shown in the following statement:—

	Rs. A. P.		Rs. A. P.
Opening balance on the 1st April 1892	77,064 13 9	Expenditure during the year 1892-93 ..	1,09,024 5 10
Receipts during the year .	70,183 5 0	Balance on the 31st March 1893 ...	38,223 12 11
TOTAL ...	1,47,248 2 9	TOTAL ...	1,47,248 2 9

2. The subjoined table shows the number and tonnage of the vessels which visited the port during the year, as compared with the figures of the two previous years:—

Shipping.

		1890-91.		1891-92.		1892-93.	
		Number.	Tonnage.	Number.	Tonnage.	Number.	Tonnage.
European vessels trading with foreign ports.	Entered ...	42	62,042	40	41,348	26	39,926
	Cleared ...	37	57,288	34	45,469	27	41,028
Native craft trading with foreign ports.	Entered ...	......	......	1	89	11	1,824
	Cleared ...	1	143	2	225	2	187
Vessels trading with home ports.	Entered ...	951	163,376	717	204,629	734	211,362
	Cleared ...	946	164,078	734	202,086	762	213,357

Of the 29 vessels which cleared for foreign ports during the year under review, 14 were bound for the United Kingdom, 3 for Ceylon, 3 for Mauritius, 1 for the Maldives, 2 for New York, 4 for Trinidad, 1 for Barcelona, and 1 for Réunion. Those for the United Kingdom, New York and Barcelona, numbering in all 17, carried jute, while the remaining 12 carried rice. The number of vessels that cleared during the previous year with jute was 19, and with rice 17.

Foreign trade.

3. The total value of the foreign trade during the year was Rs. 88,31,389, of which only Rs. 4,29,849 were under imports. The nature of the trade will appear from the following statement, which shows a decrease, compared with the previous year, of Rs. 6,22,503 :—

	1891-92.		1892-93.		Increase.		Decrease.

Coasting trade.

4. In the coasting trade, both the exports and the imports decreased, the total decrease as compared with the previous year amounting to Rs. 13,22,583.

The details of this trade are given in the following statement:—

Exports.	1891-92.	1892-93.	Increase.	Decrease.
	Rs.	Rs.	Rs.	Rs.

Total coasting trade	1,48,52,304	1,35,29,721		13,22,583

Jute trade.

The quantity of jute shipped at Chittagong during the year under review was 47,549 tons, against 46,203 tons in the previous year.

Grain trade.

The quantity of grain, including rice, exported during the year amounted to 18,699 tons, showing a decrease of 19,676 tons, as compared with that of the previous year. The decrease is principally due to the price of rice on the local market having been very high, which restricted shipments. Of the quantity exported, 10,083 tons went to home ports, and 8,616 tons to foreign ports. The grain exported to home ports consisted chiefly of rice, paddy and pulse. The average value of the rice exported to foreign ports was Rs. 5·2 per cwt.

Tea trade.

7. The total quantity of tea exported amounted to 1,078,457lbs., being 1,83,717lbs. less than that of the previous year. The amount exported to foreign ports was 103,368lbs., showing a decrease of 94,096lbs. as compared with that of last year.

Salt trade.

8. The quantity of salt imported during the year was 1,4205 tons, showing an increase of 6,469 tons on that of the previous year. The increase is due to a larger importation on account of the smallness of the stock at the commencement of the year. The salt transported to Naraingani was less than that of the previous year, as larger supplies were brought from Calcutta, where the market was cheaper.

Oils.

9. The imports of oil from foreign ports decreased in value by Rs. 2,13,448, and those from home ports by Rs. 6,581. The total value of oil imported was Rs. 2,30,709, while the value of the exports amounted to Rs. 64,887 only. The total value of mineral oil imported was Rs. 1,33,199.

Piece-goods and other articles imported from home ports.

10. The value of piece-goods imported from home ports shows a decrease of Rs. 2,86,023. The value of sugar rose by Rs. 20,647.

Cotton, oils, &c., exported to home ports.

11. Amongst the articles exported to home ports, cotton, oils and provisions show increases of Rs. 1,23,695, Rs. 32,804, and Rs. 94,560, respectively. Salt and spices, however, show decreases of Rs. 66,714 and Rs. 59,639. The decrease in the value of salt has already been noticed. The fall in the value of spices was due to smaller shipments of chillies, consequent on the partial failure of the crop in Chittagong.

Port appliances.

12. The appliances of the port are reported to have been kept in good order during the year. The depth of water in Track No. II increased by one foot, and that in Track No. IV and Track No. V by two feet, while the depths in Track No. I and Track No. III decreased by six inches and three feet respectively. The state of the river was on the whole satisfactory.

Lights and fog-signals.

13. It is stated that the lights and fog-signals of almost all native-vessels were inspected during the year. No reason is, however, given for omitting the vessels which were not examined.

Earnings and expenditure of the steam tug *Gekko*.

14. The circumstances under which the Commissioners considered the purchase of a steam-tug for the Port necessary are fully recounted in the report. They are shortly that it was the only practicable way in which the presence of a steam-tug at the Port throughout the year could be ensured. The earnings and expenditure of the steam tug *Gekko* from the 1st July 1892 to the 30th June 1893 are given in the subjoined statement:—

Receipts.	Rs.	A.	P.	Expenditure.	Rs.	A.	P.
Earnings	9,744	2	0	Cost of coal	7,242	12	3
				Stores	756	0	0
				Establishment ...	5,214	8	5
				Miscellaneous... ...	774	3	9
				Interest on loan paid ...	9,747	7	8
				Total ...	23,735	0	1
				Deduct earnings ...	9,744	2	0
					13,990	14	1
				Deduct savings effected by the tug	8,000	0	0
				Net expenditure ...	5,990	14	1

Health of the shipping.

15. The health of the shipping was good compared with that of the previous year. Thirty-seven seamen were admitted into hospital, against 41 in the year before. Of this number 33 were discharged, 1 relieved, and 3 died of cholera. The number of deaths among seamen from cholera was 4 in all. There were no cases of scurvy or disease arising from bad or insufficient food.

Light-houses.

16. The Norman's Point Light-house was visited by the Vice-Chairman of the Commissioners several times during the year, and found to be in good order. A first order dioptric revolving light was erected at Kutubdia on the 1st of January last, and is working fairly well.

Pilotage.

17. The state of the Pilotage Fund is shown in the subjoined table:—

	Rs.	A.	P.		Rs.	A.	P.
Balance at debit on the 31st March 1892	1,526	6	7½	Disbursements during the year 1892-93	9,551	8	4
Receipts during the year 1892-93	15,040	6	6	Balance on the 31st March 1893	3,962	7	6½
Net receipts ...	13,513	15	10½	Total ...	13,513	15	10½

Nothing is stated in the report about the working of the Pilot Service during the year under review. In the absence of any report to the Government about casualties occurring to ships in charge of pilots, it is presumed that there were no accidents. But the report should have contained definite information on this point. The attention of the Commissioners will be drawn to this matter.

By order of the Lieutenant-Governor of Bengal,

C. W. ODLING,

Secretary to the Government of Bengal.

REDISTRIBUTION OF THE TONNAGE OF THE HOOGHLY PILOT SERVICE.

No. 2178Marine.

GOVERNMENT OF BENGAL—MARINE DEPARTMENT.

Dated Calcutta, the 18th September 1893.

Hooghly Pilot Service.

Resolution.—The tonnage scale under which ships are at present distributed to the various grades of pilots was laid down in Resolution No. 2174Marine of the 28th August 1891. The object of the scale was to reserve ships of large tonnage for the more experienced pilots, and also to secure, as far as possible, an average income to each pilot proportionate to his standing in the service. For the five years 1888 to 1892, these objects were substantially attained, but numerous memorials have lately been received from mate pilots showing that, during the last six months, their income has seriously fallen off. The Port Officer has recommended that the limits of tonnage for each grade now in force shall be revised. The Lieutenant-Governor having fully considered this recommendation, has decided that the following scale shall be observed till further orders:—

Branch Pilots	Above 2,800 tons.
Senior Master Pilots	From 1,601 to 2,800 tons.
Junior ditto	„ 1,601 to 2,200 „
Mate Pilots	Up to 1,600 tons.

ORDER.—Ordered that a copy of this Resolution be forwarded to the Port Officer, Calcutta, for information and guidance.

Ordered also that a copy of this Resolution be submitted to the Government of India, in the Department of Finance and Commerce, for information.

By order of the Lieutenant-Governor of Bengal,

C. W. ODLING,

Secretary to the Govt. of Bengal.

EXCAVATION OF A TANK AT NOWGONG BY THE RANEES OF DUBALHATI.

No. 129T.M., dated Darjeeling, the 16th September 1893.

From—J. A. BOURDILLON, ESQ., Offg. Secretary to the Government of Bengal, Municipal Department,

To—The Commissioner of the Rajshahi Division.

WITH reference to the correspondence ending with your memorandum No. 64 P.W., dated the 2nd September 1893, regarding the offer made by Ranees Shyama Sundari and Uma Sundari Chowdhuranis of Dubalhati, to excavate, at a cost of Rs. 2,000, a tank near the Court-house at Nowgong, for the benefit of the public, and to call it the "Elliott Tank" in commemoration of Sir Charles Elliott's visit to that place, I am directed to request that you will be so good as to convey to the Ranees the Lieutenant-Governor's acknowledgment of their liberality. This letter will be published in the *Calcutta Gazette.*

Rainfall, Weather, and State and Prospects of the Crops.

Statement showing Rainfall, Weather, and State and Prospects of the Crops in the different districts of Bengal, as reported to Government, during the week ending the 16th September, 1893.

Division	No.	District and date of return.	Rainfall at Sadar Station in inches	Character of the weather and state and prospects of the crops.
BENGAL.				
BURDWAN DIVN.	1	Burdwan Sept. 16, '93 Kalna .. Katwa .. Raniganj ..	4·75 3·85 3·80 5·39	Copious rain during the early part of the week; weather has since become hot and sultry. The rain has improved prospects considerably. Prices of common rice :— Srs. Burdwan ... ... 10 to 18 } Kalna ... ... 9 to 13 } per rupee. Katwa ... ... 12 } Raniganj . . 12 }
	2	Bankura „ 16, '93 Vishnupur .	5·83 6·71	Weather—overcast and rainy with high wind in the beginning of the week and clear in the end. Prospects good. *Aus* is being harvested with good outturn. The late rain has done much good to the upland paddy. Common rice selling at 11 seers 6 chitaks per rupee at Bankura and 12 seers at Vishnupur.
	3	Birbhum „ 16, '93 Rampur Hát ..	4·68 4·01	Weather—cylonic with heavy rain. The rain has benefited the crops on high land. Common rice sells at from 12 to 14 seers per rupee.
	4	Midnapore „ 16, '93	5·05	Weather—cyclonic. Prospects continue hopeful. Prices of common rice :— Srs. Sadar ... . 12 } Contai ... ... 12 to 14 } per rupee. Tamluk ... ... 11 } Ghatal .. . ... 10 }
	5	Hooghly „ 16, '93 Serampore . . Jahanabad . .	4·88 6·38 11·41	Weather—cool, but continues to be cloudy. The recent rain has done good to the standing *aman* but the Subdivisional Officer, Jahanabad, apprehends damage owing to incessant rain, and harvesting of *aus* is therefore at a standstill. Jute steeping continues. Sugarcane doing well. Water and fodder sufficient. Prices of common rice.— Srs. Sadar .. .. 11 } Serampore .. .. 10 to 11¼ } per rupee. Jahanabad . . .. 10¾ to 12 }
	6	Howrah „ 16, '93 Uluberia .	5·78 4·53	Weather—abnormally wet during the first portion of the week. *Aman* paddy submerged in Bagnan and Amta thanas. In other places transplanting is being carried on, and this crop has benefited by the late rain. *Bhadoi* paddy in Uluberia subdivision damaged to a certain extent. Condition of cattle good. Fodder and water-supply ample. Price of rice 10 seers per rupee.
PRESIDENCY DIVN.	7	24-Parganas „ 16, '93	6·19	Weather—seasonable. Harvesting of *aus* and jute and transplantation of *aman* nearly over. Prospects of crops fair on the whole, but poor in the thana of Bankipore. Prices of common rice — Srs. Sadar . . .. 10 to 11 } Diamond Harbour . 11 } per rupee Basirhat . . . 10 } Barasat ... ... 10 }
	8	Nadia „ 16, '93 Kushtia Meherpur .. Chuadanga Ranaghat	3·74 4·91 2·72 3·47 6·32	Weather—cloudy. Prospects of *aman* rice and other standing crops fair, except in Kushtia subdivision. Lands being prepared for winter crops. Prices stationary.
	9	Khulna „ 16, '93 Bagerhat . . Satkhira .	6·91 6·05 2·99	Weather—hot with heavy showers; stormy at the beginning of the week. Harvesting of *aus* and transplantation of paddy nearly complete.
	10	Jessore „ 16, '93 Jhenida Magura . Narail Bangaon	6·50 4·44 3·11 6·79 3·83	Weather—cloudy, rainy and windy. Harvesting of *aus* nearly completed. Steeping and extracting of jute still going on. The rainfall of the week has done some good to the standing *aman* crop. Fodder and water for cattle sufficient. Prices have slightly risen.
	11	Murshidabad „ 16, '93	1·85	Weather—seasonable. Harvesting of *bhadoi* pulses going on. Present state of winter rice appears good. Jute and mulberry are still being cut in some places. Fodder sufficient for cattle. Common rice sells at 11½ seers per rupee.

	No.	District and date of return.		Rainfall at Sadar Station in inches.	Character of the weather and state and prospects of the crops.
BENGAL—*concld.*					
CHITTAGONG DIVN.	12	Chittagong	...	...	Report not received.
	13	Noakhali	" 16, '93	3·82	Weather—seasonable. Average outturn of *aus* crop is reported to be seven annas. Transplantation of *aman* still continues. State and prospects of crops fair. Fodder still insufficient. Cattle-disease reported from four thanas. Water available. Price of common rice stationary.
	14	Tippera	" 16, '93	3·33	Weather—cloudy and rainy. Prospect of *aman* crop has not yet much improved, though with the gradual subsidence of water it may be better hereafter. Common rice selling at 8 seers per rupee.
	15	Chittagong Hill Tracts.	" 15, '93	4·83	Weather—sultry and cloudy with light showers. Harvesting of *aus* paddy almost over. Very small quantity of vegetables in the bazar. No cattle-disease reported. Common rice selling at 8 seers per rupee.
DACCA DIVN.	16	Dacca	" 16, '93	2·41	Weather—hot and cloudy with occasional rain. *Rowa* and *shail* paddy being sown. Harvesting of jute going on and that of *aus* nearly finished. Prospects of *aman* fair. Water subsiding. Common rice selling from 7 to 9 seers per rupee. Fodder not sufficiently available. No cattle-disease.
	17	Faridpur Goalundo Madaripur	" 16, '93	1·77 2·19 2·86	Weather—seasonable. Condition of crops unchanged. Water subsiding again. Common rice sells at 8½ to 9 seers per rupee, but imports seem to be ample. Cattle in want of fodder in some places. Cattle-disease in Palong thana.
	18	Backergunge Pirojpur Patuakhali Bhola	" 16, '93	2·23 6·99 3·30 2·16	Weather—cyclonic during the first part of the week and fair in the latter part. State and prospects of *aman* crops fair except in Gaurnadi and Sarupkati, where it has been damaged by flood. Price of common rice varies from 8 to 9 seers per rupee. Fodder and water sufficient.
	19	Mymensingh	" 16, '93	0·61	Weather—hot; high wind from east during the first part of the week; latter part rainy and cloudy. Flood is subsiding. Transplantation of *aman* going on rapidly. Prospects of standing crops fair. Jute is still being cut. Common rice selling at 8 seers per rupee. Health of cattle good. Fodder available.
RAJSHAHI DIVN.	20	Dinajpur Thakurgaon	" 16, '93 ...	4·83 0·88	Weather—seasonable. Heavy rain on night of 15th. Prospects favourable. Transplantation of paddy approaching completion. Washing of jute continues. Price of rice unchanged. Fodder and drinking water ample.
	21	Rajshahi Nator Naugaon	" 16, '93	3·19 3·85 1·43	Weather—showery and seasonable. Condition of standing crops everywhere good; in the Barind it is excellent. Outturn of *aus* will scarcely be in excess of 8 annas. No cattle-disease. Fodder and water-supply ample. Price of rice varies from 9 to 12 seers per rupee.
	22	Rangpur Gaibanda Kurigaon Nilphamari	" 16, '93	0·26 3·10 0·64 0·34	Weather—wet and rainy. Rain has done immense good to the standing crops. Prospects continue favourable. Jute cutting and steeping continue. Prices of rice:— Srs. Sadar ... ... 10 to 12; Kurigram ... ... 9 to 12; Gaibanda ... ... 9 to 12; Nilphamari ... ... 10 } per rupee. Condition of cattle good. Fodder and drinking water sufficient.
	23	Bogra Sherpur Naukhila	" 16, '93	0·80 1·86 1·77	Weather—unsettled. Transplantation of *aman* practically finished. Prospects good. Common rice sells at 10 seers per rupee. Fodder and water sufficient.
	24	Pabna	" 16, '93	3·06	Weather—hot and cloudy. Cutting of *aus* paddy finished. Harvesting of jute nearly finished. State of standing crops on the whole fair. Common rice sells at 8 seers per rupee at Sirajganj and 8½ seers at Pabna. Fodder is not easily available at Mathura; elsewhere sufficient.
	25	Darjeeling Siliguri	" 16, '93 ...	2·95 2·85	Weather—seasonable. *In the hills:—Bhutta, chota marua, bhadoi* and potatoes being harvested. *Bara marua* and *aghani* paddy progressing favourably. *Kalai dál* coming up. *Phaphur* being planted. *In the Terai:*—Jute steeping and harvesting of *bhadoi* continue. *Haimanti* paddy promises well. Prices of coarse rice:— Srs. Hills ... ... 9; Terai ... ... 10 } per rupee.
	26	Jalpaiguri	" 16, '93	2·86	Weather—hot and cloudy. Harvesting of *bhadoi* paddy completed. Transplanting of winter paddy almost completed. More rain wanted. Prospects favourable. Common rice sells at— Srs. Sadar ... ... 12; Alipur ... ... 9 to 10 } per rupee. Fodder and water-supply sufficient. No cattle-disease.

Division	No.	District and date of return.	Rainfall at Sadar Station in inches.	Character of the weather and state and prospects of the crops.
BIHAR.				
BHAGALPUR DIVN.	27	Monghyr Sept. 16, '93 Begusarai ... Jamui ...	0·91 2·23 3·25	Weather—cool, cloudy and stormy. *Marwa* being harvested. Lands under preparation for *rabi*. Winter rice and sugarcane in excellent condition. *Kurthi* sowing nearly finished. Cattle-disease at Bakhtiarpur and Kharakpur. Prices of common rice :— Srs. Sadar ... ... 12 to 15 per rupee. Begusarai ... ... 13½ per rupee. Jamui ... ... 12 per rupee.
	28	Bhagalpur ,, 16, '93 Banka Madhipura ... Supaul ...	2·38 5·43 0·35 0·75	Weather—cloudy and hot. Transplanting of winter rice finished. *Kurthi*, *kalai* and castor are being sown, and indigo sowing has been commenced in the Sadar subdivision. Rain has done good to winter rice and other standing crops. Common rice 13 seers 14 chitaks per rupee.
	29	Purnea ,, 16, '93 Kishanganj ... Araria ...	0·67 0·24 2·48	Weather—showery. Prospects of *aghani* very good except in Kishanganj, where rain wanted. Prices stationary.
	30	Malda ,, 16, '93	1·40	Weather—cloudy with occasional light showers. Winter rice thriving. Sowing of *kalai* pulse continues. Lands are being prepared for *rabi* crops. Common rice selling at from 11 to 15 seers per rupee. No want of fodder or drinking water.
	31	Sonthal Parganas ,, 16, '93 Deoghur .. Godda ... Jamtara . Pakur .. Rajmahal ...	3·05 5·51 1·59 5·07 5·89 1·82	Weather—cloudy and rainy. Prospects of all crops good. More rain wanted in parts of Rajmahal. Water and fodder plentiful.
PATNA DIVISION.	32	Patna .. 16, '93 Barh ... Bihar .. Dinapore ...	0·13 2·90 2·05 0·91	Weather—not very hot with occasional showers. Prospects of the rice crop are generally excellent. More rain needed along the north of the district. Prices of common rice :— Srs. Sadar ... ... 15 per rupee. Barh .. .. 12¾ per rupee. Bihar ... . 15 per rupee. Dinapore ... ... 13 per rupee.
	33	Gaya .. 16, '93 Nawada .. Jahanabad ... Aurangabad ...	2·50 2·56 4·67 3·75	Weather—stormy early in the week; warm and damp since. *Bhadoi* harvest and transplantation of paddy over. Outturn of former very poor. Prospects of paddy very good, being much improved by late rain. Prices slightly lower. Fodder and water-supply ample.
	34	Shahabad .. 16, '93 Buxar ... Bhabhua ... Sasaram ...	0·32 1·72 1·95 3·37	Weather—unsettled, cloudy with frequent showers. The rainfall in the south of the district has been excessive, and some damage has been done to the young *kharif* paddy. Elsewhere the weather continues most favourable. *Bhadoi* harvest is in full swing, and generally the crops will be little, if at all, below the average.
	35	Darbhanga .. 16, '93 Madhubani ... Samastipur ...	0·10 1·61 2·40	Weather—hot and sometimes cloudy. Harvesting of *bhadoi* not affected by floods is going on. Retransplanting of rice is being vigorously pushed on where possible, and the plants are doing well. Rain is, however, much wanted, especially in the Madhubani subdivision. Fodder for cattle sufficient. Price of common rice is 14¼ seers per rupee. Prices show a slight tendency to fall.
	36	Muzaffarpur ,, 16, '93 Hajipur .. Sitamarhi ...	0·68 0·67 0·39	Weather—cloudy. Retransplanting of paddy going on in Sitamarhi. Harvesting of *bhadoi* crops in progress; outturn poor. Rain wanted for *aghani*. No cattle-disease. Fodder sufficient.

	No.	District and date of return.	Rainfall at Sadar Station in inches.	Character of the weather and state and prospects of the crops.
BIHAR—*concld.*				
PATNA DIVISION—*concld.*	37	Saran Sept. 16, '93	0·14	Weather—bright at first; stormy and cloudy on two days. Bright again. Cloudy to-day (16th). East wind prevailing. Harvesting of *bhadoi* crops coming to a close. Yield of *makai* likely to be 12 annas in Sadar and Siwan. Paddy in many places wants rain. Where it has been possible to carry water from flooded rivers, prospects excellent. At Gopalganj weather favourable for crops. Fodder sufficient, as also water, except for irrigation. in some places. Prices of common rice :— Srs. c. Chapra ... ... 14 8 } per rupee. Siwan ... ... 13 10 } Gopalganj ... ... 16 0 }
		Siwan * ...	1·01	
		Gopalganj* ...	1·32	
	38	Champaran „ 16, '93	0·03	Weather—cooler. *Saro* paddy and *kodo* are being reaped. *Aghani* paddy in good condition. Prices stationary. Fodder and water sufficient.
ORISSA.				
ORISSA DIVN.	39	Cuttack „ 16, '93	4·30	Weather—cloudy with occasional showers. *Beali* is being reaped and gathered. Transplantation of *sarad* in progress Fodder-supply sufficient. Price of common rice unchanged except in Kendrapara, where it sells at 13 seers 10 chitaks to 21 seers per rupee.
	40	Puri „ 14, '93	11·20	Weather—rainy. Rainfall quite sufficient for the time being. *Biali* being reaped. *Sarad* being weeded. Miscellaneous crops doing well. General prospects good. Common rice sells at from 12 seers 8 chitaks to 14 seers 7 chitaks per rupee in the Sadar subdivision.
	41	Balasore „ 16, '93	6·72	Weather—cloudy and showery. Transplantation almost finished. Good rain throughout the week. A report of some local damage by insects, not serious. A break in the rains would now be beneficial. 12 annas crop expected, and rain is not required till end of this month. Prices of common rice :— Srs. Balasore ... ... { New 18 } per rupee. { Old 16 } Bhadrak ... ... 15 }
CHOTA NAGPUR.				
South-West Frontier Agency.				
CHOTA NAGPUR DIVN.	42	Hazaribagh Sept. 14, '93	2·67	Weather—seasonable. Prospects of winter rice very good. Sugarcane promising. Pulses and oil-seeds being sown. Fodder and water abundant. Prices stationary.
		Giridi ...	7·98	
	43	Lohardaga „ 16, '93	10·91	Weather—hot and cloudy. Reaping of *gora* paddy continues. Prospect of winter rice good. Common rice selling at 15 seers per rupee. Fodder and water plentiful.
	44	Palamau ...	...	Report not received.
	45	Singhbhum „ 16, '93	4·95	Weather—seasonable. *Bhadoi* crops still being reaped ; a 12 to 16-anna outturn expected. Winter rice doing exceedingly well. Price of common rice ranges from 10 to 12 seers per rupee. No cattle-disease reported.
	46	Manbhum „ 16, '93	5·35	Weather—showery. Sunshine from yesterday (15th) which is much wanted. In Gobindpur subdivision and also in parts of Sadar subdivision, prospects of crops are not bright on account of heavy rain. Prices stationary.
		Gobindpur ...	6·68

* Mean of 6 days. | † Mean of 5 days.

Explanation.—Summary.—The normal means of air pressure and temperature are the arithmetical average or means of the reading during the same period
The *humidity* of the atmosphere is expressed at percentage, saturated air being presented by 100. A clear sky is denoted by 0 and an overcast sky by 01
rainfall the normal mean are the numerical means or average of the rainfall in that district determined from the returns sent in by the subdivisional station
district, *i.e.* from total rainfall at the subdivisional stations in the district sending in returns divided by the number of stations. A rainy day is one of

for the week ending Saturday, the 16th of September 1893.

Variation from normal mean.	Mean 8 A.M. temperature.	Average humidity at 8 A.M.	Average cloud amount at 8 A.M.	Rainfall of week at observing station	DISTRICT OBSERVATIONS. Of week: Mean for district	Of week: Normal mean	Of week: Average number of rainy days.	Of week: Normal number of rainy days.	Rainfall since 1st of month: Mean for district.	Since 1st of month: Normal mean.	Since 1st of month: Variation.	Since 16th May 1893: Mean for district.	Since 16th May 1893: Normal mean.	Since 16th May 1893: Variation.	District.

Explanation.—... indicates that no rain has fallen. If the return for any day has not been received, he corresponding space is left blank. If any of the returns are wanting, the corresponding spaces in the total rainfall columns are left blank. With reference to the column of rainy days, the definition of a rainy day is when at least 0·1 inches of rain has fallen.

CALCUTTA, *the* 19*th September* 1893.

SUMMARY OF THE METEOROLOGICAL AND RAINFALL OBSERVATIONS TAKEN IN BENGAL, AND OF THE METEOROLOGICAL OBSERVATIONS TAKEN IN ASSAM, FOR THE WEEK ENDING 8 A.M., SATURDAY, THE 16TH OF SEPTEMBER 1893.

At the end of the previous week, the cyclonic storm which had been forming in the Bay was moving in a north-westerly direction into the north-west angle. On the first day of the present week it underwent practically no change, as pressure remained steady at all the inland stations, and fell less than ·04 inch in Orissa. There was then a very wide-spread depression, extending over the whole of the Bay and the province of Bengal, the area of lowest pressure being in the north of the Bay between Arakan and Orissa. Within this area defect was more than ·2 inch, and at all the Bengal stations it was more than ·1 inch. The depression moved slowly to the north-west, and the centre crossed the coast between Saugor Island and Balasore about 8 A.M. on the following day, that is, the 11th. Large changes of pressure occurred near the centre, and defect increased to nearly ·4 inch at Saugor Island and Balasore, but, except in the south-western districts, readings were higher, and gradients much steeper to the east and north of the centre. With this increase of gradients squally weather became general in Lower Bengal, but more specially in the south-western districts, where heavy rain was falling.

The rise of pressure which had set in from the east continued to advance slowly, and the depression took a similar but more westerly course to that of the one which occurred exactly a week before. One important difference resulted from the slow advance of the wave of rising pressure. The centre of the depression, instead of moving 500 miles in the 24 hours after it crossed the coast, was still in the west of Chota Nagpur, and the steep gradients, with rough rainy weather, continued in the south-western districts. Pressure was then rising very rapidly in the north-west angle of the Bay, and more slowly over the whole province except in Chota Nagpur and part of South Bihar. On the 13th the rapid rise of pressure continued, but gradients were still moderately steep over the western districts, and general rain was falling, though in smaller quantities, in all districts except Assam, North Bengal, and North Bihar. Very heavy local falls occurred at some of the western stations, especially Vizagapatam, Puri, and Ranchi, where six or more inches were recorded.

As pressure continued to rise, the distribution became more uniform, weather moderated, and rainfall became scattered, and then entirely ceased in Lower Bengal and Orissa. Thus on the 14th only scattered showers fell in East Bengal, and part of South-West Bengal; on the 15th a large number of stations reported no rain, and on the 16th it had practically ceased. But during these days a ridge of relatively high pressure formed over Bengal, and the north of the Bay, running almost north and south; and when pressure began to fall, as it did, slowly on the 15th and 16th, this led to rainfall in the more northern districts which had hitherto during the existence of the disturbance been practically rainless. General moderately heavy rain fell in North Bengal and the adjacent part of Assam on the 16th, and this was practically the only rain reported on that day.

Pressure.—Readings were low in the early part of the week, while the depression crossed the south-western districts, and large changes occurred on the 11th and following days till the 14th. On the 11th there was a rapid fall in the north-west angle of the Bay near the centre of the depression, but the wave of rising pressure, which was advancing from the east, had on the 12th spread over the greater part of the province, causing almost normal readings in all districts except Chota Nagpur and Orissa. The rapid rise continued on the 13th and 14th chiefly in the western districts, and the resulting distribution was above the normal by amounts varying from ·1 inch to nearly ·2 inch. During the last two days of the week readings were very uniform, the difference between the lowest in the west of Bihar and the greatest in the south-east of the Bay being only a tenth of an inch. The mean difference from the normal for the week varies from defect of ·02 inch in Orissa and Chota Nagpur to excess of ·06 inch in North Bengal.

Temperature.—At the beginning of the week mean temperature differed very little from, but was generally above, the normal. As the disturbance advanced to the north-west and rainy weather became general, temperature fell rapidly at first in the south-western districts and afterwards over the whole province. Defect was more than 6° in south-west Bengal and Orissa on the 12th, and more than 5° in the central districts on the 13th. On the 14th and 15th comparatively cool weather continued, but temperature was increasing, though it was not till the 16th that means were again practically normal. The means for the larger divisions are below the normal except in Assam, by about half a degree in East and North Bengal and North Bihar, 1° in south Bihar, 2° in Chota Nagpur and 2·5° in Orissa and South-West Bengal.

Rainfall.—General heavy rain fell in the early part of the week in the south-western districts. In East Bengal the rainfall was general during the greater part of the week, but the falls were usually light, and on an average the normal amount has been reported. In Bihar and North Bengal falls were never heavy, and generally very scattered. There is therefore a large defect, especially in the more northern districts. In South Bihar average defect is ·57 inch, while in North Bengal the average fall is only 50 per cent. and in North Bihar less than 20 per cent. of the normal. In Orissa, on the other hand, mean excess is 2·57, in South-West Bengal 3·33, and in Chota Nagpur 3·46 inches.

The following places recorded falls of more than 10 inches:—Puri, Tamluk, Ghatal Garhbeta, Saugor Island, Moheshrekha, Jahanabad, Indas, Kotalpur and Ranchi, and, several other stations in the south-western districts reported more than 8 inches. The only falls of less than 5 inches occurred in Nadia, Jessore, Birbhum, and Murshidabad.

The following table gives the summary of the temperature and rainfall data of each of the seven meteorological divisions of the province for the week ending Saturday, the 16th of September 1893:—

Meteorological Divisions.	Temperature. Highest observed during week.	Lowest observed during week.	Averages for week. Of highest of each day.	Of lowest of each day.	Of mean for each day.	Average mean of week above or below normal mean of week.	Rainfall. Of week. Average.	Normal average.	Variation.	Rainy days. Average number in week.	Normal average number in week.	Variation.	Since 1st of month. Average.	Normal average.	Since 16th May 1893. Average.	Normal average.

	Inches.
The total fall of rain from 10th to 16th September 1893	6·19
The average fall of the corresponding period for 24 years, Surveyor-General's Office	2·13
The total fall from 1st January to 16th September 1893	75·96
The average fall of the corresponding period for 24 years, Surveyor-General's Office	54·37

The mean pressure, temperature, &c., are deduced from the traces of the Barograph and Thermograph and from observations made at 6h, 10h, 16h, and 22h.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed open at the sides and are suspended four feet above the ground.

The barometer readings are corrected approximately to those of the standard, Newman's No. 86, formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed in the Meteorological Office, and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground.

o, overcast; g, gloomy; d, drizzling rain; p, passing temporary showers; t, thunder; <, lightning; [dew], dew.

* Includes 2,631 tons and 6,957 tons of coal during 1893 and 1892, respectively, carried for Revenue, for which no "Up" and "Down" register maintained.

† Railway plant and rolling-stock, 9,977 tons and 5,334 tons for the years 1893 and 1892, respectively, for which no "Up" and "Down" register maintained.

Statement of principal commodities carried over the Eastern Bengal State Railway during the month of June 1893.

INCREASES.

	Tons.
Coal	8,181
Cause of increase not fully explained.	
Jute, unscrewed	2,280
Season rather later than in 1892.	
Kerosine oil	1,219
Partly due to prohibition of carriage by boat within certain limits of the port of Calcutta, partly to extension of bulk oil traffic.	
Oil-seeds	1,600
Alamdanga, Sonaili, Kasba, and Forbesganj show small increases under this head	
Railway plant and rolling-stock.	4,643
Chiefly from Calcutta and Chitpur for the Bengal Duars and Kuch Bihar State Railways.	

DECREASES.

	Tons.
Rice	5,082
Goalundo and Northern Section Stations generally show decreases under this head. The probability of scarcity in the eastern districts arrested exports to Calcutta; up-country dealers preferring to hold.	
Salt	896
Mostly in the upward despatches from Chitpur, due to less demand at up stations.	

CALCUTTA, *the 12th September 1893.*

JAMES SHAW,
for Examiner of Accounts.

RESOLUTION ON THE REPORT ON THE ADMINISTRATION OF THE CUSTOMS DEPARTMENT FOR THE YEAR 1892-93.

FINANCIAL DEPARTMENT—SEPARATE REVENUE.

Darjeeling, the 22nd September 1893.

RESOLUTION—No. 171T—F.

READ—

The Report on the Administration of the Customs Department for the year 1892-93.

The Customs Reports submitted to Government in previous years, while embodying interesting and valuable information regarding the seaborne trade of the province, were considered by Sir Charles Elliott not to have treated with sufficient fulness of the collection of customs duty and the growth of dutiable trade. The Board were accordingly enjoined by Government in January last to give greater prominence to these subjects in future reports: it was directed that a special Chapter should be devoted to dutiable goods showing, port by port, the imports and exports, their fluctuations in respect of quantity, value, and duty, and their destination, *i.e.*, whence they came and whither they were transported: at the same time it was pointed out that neither the form of the Report nor the system of compiling the figures therein given was to be altered in any way that might conflict with the standing orders of the Government of India on the subject. The present report has been prepared in accordance with these instructions.

2. *Customs duty.*—The following table shows the gross and net customs duty, inclusive of that on imported salt, collected in Bengal during the past five years, as well as in the year before and after the remission of the general import duties which came into force on the 10th March 1882:—

	1880-81.	1881-82.	1882-83.	1888-89.	1889-90.	1890-91.	1891-92.	1892-93.
1	2	3	4	5	6	7	8	9
	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.
Import duty (excluding duty on salt.)	72,72,428	61,72,901	14,87,018	21,61,242	24,45,683	26,75,754	28,08,900	31,06,025
Ditto on salt	2,27,44,388	2,37,15,928	1,74,72,613	2,27,28,687	2,25,83,827	2,30,66,656	2,39,34,018	2,40,16,051
Export duty	17,99,354	20,46,899	21,28,492	17,09,406	16,08,445	20,89,014	22,43,551	18,97,330
Total gross duty ..	3,18,16,170	3,19,35,818	2,10,88,123	2,65,99,335	2,66,37,955	2,78,31,424	2,89,86,469	2,90,20,006
Refunds and drawbacks—								
Imports	3,37,096	3,04,426	3,20,636	2,81,544	3,12,697	3,13,188	3,32,736	2,63,270
Exports	71,979	1,05,549	1,16,840	84,930	31,606	70,223	1,02,850	72,886
Total ...	4,09,075	4,09,975	4,37,476	3,66,474	3,44,303	3,83,411	4,35,586	3,36,156
Total net duty ..	3,14,07,095	3,15,25,843	2,06,50,647	2,62,32,861	2,62,93,652	2,74,48,013	2,85,50,883	2,86,83,850

The increase in the net revenue of the province amounts to Rs. 1,32,967, or ·4 per cent. as compared with the previous year, and the total net duty realised is now only 8·6 per cent. less than what it was in 1880-81 previous to the reduction of the salt duty and the remission of all import duties, except those on arms and ammunition, liquors and opium. There was an increase of Rs. 3,20,387 in the import duty on general merchandise, the result of larger realisations from kerosine-oil. On the other hand, receipts from export duty, which is levied on rice alone, show a falling off of Rs. 3,16,257 owing to a decline in the trade attributed to the heavy shipments of rice in the previous year, and to an increase in the price of rice during the year under review.

3. At pages 6 and 7 of the Report an elaborate table is given, showing in detail the duty realised on the imports and exports of the different dutiable goods at the several ports in Bengal during the last five years. The following statement gives in abstract the results shown in that table for the years 1891-92 and 1892-93:—

Import duty.

		Calcutta.	Chittagong.	Orissa Ports	Narainganj.	Total.

4. As was to be expected, the increase in dutiable imports in Calcutta occurred chiefly under salt and mineral oil. The receipts from salt are slowly expanding, but those from oil have grown rapidly. Liquors also yielded a slight increase, while the receipts from arms and opium fell off. The course

of the trade in kerosine-oil used for burning purposes during the last few years has been very remarkable, as will be seen from the following statement:—

COUNTRY OF EXPORT.	1888-89.	1889-90.	1890-91.	1891-92.	1892-93.
1	2	3	4	5	6
	Gals.	Gals.	Gals.	Gals.	Gals.
United Kingdom ...	1,423	2,029	4,904	3,399	110,043
United States ...	15,228,333	24,439,980	26,076,892	22,174,615	20,014,134
Russia—Batoum ...	3,371,406	1,603,899	2,157,592	10,561,006	20,103,818
Other countries ...	......	225	287	175	173
Total ...	18,601,162	26,046,133	28,239,675	32,739,195	40,228,168

The whole trade has steadily increased during the last five years. The year under report is remarkable for the enormous increase in imports from Batoum, which place for the first time shows a larger total export than the United States. The increase in shipments from the United Kingdom is also noteworthy. For the first time oil has been imported in bulk, during the year a tank steamer brought from Batoum 1,326,852 gallons, by far the largest quantity ever imported in one vessel. This innovation, by which it is said the price of oil can be reduced by 10 or 12 annas per case, bids fair to revolutionise the trade.

5. The imports of ale, beer and porter partially recovered the heavy fall of the previous year, but are still much below those of 1888-89 and 1889-90. Of spirits, whisky alone showed an increase, the total imports amounting to 159,059 gallons, the highest total yet reached. Brandy, gin and other sorts of spirits all showed a falling off. The total importations of spirit showed a decline of 10,241 gallons, but the actual consumption was probably not less than last year, for the stocks at the close of the year were reduced by 15,141 gallons. Of wines and liqueurs there was a falling off of 6,785 gallons, or 5½ per cent. in the importations, the decline being most noticeable in champagne: claret and port alone showed a slight improvement. These results the Board ascribe, no doubt correctly, to the general shrinkage in incomes caused by the decreased value of the rupee. There was an increase in the amount of Australian wine imported, but the amount is still comparatively small, and these wines do not yet appear to have secured a firm position. The falling off in exports occurred under rice for the reasons already explained.

6. The principal dutiable articles of the trade with Chittagong are kerosine-oil, salt and rice, the receipts from all of which declined in the past year. Balasore and Puri did not import any dutiable goods from foreign ports, while Cuttack imported a larger quantity of kerosine-oil, increased collections amounting to Rs. 7,813 being obtained from this article. The only dutiable article imported into Narainganj is salt, which is conveyed there from Chittagong under bond: no foreign trade is carried on with Narainganj.

7. *Value of trade.*—It has been commonly stated that the year 1892 was one of the worst years for trade ever known in Calcutta, and the figures supplied in the Board's Report show that as a fact trade was bad both in Calcutta and in the other ports of the province. The following statement compares the value of the import and export trade in the last two years under the three main heads of goods, treasure, and Government transactions, as well as the total trade of the province, both import and export:—

	Goods.		Treasure.		Government transactions.		Total.		Increase.	Decrease.
	1891-92.	1892-93.	1891-92.	1892-93.	1891-92.	1892-93.	1891-92.	1892-93.		
	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.
I. Import trade	30,82,91,522	28,07,22,042	3,49,56,332	2,63,12,924	98,36,218	1,52,55,834	35,30,84,072	32,22,91,400	... ...	3,07,92,672
II. Export ...	48,42,16,036	48,89,41,974	2,22,76,529	1,41,93,344	37,56,280	38,56,693	51,02,48,845	50,79,92,011	....	22,56,834
III. Total trade of Province ...	79,25,07,558	77,03,64,616	5,72,32,861	4,05,06,268	1,35,92,498	1,91,12,527	86,33,32,017	83,02,83,411	......	3,30,49,506

Excluding Government transactions, the total value of imports shows a decrease of Rs 3,62,12,288, and that of exports a decrease of Rs. 23,57,247. The causes of these fluctuations will be reviewed further on in this Resolution. Taking imports and exports together, the total value of the trade of the year, exclusive of Government transactions, decreased by Rs. 3,85,69,535 as compared with the figures of 1891-92.

8. *Foreign Trade of Calcutta.*—The bulk of the foreign trade of Calcutta is carried on with the United Kingdom, but the proportion which this trade bears to the whole foreign trade of the port, and which in 1890-91 was the lowest for ten years, has again slightly declined, and now stands at 57·18 per cent. The volume of trade with China, which continues to stand second in the list, also shows a decline from 10·02 to 8·83 per cent. on the whole trade of the port, the result of smaller receipts of treasure from Hong-Kong and the Treaty ports, and the more restricted shipment of opium to Hong-Kong. The United States come third, and the trade with that country appears to have revived from the depression noticed in 1891-92. Germany has again advanced, the percentage having risen from 4·50 to 4·98. The trade of Calcutta with the Straits Settlements is declining, while that with Ceylon is steadily on the increase.

9. The proportion which the foreign trade of Calcutta carried through the Suez Canal bears to the total trade fell from 68·6 per cent. in 1891-92 to 68·1 per cent. in the year under review. The decrease was entirely confined to imports, the exports showing a rise of about 41 lakhs in value.

10. The following table shows the fluctuations in shipping during the past two years:—

Arrivals and Departures.

		Number.	Tonnage.
	1891-92.		
Steam vessels	... ...	681	1,335,205
Sailing	... ...	402	580,693
Native craft	... ...	42	6,898
	Total	1,125	1,922,796
	1892-93.		
Steam vessels	...	641	1,298,244
Sailing	...	421	651,582
Native craft	...	23	4,444
	Total	1,085	1,954,270

Account is here taken of those steamers only which arrive and leave without touching at any other Indian port. Although the total tonnage has advanced by 31,474 tons, the total number of steam-vessels has fallen off by 40. In sailing vessels, the steady decline, both in number and tonnage, observed in previous years has, for the present, been checked. The trade with the United Kingdom shows a net decrease of 10 vessels, with Germany of 9, and with the United States of 1, while China shows an increase of 7 vessels.

11. *Calcutta Imports.*—The total value of imports, including treasure, into Calcutta from foreign countries again fell, viz., from Rs. 28,65,72,342 to Rs. 25,43,01,406 in 1892-93, the net decrease in merchandise amounting to Rs. 2,12,81,303, and in treasure to Rs. 1,09,89,633. The value of dutiable goods, however, shows an increase of Rs. 20,61,749. The following table shows the value of the principal articles of merchandise imported during each of the last two years:—

	1891-92. Rs.	1892-93. Rs.
Cotton-goods (including twist and yarn)	13,55,20,480	12,51,05,372
Metals	2,44,88,028	2,08,16,248
Mineral oil (for burning and lubricating)	1,34,49,052	1,56,41,143
Machinery	82,63,844	83,31,033
Woollen goods	63,84,025	62,13,269
Sugar	47,30,967	27,27,551
Salt	49,53,116	48,55,575
Liquors	44,90,858	44,00,796
Hardware	34,44,094	31,11,383

While cotton goods continued to occupy the foremost place in the import trade, their proportion to the total importations declined during the year by nearly 8 per cent: the falling off occurred both in piece-goods and twist and yarn. The metal trade which had materially recovered in 1891-92 from the decline in the preceding year fell off again during the year under review. This unfavourable result is attributed to the heavy fall in the importations of Australian copper, Japanese copper from Hong-Kong, and unwrought copper from the United Kingdom. The trade in mineral oils continues to expand as has already been stated. A special feature in the trade in machinery and mill-work is the large importation of machinery for the manufacture of paper. The trade in woollen goods received a check during the year owing to large stocks having been left at the close of the preceding year. Sugar continues to show a decline in importations. The decrease in the importation of salt and liquors has already been noticed in a preceding paragraph. The steady progress in the imports of hardware received a check during the year under review. Among other items it may be observed with satisfaction that in these provinces country coal is gradually displacing imported coal, the exports (211,218 tons) far exceeding the imports (12,565 tons) during the year, the latter figures being the smallest known for many years. Matches show an advance of 14½ per cent. in importations, Japanese matches which are said to be made by hand having been received in much larger quantities than in 1891-92. The importations of tea have fallen to the lowest point yet touched, Indian tea having almost altogether supplanted the China leaf in the favour of the public.

12. *Calcutta Exports.*—The total value of exports from Calcutta to foreign countries, including treasure, again rose, viz. from Rs. 38,91,36,558 in 1891-92 to Rs. 41,04,16,430 in 1892-93, this being a higher figure than any yet recorded. In dutiable goods, that is in rice, there was a decrease of Rs. 1,87,963; in free goods there was an increase of Rs. 1,78,02,607. The following statement gives the value of the principal articles of Indian produce and manufacture exported in 1891-92 and 1892-93—

	1891-92. Rs.	1892-93. Rs.
Jute, raw	6,08,27,524	7,19,71,637
Opium	6,01,47,915	5,98,50,325
Tea	5,63,31,095	6,06,74,386
Oilseeds	4,13,45,725	3 22,59.426
Rice	3,26,87,662	3,25,26,271
Indigo	2,63,60,394	2,60,04,461
Jute (gunny-bags and cloths)	2,45,38,536	3,17,58,214
Hides and skins ..	2.25,72,638	2,50,84,939
Wheat	2,11,85,172	1,52,42.488
Raw cotton	30,85,633	63,58,537

The decline in the exports of jute in the previous year has been followed by an increase in the year under review; for the crop was good and prices were low during the months of largest shipments. For the first time the trade in tea has shown a decline in the quantity exported, though the total value of the exports continues to show an increase, the average selling price having risen by one anna. The Collector of Customs draws attention to the decline in the export of tea from Calcutta to Australia and the simultaneous increase in exports from Ceylon, the figures being respectively 3,879,303 lbs. from the former and 5,042,648 lbs. from the latter, and there is little doubt that Ceylon is making every effort to obtain command of the trade. China tea shows no signs of recovery in foreign markets, but Ceylon tea continues to advance in favour. The trade in oilseeds, particularly linseed, which had advanced in the preceding year, fell off again in the past year, having gravitated towards Bombay. The exports of indigo were the lowest recorded for many years; the outturn, owing to unfavourable weather, amounting to barely half that of the previous year; prices, however, rose proportionately, so that the value of the crop exported was not below the average. The remarkably large increase in the exports of wheat in 1891-92 was arrested during the year under review owing to a short crop and the low prices ruling in the foreign markets; the bulk of the shipments was as usual consigned to the United Kingdom. A better crop and higher prices in Europe stimulated the cotton trade during the year, the

percentage of exports having risen from ·7 to 1·5: Bengal cotton, however, owing to its short staple, is not much in request in the English market.

13. *Treasure.*—The net imports of gold and silver declined by 65½ and 73⅔ lakhs, respectively.

14. *Coasting trade of Calcutta.*—After an advance in the two years preceding 1892-93, the coasting trade of Calcutta again fell off, the imports having decreased by Rs. 50,16,190, and the exports by Rs. 86,08,087: the decrease was confined to Indian produce.

15. *Chittagong.*—The total value of the trade of Chittagong shows a decline of Rs. 19,17,194 as compared with the previous year, the decrease affecting both foreign and coasting trade. The falling off under foreign trade is attributed to smaller imports of kerosine oil, and smaller exports of rice, jute, and tea, and under the head of coasting trade it is ascribed to smaller imports of piece-goods and smaller shipments of paddy, salt and spices. The amount of customs duty declined from Rs. 7,75,031 in 1891-92 to Rs. 6,79,473 in 1892-93.

16. *Orissa Ports.*—The following statement shows an abstract of the import and export trade of the Orissa ports during the last two years:—

	1891-92.	1892-93.
	Rs.	Rs.
Cuttack.		
Foreign	33,79,111	27,56,539
Coasting	8,22,161	6,58,897
Total ...	42,01,272	34,15,436
Puri.		
Foreign	3,41,728	1,68,141
Coasting	2,22,761	1,36,858
Total ...	5,64,489	3,04,999
Balasore.		
Foreign	3,72,900	3,94,245
Coasting	1,21,46,539	1,03,51,964
Total ...	1,25,19,439	1,07,46,209

In all these ports there has been a shrinkage of trade during the year under review, and the customs duty realised declined from Rs. 2,33,294 to Rs 1,76,435.

17. *Narainganj* (*Dacca*).—The total trade of Narainganj, which is carried on with the coast ports only, fell from Rs. 73,00,346 to Rs. 72,34,513 in 1892-93. The customs duty, which represents exclusively the duty levied on salt imported from Chittagong under bond, fell from Rs. 4,53,021 to Rs. 3,02,198.

18. The Lieutenant-Governor's thanks are due to the Board of Revenue for their supervision of the Customs Department during the year, and to Mr. Marriott for his efficient administration of the department, and for the full and interesting report submitted by him. The names of the officers who are favourably noticed by the Board, with the remarks recorded, will be communicated to the Appointment Department.

By order of the Lieutenant-Governor of Bengal,

J. A. BOURDILLON,

Offg. Secretary to the Govt. of Bengal.

FLOODS IN CERTAIN PARTS OF THE DACCA, CHITTAGONG, AND PATNA DIVISIONS.

REVENUE DEPARTMENT, AGRICULTURE.—No. 1140T.—R.

Darjeeling, the 22nd September 1893.

RESOLUTION.

READ—

Correspondence between this Government and the Commissioners of the Patna, Dacca, and Chittagong Divisions on the subject of floods which have prevailed in parts of those Divisions.

Early in August reports reached the Officiating Lieutenant-Governor that there had been excessive floods in certain parts of the Dacca, Patna, and Chittagong Divisions, and that some injury to the crops and possibly some distress in the affected localities might ensue. Accordingly the attention of the local officers concerned was called to these reports, and instructions were issued that prompt inquiries should be made by Collectors and Commissioners themselves in the affected areas.

2. The results of these inquiries show that there is nowhere any ground for apprehending famine; nor is there reason for thinking that there may be serious distress over any considerable area, though undoubtedly hardship has been caused in isolated localities.

The Commissioner of Patna, after a tour of inspection in his Division, reported on the 17th instant that there is no apprehension of serious distress in the flooded tracts. Considerable areas in which the crops had been destroyed are being replanted, the public health is good, the condition of cattle is also good, and no relief works are at present necessary. In Champaran there was no loss of cattle from the floods. In the other districts of North Bihar the loss was inappreciable, the cattle having been removed in time to high lands.

3. The Commissioner of Chittagong reported on the 14th instant that prospects continue to improve; there are no authenticated cases of distress; transplanting of rice gives ample labour in the fields, and unskilled labour of coolies is not procurable at less than 5 annas a day. On the 21st he reported that there was no keen distress in Tippera and Noakhali requiring relief from Government at present.

4. In the Dacca Division there is a small tract, known as the *bil* country, in the Backergunge and Faridpur districts, with a population of about 40,000 persons, in which there is likely to be some scarcity, possibly even distress.

Here, in what have been described as "fantastic floating islands," splendid crops of aus and aman rice are reaped in years when the rise of the water is slow. Special long-stemmed kinds of aus and aman rice are sown together in March and April, and grow up in favourable years with the rise of the rivers in May and June—the aman rice with stems from five to seven yards in length. But if the water rise suddenly, as happened this year, before the seed can be sown, or so soon after that the seedlings are submerged, a complete failure of crops usually results. This is to a great extent what has taken place this year. But the tract happily does not rely for food on the rice crop alone. The supply of fish is inexhaustible, and part of the population being fishermen, food is procurable by them independently of their rice crops. The remainder of the population consists mostly of Christians, Mussalmans, and Namas. These have been accustomed to move elsewhere in search of labour; but as the aus crop is light, and as earthwork does not in these districts begin before December, these people, if not assisted, will be pinched, if not subjected to still greater distress.

To test the reality of the complaints of distress made last month in this tract, test relief works were opened, but nobody would work upon them at the wages prescribed in the Famine Code, and the complaints died away. They have been again raised, and Sir Antony MacDonnell has again ordered test relief works to be started. The District Officers are carefully watching for signs of distress, and have been instructed to make agricultural loans and to take such other measures as they may on personal enquiry find to be necessary.

In making agricultural loans care is necessary lest the amounts advanced are expended on payment of rent, and not in the support of the recipients.

5. Some loss of cattle by drowning and disease is reported from the Naraingunj and Munshiganj subdivisions of Dacca, and from parts of Noakhali and Faridpur, but the disease is now abating everywhere excepting Noakhali, where the Commissioner reported on the 21st instant that it had reappeared. Want of fodder is felt in parts of Noakhali, Tippera, Dacca, and Faridpur, but the urgency of this want should diminish with every day that passes.

6. All experience points to the great improbability of anything like severe distress being caused by floods in limited areas in districts like Faridpur and Backergunge, which have hitherto been safe from famine, and are in fact among the granary districts of India. No doubt the excessive floods have caused much individual inconvenience and hardship; but the information before Government is satisfactory on the point that there is at present no such distress as need cause anxiety to the public, although in limited areas some temporary assistance may be necessary. It is only reasonable that such assistance should be afforded by the zamindars to their raiyats. But where the zamindars hold back and relief from public funds is necessary, the District Boards and local officers are in possession of the means necessary to meet any emergency that may arise.

ORDER.—Ordered that the foregoing Resolution be published for general information.

Ordered, also, that a copy of the Resolution be submitted to the Government of India for information, and copies be forwarded to the Commissioners of Patna, Chittagong, and Dacca for information and guidance.

By order of the Lieutenant-Governor of Bengal,

M. FINUCANE,

Offg. Secretary to the Govt. of Bengal.

Rainfall, Weather, and State and Prospects of the Crops.

Statement showing Rainfall, Weather, and State and Prospects of the Crops in the different districts of Bengal, as reported to Government, during the week ending the 23rd September, 1893.

Division	No.	District and date of return.	Rainfall at Sadar Station in inches.	Character of the weather and state and prospects of the crops.
BENGAL.				
BURDWAN DIVN.	1	Burdwan Sept. 23, '93 Kalna ... Katwa ... Raniganj ...	1·04 0·64 1·03 0·24	Rain throughout the week. State and prospects of crops excellent. Prices of common rice :— Srs. Burdwan ... ... 10 to 13 Kalna ... ... $9\frac{1}{4}$ to 13 Katwa ... ... $12\frac{7}{16}$ Raniganj ... ... $11\frac{13}{16}$ per rupee.
	2	Bankura „ 23, '93	1·44	Weather—overcast and rainy. Prospects continue good. *Aus* paddy being harvested with good outturn. Common rice selling at 11 seers 14 chitaks per rupee at Bankura and 12 seers at Vishnupur.
	3	Birbhum „ 23, '93 Rampur Hát ...	2·68 0·41	Weather—incessantly rainy with high wind. About 2 inches of rain fell in 36 hours. The paddy crops, both early and *aman*, are doing well. Early paddies are beginning to be in ear. Price of common rice 12 to 14 seers per rupee.
	4	Midnapore „ 23, '93	1·29	Weather—fair, and at times cloudy. Transplantation still continues. Prospects hopeful. The late heavy rain has caused some damage to the standing crops. No want of fodder. Cattle-disease in Contai and Khedgeri. Prices of common rice :— Srs. Sadar ... ... 12 Contai ... ... 12 Tamluk ... ... 11 Ghatal ... ... 11 per rupee.
	5	Hooghly „ 23, '93 Serampore ... Jahanabad ...	0·84 0·23 1·36	Weather—cloudy; hot but latter part cool; rain on almost all days of the week with sunshine at intervals. *Aus* almost harvested. Jute being steeped. State of *aman* good. Sugarcane and other crops doing well. Prices of common rice :— Srs. Sadar ... ... 11 Serampore ... ... 10 to $11\frac{1}{4}$ Jahanabad ... ... 11 to $12\frac{3}{4}$ per rupee.
	6	Howrah „ 23, '93 Ulubaria ...	1·81 0·11	Weather—seasonable. In Ulubaria the harvesting of early rice continues. In parts of that subdivision floods have prevented transplantation of *aman*; otherwise it is doing well. Price of rice $9\frac{1}{2}$ to 10 seers per rupee. Water sufficient. Fodder short in parts of the district.
PRESIDENCY DIVN.	7	24-Parganas „ 23, '93	1·43	Weather—rainy and hot for the time of the year. Harvesting of *aus* and jute and transplantation of *aman* nearly over. Prospects of crops fair on the whole, but poor in the thana of Bankipore. Prices of common rice :— Srs. c. Sadar ... ... 10 to 10 12 Barasat ... ... 9 8 Diamond Harbour ... ... 10 8 Basirhat ... ... 9 $13\frac{1}{2}$ per rupee.
	8	Nadia „ 23, '93 Kushtia ... Meherpur ... Chuadanga ... Ranaghat ...	2·24 0·45 1·07 1·66 0·62	Weather—hot and cool with occasional showers. Prospects of *aman* rice and other crops fair except in the Kushtia subdivision. Lands being prepared for winter crops. Health of cattle good. Prices stationary. Supply of fodder sufficient.
	9	Khulna „ 23, '93 Bagerhat ... Satkhira ...	2·64 0·37 Nil	Weather—hot with heavy showers. Harvesting of *aus* and transplantation of *aman* continue. Ordinary rice sells at 9 to 10 seers per rupee. Water and fodder sufficient.
	10	Jessore „ 23, '93 Jhenida ... Magura ... Narail ... Bangaon ...	0·85 0·07 1·20 0·69 1·80	Weather—seasonable at the beginning of the week, but windy and rainy at its close. Harvesting of *aus* and jute nearly finished. Prospects of *aman* fair. Rivers rising. Fodder and water for cattle sufficient. Prices stationary.
	11	Murshidabad „ 23, '93	1·88	Weather—hot with occasional showers. *Aman* plants thriving well. Cutting of jute and mulberry almost finished. State of sugarcane not so good as expected. Fodder and water sufficient for cattle. Common rice sells at $11\frac{1}{4}$ seers per rupee.

Division	No.	District and date of return.		Rainfall at Sadar Station in inches.	Character of the weather and state and prospects of the crops.
BENGAL—*concld.*					
CHITTAGONG DIVN.	12	Chittagong	Sept. 23, '93	2·68	Weather—seasonable. Transplantation of *aman* still continues. Prospects fair in Sadar: good in Cox's bazar. Prices stationary. Condition of cattle generally good. Supply of fodder sufficient.
	13	Noakhali	„ 23, '93	1·27	Weather—seasonable. State of standing crops very fair and prospects hopeful. Condition of cattle fair, but fodder insufficient. Prices stationary.
	14	Tippera	„ 23, '93	4·1	Weather—cloudy with strong wind. The gradual subsidence of water is brightening the prospect of the existing *aman* crop. At present it is doing fairly. Fodder is not yet sufficient, but death of cattle is decreasing. Price of rice same as last week.
	15	Chittagong Hill Tracts.	„ 21, '93	4·58	Weather—fair with occasional showers. Harvesting of *jum* and *aus* paddy still going on. Condition of cattle good. Price of common rice 8 seers 14 chitaks per rupee.
DACCA DIVN.	16	Dacca	„ 23, '93	1·76	Weather—hot with occasional rain. Harvesting of jute still going on. *Shail* paddy being sown. Prospects of *aman* paddy fair, but it is being damaged by a kind of insect in some places in the Munshiganj subdivision. Water subsiding. Common rice selling from 7 to 9 seers per rupee. Fodder available with difficulty. No cattle-disease.
	17	Faridpur	„ 23, '93	1·91	Weather—unsettled; at present wet and boisterous. Condition of crops unchanged. Rivers falling. Common rice sells at 8½ to 9 seers per rupee. Fodder-supply inadequate in some places. Some cattle-disease in Palong thana.
		Goalundo	...	0·27	
		Madaripur	...	0·32	
	18	Backergunge	„ 23, '93	1·97	Weather—fair in the first part of the week: cyclonic in the latter part. State and prospects of crops fair except in Gaurnadi, Mendiganj, and Sarupkati, where they have been damaged by flood. Common rice selling at 8 to 9 seers per rupee. Fodder and water sufficient.
		Pirojpur	...	3·93	
		Patuakhali	...	1·10	
	19	Mymensingh	„ 23, '93	2·25	Weather—seasonable. State and prospects of crops fair. The river has gone down to its usual level in this season of the year. Common rice selling at 8 to 9 seers per rupee. Condition of cattle good except in some places in the Netrakona subdivision. Fodder sufficient except in Kishorganj and Netrakona.
RAJSHAHI DIVN.	20	Dinajpur	„ 23, '93	1·34	Weather—cloudy and rainy. Prospects of standing crops continue to be good. Condition of cattle good. Fodder and drinking water plentiful. Price of *haimanti* rice at Sadar unchanged; that of *bhadoi* rice 12 to 12½ seers per rupee.
	21	Rajshahi	„ 23, '93	Not reported.	Weather—seasonable: wet interspersed with sunshine. Prospects good. A long break in the wet weather we are having now, is desirable. Fodder and water-supply ample. No cattle-disease. Price of rice varies from 9 to 12 seers per rupee.
	22	Rangpur	„ 23, '93	2·35	Weather—showery. The rain will be beneficial to the newly-planted rice. Transplantation of *aman* almost finished. Jute harvest goes on. Price of rice slightly higher.
		Gaibanda	...	2·00	
		Kurigaon	...	1·66	
		Nilphamari	...	1·18	
	23	Bogra	„ 23, '93	0·88	Weather—unsettled and stormy. Transplantation of *aman*. is finished. Prospects good. Common rice sells at 10 seers per rupee. Fodder and water sufficient.
		Sherpur	...	0·61	
		Naukhila	...	1·02	
	24	Pabna	„ 23, '93	1·74	Weather—rainy and cyclonic during the last two days. Harvesting of jute still continues. Prospects of standing crops fair. Common rice sells at Sirajganj at Rs. 4-14 to Rs. 5 per maund and 9½ seers per rupee at Pabna. Fodder and water-supply sufficient.
	25	Darjeeling	„ 23, '93	4·48	Weather—seasonable. *In the hills:—Bhutta, chota marua* and *bhadoi* rice being harvested. *Aghani* rice, *bara marua* and *kalai* progressing favourably. *Phaphur* being planted. *In the Terai:*—Harvesting of jute nearly completed. *Bhadoi* being harvested. *Haimanti* rice doing well. Prices of coarse rice:— Srs. Hills ... ... 9 } per rupee. Terai ... ... 10 } per rupee.
		Siliguri	...	4·89	
	26	Jalpaiguri	„ 23, '93	1·69	Weather—seasonable. Transplantation of *haimanti* paddy is completed. The recent rain has done much good to this crop. Washing of jute continues. Price of common rice stationary. Fodder and water-supply sufficient.

No.	District and date of return.	Rainfall at Sadar Station in inches.	Character of the weather and state and prospects of the crops.
BIHAR.			
BHAGALPUR DIVN.			
27	Monghyr Sept. 23, '93 Begusarai ... Jamui ...	7·89 2·08 0·88	Weather—hot and cloudy with occasional showers. *Marua* harvesting continues. Prospects of standing crops hopeful save those on flooded parts. Winter rice, *kurthi* and sugarcane thriving well. Good outturn is expected of *sathi* paddy. Cattle-disease at Nawadih and Sheikpura. Sufficient fodder and water. Prices of common rice :— Srs. Sadar ... ... 10½ to 15 } per rupee. Begusarai ... ... 13 } Jamui ... ... 12 }
28	Bhagalpur „ 23, '93 Madhipura ... Supaul ...	1·75 6·18 3·91	Sowings of *kurthi*, *kalai*, castor and indigo are being made. There has been a good *bhadoi* crop, and the prospects of winter rice continue favourable. Price of common rice 13 seers 14 chitaks per rupee.
29	Purnea „ 23, '93 Kishanganj ... Araria ...	1·10 5·40 4·38	Weather—cloudy with occasional showers; cool. *Bhadoi* harvest almost over. Prospects of *aghani* excellent. Fodder and water plentiful. Prices easier.
30	Malda „ 23, '93	1·56	Weather—cloudy and rainy with high east wind. Prospect of winter rice continues favourable. Sowing of *kalai* has been retarded on account of rising of the river. Steeping and extracting of jute not yet finished. Price of common rice varies from 11 to 17 seers per rupee. Fodder and water ample.
31	Sonthal Parganas „ 23, '93 Deoghur ... Godda ... Jamtara ... Pakur ... Rajmahal ...	1·84 0·57 2·29 0·36 1·56 0·27	Weather—sunshine and rain alternately. Standing crops doing well and prospects continue favourable. Fodder and water-supply ample. Cattle-disease reported from the Godda subdivision. Price of rice steady.
PATNA DIVISION.			
32	Patna „ 23, '93 Bihar ... Dinapore ...	0·80 1·85 2·94	Weather—cool for the season and cloudy. Prospects of winter rice excellent, the rain being sufficient. The high *bhadoi* lands are being rapidly prepared for the early spring crops. Potatoes being sown. Prices of common rice :— Srs. Sadar ... ... 15 } per rupee. Bihar ... ... 15 } Dinapore ... ... 13 }
33	Gaya „ 23, '93 Aurangabad ... Jahanabad ... Nawada ...	0·88 1·94 1·02 0·42	Weather—unsettled; getting cooler. Prospects of paddy crop very favourable. Weeding going on. New maize and millet coming into market. Price of rice 12 seers per rupee at Gaya and Jahanabad, 14 seers at Aurangabad, and 15 seers at Nawada. Supply of fodder and water ample.
34	Shahabad „ 23, '93 Buxar ... Bhabhua ... Sasaram ...	1·38 3·23 4·74 0·48	Weather—unsettled with cloudy skies and frequent showers. The weather is all that could be desired from an agricultural point of view. The young paddy is thriving. Sugarcane has improved. The coarse crops which form the *bhadoi* harvest are being got in. In the south, where they are important, produce is very poor.
35	Darbhanga „ 23, '93 Madhubani ... Samastipur ...	2·51 1·22 3·75	Weather—cloudy with high east wind. Harvesting of *bhadoi* nearly completed. Retransplanting of rice still going on. The rainfall of the week has done immense good to the crop. More rain is, however, wanted in the Madhubani subdivision. Fodder for cattle sufficient. Prices have slightly fallen.
36	Muzaffarpur „ 23, '93 Hajipur ... Sitamarhi ...	0·65 1·39 2·08	Weather—hot; cloudy. Retransplantation of paddy still going on in the Sitamarhi subdivision. Harvesting of *bhadoi* crops still going on. More rain wanted for *aghani*. No cattle-disease except a few cases of *dakha* and small-pox in Majorganj, Mahnar, and Mahna. Fodder and water sufficient.

Division	No.	District and date of return.	Rainfall at Sadar Station in inches.	Character of the weather and state and prospects of the crops.
BIHAR—*concld.*				
PATNA DIVISION—*concld.*	37	Saran, Sept. 23, '93 Siwan ... Gopalganj ...	3·15 1·35 1·61	Weather—changeable in part of the week. Cloudy and drizzling with strong east wind to-day (23rd). Heavy rain at head-quarters on 20th. Paddy crops generally improved. In tracts where flood water has reached, best outturn assured. In parts of Sadar and Siwan more rain wanted in less favoured tracts. In Gopalganj paddy doing well. Fodder and water abundant. Prices showing a tendency to fall. Prices of common rice:— Srs. c. Sadar ... ... 14 8 } per rupee. Siwan ... ... 14 12 } per rupee.
	38	Champaran ,, 23, '93	5·16	Weather—unsettled and cooler. *Bhadoi* rice and *kodo* are being reaped. Prospects of *aghani* rice very good. Prices stationary. Fodder and water sufficient.
ORISSA.				
ORISSA DIVN.	39	Cuttack ,, 23, '93	2·75	Weather—cloudy with heavy showers occasionally. *Early biali* being gathered. *Bara biali* ripening. Transplantation of *sarad* still in progress. Fodder-supply sufficient. Prices of common rice:— Srs. c. Srs. c. Sadar ... ... 10 8 to 13 2 } Jajpur ... ... 14 7 to 17 6 } per rupee. Kendrapara ... ... 14 7 to 22 0 } Banki ... ... 15¼ }
	40	Puri ,, 21, '93 Khurda ...	0·74 2·37	Weather—cloudy with occasional showers. *Biali* being reaped. *Sarad* being weeded. Some damage to *sarad* paddy from a disease locally known as *kahalia* and *puka chhinda* and believed to be induced by excessive rainfall, is reported from Banpur and Khurda. General prospects good. Prices of common rice:— Srs. c. Srs. c. Sadar ... ... 12 8 to 14 1 } per rupee. Khorda ... ... 11 0 to 15 12 } per rupee.
	41	Balasore ,, 23, '93	4·06	Weather—stormy; cyclonic depression and heavy showers in the latter part of the week. Crops are still reported good and fair at Balasore and Bhadrak respectively. The heavy rain has brought on insects and weeds, and damaged two annas in a small area, and floods have also done local damage in the south. The present stormy weather, if it continues, will cause damages. Prices stationary.
CHOTA NAGPUR. *South-West Frontier Agency.*				
CHOTA NAGPUR DIVN.	42	Hazaribagh Sept. 23, '93	4·85	Weather—very wet and stormy. Sugarcane and rice crops are doing well, and miscellaneous rainy-season crops are yielding fairly. Indian-corn almost a complete failure. Sowings of oil-seeds continue. Fodder and water abundant. Prices stationary.
	43	Lohardaga ,, 23, '93	0·75	Weather—cloudy and rainy. Reaping of *gora* paddy continues. Prospect of winter rice continues good. Common rice selling at 16 seers per rupee. Fodder and water plentiful.
	44	Palamau ...	...	Report not received.
	45	Singhbhum ,, 23, '93	1·45	Weather—seasonable. *Bhādoi* crops have been harvested with good results. Winter rice crop very good everywhere. Price of rice about 12 seers per rupee. Some cases of cattle-disease reported from the Chakardharpur thana.
	46	Manbhum ,, 23, '93 Gobindpur ...	1·08 1·05	Weather—stormy and rainy. We are having too much rain, and winter crops are being damaged somewhat. Prices stationary.

The average fall of the corresponding period for 24 years, Surveyor-General's Office	2·69
The total fall from 1st January to 23rd September 1893	77·64
The average fall of the corresponding period for 24 years, Surveyor-General's Office	57·06

The mean pressure, temperature, &c., are deduced from the traces of the Barograph and Thermograph and from observations made at 6h, 10h, 16h, and 22h.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed open at the sides and are suspended four feet above the ground.

The barometer readings are corrected approximately to those of the standard, Newman's No. 86, formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed in the Meteorological Office, and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground.

o, overcast ; g, gloomy ; d, drizzling rain ; p, passing temporary showers; t, thunder; [dew symbol], dew.

* Mean of 6 days.

Explanation.—*Summary.*—The normal means of air pressure and temperature are the arithmetical average or means of the reading during the same period The *humidity* of the atmosphere is expressed at percentage, saturated air being presented by 100. A clear sky is denoted by 0 and an overcast sky by 01 rainfall the normal mean are the numerical means or average of the rainfall in that district determined from the returns sent in by the subdivisional station district, *i.e.* from total rainfall at the subdivisional stations in the district sending in returns divided by the number of stations. A rainy day is one of

for the week ending Saturday, the 23rd of September 1893.

Variation from normal mean.	Mean 8 A.M. temperature.	Average humidity at 8 A.M.	Average cloud amount at 8 A.M.	Rainfall of week at observing station.	DISTRICT OBSERVATIONS. Rainfall. Of week. Mean for district.	Normal mean.	Average number of rainy days.	Normal number of rainy days.	Since 1st of month. Mean for district.	Normal mean.	Variation.	Since 16th May 1893. Mean for district.	Normal mean.	Variation.	District.

Explanation.— .. indicates that no rain has fallen. If the return for any day has not been received, the corresponding space is left blank. If any of the returns are wanting, the corresponding spaces in the total rainfall columns are left blank. With reference to the column of rainy days, the definition of a rainy day is when at least [illegible] inches of rain has fallen.

CALCUTTA, *the 26th September* 1893.

SUMMARY OF THE METEOROLOGICAL AND RAINFALL OBSERVATIONS TAKEN IN BENGAL, AND OF THE METEOROLOGICAL OBSERVATIONS TAKEN IN ASSAM, FOR THE WEEK ENDING 8 A.M., SATURDAY, THE 23RD OF SEPTEMBER 1893.

DURING the early part of the week the pressure distribution was fairly uniform, and comparatively fine calm weather prevailed, though interrupted in places by local storms, which caused showers of varying amounts. On the 17th, the first day of the week, there was excess in pressure of a tenth of an inch at most of the Bengal stations and in the north of the Bay, but in Burmah and Madras readings were more nearly normal. A fall of pressure began over the Bay, and continued during the whole week both over the Bay and the province, except at the eastern stations towards the end. The result of this steady fall was a depression, which formed in the north of the Bay, and after remaining shallow for some days, developed very rapidly as it approached the Orissa coast, and proved to be a disturbance of considerable severity, when it crossed the coast near Puri on Saturday, the last day of the week.

The first signs of the commencing depression were observable in the northerly winds at the Orissa stations, and the faint indraught across the east coast of the Bay on Monday, the 18th. Excepting the continued slow fall of pressure, and the more regular cyclonic circulation, there was very little change till the 20th, when the depression was better defined, but even then it was so diffused that its exact position, though nearer the west coast, was still doubtful. Gradients became steeper in the south-east of the Bay and winds strengthened, but velocity was never above 20 miles an hour at Diamond Island. The depression continued to drift slowly westward on the 21st, and on the 22nd it was near the South Orissa coast. Pressure fell more rapidly at the Orissa stations, and as it was then rising moderately in the east of the Bay and briskly in North Bengal and Assam, the disturbance was concentrating. Stormy weather rapidly developed, and when the centre of the depression crossed the coast near Puri on the morning of Saturday, gradients were very steep, and very strong winds prevailed over the south of Orissa and the adjacent part of the Bay. After crossing the coast the direction of motion was more northerly, and the track of the centre was never far from the western boundary of the province, till the disturbance broke up amongst the hills a day or two afterwards.

During the last two days of the week rough rainy weather prevailed over the greater part of the province, but especially in Lower Bengal, Orissa, and Chota Nagpur.

Pressure from being a tenth of an inch above the normal at the beginning of the week fell steadily, but slowly, at all stations till the last two days, when the depression received a considerable addition of power from the brisk increase of pressure in North-East Bengal, while it was falling near the centre of disturbance. Changes were above a tenth of an inch only on the last day of the week, while the area of lowest pressure was crossing Orissa, and these larger changes were confined to the Orissa stations, varying from ·1 inch at Balasore to ·35 inch at Cuttack. Defect was then half an inch at Cuttack, but gradients being very steep near the centre, the difference from the normal diminished rapidly towards the north, and was less than a tenth of an inch at most of the stations in South-West Bengal and Chota Nagpur. The mean difference from the normal for the week varied from defect of 0·76 inch at Cuttack to excess of ·03 inch over the greater part of Bengal and Bihar.

Temperature—Has generally been below the normal, at times by several degrees, and means for the larger divisions are all relatively low. Defect in Assam is very slight, and in Lower Bengal about half a degree, but in the other districts it varies from 1° to more than 2.°

Rainfall—Was scattered and very irregular in amount, being due to local storms, till towards the end of the week, when the disturbance in the north of the Bay caused general cloudy weather with rain over the greater part of the province. In Bengal rather less than the normal amount has fallen, but in Orissa, Chota Nagpur, and Bihar considerably more than the average was received. Excess in South Bihar is 0·6 inch, in Chota Nagpur nearly 1 inch, in North Bihar 1·69 inches, and in Orissa 1·89 inches. The rainfall on the whole has been more evenly distributed than is usually the case, as the falls at the various stations rarely differ much from 2 inches except in Orissa and in the Darjeeling Hills.

The following table gives the summary of the temperature and rainfall data of each of the seven meteorological divisions of the province for the week ending Saturday, the 23rd of September 1893:—

Meteorological Divisions.	Temperature.						Rainfall.									
	Highest observed during week.	Lowest observed during week.	Averages for week.			Average mean of week above or below normal mean of week.	Of week.			Rainy days.			Since 1st of month.		Since 16th May 1893.

RESOLUTION ON THE ANNUAL GENERAL ADMINISTRATION REPORT OF THE CHITTAGONG DIVISION FOR 1892-93.

GENERAL DEPARTMENT—MISCELLANEOUS No. 667T—G.

Darjeeling, the 1st October 1893.

RESOLUTION.

READ—

The Annual General Administration Report of the Chittagong Division for 1892-93.

This report is submitted by Mr. Oldham, who was in charge of the Division throughout the year, except for two months, from 10th October 1892, when he took privilege leave and Mr. Greer officiated for him.

Tours and Inspections.

2. The orders of the Government respecting tours seem to have been properly carried out by the Commissioner and District and Subdivisional Officers; and the diaries submitted showed that full attention had been paid to all subjects of outdoor

inspection. In Chittagong Mr. Slack made a special tour for the purpose of removing the hindrances which had arisen to the making over of the land required for the Assam-Bengal State Railway, and was successful in his object. In Tippera Mr. Greer's tact overcame the opposition of the people to the survey of the Maharaja of Hill Tippera's estate. The useful character of the inspections made by Mr. Manson, in charge of Cox's Bazar, has been especially brought to notice in connexion with the tours of Sub-divisional Officers. Half-yearly inspections of the offices at head-quarters were duly made by all Collectors.

Weather and Crops.

3. The rainfall is reported to have been sufficient and well distributed. The fall at Chandpur and Mirserai in Chittagong was deficient, being only 62" and 59" respectively, compared with an average of 96" for the whole district. Fine crops of rice and jute, the staple products of the Division, were reaped. The winter crops, however, in Chittagong and Noakhali were poor.

The Commissioner notices two interesting facts in regard to Tippera. It is said that in that district the jute crop is now considered the most important crop of the year, coming even before rice, and that in the north of the district the cultivation of hemp is spreading, and is considered very profitable.

Public health.

4. The year was an unhealthy one in Noakhali and the northern half of Chittagong, where an epidemic of cholera raged from May to September.

The following figures show the total reported mortality in each District for the last three years:—

	Population by census of 1891.	1892-93.	1891-92.	1890-91.
Chittagong ...	1,290,167	37,211	30,279	28,072
Noakhali ...	1,009,693	29,505	25,851	26,685
Tippera ...	1,782,935	32,944	33,103	36,558
Total ...	4,082,795	99,660	89,233	91,315

It will be observed that the total number of deaths reported increased considerably in Chittagong and Noakhali, while in Tippera there was a slight decrease. It is difficult to speak with any certainty of the death-rate in this or other divisions of these provinces, the registration of mortality being still defective. It is true that the public health was better in Tippera than elsewhere, but the figures for that district show a death-rate of only 18·4 per mille against 21 and 29 per mille in Chittagong and Noakhali, indicating that registration there is still very imperfect.

Condition of the people.

5. Good crops and brisk trade maintained the people of the Division in the usual condition of prosperity, which characterises the eastern districts of Bengal. It is only in Noakhali, which is the poorest district of the division, that the offer of 5 and 6 annas a day attracts any local supply of day labourers. Elsewhere work at this rate is left to be performed by outsiders, who come annually from great distances to secure higher wages than they can obtain near their homes in Bihar and Oudh. The Commissioner remarks that, with the work on the Assam-Chittagong Railway in progress, this immigration must increase, as last year local labour failed in Tippera and Chittagong. The prices of food-grains were slightly higher than in the previous year, owing to exportations to meet scarcity in other parts of India, but the wages of labour rose in general on a corresponding scale. The division is practically secure against famine or even general scarcity. Floods can only cause partial and temporary distress in particular localities, and even in such cases the people are able to obtain credit or to fall back on reserves of former years.

Manufactures, Trade and Commerce.

6. The bulk of the trade is water-borne, and centres at the ports of Naraianganj and Chittagong. Figures for the latter port show a decline both in exports and

imports, but this decline is due to causes in no way affecting the prosperity of the Division as a whole. The exports of rice decreased because the Deltaic Districts, which generally send their rice to Chittagong, whence it is again exported, were able last year to secure good prices in markets nearer home, and their consignments to Chittagong were therefore diminished. Again, the decrease in the value of jute imported into and exported from Chittagong is due, as the Commissioner observes, to the fact that the raiyats, in view of the large profits made by middlemen in 1890 and 1891, held up their jute to an unprecedented extent, in the hope of obtaining similar profits in the year under review. Tea is a local product in Chittagong, and a poor crop accounts for the decrease in the amount exported. There was an increase in the exports of cotton, much of which, however, was the remnant of the previous year's crop—an exceptionally good one.

In connection with the Port of Chittagong, it may be mentioned that the term of office of all the Commissioners of the Port Trust expired during the year, and that a new body were appointed or elected.

Civil Justice.

7. The following table shows the work of the Civil Courts during the year. The information has, under the order of Sir Charles Elliott, been furnished by the Civil Courts:—

Districts.	Sub-division or chauki.	Description of Court.	Number of officers.	Number of original cases disposed of.		Details of cases in columns 5A and 5B.			Number of witnesses examined.	Ratio per cent. of witnesses detained over two days to total examined.	Ratio per cent. of cases pending at end of year to total disposed of.

† Shows the number of witnesses attended.

The number of civil suits disposed of by Munsifs shows an increase from 56,708 to 62,909. The Commissioner quotes, as generally applicable to the Division, some comments made by Mr. Gun, the Judge of Noakhali, to the effect that increase of litigation continues. Causes for this increase are, it is said, to be found in the extention of cultivation, which induces disputes as to the ownership of fallow land, and in the increasing familiarity of the people with the law on the subject of occupancy rights, to enforce which many suits are brought.

Criminal Justice.

8. The following statement shows the criminal work of the Division:—

District.	Subdivision.	Class of officers.	Number of officers.	Cases disposed of.	Persons disposed of.	Ratio per cent. of persons convicted to disposed of.	Number of witnesses examined.	Ratio per cent. of witnesses detained over two days to total number examined.	Ratio per cent. of cases confirmed in appeal to total appealed.	Number of A cases disposed of.	Number remanded six times and more.	Average number of cases disposed of per officer.	Average number of witnesses examined per case.	Ratio per cent. of column 12 to column 11.

Taking the Division as a whole, cognizable crime increased by 657 while non-cognizable crime decreased by 441 cases. The increase in cognizable crime is localized in the district of Chittagong, and is due to an increase in offences against property caused by high prices in the beginning of the year, and to an increase in the number of prosecutions under the Arms, Salt, and Opium Acts and in the number of agrarian riots, which rose from 89 to 119. In Tippera the number of cases was nearly the same as in the previous year; but in contrast to Chittagong there was a marked decrease in riots, which is attributed to preventive measures taken by the Courts. Noakhali was unusually free from crime; cognizable cases fell from 1,189 to 1,057, and non-cognizable cases from 3,749 to 3,272. The Commissioner reproduces a description given by Mr. Nanda Krishna Bose, the Magistrate of Noakhali, of the system adopted by him of referring a large proportion of complaints to the village panchayats for report under section 202 of the Criminal Procedure Code. Out of 4,193 complaints, 1,260, or about 30 per cent., were so referred. Of this number, 722 did not again come before the Courts, having been amicably settled in the villages, 313 were subsequently enquired into magisterially, and 225 are pending. In order to provide a safeguard against the abuse of power by panchayats, Mr. Bose makes it an essential condition of the system that cases in which the panchayats fail to bring about an amicable settlement should invariably be enquired into magisterially. The Commissioner is of opinion that the system has no inherent excellence, and but few extrinsic virtues, but if, as is said to be the case, the panchayats command the confidence of the people, the Officiating Lieutenant-Governor would not discourage a system which seems to promote the amicable adjustments of petty difference and disputes. Mr. Greer adopted a similar method in Tippera with success, and mentions, as a point in favour of it, that the employment of panchayats tends to increase the importance of the office.

The Stipendiary Magistrates at Chandpur and Brahmanbaria in Tippera had according to these returns most work to do and disposed of it promptly; only about one per cent. of the witnesses being detained over two days. The Magistrate at Cox's Bazar, on the contrary, detained 17 per cent. of witnesses over two days, while in the case of the Honorary Magistrates of Chittagong the percentage rose to 47. The proportion of A Form cases remanded over six

times was generally insignificant, amounting to only 64 cases out of 2,009. The work done by Honorary Magistrates increased in every district, the total number of cases disposed of by this agency in the Division being 1,439 as against 1,015 in the previous year.

Sessions trials.

9. The following table shows the result of Sessions trials:—

Sessions trials.

District.	Number of cases pending at commencement of year	Number committed during the year.	Total for disposal.	Number disposed of.	Number in which conviction obtained.	Number in which sentences modified or reversed by High Court.	Number acquitted by Sessions Judge.
1	2	3	4	5	6	7	8
Chittagong ...	3	37	40	35	21	5	12
Noakhali ...	1	17	18	18	12	4	6
Tippera ...	...	38	38	36	28	4	8

Fines.

10. The amount of fines imposed, remitted, and collected is given below:—

District.	Balance outstanding at commencement of the year.	Amount imposed during the year.	Total demand.	Amount collected during the year.	Amount remitted or written off during the year.	Total collected and remitted.	Balance outstanding at the end of the year.
1	2	3	4	5	6	7	8
	Rs. A. P.	Rs. A. P.	Rs. A. P.	Rs. A. P.	Rs. A. P.	Rs. A. P.	Rs. A. P.
Chittagong ...	4,005 11 8	18,584 15 0	22,890 10 8	15,130 7 1	1,778 8 0	16,908 15 1	5,981 11 7
Tippera ...	5,097 11 4	27,872 0 3	32,969 11 7	27,315 4 8	1,324 6 9	28,039 11 0	4,330 0 7

Chittagong Hill Tracts.	622 15 3	525 12 0	1,148 11 3	703 14 3	194 15 0	898 13 3	249 14 0
Total ...	12,241 6 1	56,019 1 0	68,260 7 1	51,306 10 1	4,698 12 4	56,005 6 5	12,255 0 8

Except in Chittagong, the outstanding balance was smaller at the end than at the beginning of the year.

Attendance of Honorary Magistrates.

11. The following table shows the attendance of Honorary Magistrates:—

District.	Number of Honorary Magistrates.	Number of times asked to attend.	Number of times actually attended	Absent with leave or notice.	Absent without leave or notice.	Total absences.	Remarks.
1	2	3	4	5	6	7	8
Chittagong ...	38	645	577	84	219	303	There were 234 attendances without calls.
Noakhali ...	17	235	189	30	16	46	
Tippera ...	34	689	401	76	209	285	

The attendance was most satisfactory in Noakhali.

Registration.

12. The registrations of the year under review exceeded those of 1891-92 by 4,486 in Chittagong, and 1,396 in Noakhali. The following table gives the figures for each district:—

Registration Statement XVII.

District.	Class of Registration office.	Number of offices.	Number of documents registered.	Average per office.
1	2	3	4	5
Chittagong	Special	1	5,103	5.103
	Rural	17	70,635	4,155
Noakhali	Special	1	8,716	8,716
	Rural	11	46,805	4,255
Tippera	Special	1	3,835	3,835
	Rural	12	35,378	2,948
Total ...	Special	3	17,654	5,884
	Rural	40	152,818	3,820

Two new offices are to be opened in Noakhali.

Land Revenue.

13. The demand, collection and balance of Land Revenue, road cess, and zamindari dák cess in each district are shown in the following table:—

District.	Class of demand.	Class of estates.	Number of estates.	Demand.		Collections.		Balance on 1st April 1893.		Remarks.

		Ditto for 1891-92.	......	31,43,745	1,69,833	30,20,060	1,42,788	1,24,925	20,529	

The Lieutenant-Governor observes with satisfaction an improvement in collections as compared with those of the previous year. Out of a total demand of Rs. 33,32,491 on account of land revenue, road cess, and zamindari dák cess, Rs. 32,25,214 were collected and Rs. 4,519 remitted, the balance being

Rs. 1,04,212, against Rs. 1,49,229 in 1891-92. The aggregate collections of the Division were good, and generally reached the prescribed standards, except that Noakhali failed to reach the standard for land revenue collections in private estates managed by Government and in Government estates let in farm, and Tippera for estates managed khas by Government, the latter failure being, it is said, due to the difficulty experienced in enforcing two new settlements. The payment of revenue and cesses by money-orders continues to grow in favour, 27,970 orders having been received as against 27,020 in the year preceding. As was to be expected, money-order payments are most common in Chittagong with its numerous small estates.

Payment of rent by money-orders is also growing popular: in Chittagong the practice was to all intents non-existent in 1891-92, but in 1892-93 the number of such orders was 6,517, covering Rs. 20,477. The number of sales of estates and tenures for arrears of revenue was less than in the preceding year.

Certificates.

14. The work of the Certificate Department is shown in the following statement:—

District	Department	Number pending at beginning of year.	Number issued during year	Total for disposal	Amount of certificates	Number disposed of during year	Amount realized	Number pending at close of year.

* These figures for 1891-92 show the number of certificates filed during year

The number of institutions decreased in every district, and the number of pending cases was less at the end than at the beginning of the year.

Surveys and Settlements.

15. In Chittagong 530·62 square miles were surveyed during the year with a view to settlement of revenue at a cost of Rs 91,353, showing a rate per acre of 6 annas 4 pies in the head-quarters sub-division and 6 annas 11 pies in the Cox's Bazar sub-division. The total area surveyed up to the close of 1892-93 is 1,586·62 square miles. As regards settlement, the Commissioner writes—

"In Chittagong, where *khanapuri* work is under the Settlement Officer, up to 31st March 1893, 1,735,427 khasra numbers had been dealt with, making a total of 3,991,643 plots up to the end of 1892-93 This excludes Old Thana Ramu The records of 401 villages were prepared during the year for attestation. Existing rents were determined, and the status recorded for 227,813 raiyats and for 112,659 other tenants Towards the end of the year the soil map system was started, and soil maps for 116 villages with an area of 87 square miles were prepared. The subject of assessment is still pending. The total expenditure on settlement last year was Rs 1,38,828"

In Tippera the survey of the Sarail Estate, with 299 villages and an area of 154,450 acres, was completed at a cost of Rs. 1,05,588. In the estate of the Maharaja of Hill Tippera in this district, 344 villages extending over 150 square miles were cadastrally surveyed. The settlement proceedings in the Sarail Estate were completed with the result that the rental of the estate was raised by Rs. 55,704. The Commissioner writes—

"This settlement has been conducted with an entire absence of friction, though Sarail is one of the literate areas of Bengal, like pargana Bikrampur in Dacca and thana Patiya in

Chittagong. There were, I hear, only three appeals. The Settlement Officer was Babu Kali Sankar Sen."

Petty settlements were in progress in Tippera and Noakhali.

16. There were 15 estates in the Division under the Court of Wards, and the Commissioner speaks in high terms of the success with which they are managed, especially in Chittagong, where the Court's management is reported to be so popular that the assumption of fresh estates has to be guarded against with some care. In Noakhali, owing to the scattered character of the estates, the expenses of management are greater.

Wards' estates.

In Chittagong several improvements were effected in the estates under management, the most prominent being the erection and maintenance of sea dykes, the construction of roads, and the excavation of tanks. Some agricultural experiments were also made, and several of the estates subscribed to schools and dispensaries.

17. The Excise revenue rose from Rs. 2,55,475 to Rs. 2,69,976, though, except in the case of opium and ganja in Chittagong, the consumption of exciseable articles showed a slight tendency to decrease. The incidence of Excise revenue is about $11\frac{1}{2}$ pies per annum per head of population.

Excise.

18. Including the Chittagong Hill Tracts, 50 per cent. of the boys of school going age are said to be at school, as compared with 51 per cent. in the year 1891-92. Tippera and Noakhali show a backward tendency, while in Chittagong there has been a slight advance. The following table gives particulars of the schools in each district:—

Education.

District.	Class of schools.	Number of schools.	Number of pupils on rolls.	Cost. Provincial.	District Board.	Municipality.	Fees.	Other.	Total.	Cost per head of pupils.	Population.	Number of boys of school-going age.	Percentage of pupils on rolls to boys of school-going age.

* Include an additional expenditure of Rs. 14,886 for special training in the Noakhali district.

There were altogether 6,739 schools with 159,546 pupils, against 6,837 schools and 160,864 pupils in the previous year, but the expenditure increased

from Rs. 3,73,898 to Rs. 4,06,817. Tippera shows the largest expenditure on primary education, and Noakhali the largest proportion of boys at school. The average cost of each pupil at primary schools is almost twice as much in Tippera as in Noakhali and Chittagong. The proportion of boys at school to the total number of boys of school-going age (excluding the Hill Tracts) is smallest in Chittagong, where it is only 38 per cent., as against 69 per cent. in Noakhali and 50 per cent. for the division. But the attendance on the whole as shown by these figures is exceedingly good, the result being due no doubt partly to the popularity of the *Koran* schools. The expenditure of the District Board of Chittagong on middle schools appears to be unduly large. The contributions made by Municipalities for the support of education in the Division, amounting to Rs. 978, are insignificant and inadequate. The remarkable increase in female education which was noticed last year has not been maintained, as the Tippera and Noakhali District Boards were unable to subsidize girls' schools on the same scale as before, but it is said that there is no prejudice against female education, and that, though their numbers have decreased, girl-scholars have distinguished themselves fairly.

In Tippera 66·1 per cent. of the primary pupils were Muhammadans. The Lieutenant-Governor notices with pleasure the progress of the Faizunissa School for girls and of the recently established Elliott Artizan School.

Dispensaries

19. The following table gives statistics relating to dispensaries :—

District	Number of dispensaries	Income from— Government	District Board	Municipality	Subscriptions	Total	Daily average patients In-patients	Out-patients.	Ratio per cent. of outdoor patients to total population
1	2	3	4	5	6	7	8	9	10
		Rs	Rs	Rs	Rs	Rs			
Chittagong	7	[illegible]	4,704	4 757	1 10[illegible]	11 100	13 91	136 36	2 5
Noakhali	5	35	2 751		1 [illegible]	3 910	5 50	63 19	1 5
Tippera	15	1 [illegible]35	10 000	1 731	[illegible]	18 714	14 08	315 92	4
Chittagong Hill Tracts	1				[illegible]	628		2·1	·5
Total	28	717	16 86[illegible]	6 493	8 3[illegible]	34,4[illegible]2	3[illegible] 80	517 47	2·9

Tippera is by far the most advanced district in the Division in respect of medical aid. The District Board under Mr. Greer's administration maintained 11 dispensaries on the system described last year, under which a certain amount of local subscriptions is insisted upon. Two dispensaries in this district are entirely maintained by the Nawab of Dacca.

The following remarks regarding the Faizunissa Zanana Hospital are quoted from the Commissioner's report:—

"A lady doctor was entertained from the 26th May 1892. At present she attends the dispensary and visits patients in their houses, and her work is popular, as she treated 1,618 patients last year She will be stationed at the zanana hospital, where it is proposed to form accommodation for all the dispensary female patients. This lady doctor has free quarters, and gets Rs 90 a month—Rs 50 from the District Board, Rs 30 from the Maharaja, and Rs. 10 from the local branch of the Lady Dufferin Fund."

Local Self-Government Institutions

20. The following remarks of the Commissioner regarding the Chittagong and Noakhali Municipalities are reproduced :—

"In previous reports the Chittagong and Noakhali Municipalities were very unfavourably noticed, though, with a change in the executive, the former was trying hard to regain its position This it has now completely done, and it is, as it should be, in management and efficiency the first Municipality in the Division, with a rapidly developing revenue, which is being punctually collected The chief improvement effected out of doors has been the great extension of town lights. The latrine system is still radically bad. This is the burning subject of local interest, and each attempt at reform has roused much agitation. The Commissioners have finally resolved to wait for the amended municipal law The cost of establishment is high in Chittagong, and this is accounted for by local conditions. The Chairman, Mr. Good, with Babu Satish Chandra Sen, the Vice-Chairman, deserve the entire credit for the reforms effected. In December 1892 I inspected the Noakhali Municipality, and was able to submit a favourable report to Government. In this case order was restored without any change in the *personnel*, which had permitted the disorder."

The Lieutenant-Governor hopes that continued efforts will be made to improve the working of these Municipalities.

The Commissioner reports that the working of the three District Boards has been very satisfactory, and that the three Local Boards in Tippera have worked as well as could be expected. The percentage of cost of establishment to income is highest in the case of the Chittagong District Board (13 per cent.), and lowest in that of the Noakhali District Board (8·9 per cent.).

Public Feeling.

21. On the state of public feeling, the Commissioner makes the following remarks:—

"There is no indication that public feeling, as the term is generally understood exists in the Division. I should say that our vaccination operations form the subject most widely felt. The people are interested in them and accept them because inoculation is not permitted, but they do not understand or are not convinced by the prohibition, and prefer and often ask for inoculation and frequently practise it. In Chittagong the settlement is a general topic, and in Tippera it is the chief topic in the smaller area where it has begun, though the people there have not formed any defined ideas about it yet, because it is a new measure. But in Chittagong there is an old and famous standard for comparison, and though the people realize that it is, for working purposes, obsolete, they felt, if only from mere objection to change, a general dislike to the new methods which are being substituted, and this has been constantly expressed, though its reasonableness has never been sustained by instances or attempted to be pushed to proof. In practice individuals confine themselves to ascertaining what they will lose or gain, and Mr. Slack now says the tenantry have grasped the nature of the work and regard the operations as beneficial.

"It is worth while here to refer to the relations of the people with the agents of Government. It would not be an exact description to call these relations cordial, but they are eminently business-like, and marked with confidence, and are the most satisfactory that I have seen anywhere in India. The people, especially in Chittagong, where wealth is so generally diffused, are particularly independent and self-respecting. It can be plainly seen that they regard the officers of Government as capable agents for transacting their public business, in whom they repose not implicit, but full, ordinary, and sufficient confidence. Thus the way in which a District Magistrate and rural postmaster is regarded only differs in degree. The bearing of the people to all is much the same. It is dignified, and while it is the opposite of cringing and servile, it is neither self-asserting nor obtrusive."

Conduct of zamindars.

22. The Maharaja of Hill Tippera and the Nawab of Dacca have maintained their characters as beneficent zamindars. The Sobhabazar family of Calcutta are favourably mentioned with the Maharaja for their ready compliance with the wishes of Government in regard to the removal of the Gumti embankment in their estates. Nawab Sahiba Faizunissa and her lady co-sharers continued to be the benefactresses of Comilla, where also Syed Hossein Haidar is well spoken of. On the other hand, the Nag family Baradihi in Dacca are unfavourably mentioned, their relations with their tenants in Tippera being so strained that the employment of police, the appointment of special constables, and, finally, the application of chapter X of the Tenancy Act, became necessary in the disturbed tract.

Political.

23. The Commissioner gives an interesting account of the Chittagong Hill Tracts, of which Mr. C. S. Murray, C.I.E., was in charge throughout the year. The rules framed in continuation of the Hill Tracts Rules of 1860 were brought into force, initiating a territorial system of jurisdiction in place of the tribal and nomadic system, irrespective of physical boundaries, which had until recently been recognized. The determination of areas led necessarily to the definition to some extent of the powers and duties of the indigenous agents within those areas. Thus major divisions, known as taluks, have been formed in the three chieftaincies' circles, and within the taluks 61 mauzas have been formed, and mapped and settled under headmen. The introduction of these changes in complete detail can only be gradually effected, as the people become accustomed to them.

Another reform was effected in the abolition of the system known as the Trade Pass system, designed originally to prevent smuggling, but afterwards amplified for statistical purposes. The system was found to confine and restrict trade, and a simpler system has been adopted, from which good effects are expected.

A Land Revenue Report was submitted for the first time during the year, in connection with a tentative system introduced for the collection of revenue from arable land, that is, land actually brought under the plough. The Commissioner's account shows that, though the demand of rent has risen from Rs. 1,400 to Rs. 6,200 in a single season, considerable care has been taken in

making assessments. It is stated, that for some time to come, each jamabandi must be locally examined and revised every year.

The payment of all Government dues by money-order was authorized in the Hill Tracts during the year.

Weather and crops were normal, and public health was good. There was little crime, and it is satisfactory to note the Commissioner's remark that, in two cases of murder, the indigenous agents gave the promptest and most efficient aid, which led to the punishment of the offenders.

In Hill Tippera the Minister, Rai Uma Kanta Das Bahadur, was permitted to retire during the year. He had thoroughly reorganized the finance of the State and relieved it of its embarrassments. His attempts, however, to bring the administration of the state into accord with advanced ideas led to complications, and his position became untenable. Mr. McMinn has been appointed to have charge of the zamindaris, and to superintend the survey on the Maharaja's behalf.

24. The Lieutenant-Governor thanks Mr. Oldham for his administration of the Division which was efficient in every department throughout the year, and notices with satisfaction the praise bestowed by him upon the Collectors of Tippera, Chittagong, and Noakhali. The report on the qualifications of officers will be communicated to the Appointment Department, intimation being given to the officers concerned in cases where seriously unfavourable remarks have been made.

By order of the Lieutenant-Governor of Bengal,

M. FINUCANE,

Offg. Secretary to the Govt. of Bengal.

RESOLUTION ON THE REPORT OF THE BOARD OF REVENUE ON THE ADMINISTRATION OF THE SALT DEPARTMENT FOR THE YEAR 1892-93.

FINANCIAL DEPARTMENT—SEPARATE REVENUE.

Darjeeling, the 30th September 1893.

RESOLUTION No. 286T.—F.

READ—

The Report of the Board of Revenue on the Administration of the Salt Department for the year 1892-93.

The report which the Board of Revenue submit on the administration of the Salt Department is complete and instructive. In the following paragraphs the Lieutenant-Governor indicates for general information the leading features of the Board's report.

2. *Receipts and charges.*—The following statement shows the receipts and charges of the Salt Department during each of the last six years:—

Approximate Statement of Receipts and Charges of the Salt Department for the years 1887-88 *to* 1892-93.

(a) Includes the cost-price of salt manufactured under the direct management of Government in Orissa.
(b) Details are given in the statement in paragraph 45 below.

3. The year under review as compared with 1891-92 shows an increase of Rs. 2,26,036, or ·93 per cent. in the receipts, and of Rs. 43,033, or 10·6 per cent. in the charges, giving a net revenue of Rs. 2,38,69,837, which is higher than that of 1891-92 by Rs. 1,83,003, or ·77 per cent. There has been an almost unbroken advance in the salt revenue since the year 1887-88, and the figure recorded during the year is higher than that of any other year since the year 1881-82,—the last year in which duty was realized at the rate of Rs. 2-14 per maund. The large advance in the amount of the receipts in the year 1888-89 is due to the increase of duty from Rs. 2 to Rs. 2-8 per maund on the 19th January 1888. For some years this enhancement of duty affected the revenue to some extent by reducing importation, but the effect has now disappeared, and there has been a full recovery; the amount of salt on which duty was paid during the year being the highest on record, except that of the years 1884-85 and 1886-87. The increased revenue from "Import duty," which is by far the most important item on the receipt side, is attributed by the Board partly to the fact that owing to the lower prices prevalent during the year, an absolutely larger quantity of salt was cleared for sale, and partly to a smaller quantity of duty-paid salt having been imported from Bombay and Madras. The revenue from excise salt shows a material improvement on the figures for the year 1891-92,—a result which the Board ascribe to the larger outturn of the Government factories in Orissa; to the restriction on the sale of Ganjam salt during a part of the year;

to the fall in the price of excise salt; and to the forced sale by auction of a quantity of excise salt for the recovery of charges due from certain licensees. The proceeds from "Rent of warehouses" show a decline owing to the quantity bonded being less and to a general reduction in the stock kept at the golahs during the year. The reason is that, owing to the exceedingly low rate of freight and the difficulty of obtaining cargo, there was no object in rapidly discharging salt-laden ships, and owners found that it paid them better to sell salt direct from the ships instead of discharging and storing it. Moreover, the fluctuations in exchange have militated against the storage of salt in golahs for long periods, while at the same time the increased facilities for discharging salt quickly from steamers have enabled shipments to be made to definite order and to meet immediate requirements. It is probable that, if there is an improvement in the rates of freight, the golahs will be more used than they are at present, and a larger revenue derived from warehouse-rents. The increase under the head "Miscellaneous" is due partly to an increase in the amount realized in Orissa on account of the cost price of Government salt, and partly to the recovery of a sum from the East Indian Railway Company for the use of the siding within the Sulkea Golahs.. The provincial expenditure on account of salaries, establishments, and contingencies, not including Orissa, amounted to Rs. 1,23,727, against Rs. 51,608 in the previous year. The increase was chiefly due to the payment of an honorarium of Rs. 75,000 to Mr. Kilby on account of the scales invented by him, which continue to give complete satisfaction.

4. *The Salt Trade.*—The fluctuations in the volume of the salt trade in Bengal during the last two years are illustrated in the following statement:—

			1891-92.		1892-93.	
			Mds.	Mds.	Mds.	Mds.

		Puri ...	37,832		19,908	
		Balasore ...	106	37,938	250	20,158
				14,90,164		7,39,475

* Includes 1,715 maunds found in excess in the golahs and 6 maunds found by re-weighment.
† Ditto 1,579 maunds found in excess in the golahs.
‡ Ditto 1,58,712 maunds of Bombay salt and 2,138 maunds of Madras salt, which were passed free of duty
§ Excludes 2,628 maunds, the duty on which was paid during the previous year, but which were cleared during the year
‖ Ditto 4,19,128 maunds 30 seers of Bombay salt, which was passed free of duty.
¶ Ditto 1,48,419 maunds of Bombay salt, which was passed free of duty.
** Includes 3,90,577 maunds 20 seers of Bombay salt, which was passed free of duty.

The stock in the golahs at the commencement of the year under review was far below the opening stock of any of the three preceding years, and at the close of the year, for the reasons already stated above, it had been so far reduced as to be less than the closing stock in any of the last five years. There were, however, in addition to the stock in the golahs, 6,23,060 maunds lying afloat in ships and destined to be sold direct to purchasers.

5. *Imports.*—The imports into Calcutta and Chittagong show a net increase of 3,32,032 maunds, or 3·6 per cent., as compared with the figures of 1891-92. The following statement shows the different countries and places from which the shipments were made:—

Group.	Whence imported.	Total.		Percentage of quantity imported in 1892-93 for each group.
		1891-92.	1892-93.	
1	2	3	4	5
		Mds.	Mds.	Mds.
I	United Kingdom	55,27,227	59,40,724	63·3
II	Hamburg	16,55,709	9,38,190	9 8
III	Fougies (Asiatic Turkey) ...	56,070	...	......
IV	Ras Rawayah	......	1,59,572	20·5
IV	Jeddah, Muscat, and Saliff ...	2,99,208	7,27,481	
IV	Aden	8,79,841	9,99,718	
V	Madras	42,118	73,940	·7
VI	Bombay	5,91,103	5,43,683	5·7
	Total ...	90,51,276	93,83,308	100·0

The decline in imports was brought about chiefly by the falling off in shipments from Hamburg, which were 7,17,519 maunds less than in 1891-92. The Collector of Customs is inclined to think that the decrease is due in some degree to interference in the market by a Syndicate or other combination to control prices, and also to a falling off in the general direct trade with Hamburg. Whatever the cause may be, the Board are certainly right in saying that it is premature to assume that this class of salt has fallen permanently into disfavour. The importation from Fougies or New Fokia in Asiatic Turkey ceased altogether, while Bombay shows a decline of 47,420 maunds.

6. *Sales of imported salt.*—Including Bombay and Madras salt cleared free of duty in Calcutta, 63,47,425 maunds of salt were cleared from shipboard, against 59,00,244 maunds in the previous year, giving an increase of 4,47,181 maunds or 7·6 per cent. in the quantity cleared, and of Rs. 10,89,043 or 7·5 per cent. in the duty realized. On the other hand, the clearances from bond fell from 41,33,501 maunds to 37,10,170 maunds, while the duty on such clearances decreased by Rs. 9,87,412. On the whole, the total clearances of all kinds, including those of excise salt, rose from 1,00,52,611 maunds to 1,01,38,924 maunds.

7. *Consumption of Salt.*—Deducting from the above clearances the net exports from Bengal, amounting to 7,39,361 maunds, and adding 34,360 maunds, being the quantity of saltpetre salt brought into use, the balance of salt left for consumption in Bengal during 1892-93 was 94,33,923 maunds, or an average of 10¼ lbs. per head of the population. In the saliferous tracts, excluding Orissa, there was a general decline in the consumption of licit salt, which is ascribed partly to the prevailing scarcity and partly to a defect in the law which it is intended shortly to correct. The amount consumed per head averaged 10 lbs. 5 oz., which, notwithstanding the decline, was still above the average per head in the rest of Bengal (10 lbs. 4 oz.). That the consumption of licit salt in the districts within salt law limits is usually greater than in the rest of the Province is strange—all the more so, because the price of salt there is generally slightly higher than elsewhere : the explanation that those districts are in ordinary years exceptionally

prosperous does not appear altogether adequate. In the Bombay and Madras Presidencies the average consumption per head during 1891-92 was 11·82 lbs. and 16·34 lbs. respectively, and in Orissa it was nearly 10 lbs. The Board's report deals fully with the fluctuations of consumption in each district, and it is necessary in this place only to notice the increase of 9·3 per cent. in Midnapore, which is attributed to more active measures for the suppression of dealings in illicit salt, and at the other end of the scale the decrease of 10·8 per cent. in the 24-Parganas, where the authorities are charged with some laxity, and where there was also some slight distress during part of the year.

8. *Inland trade.*—The districts of Bengal Proper derive their supply of salt chiefly from the ports of Calcutta and Chittagong, Orissa gets a portion of its supply by local manufacture and by importation from Ganjam, and the Bihar districts are supplied partly from the North-Western Provinces. The total imports by land fell from 5,53,093 maunds in 1891-92 to 4,23,188 during the year under report. The decline was almost entirely in salt imported into Orissa from Madras, and was no doubt due to the increased production and the fall in price of locally manufactured salt. The exports also fell from 12,51,475 to 11,62,549 maunds, the chief decline being in exports by river to Assam.

9. *Price of salt.*—Statements A and B appended to the Board's report give for the last two years the wholesale price of salt (*a* at monthly intervals in the bazars of district head-quarters, and (*b*) at fortnightly intervals in certain selected marts, and they show that salt equally with other commodities is affected by the tendency of improved communications to equalise prices in widely separated places. The prices on the whole were lower than in the previous year. The fluctuations in the wholesale price of Liverpool salt during the year under report were unusually small. In 1891-92 the price per 100 maunds, exclusive of duty, ranged from Rs. 80 to Rs 53 with an average for the year of Rs. 64-11-11; in 1892-93 the highest price was Rs. 68-12 and the lowest Rs. 57-8. The average price has fallen during the past five years from Rs. 94-6 to Rs. 61-9-3. The statement given in the margin shows the average prices of Government salt, exclusive of duty, at each of the Orissa factories during the last two years. The prices were lower than in the preceding year.

Salt station.	Year.	Average price per maund ex-duty. Rs.	A.	P.
Sartha	1892-93	*0	4	0
	1891-92	0	5	5½
Sibuntapur ...	1892-93	0	5	2
	1891-92	0	7	9
Timur	1892-93	0	5	3
	1891-92	0	8	2
Baghkan	1892-93	0	2	0
	1891-92	0	5	2
Tua	1892-93	0	6	1
		*0	4	0
	1891-92	0	8	8
Gurubai	1892-93	*0	4	0
	1891-92	....		

* These prices were of Government salt. There were no excise stocks at Sartha and Gurubai.

10. *Working of the Salt Laws and rules.*—The total number of seizures of contraband salt, including those in the Orissa districts, rose from 1,435 to 2,015 during the past year, and the quantity attached from 497½ to 1,672 maunds, but this total includes 702 maunds which were seized in Backergunge at one time, because they were not protected by a rowana, but afterwards released on duplicate rowanas being produced. There were in all, excluding pending cases, 1,472 prosecutions under the Salt law during the year, being an increase of 143 on the previous year. Convictions were obtained against 1,420 persons out of 1,555 apprehended. Considerable fluctuations occur in the scale of rewards sanctioned in different districts, and the whole subject is under the consideration of the Board. There appears to be reason to believe that in the Diamond Harbour subdivision of the 24-Parganas and in the Midnapore district illicit manufacture was carried on to some extent. In the former district the simultaneous decline in the consumption of licit salt, and in the prosecutions for offences against the Salt law, seem to justify the Board's conclusion that want of vigilance on the part of the authorities was the main cause of the decrease in consumption. In the latter district 403 persons were prosecuted during the year for illicit manufacture and 394 were convicted. Mr. Bompas, the Subdivisional Officer of Contai, computed that in 1891-92 not less than 30,000 maunds of illicit salt were consumed within the rowana limits of the Midnapore district, and that probably another 20,000 maunds were exported.

11. Proposals were made during the year by the Government of Bengal for the amendment of the Bengal Salt Act of 1864, with a view to increasing the penalty for illicit possession and transport of salt; but the Government of India have determined that before action can be taken, an enquiry should be made by an officer of the Northern India Salt Department as to the extent of illicit

manufacture in the saliferous tracts of Bengal outside Orissa. This enquiry will take place during the coming cold season.

12. *Salt in Orissa.*—In accordance with custom the Board devote a separate part of their report to the administration of the Salt Departments in Orissa. In this province, by an arrangement which has been in force since 1886, the operations of the department are conducted by officers of the Government of Madras, and are divided into manufacture and prevention. The factories at work in Orissa during the year under review for the manufacture of *karkach* salt in evaporating pans were those at Sartha in the district of Balasore, and at Tua and Gurubai in the district of Puri, and they were all managed direct by Government: the Sartha factory has now been closed in view of the difficulty of procuring labour and the insufficiency of the brine supply. It is satisfactory to note that the quality of the salt turned out at these factories was much better than in the last few years, and the quantity manufactured about eight times as great as in 1891-92. The receipts of the Orissa Salt Department rose from Rs. 47,087 to Rs. 2,17,410, chiefly by reason of the increased receipt of duty on the larger quantities manufactured, and the expenditure advanced from Rs. 1,33,003 to Rs. 1,51,053 on account of the necessarily increased charges for manufacture and establishment. The percentage of the charges to the receipts thus amounts to 69·4, which at first sight appears to be preposterously high; but if the duty realised elsewhere on salt consumed in Orissa be included in the calculation, as the Madras Salt Department contend that it should be, the total revenue would amount to Rs. 17,73,362, and the charges will then bear the moderate ratio of 8·5 per cent. to this amount. The Board of Revenue in their report for 1891-92, as well as in that under review, urge the equity of this contention, which appears to the Officiating Lieutenant-Governor to be not unreasonable on the ground that but for the existence of the Preventive Establishments a great part at any rate of this revenue would not have been realised. It is owing to these establishments that, practically speaking, the local demand is not supplied by illicit manufacture; and as the consumption of licit salt, whether imported or locally manufactured, is therefore a consequence of the action of these establishments in Orissa, it seems only fair to set off against the charges, if not all, certainly a large part of the duty levied on salt consumed in Orissa.

13. *Changes proposed.*—The question of amending the Salt Law in Orissa with the object of suppressing the illicit manufacture of salt in that province lately engaged the attention of Government, and proposals were submitted to the Government of India to amend in some respects the Indian Salt Act XII of 1882, which is in force in Orissa. The Government of India, while accepting generally the principles embodied in these proposals, has suggested for consideration whether it would not be preferable to introduce the Madras Salt Act into Orissa as being better suited to the conditions of the maritime districts of which that province is composed. This suggestion is now under consideration.

14. It has also been suggested that the Madras Salt Department should be relieved of the administration of the Salt Department in Orissa, and that it should be made over to the officers of the Bengal Government, Salt and Excise being administered by the same staff of officers. But the Officiating Lieutenant-Governor, while admitting that there are some points in the proposal which merit attention, is not at present prepared to condemn the administration of the Madras officials or to recommend to the Government of India that they should be withdrawn from Orissa on the arguments which have hitherto been laid before him. The question is not without difficulty, and one aspect of it, namely, the gradual decrease of the salt industry in Orissa, is causing the Officiating Lieutenant-Governor uneasiness. A decrease in the home production of such an article as salt is not, *per se*, a desirable result, even if, through importations of foreign salt, it be accompanied by a reduction in the selling price of the article, while from the standpoint of the hardships caused to the classes whose hereditary occupation it is to make salt, such a decrease is unsatisfactory. Of course the Officiating Lieutenant-Governor has no intention of propping up a decaying industry by factitious methods; but he is very anxious that the decay should not be hastened or produced by any ill-directed administrative measures, and he

would therefore be glad if the attention the subject is now receiving had the effect of strengthening the local manufacture of salt subject to due safeguards throughout the province. Any arrangements that may be proposed in connection with the Preventive Establishments should proceed on the basis of conserving rather than of discouraging the indigenous descriptions of salt manufacture so far as this can be done without artificial means.

15. *The Sulkea Golahs.*—The bonding operations at the Sulkea Golahs received a check during the year, the quantity of salt bonded being 2,80,731 maunds less than in the previous year. The low rate of freight has, as mentioned above, nullified so far the inducements to bonding afforded by the recent improvements in the golahs, which have been carried out at considerable expense.

16. The thanks of the Officiating Lieutenant-Governor are due to the Board for their supervision of the Department, and Sir Antony McDonnell observes with satisfaction that Messrs. Savage and Bompas are again selected for special commendation by the Board for the excellent work done by them during 1892-93.

By order of the Lieutenant-Governor of Bengal,

J. A. BOURDILLON,

Offg. Secretary to the Government of Bengal.

RESOLUTION ON THE REPORT ON THE ADMINISTRATION OF THE STATIONERY DEPARTMENT FOR THE YEAR 1892-93.

FINANCIAL DEPARTMENT.—MISCELLANEOUS No. 399T.—F.

Darjeeling, the 30th September 1893.

RESOLUTION.

READ—

Letter No. 727B., dated the 25th August 1893, from the Board of Revenue, submitting the Report on the Administration of the Stationery Department for the year 1892-93.

The Stationery Department is one of those branches of the administration which in unobtrusive fashion discharges year by year duties of great value and importance to the State: it deals with property, the money value of which is very large, and it is hardly too much to say that inefficiency in its administration would incommode every officer employed in Upper India. The Superintendent is responsible for the supply of stationery to the offices under the Government of India as well as to those in the Provinces of Bengal, the North-Western Provinces and Oudh, the Panjab, the Central Provinces, Assam and Burma, and his office is the centre from whence are distributed the millions of printed forms required in Bengal and Assam, besides forms supplied under special orders to offices in other parts of the Empire. The present report, which has been submitted to Government with the observations of the Board of Revenue, refers to the administration of the Stationery Department as a whole; a separate report, dealing with its own stationery and forms, being subsequently forwarded to the Government of India and to each Local Government and Administration.

2. The value of the stocks, receipts, and issues of the year under review is compared below with the figures for 1891-92:—

	1891-92.	1892-93.
	Rs.	Rs.
Value of stores at the beginning of the year ...	6,23,856	5,12,445
Add value of stores received and credited during the year	21,55,719	24,63,500
Total ...	27,79,575	29,75,945
Deduct value of [illegible] issued	22,67,130	24,15,430
Value of balance in stock on 31st March ...	5,12,445	5,60,515

There was again an advance in the value both of the stores received and issued from the Stationery Office, and in that of the stores in stock at the end of the year. It is obviously undesirable to keep up a larger stock of stationery than is absolutely necessary, and during the past five years the balance in hand has been steadily diminishing. The increase now reported is attributed to the fact that a large quantity of expensive hand-made paper was imported before the use of local machine-made paper was sanctioned in its stead; the imported paper has for the most part been disposed of without loss.

3. The decline in the value of stores received from the India Office, which was observed in the previous year, received a check during the year under review. This increase (Rs. 2,06,332) is partly due to larger imports of drawing paper and materials received for the Public Works and Survey Departments, hand-made paper for the Registration Department and the High Court, and binding materials for the latter. It is also partly due to the fact that under the orders of Government expensive articles, such as copying presses, type-writers and so forth, are obtained through the Superintendent. Part of the increase, however, is due to the difference in the official rate of exchange in 1890-91 and 1891-92, since the percentage to cover freight and loss by exchange, added to the invoiced cost of English goods at 2*s.* the rupee, rose from 45 in 1891-92 to 58 in 1892-93. The value of country-made paper and other stores purchased locally also shows an increase of Rs. 85,136, the result of larger demands made by the printing presses in Bengal and Burma, and of larger indents from the Central Provinces, which Administration commenced for the first time to draw its full supplies from the Calcutta depôt. Under "Issues" there was a net increase of Rs. 1,96,582 in the value of the stationery supplied to Local Governments and Administrations. Of this sum, Bengal is responsible for Rs. 76,772, the North-Western Provinces and Oudh for Rs. 30,199, Burma for Rs 37,374, the Central Provinces for Rs. 56,953, and Assam for Rs. 1,970, the Panjab showing a decrease of Rs. 6,235. The advance in Bengal is due to the increased activity of the Survey and Settlement Departments during the year, a larger number of forms being required for the cadastral survey in Bihar and for the settlement operations in Chittagong and Orissa. On the other hand, there was a decrease of Rs. 12,040 in the value of stationery used by offices and departments under the Government of India.

4. After eliminating from the value of the total issues (Rs. 24,15,430) the cost of the items noted in the margin, aggregating Rs. 18,44,781, which comprise certain paper adjustments and the consumption of Government presses, the actual cost of stationery supplied to Government offices, including State Railways and local bodies, amounts to Rs. 5,70,649. Excluding the supplies to State Railways, Railway Mail, and Telegraph Departments, and certain petty items, but including those to local bodies and other offices which pay for their stores, the value is shown at Rs. 4,46,556. This sum distributed among 3,457 indenting officers places the average cost of the stationery issued to each officer at Rs. 129 as against Rs. 115 in 1891-92. This calculation is apt to mislead, since the demands of the different officers necessarily vary very much, and the addition of the Secretariat and the Settlement Department of the Central Provinces, each of which counts in the calculation as one office, greatly raises the average. Some small advance is unavoidable year by year as work tends to increase and there is a constant endeavour to improve the manner of its execution; but the Lieutenant-Governor agrees with the Board in thinking that more might still be done by local officers to enforce economy and to prevent that waste and leakage which indisputably exist in some quarters.

	Rs.
Value of water-marked paper	1,43,985
Value of stores issued to printing presses for blank books, &c.	34,113
Value of stores transferred to Bombay and Madras	2,249
Value of unserviceable stores written off and sold	22,201
Value of deficiencies in stock-taking ...	1,521
Miscellaneous adjustments	1,040
Loss by revaluing the closing balance at the issue rates of the year	17,605
Value of supplies to presses	16,21,977
Total ...	18,44,781

5. The substitution of Indian-made paper for paper made in England underwent a further development during the year under review. The prices charged by the local mills for the better kinds of paper were formerly considered to be higher than the cost of similar articles procured from England;

but the local mills having reduced their rates, and the accuracy of the above conclusion having been questioned, it was decided at a Conference over which the Member of the Board of Revenue in charge of the Miscellaneous Department presided, that on the whole it would be more economical to obtain these papes locally. Another point besides cheapness in favour of country-made paper is the absence of adulteration in the materials used for its manufacture, and the Superintendent of Stationery points out that the cheaper kinds of European paper, the prices of which were quoted by the Secretary of State, in competition with the Indian-made article, have been condemned for office use in England. In 1887 only ordinary printing paper was purchased locally; now all paper required for the Government presses, as well as what are technically known as writing papers, are obtained from the local mills. In July 1892 orders were issued forbidding the issue of English-made writing paper of any kind to all indenting officers under the Government of Bengal without exception, save with the special sanction of Government, country-made paper being found quite good enough for all ordinary office business. These orders have, under the authority of the Government of India, since been extended to supplies to other Local Governments and Administrations, the Departments of the Supreme Government, and the officers subordinate thereto. The Lieutenant-Governor anticipates the best results from a frank adoption of this policy. With exchange so much against India, every rupee saved in the charges payable in England is an advantage to the Imperial finances; while an avowed willingness on the part of so large a customer as the Government to accept the locally manufactured article must stimulate competition, and cause the production of a better article at equal or less cost.

6. The income and expenditure of the Stationery Department proper amounted during the year to Rs. 1,14,876 and Rs. 95,068, against Rs. 98,734 and Rs. 84,815 in 1891-92. The improvement in receipts was due to the sale-proceeds of a quantity of coloured paper which had been lying in stock for more than three years. The increase in expenditure occurred mainly under "Establishment" (Rs. 990), due to periodical increments in salaries of clerks; under "Packing" (Rs. 3,209), due to the increased supply of stationery to the Central Provinces and the substitution of country-made for English paper, because while the latter was supplied in the cases in which it was received, paper locally made had to be packed for despatch; and under "Freight" (Rs. 9,483), due to larger shipments of stationery to Burma.

7. In addition to the Stationery Department, which, as explained above, supplies the whole of Upper India, no inconsiderable part of the duties of the Superintendent of Stationery is the receipt, storage and issue of printed forms, chiefly for Bengal and Assam. These are for the most part prepared at the Presidency Jail Press, and the magnitude of the work is proved by the following figures, which show the total receipts and issues of standard and special forms during the last two years:—

	Forms— Received.	Forms— Issued.
1891-92	96,688,566	87,895,207
1892-93	137,494,831	107,897,243
Increase in 1892-93 ...	40,806,265	20,002,036

The increase of over 40 millions in the number of forms received from the Press is ascribed to some extent to the receipt of a large number of forms during the year under review, which ought properly to have been supplied in the previous year, and to the receipt in advance of several forms which were not due till the current year. Under "Issues" there was an increase of over 119 lakhs in special forms and of nearly 41 lakhs in forms required for survey, settlement, and land acquisition purposes. The total cost of printing the forms supplied by the Stationery Office, including the cost of paper, amounted during the year to Rs. 8,23,933,* or more than a lakh of rupees in excess of the expenditure of the previous year. The details regarding the expenditure incurred in form-printing, which the Superintendent promises to furnish in the

	Rs.
* Printing	2,14,091
Paper	6,09,842

Report on the Provincial Expenditure of the Stationery Department, are awaited. Meanwhile it is noteworthy that the average cost of forms per indenting office is nearly double that of stationery, and the Lieutenant-Governor desires that the Board will call the attention of all officers to the necessity of economy in this department just as much as in the expenditure of stationery. The number of forms is so large and the apparent value of each is so small that they are frequently regarded as things of no account. The supply of forms was much disorganized in 1890-91 by the printing and distribution of census forms, and also by a large demand for new High Court forms; but no such specially disturbing influences have been at work during the year under review, and it is satisfactory to learn that great progress has been made in working off the arrears in the supply of forms, regarding which several complaints had lately been preferred, and both the Stationery Office and the Press are now reported to be abreast of their work as far as annual indents are concerned. The Board again bring to notice the serious inconvenience caused by the introduction of new and revised forms at inopportune times, and the submission of an unreasonable number of supplementary indents. A Resolution was issued by the Board during the year on the latter subject, and the Lieutenant-Governor requests that they will not lose sight of the matter, but insist on their rules being complied with. There have been several complaints during the year of delay in the supply of forms, but the Board have taken steps to accelerate the supply of materials from the Stationery Office to the Press, and have introduced a monthly report to be submitted by the Superintendent of Government Printing, which will enable them to detect the cause of delay and apportion the blame for its occurrence.

8. The receipts and charges of the Form Branch of the Stationery Department amounted to Rs. 34,655 and Rs. 57,960, against Rs. 29,617 and Rs. 46,100 in the previous year. The increase in receipts is ascribed to the larger sales of saleable forms, and the advance in expenditure is a necessary consequence of the despatch of a larger number of forms and the rent of outside godowns to contain them.

9. The system of supplying newspapers and periodicals through the Calcutta Stationery Office appears to be working well, the publications being supplied with regularity and punctuality. The number of newspapers supplied rose from 2,045 in 1891-92 to 2,716 in 1892-93, of periodicals from 2,193 to 3,195, and of books from 21,266 to 27,012. The total payment for the newspapers, &c., amounted to Rs. 97,587, against Rs. 68,987 in 1891-92. The cost of supplying these publications to officers under the Government of Bengal amounted to Rs. 13,824 against Rs. 9,364. The Lieutenant-Governor also notices that a considerable advance in the employment of rubber stamps is implied in the increase of expenditure from Rs. 11,843 in 1891-92 to Rs. 14,838 in 1892-93.

10. The Lieutenant-Governor notices with satisfaction the favourable mention made by the Board of the work of Mr. Barnes, the Superintendent of Stationery. When the Department is provided with sufficient space by the building of the new Stamps and Stationery Office in Calcutta, now under construction, and when the establishment is strengthened, as has been proposed, His Honour has no doubt that the administration of the Department will be still further improved.

By order of the Lieutenant-Governor of Bengal,

J. A. BOURDILLON,

Offg. Secretary to the Government of Bengal.

INVESTIGATIONS INTO SHIPPING CASUALTIES.

No. 2296Marine.

GOVERNMENT OF BENGAL—MARINE DEPARTMENT.

Dated Calcutta, the 2nd October 1893.

READ—

Marine Department Resolution No. 1Marine, dated 3rd January 1893.
Letter from the Vice-Chairman of the Port Commissioners, No. 1483, dated the 27th July 1893.

OBSERVATIONS.—In the Resolution read above it was decided that the duties imposed by section 6 of Act V of 1883 upon a Magistrate or other officer appointed on that behalf by the Local Government shall, as regards the port of Calcutta, be performed by the Port Officer to whom the reports required by sub-section 2 shall be made. On the receipt of such a report it would be the duty of that officer to hold an informal enquiry, exercising the powers conferred on him by section 9 of Act VI of 1891, and to submit a report to Government in the Marine Department.

2. The Port Commissioners of Calcutta have, however, represented that the Harbour Masters being part of their establishment, it is desirable that enquiries in the case of casualties to ships when in charge of Harbour Masters, shall be conducted by the Deputy Conservator of the Port rather than by the Port Officer, as eventually the opinion of the former officer is necessarily taken when the matter is considered by the Commissioners. Under the present arrangements enquiries are held (1) by the Port Officer on behalf of Government under the orders of the 3rd January 1893, and (2) by the Deputy Conservator on behalf of the Port Commissioners under departmental rules.

RESOLUTION.—Having given due consideration to the representation of the Port Commissioners, the Lieutenant-Governor has decided to appoint the Deputy Conservator of the Port to be the officer under section 6 of Act V of 1883 to receive reports of casualties to vessels when in charge of Harbour Masters, and the following revised orders for the procedure to be adopted are hereby issued.

2. The duties imposed by section 6 of Act V of 1883 upon a Magistrate or other officer appointed in that behalf by the Local Government shall, as regards the port of Calcutta, except in the case of a casualty to a vessel in charge of a Harbour Master, be performed by the Port Officer to whom the reports required by sub-section 2 shall be made. In the case of vessels in charge of Harbour Masters, the duties imposed by section 6 of Act V of 1883 shall be performed by the Deputy Conservator of the Port of Calcutta, to whom all casualties to vessels in charge of Harbour Masters should be reported. When such a report is received, or when it comes to the Port Officer's or Deputy Conservator's knowledge that a casualty as described in section 6 (1c) has occurred, it shall be the duty of the Port Officer or Deputy Conservator, as the case may be, to hold an informal enquiry, exercising the powers conferred on him by section 9 of Act VI of 1891, and to submit a report to Government in the Marine Department. The Lieutenant-Governor reserves the right of directing, in any special case, that the preliminary enquiry regarding a casualty to a vessel in charge of a Harbour Master shall be held by an officer other than the Deputy Conservator.

3. In the case of vessels between Garden Reach and Budge-Budge, when there is a collision between a vessel in charge of a Harbour Master and a vessel in charge of a pilot, the enquiry will be held by the Port Officer.

4. When the Deputy Conservator, as the result of his enquiry into a casualty, considers a vessel unsafe, he shall at once give notice to the Port Officer, who is the detaining officer.

5. The greatest possible expedition should be used in making the enquiry and submitting the report. In conducting the enquiry the following remarks by the Advocate-General should be borne in mind:—

"Under Act V of 1883, section 6, it becomes the duty of the officer appointed in that behalf, upon receiving credible information of the happening of any of the occurrences

mentioned in that section, to hold the abovementioned preliminary investigation. Clause 4 of this section (Act VI of 1891, section 9) furnishes him with ample powers of doing so without being in any way trammelled by the laws of evidence or the rules of procedure. Such an investigation ought, in my opinion, to be held in every case falling within the purview of section 6, and should be of such a searching character as to render the report to be thereon drawn up and submitted to the Local Government such a full and sufficient statement of the whole case as to enable that Government to determine whether it is requisite or expedient to direct the abovementioned formal investigation, and the Deputy Legal Remembrancer to conduct it if directed."

6. The following instructions given by the Board of Trade, which are in force in England, appear to be equally applicable *mutatis mutandis* to enquiries made in this country, and form directions which may usefully be taken note of by the Port Officer or Deputy Conservator in the case of the enquiries which are now directed to be made:—

"He will observe that he may, if necessary, examine upon oath, but he will probably seldom find it necessary or desirable to do so.

"In all cases when there is any point which it is important to establish, or any question of fact in dispute or doubt, he will take the evidence in writing.

"In every case, when the enquiry is concluded, the officer will send a report to the Board of Trade containing the result of the enquiry, and such of the evidence as may be important.

"In all cases of casualties arising from avoidable causes, the report and the statement of the evidence bearing on the point should be full and complete."

7. The report will assume one of two forms—

(1) It will be to the effect that no blame attaches to any one and no further enquiry is needed; or

(2) It will state that a further formal enquiry is necessary; that blame *primâ facie* attaches to some one, either Pilot, Master, Mate or Engineer of the ship, or Harbour Master of the Port, or that the circumstances attending the casualty point to some defect in the vessel.

In case (2) the Port Officer or Deputy Conservator will order the detention of such witnesses as are necessary for the proper elucidation of the facts.

8. If the Port Officer holds that *primâ facie* blame attaches to a Pilot, he shall appoint a Departmental Court of Enquiry composed of two Pilots and a Master of a mercantile ship.

9. If (1) the person implicated by the Port Officer's report (*vide* paragraph 7, clause 2 above) is a Master, Mate, or Engineer of a ship, or (2), in case of a Pilot, if Government, on the receipt of the report of the Departmental Committee under paragraph 8, consider an enquiry under Act V of 1883 to be desirable, or (3) if the casualty is stated to be due to some defect in the ship, the Local Government will appoint the Chief Presidency Magistrate and two persons to be a Special Court to hold a formal investigation under section 7 of Act V of 1883, and will direct the Court—

(1) if they find that a charge of incompetency or misconduct lies against a Pilot, to report at once to Government;

(2) if they find that such a charge lies against Master, Mate, or Engineer, to proceed as directed in sections 9, 11, 12, &c., of Act V of 1883.

10. If the report of the Special Court implicates a Pilot, the Lieutenant-Governor will decide whether to proceed against him departmentally, or whether he shall be tried under Act XII of 1859. In the latter case the Chief Presidency Magistrate will be the Judge of the Court, and there will sit with him as Assessors two Merchants of Calcutta and a Pilot of not less than twenty years' service, to be selected from the lists prepared and kept in the manner prescribed by section 6 of the Act, and the Master of a merchant ship lying in the port of Calcutta.

11. If the report of the Deputy Conservator (paragraph 7) or that of the Port Officer in the case of an enquiry held under paragraph 3, implicates a Harbour Master, the Port Commissioners should, in the event of a formal

enquiry under Act V of 1883 not being ordered, report to Government the orders passed thereon. If an enquiry under Act V of 1883 is held, the judgment of the Court will be forwarded to the Port Commissioners for such further action as they may consider to be necessary.

12. In all formal investigations carried out under Act V of 1883, or under Act XII of 1859, the Deputy Legal Remembrancer, or other suitable officer to be appointed by Government for the occasion, will appear before the Court on behalf of Government.

ORDER.—Ordered (I) that a copy of this Resolution be forwarded to the Commissioners for the Port of Calcutta and to the Deputy Conservator for information and guidance.

Ordered (II) that a copy of this Resolution be forwarded to the Port Officer, Chief Presidency Magistrate, and the Legal Remembrancer, for information and guidance, and to the Judicial Department of this Government for information.

Ordered (III) that a copy of this Resolution be published in the *Calcutta Gazette* for general information.

By order of the Lieutenant-Governor of Bengal,

C. W. ODLING,

Secy. to the Government of Bengal.

Rainfall, Weather, and State and Prospects of the Crops.

3	Birbhum „ 30, '93 Rampur Hát ...	2·15 4·75	Fine weather prevails. Rice crop looks fine, and a good harvest is expected everywhere. Price of common rice 10 to 14½ seers per rupee.
4	Midnapore „ 30, '93	4·81	Weather—cloudy and rainy at first; afterwards hot. Prospects continue good but the cyclone last week has probably done a good deal of damage ir Contai. Prices of common rice:— Srs. Sadar ... ... 12 } Contai ... ... 13 } per rupee. Tamluk ... ... 11 } Ghatal ... ... 10 to 11 }
5	Hooghly „ 30, '93 Serampore ... Jahanabad ...	0·95 2·46 7·91	Rain in early part of the week: fine weather and sunshine in latter part. *Aus* still being harvested. Jute being steeped. Sugarcane and *aman* doing well. Prospect in Khanakool (Jahanabad subdivision) bad, part of that thana being still under water. Fodder and water sufficient. Prices of common rice:— Srs. Sadar ... ... 11 } Serampore ... ... 10 to 11½ } per rupee. Jahanabad ... ... 11 to 12½ }
6	Howrah „ 30, '93 Ulubaria ...	0·35 2·54	Weather—getting warm. *Aman* paddy in the Ulubaria subdivision somewhat damaged. Condition of cattle good. Fodder and water-supply sufficient. Price of rice 10 seers per rupee.
PRESIDENCY DIVN.			
7	24-Parganas „ 30, '93	0·47	Weather—seasonable. Prospects of crops fair in the north of the district, but poor in the southern part, especially in the thana of Bankipore. Transplantation of *aman* and harvesting of *aus* and jute nearly over. Prices of common rice:— Srs. c. Sadar ... ... 10 to 11 0 } Barasat ... ... 11 0 } Basirhat ... ... 9 13½ } per rupee. Diamond Harbour ... ... 10 0 }
8	Nadia „ 30, '93 Kushtia ... Meherpur ... Chuadanga ...	2·28 4·76 4·87 2·78	Weather—hot and cool with occasional showers. Prospects of *aman* fair except in the Kushtia subdivision, where it is reported not favourable. *Kalai* and *mung* are being sown broadcast.
9	Khulna „ 30, '93 Bagerhat ... Satkhira ...	3·24 3·54 3·46	Heavy rain at beginning of week: finer towards the end. *Aman* transplantation nearly finished. Prospects good except in very low lands. Supply of fodder and water sufficient.
10	Jessore „ 30, '93 Jhenida ... Magura ... Narail ... Bangaon ...	0·98 4·17 3·81 2·93 1·15	Weather—cloudy and rainy at the beginning of the week. Harvesting of *aus* and jute nearly finished. Prospects of *aman* fair. Lands being prepared for winter crops. Rivers going down slowly. Plenty of fodder and water for cattle. Prices steady.
11	Murshidabad „ 30, '93	3·90	Weather—hot and cloudy at times with occasional rain. The rain has done some good to *aman* plants. Cutting of jute finished. Mulberry still being cut. Sugarcane doing well. Fodder sufficient for cattle. Common rice sells at 11½ seers per rupee. No cattle-disease reported except a few cases of small-pox from Jangipur.

	No.	District and date of return.	Rainfall at Sadar Station in inches.	Character of the weather and state and prospects of the crops.
BENGAL—*concld.*				
	12	Chittagong ...	...	Report not received.
CHITTAGONG DIVN.	13	Noakhali Sept. 30, '93	2·80	Weather—seasonable. Reaping of early *aman* has commenced in the islands. Transplantation of late *aman* still going on in the main land. Prospects excellent. Fodder is available in sufficient quantities, and cattle-disease is abating. Prices of common rice:— Srs. c. Noakhali ... 9 4; Feni ... 8 8 per rupee.
	14	Tippera " 30, '93	2·91	Weather—seasonable. Occasional foggy mornings. Harvesting of jute and transplantation of *aman* going on briskly. *Aman* seedlings selling at more than 20 times its ordinary price. Labour in great request. Prospects of *aman* have improved greatly, and the late rain has done much good to it. Common rice selling at 8 to 9 seers per rupee. Fodder not yet sufficient. Water gone down about 5 feet.
	15	Chittagong Hill Tracts. " 29, '93	0·91	Weather—seasonable. Harvesting of *aus* paddy in *jums* over. Very little quantity of vegetables available in the bazar. Condition of cattle generally good. Common rice selling at 8 seers 14 chitaks per rupee.
DACCA DIVN.	16	Dacca " 30, '93	2·90	Weather—hot with occasional rain. Harvesting of jute nearly finished. *Rowa* and *shail* paddy being sown. Prospects of *aman* fair, but it is being damaged by a kind of insect in some places in Srinagar thana in the Munshiganj subdivision. Common rice selling at from 7 to 9 seers per rupee. Fodder not sufficiently available. No cattle-disease.
	17	Faridpur .. 30, '93 Goalundo ... Madaripur ...	1·43 2·72 2·15	Weather—at first stormy: now fine. Prospects of crops unchanged. Water subsiding. Rice sells at 9 to 10 seers per rupee, imports being plentiful. Fodder-supply improving. Still some cattle-disease at Palong.
	18	Backergunge " 30, '93	3·25	Weather—seasonable. State and prospects of crops fair, except in the flooded tract. Common rice selling at from 8 to 9 seers per rupee. Fodder and water sufficient.
	19	Mymensingh " 30, '93	5·88	Weather—cloudy and rainy. State of standing crops very fair. Common rice selling at 8 to 9 seers per rupee. Condition of cattle good except in the Netrakona subdivision. Fodder available except in Kishorganj, where the supply is insufficient.
RAJSHAHI DIVN.	20	Dinajpur " 30, '93 Thakurgaon ..	8·64 13·07	Weather—hot and cloudy with occasional showers. Heavy rain in the north of the district. Prospects favourable. Prices of rice both at Sadar and Thakurgaon stationary. *Bhadoi* rice selling at Sadar from 12 to 13 seers per rupee. Condition of cattle good. Fodder and drinking water sufficient.
	21	Rajshahi " 30, '93 Nator .. Naugaon ...	1·82 2·69 5 49	Weather—hot; sunshine at intervals. Prospects generally good. *Bhadoi* has given a fair outturn. Fodder and water-supply ample. No cattle-disease. Rice selling at from 9 to 11 seers per rupee.
	22	Rangpur " 30, '93 Kuriganon ... Gaibanda ... Nilphamari ...	12·49 8·79 3·76 9·46	Heavy rain during the week. Transplanting of *aman* is now finished. Prospects very favourable. Jute steeping in progress; 16 annas outturn may be expected. Average price of rice about 10 seers per rupee.
	23	Bogra " 30, '93 Sherpur ... Naukhila ...	6 75 4·16 5·75	Weather—unsettled. Transplantation of *aman* finished. Prospects good. Common rice 9 to 10 seers per rupee. Fodder and water sufficient.
	24	Pabna " 30, '93	3·00	Weather—seasonable. Partially cloudy and rainy. Prospects of *aman* rather improved by the late showers. Price of common rice at Sirajganj Rs. 4-12 per maund and at Pabna 9¼ seers per rupee. Fodder and water-supply sufficient.
	25	Darjeeling " 30, '93 Siliguri ...	14·54 9·09	Weather—cloudy and wet at beginning of week. Bright towards the close. *In the hills:—Bhadoi* paddy and *bhutta* being harvested. *Haimanti* paddy, *phaphur, kalai* and *bara marua* progressing favourably. *Chota marua* has been harvested. *In the Terai:*—Jute steeping continues. *Bhadoi* harvested. Prospects of *aghani* favourable. Prices of coarse rice:— Srs. Hills ... 9; Terai ... 10 per rupee.
	26	Jalpaiguri " 30, '93	11·75	Weather—seasonable. Prospects of *haimanti* paddy good. Washing of jute continues. Common rice sells at Sadar at 11 seers per rupee. Fodder and water-supply sufficient. No cattle-disease reported.

	No.	District and date of return.	Rainfall at Sadar Station in inches.	Character of the weather and state and prospects of the crops.
BIHAR.				
Bhagalpur Divn.	27	Monghyr Sept. 30, '93 Begusarai ... Jamui ...	6·14 6·13 3·34	Weather—very stormy with excessive rain. *Bhadoi* harvest finished. Prospects of winter rice good. *Kurthi* and sugarcane look promising. Lands being ploughed for *rabi* and indigo. Cattle-disease at Ballia, Kharakpur, Nawadih, and Sheikpura. Ample fodder and water. Prices of common rice:— Srs. Sadar ... ... 11 to 15 } Begusarai ... ... 12 to 13 } per rupee. Jamui ... ... 12 }
	28	Bhagalpur .. 30 Banka ... Madhipura ... Supaul ...	5·78 3·02 5·48 7·34	The late rain has done some harm to *kurthi* and *marua* in the north, but prospects of winter rice are excellent.
	29	Purnea „ 30, '93 Kishanganj .. Araria ...	10·99 11·33 14·09	Heavy rain during the first part of the week. This rain has done good to the standing crops. Prospects excellent everywhere. Fodder and water sufficient. No cattle-disease. Price of rice stationary.
	30	Malda „ 30, '93	3·49	Weather—cloudy and damp in the first part of the week: latterly fine. Extraordinarily heavy rain fell in the north of the district. Winter rice coming into ear. Sowing of *kalai* on low lands has been stopped on account of rising of the river. Price of ordinary rice varies from 11 to 17 seers per rupee. Fodder and water ample.
	31	Sonthal Parganas .. 30, 93 Deoghur ... Godda ... Jamtara .. Pakur ... Rajmahal ...	3·23 1·56 5·91 1·96 8·03 11·22	Rain during the early part of the week. Weather now hot in the day and cool at night. Prospects of paddy crop continue favourable. *Kalai* damaged to some extent in the Rajmahal subdivision owing to rise of the Ganges. Supply of fodder insufficient at Sahebganj. Cattle-disease still reported from the Godda subdivision. Price of rice stationary.
Patna Division.	32	Patna .. 30, '93 Barh ... Bihar ... Dinapore ...	3·08 4·19 2·39 3·52	Weather—rainy during the first part of the week, but clear and cool during the latter part. The recent heavy rain has probably ensured a bumper rice crop. Tobacco doing well. Early spring garden crops being sown. Prices of common rice:— Srs. Sadar ... ... 15 } Barh ... ... 13 } Bihar ... ... 15 } per rupee. Dinapore ... ... 13 }
	33	Gaya .. 30, 93 Aurangabad ... Jahanabad ... Nawada ...	1·90 4·74 2·78 3·71	Weather—fair and growing cooler. Prospects of paddy crop favourable. Weeding going on. Prices of rice:— Srs. Gaya ... ... 13 } Aurangabad ... . 14½ } Jahanabad ... ... 12½ } per rupee. Nawada ... . 16 } Supply of fodder and water ample.
	34	Shahabad .. 30, '93 Buxar ... Bhabhua ... Sasaram ...	5·15 1·36 4·80 3·17	Fine clear weather with light westerly winds. The young paddy has been damaged to some extent in the south by excessive rainfall. On the whole, however, prospects are excellent.
	35	Darbhanga „ 30, '93 Madhubani ... Samastipur ...	6·19 3·98 8·04	Weather—rainy during first four days of the week; fair in the latter part. The heavy falls of rain this week have benefited the rice crop. A break for some days is wanted to facilitate the preparation of lands for *rabi* and the planting of tobacco and *alua*. Prices of Indian-corn and *marua* have fallen. Common rice selling at 14½ seers per rupee. Fodder for cattle sufficient.
	36	Muzaffarpur „ 30, '93 Hajipur .. Sitamarhi ...	4·15 4·05 7·09	Weather—rainy, cloudy at times, and hot. Retransplantation of paddy nearly finished in the Sitamarhi subdivision. The recent rain has done much good to standing crops. Harvesting of *bhadoi* crops almost over. No cattle-disease. Fodder and water for cattle sufficient. Prices almost stationary.

Division	No.	District and date of return.	Rainfall at Sadar Station in inches.	Character of the weather and state and prospects of the crops.
BIHAR—concld.				
Patna Division—concld.	37	Saran Sept. 30, '93 Siwan ... Gopalganj ..	5·17 4·45 5·00	Weather—stormy and then fine. State and prospects of crops excellent. Price of common rice. Srs. c. Chapra ... ... 15 0 per rupee Siwan ... ... 14 12 per rupee Gopalganj .. .. 16 0 per rupee Fodder and water plentiful.
	38	Champaran „ 30, '93	9·83	Weather—cloudy and rainy throughout the week except to-day (30th) when the sky looks clear. The flood again appeared in this week owing to the rise of the Sikhrana. Portion of the Segowlie bridge has been washed away. The water is draining off quickly. At present the extent of damage cannot be correctly estimated, but it appears it was not much. Prices stationary. Fodder and water sufficient.
ORISSA.				
Orissa Divn.	39	Cuttack „ 30, '93	1·20	Weather—days warm, nights cool. *Satika biali* being gathered. *Bara biali* ripening. Weeding of *sarad* in progress. Fodder sufficient. Prices of common rice:— Srs. c. Srs. c. Sadar ... ... 10 8 to 13 2 per rupee. Jajpur ... ... 13 2 to 17 0 per rupee. Kendrapara ... ... 13 2 to 22 0 per rupee. Banki ... ... 15 12 per rupee.
	40	Puri „ 28, '93 Khurda ...	2·44 5·61	Weather—stormy with occasional showers. *Biuli* being reaped. *Sarad* and *laghu* being weeded. State of miscellaneous crops good. Prices of common rice:— Srs. c. Srs. c. Sadar ... ... 12 8 to 14 1 per rupee. Khorda ... ... 11 0 to 18 6 per rupee.
	41	Balasore „ 30, '93	3·57	Weather—fine; occasional but not daily showers. A break of two days at a time. Fine weather twice this week has done much good. Transplantation finished; 12 annas rice crop may be expected. Prices stationary.
CHOTA NAGPUR.				
South-West Frontier Agency.				
Chota Nagpur Divn.	42	Hazaribagh Sept. 30, '93 Giridi ...	3·06 1·59	Weather—seasonable. Paddy and sugarcane doing well. Miscellaneous crops fairly good. Lands being ploughed for *rabi* sowings. Water and fodder abundant. Cattle-disease reported from Hunterganj.
	43	Lohardaga „ 30, '93	1·59	Weather—seasonable. Reaping of *gora* paddy nearly finished. Prospect of winter rice continues good. Common rice selling at 15 seers per rupee. Fodder and water sufficient.
	44	Palamau „ 29, '93	3·91	Heavy rain and wind. It cleared off on the 26th. The rain has been general, and no more is now required for the *aghani* crop which should be a full one. *Bhadoi* paddy is also a full crop, and cotton, *til*, sugarcane, and *kurthi* all promise very well. Ploughing and sowing of *rabi* going on. Rice selling at from 11 to 16¼ seers per rupee. Fodder and water-supply ample.
	45	Singhbhum „ 30, '93	1·15	Weather—seasonable. Cold weather setting in. Standing crops doing excellently. Price of rice falling. Cattle-disease reported from Bahragora in Dhalbhum.
	46	Manbhum „ 30, '93 Gobindpur ...	1·20 3·36	Weather—rainy in early part of week; now settled, fine. The bright dry weather will do much good to all standing crops, the prospects of which are so far good. Prices stationary.

* Mean of 6 days.

Explanation.—Summary.—The normal means of air pressure and temperature are the arithmetical average or means of the reading during the same period

The *humidity* of the atmosphere is expressed at percentage, saturated air being presented by 100. A clear sky is denoted by 0 and an overcast sky by 01

rainfall the normal mean are the numerical means or average of the rainfall in that district determined from the returns sent in by the subdivisional station

district, *i.e.* from total rainfall at the subdivisional stations in the district sending in returns divided by the number of stations. A rainy day is one of

for the week ending Saturday, the 30th of September 1893.

Variation from normal mean.	Mean 8 A.M. temperature.	Average humidity at 8 A.M.	Average cloud amount at 8 A.M.	Rainfall of week at observing station.	DISTRICT OBSERVATIONS. Of week. Mean for district.	Normal mean.	Average number of rainy days.	Normal number of rainy days.	Rainfall. Since 1st of month. Mean for district.	Normal mean.	Variation.	Since 16th May 1893. Mean for district.	Normal mean.	Variation.	District.

Explanation.—... indicates hat no rain has fallen. If the return for any day has not been received, he corresponding space is left blank. If any of the returns are wanting, the corresponding spaces in the total rainfall columns are left blank. With reference to the column of rainy days, the definition of a rainy day is when at least 0·1 inches of rain has fallen.

CALCUTTA, *the 30th September* 1893.

SUMMARY OF THE METEOROLOGICAL AND RAINFALL OBSERVATIONS TAKEN IN BENGAL, AND OF THE METEOROLOGICAL OBSERVATIONS TAKEN IN ASSAM, FOR THE WEEK ENDING 8 A.M., SATURDAY, THE 30TH OF SEPTEMBER 1893.

As stated at the end of the summary of the weather of the previous week, the depression which had crossed the Orissa coast moved in a north-westerly direction, the centre never being far from the western boundary of the province. On the 24th, the first day of the present week, the area of lowest pressure extended over Chota Nagpur, and stormy weather was general in all districts of the province. Rainfall was not very heavy, but it was well distributed, varying from one to four inches. On the following day the path of the centre of disturbance changed to north-east, a direction which brought it into the west of Bihar. Defect at Buxar was more than ·4 inch, and at Arrah more than ·3 inch, so that the depth had not diminished more than a tenth of an inch during the two days that had elapsed since the centre crossed the coast. Unusually stormy winds were reported from the Bihar stations, and heavy rain fell in the northern districts. In Orissa rainfall had entirely ceased, and it was becoming partial in South-West Bengal and Chota Nagpur. Continuing its north-easterly course, the depression broke up on reaching at the Himalayas, and on the following day very little trace of its existence remained. As is usual in such cases, very heavy rain fell along the hills and in the neighbouring plains. The heaviest falls of rain reported on the 26th occurred in the Darjeeling Hills, Purnea and Champaran. After the depression ceased to exist weather improved rapidly. General moderate rain continued in the northern districts on the 27th, but on the 28th it was confined to North Bengal and the adjacent part of East Bengal, where a slight residual depression caused light scattered showers.

As pressure rose rapidly after the passage of the depression, and at the same time a fall commencing in the east, spread gradually towards the west, the distribution became very uniform, and calm weather prevailed. The fall of pressure continued till the 28th, and a shallow depression, which appeared over Burma, became more distinct on the 29th in consequence of the brisk increase in Bengal. Barometric readings on the 30th were lowest in the south of Burma and gradually increased towards the north-west, where they were nearly a tenth of an inch higher. Following this distribution light north-westerly winds became general over the province and the north of the Bay, and fine, dry, almost cloudless weather, prevailed.

Pressure.—During the early part of the week large changes of pressure occurred in the western districts till the depression broke up on the 26th. On the 24th there was a rise in Orissa varying from ·1 to ·35 inch, and a fall in Chota Nagpur of about 15 inch. On the 25th the rapid rise continued in Orissa and extended to Chota Nagpur, while in the west of Bihar the fall was ·25 inch. On the following day the depression had almost disappeared, the rise in the west of Bihar being very little under ·4 inch. On the 27th and 28th a fall prevailed except in the north-western districts, where the rise continued, but during the last two days of the week a general rise again set in and the distribution became practically normal Means for the week are below the normal everywhere by amounts varying from ·02 inch in Orissa to ·1 inch in the west of Bihar.

Temperature.—While the stormy weather prevailed, temperature, especially during the day, was very low, defect at times being nearly 10°. On the 24th mean defect was everywhere between 3° and 5°, on the 25th it varied from half a degree in the south of Orissa to 8° in parts of Bihar, and on the 26th, in Bihar and part of North Bengal, it averaged 8°. As the sky began to clear after the filling up of the depression, the defect, though still large in Bihar on the 27th, began to diminish, and on the 28th it was generally under 3°. On the 29th and 30th the difference from the normal was small, there being a small excess in Lower Bengal and a small defect in the northern districts. The means for the week are all below the normal, and defect in the larger divisions varies from a fifth of a degree in Orissa to nearly 4° in North Bihar.

Rainfall.—General rain fell on the first day of the week in all districts. On the second it had almost entirely stopped in Orissa, and on the following day in South-West Bengal and Chota Nagpur. During these days very heavy rain fell in North Bengal and Bihar. The mean falls for the week are above the normal except in Orissa, where the moderately heavy rain on the 24th gave an average for the week of about ·8 inch. In East Bengal the fall is slightly above the normal, and in South-West Bengal and Chota Nagpur by between a half and one inch; but in North Bihar, with an average fall of 6·74, there is excess of more than 4 inches, and in North Bengal nearly as much. In South Bihar excess is nearly 2 inches.

The following places received more than 10 inches during the week:—Chanchal and Gajol in the Malda district; Churaman and Thakurgaon in Dinajpur; Rangpur, Jalpaiguri, Alipur Duar and Fallacotta; Kuch Bihar, Mickliganj and Matabhanga; Darjeeling, Kalimpong, Kurseong and Pedong; Kishanganj, Araria and Purnea. The falls at many other stations in the northern districts were very little under 10 inches.

The following table gives the summary of the temperature and rainfall data of each of the seven meteorological divisions of the province for the week ending Saturday, the 30th of September 1893:—

Meteorological Divisions	Temperature. Highest observed during week.	Lowest observed during week.	Averages for week. Of highest of each day.	Of lowest of each day.	Of mean for each day. The highest velocity of the wind in one hour	20
	lbs.
The highest pressure of wind on one square foot	?
	%
The mean relative humidity	85
The average relative humidity of the corresponding period for 24 years, Surveyor-General's Office	85
	Inches.
The total fall of rain from 24th to 30th September 1893	0·22
The average fall of the corresponding period for 24 years, Surveyor-General's Office	1·76
The total fall from 1st January to 30th September 1893	77·86
The average fall of the corresponding period for 24 years, Surveyor-General's Office	58·82

The mean pressure, temperature, &c., are deduced from the traces of the Barograph and Thermograph and from observations made at 6h, 10h, 16h, and 22h.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed open at the sides and are suspended four feet above the ground.

The barometer readings are corrected approximately to those of the standard, Newman's No. 86, formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed in the Meteorological Office, and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground.

o, overcast; g, gloomy; d, drizzling rain; p, passing temporary showers; ⌓, dew.

FIRST FORECAST OF THE BHADOI CROPS IN BENGAL, 1893.

THE following is published for general information.

REVENUE DEPT.,
The 3rd October, 1893.

M. FINUCANE,
Offg. Secy. to the Govt. of Bengal.

First Forecast of the Bhadoi crops in Bengal, 1893 (*to the end of August*).

[The district returns appended to this note include for the first time a forecast of the *bhadoi* crops in Angul and the Khondmals.]

1. *Explanatory.*—An attempt has been made to exhibit in these returns the area and outturn of each principal *bhadoi* crop grown in each subdivision in Bengal. The estimates of areas under the different crops are, however, little better than guesses. It will be seen that the total area cropped in the *bhadoi* season (exclusive of the area under winter rice) has been estimated at about 16 million acres out of the total estimated cultivated area in these Provinces, which is shown as 55 million acres. The most important *bhadoi* crops are bhadoi paddy, Indian-corn and millets; these occupy about two-thirds of the total area under *bhadoi* crops; next in point of importance are jute and indigo. Of the total area under *bhadoi* food-crops, *bhadoi* paddy occupies about 70 per cent., and maize and millets about 30 per

cent. *Bhadoi* or *aus* paddy predominates in Bengal and Orissa, where very little maize and millets are grown, while in Bihar and Chota Nagpur maize and millets are grown on large areas.

2. *Character of the season.*—The present season has been characterized by abnormally heavy rainfall in every part of these Provinces, and by destructive floods in East Bengal and North Bihar. The earlier months of the year, namely, from January to April, were unusually wet, and although the frequent and abundant showers which fell during this period were favourable on the whole to the preliminary operations of cultivation, they prevented much of the low-lying areas from being brought under cultivation. During May and June, when the sowing and weeding operations were in progress, the weather was unfavourable. Except in a few districts of North Bengal and North Bihar, the rainfall during these months was exceedingly heavy; the growth of the young crops was checked in consequence, while in some parts the crops in low-lying lands suffered from accummulation of water. In July, except in Orissa and South-West Bengal, the rainfall was above the normal. During August, the rainfall was generally short of the normal, but during this month and the early part of September many of the districts in East Bengal, and parts of Darbhanga, Muzaffarpur, and Champaran in North Bihar, were visited by destructive floods. The present season much resembles that of 1890, when the *bhadoi* crops were largely destroyed by heavy rain and floods.

3. *Area sown.*—The total area sown with *bhadoi* crops this year is estimated at 15,609,429 acres, against 15,940,478 acres sown last year. Taking, therefore, these Provinces as a whole, the area sown does not seem to be much below that of last year. There are, however, several districts and sub-divisions where large proportions of the usual *bhadoi* areas could not be sown on account of excessive rain, or were destroyed later on by floods. The localities so adversely affected are shown in a statement (Appendix II) appended to this note.

4. *Character of the crops.*—The *bhadoi* food-crops, including paddy, maize, and millets, have been more or less damaged by excessive rainfall in almost every district in Bengal, and in some places also by floods. Only a few districts and sub-divisions* have reported either a full or more than a full crop. A statement (Appendix III) is annexed to this note, showing the districts or sub-divisions in which the food-crops have suffered to the extent of 8 annas and upwards. Taking Bengal as a whole, the outturn of the food-crops may be estimated at about $\frac{11}{16}$ths of an average outturn. Except in Orissa and parts of Northern and Western Bengal the crop is on the whole a much poorer crop than that of last year, which was estimated as a full average crop of 16 annas.

Separate reports have been already published about the jute crop of this season, and it is thought unnecessary to refer to this crop again.

* Bankura, Birbhum, Sadar (Hooghly), Basirhat (24-Parganas), Ranaghat (Nadia), Sadar (Murshidabad, Dinajpur), Sadar (Rajshahi), Nilphamari (Rangpur), Siliguri (Darjeeling), Jamalpur (Mymensingh), Gopalganj (Saran), Bhagalpur, Purnea, Malda, and Banki (Cuttack).

B. C. BASU,

Assistant to the Director of the Department of Land Records and Agriculture, Bengal.

COUNTERSIGNED.

W. C. MACPHERSON,

Offg. Director of the Dept. of Land Records and Agriculture, Bengal.

The 24th September 1893.

APPENDIX I.

Preliminary forecast of Bhadoi crops, to end of August 1893.

1	2	3	4	5	6	7	8	9	10	11	12
DISTRICT.	Sub-division.	Total area of sub-division in acres.	Total area estimated to be under cultivation in acres.	Name of crop	Approximate normal area under each *bhadoi* crop in acres.	Approximate area under each of the last year's *bhadoi* crops in acres.	Estimated area under each of this year's *bhadoi* crops in acres.	Taking 16 annas to represent the average outturn, how many annas represented outturn last year?	Taking 16 annas to represent the average outturn, how many annas will represent this year's outturn?	Remarks by the District Officers.	Remarks by the Department of Land Records and Agriculture, Bengal.
								Annas.	Annas.		
Burdwan ...	Sadar	794,880	635,500	Bhadoi paddy	84,480	77,768	84,480	8	14	Owing to the sufficient rainfall this year, a fair outturn of bhadoi crop is expected.	The figures returned for area under jute for several districts do not agree with those given in the jute forecasts published by this Department. As it is not clear in all cases whether Collectors rely on later information or not, their figures submitted for the purposes of this return have been left without alteration. In the final report on bhadoi crops of 1892, the area under jute in Kalna was shown as 1,000 acres. The Collector is requested to report in the final bhadoi crop report, whether such a large area as 10,000 acres was sown in jute this year.
				Ditto pulse	2,420	1,620	2,000		12		
				Jute . ..	670	372	450		10		
				Hemp	630	150	450		10		
				Til (gingelly)	758	610	500		12		
	Total	794,880	635,500	All bhadoi crops ...	88,958	76,900	87,880	8	12		
	Kalna . .	276,480	224,000	Bhadoi paddy .. .	64,000	64,000	64,000	14	12	Expected outturn was 16 annas, but about 25 per cent. of the crop sown late was submerged too early for reaping.	
				Jute	10,000	10,000	10,000	14	8	Damaged by excessive rainfall.	
				Indigo	4,000	4,000	4,000	16	8	In the last year's return no area under jute was shown in this forecast for Kalna, but this year 10,000 acres have been shown.	
	Total ...	276,480	224,000	All bhadoi crops ...	78,000	79,000	79,000	15	9½

(a) 430,436	(a) 430,336	386,273	12	10	(a) The difference between the figures shown here and those reported in the last year's forecast is due to the adjustment of the area under "jute" and "millet," with reference to the forecast of jute crop for the current year, and the estimate of outturn of rabi crops for 1892-93. The abnormal rainfall during ploughing and sowing season affected the area under bhadoi crops and the outturn of jute, indigo and paddy. The excessive rains in June and July last submerged a large tract of land sown with jute and paddy in the Kushtea and Meherpur sub-divisions.

Jessore ...	Sadar ...	568,960	304,000	Bhadoi paddy ...	135,200	133,600	120,000	18	12	The decrease in area sown with bhadoi paddy, jute, til and miscellaneous crops as compared with normal and last year's is due to heavy rainfall at the sowing season. The decrease in outturn is due to injury caused to the crops by heavy and incessant rains. The increase in the normal area under bhadoi paddy is due to the fact that the area previously grown with indigo, which has ceased to be cultivated, is now brought under cultivation of this crop.	
				Jute	800	800	600	16	6		
				Indigo	......	1,600	...	16	...		
				Til (gingelly)	1,000	1,000	500	6	6

	Total ...	568,960	304,000	All bhadoi crops ...	137,800	137,500	131,000	16	8		
	Magura ...	272,000	171,520	Bhadoi paddy ...	39,384	38,706	38,000	18	14	Paddy.—The area cultivated and the outturn are reported to be less than those of the last year, which was a bumper year here in every way. The excessive rainfall at the sowing time and during May and June did some damage, but the favourable weather in July and August has improved the crop beyond all recognition. Indigo has been a miserable failure, the cold and rain in May and June quite stopping the plant's growth. Excessive rainfall accounts for the bad jute crop, much of it has never grown at all. Til was	
				Jute	3,540	4,480	2,540	16	8		
				Hemp	50	50	40	16	8		
				Indigo	2,056	2,094	2,056	6	3		
				Til (gingelly)	600	600	400	4	12		
				Miscellaneous (not included in the above.)	150	150	150	16	12		

Total ...	272,000	171,520	All bhadoi crops ...	46,080	46,080	43,486	13	10	slightly damaged by xcessive rain. The decrease in the area under jute, hemp, and til is due to heavy rains at sowing season.
Jhenida ...	304,000	204,800	Bhadoi paddy ..	16,000	16,000	16,000	20	8	On account of constant rains the outturn falls much below the average. The area under indigo as shown in columns 6 and 7 has been revised after careful enquiry.
			Jute	10,000	10,000	10,000	16	8	
			Indigo	12,026	12,026	12,026	10	6

Bangaon ...	415,360	248,960	Bhadoi paddy.. ...	106,000	[illegible]	[illegible]	16	12	The figures shown in columns 6 and 7 against indigo differ from those given in the final forecast of 1898, owing to revision based on minute and careful enquiry.
			Bhadoi pulse	8,654	[illegible]	6,000	12	5	
			Jute	8,320	7,680	7,800	16	4	
			Indigo	(a)3,717	(a)3,444	2,800	8	4	The area sown this year with bhadoi paddy, bhadoi pulse and indigo are below normal and last year's owing to excessive rain at the sowing season. Jute shows slight increase over last year's area and calls for no explanation, but the decrease as compared with normal is attributed to heavy rains. The area under til is larger than in the preceding year, but below normal. No explanation has been submitted by the Sub-divisional Officer of this variation. The increase as compared with last year's may, however, be attributed to the season being more favourable to the sowing of this crop. The decrease in the area under miscellaneous crops as compared with normal may be attributed to the heavy rainfall of the year. The fall in the outturns of bhadoi paddy, bhadoi pulse, jute, and indigo is attributed to excessive and incessant rain which destroyed the young plants or stunted their growth. The slight increases in the outturns of til and miscellaneous crops call for no comments.
			Til (gingelly)	4,326	2,000	4,000	6	8

Approximate area under each of the last year's bhadoi crops in acres.	Estimated area under each of this year's bhadoi crops in acres.	Taking 16 annas to represent the average outturn, how many annas represented outturn last year?	Taking 16 annas to represent the average outturn, how many annas will represent this year's outturn?	Remarks by the District Officers.	Remarks by the Department of Land Records and Agriculture, Bengal.
Mymensingh —*concld.*	Kishoreganj ...	476,160	224,000	Bhadoi paddy	64,000	57,600	57,600	Annas. 10	Annas. 10	Owing to the incessant heavy rain in May last, the area cultivated this year has been smaller than the normal area under cultivation; but the area brought under jute cultivation this year is greater than that of last year owing to the high prices of jute. As in the early part of last year, considerable damage was done by excessive rainfall at the weeding time and also some damage was done by early flood.	
				Jute	57,600	44,800	45,000	12	8		
	Total ...	476,160	224,000	All bhadoi crops ...	121,600	102,400	102,600	11	9		
	Jamalpur ...	817,752	627,200	Bhadoi paddy	60,700	25,000	25,000	8	17	This year's outturn is much better than last year's owing to the seasonable and sufficient quantity of rainfall during the current year. The outturn would have been a bumper one had not there been excessive rain and flood which occurred lately. The area under cultivation of each bhadoi crop is the same as of the last year, except of jute, which was cultivated under increased area by about 4,000 acres for seasonable rainfall, and also for better prospect. The cultivation in jute is gradually increasing here year by year.

DISTRICT.	Sub-division.	Total area of sub-division in acres.	Total area estimated to be under cultivation in acres.	Name of crop.	Approximate normal area under each *bhadoi* crop in acres.	Approximate area under each of the last year's *bhadoi* crops in acres.	Estimated area under each of the this year's *bhadoi* crops in acres.	Taking 16 annas to represent the average outturn, how many annas represented outturn last year.	Taking 16 annas to represent the average outturn, how many annas will represent this year's outturn?	Remarks by the District Officers.	Remarks by the Department of Land Records and Agriculture, Bengal.
								Annas.	Annas.		
Darbhanga	Sadar	782,080	594,560	Bhadoi paddy	26,112	26,112	26,112	16	4	Favourable and timely rainfall during the sowing season helped the raiyats to cultivate bhadoi crops as in ordinary years, but the late excessive rainfall followed by unprecedented flood caused severe damage to the bhadoi crops of almost the whole Sadar Sub-division. The average outturn is roughly estimated at 4 annas.	
				Millets	73,894	73,894	73,844				
				Indian-corn (maize).	31,770	31,770	31 770

Taking 16 annas to represent the average outturn how many annas will represent this year's outturn?	Remarks by the District Officers	Remarks by the Department of Land Records and Agriculture, Bengal.
Monghyr—*concl.*	Whole district	2 509,440	1 582 800	Bhadoi paddy	739,600	111,320	108,200	Annas 15½	Annas 9	Owing to excessive rain the outturn is less than last year's. The decrease of area sown is in Jamui sub division and the reason assigned for this is that owing to rain, usual area could not be sown.

								Annas.	Annas.		
Purnea ...	Sadar	1,646,080	790,000	Bhadoi paddy ...	280,000	280,000	290,000	16	15	The rainfall during the ploughing, sowing, and weeding seasons was more than was necessary resulting in early floods which damaged to a certain extent the crops on the low lands. This loss, however, has to a great extent been made up by the bumper outturn of the high lands. The increase in area is due to extension of cultivation.	
				Indian-corn (maize) ..	3,500	4,000	4,500	16	13		
				Bhadoi pulse	2,500	2,000	2,500	16	16		
				Jute	5,000	5,000	6,000	16	14		
				Indigo	37,000	37,000	38,000	16	12		
				Miscellaneous (not included in the above.)	20,000	20,000	20,000	16	16		
	Total ..	1,646,080	790,000	All bhadoi crops ...	348,000	348,000	361,000	16	14½		
	Kishanganj ...	857,600	530,000	Bhadoi paddy... ...	109,400	101,200	101,200	18	18	After the plants came up, there was too much sunshine which caused some injuries to them. The excessive rain in June 1893, which caused too much accumulation of water in the field, interfered with the thriving of the stems which became much shorter and thinner than in the past year. This contributed to reduce the outturn as compared with that of last year.	
				Jute	34,000	33,000	33,000	18	14		
		857,600	530,000	All bhadoi crops .	143,400	134,200	134,200	18	16		
	Araria .. .	668,100	419,000	Bhadoi paddy	160,000	160,000	160,000	16	16	There has been a sufficient and timely rainfall this year. The outturn would have been even above 16 annas had it not been for floods from the Kusi river which damaged the crops to a certain extent in riparian tracts.	
				Jute	8,000	8,000	8,000	16	16		

				Indigo	100	100	100	16	10	The low outturn of indigo is due to damage from flood.

Puri .	Sadar	979,200	460,800	Bhadoi paddy ..	47,300	47,300	45,400	7	8	The reason of increase in columns 4 and 6 is that some new land has been brought under cultivation in Khurda. The cultivation of cotton and mandia decreased in consequence of excessive rainfall in May. Last year the outturn was small in consequence of deficient rainfall and damage done by floods. This year the excessive rainfall in May retarded sowing in Sadar. It did not affect Khurda, the lands there being high.
				Millets mandia or ragi.				6	9	
	Total	979,200	460,800		47,300	47,300	45,400	6½	9½

WORKING OF CHARITABLE DISPENSARIES IN BENGAL DURING THE YEARS 1890—92.

MUNICIPAL DEPARTMENT. MEDICAL—No. 925T.M.

Darjeeling, the 3rd October 1893.

RESOLUTION.

READ—

The Triennial Report on the working of the Charitable Dispensaries in Bengal for the years 1890, 1891, and 1892.

Read also—

The Triennial Report for the years 1887, 1888, 1889, the annual returns for 1890 and 1891, and the Resolutions recorded upon them.

The present report has been submitted under the triennial system, being the second of that series, and therefore contains much more matter than the brief reports which, in each of the last two years, have accompanied the figures of the previous twelve months: this is no doubt one reason for the delay in the submission of the report which did not reach Government till long after the due date. During the three years under review, the medical administration of the Province has undergone several improvements: not only has the number of dispensaries greatly increased, but at some places separate hospitals have been established for the treatment of female patients, the Dispensary Manual has been thoroughly revised, and there has been a large increase in surgical operations. On the whole, there has been throughout the Province a general and satisfactory development of medical administration.

2. *Number of dispensaries.*—The number of dispensaries has increased from 261 on the 31st December 1889 to 310 at the end of 1892. Almost all the new institutions belong to classes II and III, viz., other than purely State dispensaries—a circumstance which indicates that local bodies and private individuals have shown greater interest in affording medical relief to the people; indeed the number of dispensaries maintained solely from local funds advanced from 125 to 160. Looking to the large population of the Province, however, the number of existing dispensaries is still far too small to meet the requirements of the people. The figures in the margin give for each Division the number of persons to each dispensary, and they show that the Chittagong Division is best supplied, while Bhagalpur and Patna are at the other end of the scale. In all the Divisions the provision for medical relief is still quite inadequate, and the Lieutenant-Governor fears that it will be long before the local bodies will be able fully to supply this want.

Burdwan	...	219,682
Presidency		174,523
Rajshahi	..	170,621
Dacca		273,415
Chittagong		161,214
Patna	.	316,220
Bhagalpur	...	357,603
Orissa	..	213,018
Chota Nagpur	...	289,299

3. *Officers in charge of dispensaries.*—Of the 299 dispensaries from which returns have been received, 193 were under the immediate charge of medical subordinates of the Government establishment, and 106 were under local native doctors, so that on the 31st December 1892 Government medical officers held charge of about two-thirds of the institutions. Local bodies generally prefer to employ medical subordinates of the Government establishment in their dispensaries, and it is only when they are unable to meet the pay of these officers that they appoint their men locally under rule 9 of the Dispensary Manual. This action, however, sometimes causes inconvenience not only to the dispensary authorities, but also to Government, which has to provide for the men replaced by local native doctors. A somewhat similar inconvenience arises when an officer paid from local funds is promoted, and his employers find themselves unable to meet the extra cost of his enhanced pay. In the Resolution on the medical institutions of Calcutta, it was pointed out how small a part of the great stream of native charity was turned towards the endowment of medical institutions. Sir Antony MacDonnell desires again to bring the subject to the

attention of the wealthy and the benevolent in these Provinces. Charity cannot be better exercised than in the extension of medical relief to suffering humanity.

4. *Inspections.*—Although there has been some improvement in the number of inspections made by Civil Surgeons, the figures are still unsatisfactory. Under rule 29 of the Dispensary Manual, a Civil Surgeon is required to visit each dispensary in his district at least four times a year: in no year, however, was more than half the number of dispensaries visited by these officers four times. In a district which is so large as Mymensingh, or so well provided with dispensaries as the 24-Parganas, the rule may doubtless be relaxed, but in ordinary cases, although it may be inconvenient to leave the Sadar station, and sometimes serious cases of illness forbid it, the Lieutenant-Governor desires that the attention of Civil Surgeons should be drawn to the necessity of carrying out the rule, more especially as these visits have by recent orders to be utilized for the supervision of vaccination operations also.

5. *Patients.*—The Inspector-General of Civil Hospitals gives an elaborate table showing for each district and division the total number of indoor and outdoor patients treated during the year and their ratio to population, and the general result is abstracted below:—

Years	Patients			Population of the Province	Ratio per cent of total treated to population.
	Indoor	Outdoor	Total treated.		
1	2	3	4	5	6
1890	29,660	1,239,850	1,269,510	*70,665,427	1·79
1891	35,859	1,460,195	1,496,054		2·12
1892	37,845	1,575,926	1,613,771		2·28
	103,364	4,275,971	4,379,335	70,665,427	6·19

N. B.—This is exclusive of the population of Calcutta, but is inclusive of that of the Chittagong Hill Tracts.

There has been a steady increase in the number of patients of both classes, but, as has been already pointed out, the proportion of those treated to the total population is still very small, due no doubt to the comparative fewness of the dispensaries. Even if it be conceded that each institution supplies the wants of the population in a circle of five-mile radius, the influence of the 310 existing dispensaries extends over less than one-fifteenth part of the total area of Bengal.

6. *Indoor patients.*—About half the dispensaries (148) in the Province received indoor as well as outdoor patients, and the total number of indoor patients treated has advanced from 28,981 in 1889 to 37,845 in 1892—an advance of 30·6 per cent. The increase is satisfactory so far as it goes, but the figures are small in comparison with the results in other Provinces, and it is clear that full advantage is not taken of the accommodation provided, for out of 2,357 beds available during the year 1892 for indoor patients of both sexes, the daily average of occupants was only 1,535. The explanation is probably to be found in the remarks quoted in paragraph 5 of the Resolution on the last triennial report, and there can be little doubt that, if proper provision were made near the dispensaries for the accommodation of the relatives of patients, more satisfactory results would be obtained: the attention of municipalities has already been drawn to the point. The death-rate among the in-patients was very high, being 12·85, 13·31 and 13·49 respectively in the three years under review, and is said to be due to the unavoidable admission of a large number of patients in a hopelessly advanced stage of disease: this is specially the case in the dispensaries at Balasore, Puri, Deoghur, Raniganj, Midnapore and Chandbally, which lie on the main pilgrim routes. The death-rate is also further increased by the number of severely injured persons brought to dispensaries by the police. Sir Antony MacDonnell's experience is that the admission of moribund patients, and generally pauper patients, to the wards of a hospital very seriously detracts from the popularity of the institution, and he has found it most useful to attach a separate house or hut or other suitable accommodation to the hospital for the reception of moribund cases

and for the shelter of pauper patients: for the latter the accommodation would be in the nature of a poor-house ward. He commends this arrangement to the attention of all Civil Surgeons and Hospital Committees.

7. *Outdoor patients.*—There was a steady increase during the three years under review in the attendance of outdoor patients, equivalent to 396,083 or 33·5 per cent. on the total of 1889—the actual figures being 1,239,850, 1,460,195 and 1,575,926. The improvement is satisfactory, and points to the increasing popularity of mufassal dispensaries. In the Resolution recorded on the last triennial report, the Lieutenant-Governor commented on the smallness of attendance at some of these institutions: on this subject Dr. Pilcher has recorded the following remarks:—

"Enquiries satisfy me that there is a much larger number of persons in proportion to the population practising medicine in Bengal than in either the North-Western or Central Provinces, and the people in Bengal can more readily obtain medical aid at their own houses and for a very trifling expenditure. It is also the custom in Bengal for the well-to-do practitioners to give advice and medicine gratuitously to the poor. Individual instances of want of civility, energy, or attention on the part of medical subordinates in charge of a dispensary may have occurred, but in no district could the low attendance be attributed solely to the personal failings of the subordinate medical officer in charge."

8. The Lieutenant-Governor is glad to observe that sixteen dispensaries had an average daily attendance of 100 or more in 1892 as against twelve in 1889. The attendance at those which have been most conspicuous for steady progress during the past three years is given below, and Sir Antony MacDonnell congratulates the managing body of each of them on the great benefits to the public which these figures imply. The popularity of the Hathuwa dispensary must be gratifying to the Maharaja, who supports it entirely at his own expense.

Dispensary and district.	Total number of outdoor patients treated.		
	1890.	1891.	1892.
Chapra (Saran)	26,305	27,750	29,780

9. Some doubts have been expressed by Government of the propriety of supplying medicines to patients represented through their friends or relatives, but from the explanation now afforded by the Inspector-General of Civil Hospitals, the Lieutenant-Governor is satisfied that in most cases the practice is not likely to lead to abuse.

10. *Diseases treated.*—The report contains detailed statistics of the diseases treated at the dispensaries of the Province. Malarial fever of course contributes the largest number of cases to the sick list. It is well known that the

high temperature which accompanies many disorders of the body is frequently represented as the cause and not the consequence of illness, so that many cases are improperly ascribed to malarial fever which should be attributed to some other specific ailment; but even making allowance for those mistakes, the fever which is endemic in Bengal yearly claims a majority of the patients in the dispensaries in the Province, and of the deaths in the returns of mortality. The number of outdoor fever patients relieved in each of the years 1890, 1891 and 1892 was respectively 267,003, 327,969 and 320,113, giving a percentage on the total outdoor patients of 21·03, 21·92, and 19·03. In the Resolution on the report of the Sanitary Commissioner for 1892, the Lieutenant-Governor has already noticed the ravages of this disorder, and expressed his conviction that the true remedies for the deplorable loss of life which it causes year by year are the improvement of drainage and the supply of pure water, and those observations need not be repeated here; it will be enough to reproduce from Dr. Pilcher's report the following table giving for each Division the statistics of fever cases treated in the dispensaries. They demonstrate clearly the general accuracy of the conclusions arrived at by the Sanitary Commissioner, and confirm the observations of the Superintendent of Census as to the great insalubrity of large tracts in the Burdwan, Rajshahi and Presidency Divisions:—

	1890.		1891.		1892.	
	Number of cases of malarial fever.	Percentage to total treated.	Number of cases of malarial fever.	Percentage to total treated.	Number of cases of malarial fever.	Percentage to total treated.
1	2	3	4	5		
Burdwan ...	47.996	30·61	58.973	32·67	51,036	28·08
Presidency ...	54,150	33 93	68,142	36·19	58,620	30·19
Rajshahi ..	43,762	27 01	60,692	30·2	55,097	26·55

Dacca ...	17.609	13·6	22,047	13·71	24,278	13 39
Chittagong ...	9,538	16·88	9,615	11·18	11,270	10·39
Patna ...	56.158	14 22	64,235	14·41	75,452	15·28
Bhagalpur ...	19,278	19·45	23.495	20·72	23,089	20·69
Chota Nagpur ...	5,233	16·18	5,817	15·25	6,553	14·82

11. As usual, very few cases of small-pox were brought for treatment, the number being 103 cases in 1890, 165 in 1891, and 191 in 1892. Dr. Pilcher correctly states that the people are naturally averse to remove a relative suffering from this disease from their homes, especially as a religious prejudice is connected with it. The number of cholera cases shows an increase from 6,360 in 1890 to 9,402 in 1891 and 9,795 in 1892. The advance was remarkable in the Patna Division, where the disease appears to have been very prevalent in 1892, and the mortality high: admissions for cholera were very small in the Chota Nagpur Division, and it is not to be expected that they will ever bear any considerable ratio anywhere to the number of cases. The onset of the disease is so violent, and collapse follows with such rapidity, that removal to a hospital, even if possible, is in many cases not advisable. Diseases of the spleen, which are considered as the effect of continued malarial influence, caused no less than 61,863 admissions in 1892, against 54,652 in 1891 and 46,822 in 1890. Although for obvious reasons cases of leprosy are not generally admitted in the dispensaries, the number of persons treated for this disease was by no means small, being 2,769 in 1892, 2,828 in 1891, and 2,625 in 1890.

12. *Surgical operations.*—The number of surgical operations of all kinds increased from 66,324 in 1889 to 86,915 in 1892, or by 31 per cent., and the number of major operations, which have more than doubled themselves during the last six years, advanced in the three years under review from 5,336 in 1889 to 9,263 in 1892, or by 73·3 per cent. In proportion to population, however, as the statistics below will show, the number of major operations in Bengal is much below that in the North-Western Provinces and Oudh and the Panjab. The Lieutenant-Governor notices with satisfaction the large number

of major operations performed at Gaya (2,474), Dacca (1,344), Bankipore (1,308), Monghyr (1,272), Chapra (972), and Arrah (752). Most of these institutions were at the head of the list at the time of the previous triennial report, and the great development of surgical treatment during the period under review can be inferred from the fact that the figures for the previous three years were Dacca 832, Monghyr and Chapra 697 each, Burdwan 480, Muzaffarpur 398, and Bankipore 382. The popularity of these institutions for their surgical record is due to the skill and labour of Surgeon-Major R. D. Murray at Gaya, who in two years performed 1,434 operations; and of Assistant Surgeons Upendra Nath Sen (Monghyr), Apurba Krishna Das (Chapra), and Nritto Gopal Mitter (Arrah). The lithotomy operations, always an important feature in the list, aggregated 659, with a mean death-rate during the three years of 7·8. Numerically the most important operation is that for cataract, and the Lieutenant-Governor is glad to find that the number of these operations increased from 926 in 1889 to 2,333 in 1892, and that more than 81 per cent. of them proved successful. He is disappointed to learn, as shown by the statistics in the margin for the year 1892, how far below the returns for the other great provinces of Upper India these figures are, and he agrees with the Inspector-General of Civil Hospitals that Civil Surgeons and subordinate medical officers should be stimulated to greater exertions in this direction. The number of officers who have really devoted themselves to the practice of this operation is small, and it is clear that over large areas of the Province little has been done to relieve what is evidently a most common affliction.

Province.	Population.	Total major operations.	Operations for cataract.	Ratio per cent. Column 3 on column 2.	Ratio per cent. Column 4 on column 3.
1	2	3	4	5	6
Bengal ...	71,346,987	9,263	2,333	·01	25·1
North-Western Provinces and Oudh.	46,905,085	21,301	8,880	·05	26·5
Panjab	20,866,847	14,060	4,294	·07	29·8

13. *Sex of patients.*—There has been a considerable increase in the number of adult males and children treated in the dispensaries. The number of females, though showing an increase over that of the previous year, is still only about one-fourth of that of the males, and it is believed that want of separate accommodation in most of the dispensaries for the treatment of female patients is the cause of this small attendance. The list furnished by the Inspector-General of Civil Hospitals, in compliance with the orders contained in the Resolution on the annual returns for 1891, shows that separate hospitals for females exist at Bankipore, Burdwan, Cuttack, Dacca, Dinajpur, Kamarhati, Gaya and Barisal, and that in many dispensaries there are separate wards for the treatment of women. The Lieutenant-Governor is glad to find that the necessity for providing separate accommodation for female patients has been more generally recognized, and it is hoped that before long this want will be supplied at most places.

14. *Income and expenditure.*—The following table, which shows at a glance the total income and expenditure of the dispensaries during the last three years, is reproduced in full from Dr. Pilcher's report:—

Income.

	1890. Rs.	A.	P.	1891. Rs.	A.	P.	1892. Rs.	A.	P.

Total expenditure ...	4,74,853	15	6	4,78,441	4	7	5,23,544	9	8
Cash balance on 31st December	32,729	3	5	35,285	3	0	25,154	13	11

The difference between the opening balance of each year and the closing balance of the previous year is due to certain institutions having been newly brought on the Government list, to the closing of a dispensary, and to the correction of the accounts of certain institutions.

15. The total income of the mufassal dispensaries shows a considerable increase over that recorded in 1889, the figures being Rs. 5,07,583 in 1890, Rs. 5,13,726 in 1891, and Rs. 5,48,699 in 1892, against Rs. 4,73,333 in 1889. It is satisfactory to notice that these receipts were sufficient to meet the current expenses of the institutions, and allowed of investments being made. The contributions from Government increased from Rs. 22,921 in 1889 to Rs. 27,978 in 1892. This increase was chiefly under the head of Salaries, and is largely due to Government having undertaken in many cases to meet the increased salaries payable to medical subordinates on promotion to higher grades, where the dispensary funds were unable to bear it. The total amounts received from municipal and other local funds increased by Rs. 5,769-12-8 in 1890.

by Rs. 33,789-14-6 in 1891, and by Rs. 18,944-0-3 in 1892. The receipts from subscriptions rose in 1890 from Rs. 1,36,738-11-10 to Rs. 1,61,674-14-4. In 1891, however, they fell to Rs. 1,37,556, but again rose in 1892 to Rs. 1,41,326-9-4. The great increase in 1890 was due to a sum of Rs. 17,600 having been received in the Kandi Dispensary as a part of the original legacy of the late Kumar Girish Chunder Singh, and to a sum of Rs. 15,000 having been paid by Srimati Bindu Bashini Chowdhurani of Santosh for the construction of a masonry building for the Tangail dispensary.

16. The total expenditure, exclusive of the amounts invested, shows an increase of Rs. 17,833-9 in 1890, Rs. 21,718-8-1 in 1891, and Rs. 36,259-4-9 in 1892. The increase is distributed over all the heads of ordinary expenditure excepting miscellaneous charges. The rise under the head of Establishment is due to the opening of new dispensaries and to an increase of the staff of menials at certain places. The increase under all other heads is attributed chiefly to the rise in the number of in-patients. Under the head of Buildings and repairs, there was a large increase in 1890, but in 1891 it fell by Rs. 8,874-12-2, and in 1892 by Rs. 860-12-8.

17. The amounts invested during the three years were Rs. 11,04,374-7, Rs. 11,00,323-13-3 and Rs. 11,08,849-15-1 respectively, and the value of the securities sold or withdrawn was Rs 19,586-0-11, Rs. 14,643-14-10 and Rs. 19,834-7-3. The difference between the opening balance of each year and the closing balance of the previous year was due mainly to the incorrectness of the accounts of certain dispensaries. Rule 24 of the Dispensary Manual, which lays down that the deposits in Savings Banks, when exceeding Rs. 200, should be invested in Government securities, was not complied with in many cases, and the attention of Civil Surgeons has been drawn to the fact.

18. *Conclusion.*—During the greater part of the period under review, Surgeon-Colonel Hilson, C.I.E., was Inspector-General of Civil Hospitals, and to him the thanks of Government are due for what he was able to do in spite of failing health. To Surgeon-Colonel Pilcher, who held the appointment for a short time at the end of 1892, the Lieutenant-Governor tenders his acknowledgments for a complete report. The names of the Medical Officers specially commended in the 66th paragraph of the report will be noted in the proper Department.

By order of the Lieutenant-Governor of Bengal,

J. A. BOURDILLON,

Offg. Secy. to the Govt. of Bengal.

DONATION BY HIS HIGHNESS THE MAHARAJA SCINDIA BAHADUR OF GWALIOR.

GENERAL DEPARTMENT—EDUCATION No. 2320.

Darjeeling, the 10*th October* 1893.

RESOLUTION.

READ—

Letter from the Director of Public Instruction, Bengal, No. 5757, dated the 9th September 1893.

The Director of Public Instruction reports that, in addition to the donations already acknowledged by Government on two previous occasions, His Highness the Maharaja Scindia Bahadur of Gwalior has presented, through the late Nawab Bahadur Abdul Lateef, C.I.E., a sum of Rs. 500 to be invested in a 4 per cent. Government Promissory note for the award, in His Highness' name, of an annual medal or money prize to a student of the Calcutta Madrasa who having passed the F. A. Examination, may not have obtained a scholarship or other prize.

2. The ackowledgments of Government are again due to His Highness the Maharaja Scindia Bahadur of Gwalior for his liberal donation, and for the interest thereby displayed in the promotion of Muhammadan education.

His Honour approves the proposal made by the Director of Public Instruction that the Principal of the Calcutta Madrassa be appointed Administrator of the Fund.

ORDER.—Ordered, that a copy of the Resolution be forwarded to the Director of Public Instruction, and to the Accountant-General, Bengal, for information; also that the Government of India, Foreign Department, be requested to forward a copy, with the permission of His Excellency the Governor-General in Council, to His Highness the Maharaja Scindia Bahadur of Gwalior.

Ordered also, that a copy of this Resolution be published in the *Calcutta Gazette*.

By order of the Lieutenant-Governor of Bengal,

M. FINUCANE,

Offg. Secretary to the Government of Bengal.

RESOLUTION ON THE ADMINISTRATION REPORT OF THE COMMISSIONERS OF THE PORT OF CALCUTTA FOR 1892-93.

No. 2324Marine.

GOVERNMENT OF BENGAL—MARINE DEPARTMENT.

Dated Calcutta, the 5th October 1893.

RESOLUTION.

READ—

The Administration Report of the Commissioners of the Port of Calcutta for 1892-93.

The consolidated debt due to Government was reduced during the year from Rs. 39,94,381 to Rs. 38,46,346, or by Rs. 1,48,035, and a sum of Rs. 1,30,500 was invested in their own debentures for the repayment of their different debenture loans aggregating Rs. 60 lakhs. The gross debt of the Commissioners on 31st March 1893 amounted to Rs. 1,16,11,346. This does not, however, include the advances made by Government for the construction of the Kidderpore Docks. The details of the consolidated debt are given below:—

	Rs.
Consolidated debt due to Government	38,46,346
Port debt not repayable	17,65,000
4½ per cent. debenture loan of 1881	10,00,000
Ditto ditto of 1883	20,00,000
5½ per cent. ditto of 1886	30,00,000
Total ...	1,16,11,346

2. Against this debt the Commissioners hold block to the value of Rs. 2,30,04,615 in addition to certain valuable strand bank lands, for which they pay to Government an annual rent of Rs. 37,292. The statement below shows the cost of the works constructed and the sources from which the expenditure has been met:—

		Expenditure up to 31st March 1893. Rs.
Jetties and appliances for sea-going vessels		83,60,566
Inland Vessels' Wharves, Landing-stages, Tramway, &c., on the Calcutta side		62,02,698
Inland Vessels' Wharves, Landing-stages, Tramway, &c., on the Howrah side		16,38,634
Dockyard and Workshop at Howrah ...		5,25,484
Moorings, Anchor-vessels, Harbour Master's Boats, Light-ships, Survey Vessels, &c.		38,75,244
Reserve Fund	Jetties Reserve Funds	99,244
	„ Insurance Fund	50,000
	Port Reserve Fund ...	3,64,250
	„ Depreciation Fund	1,99,995
	„ Approaches Depreciation Fund ...	2,50,000
	Debenture Loan Sinking Fund ...	10,38,500
	Dock Contingent Fund	4,00,000
TOTAL ...		2,30,04,615

	Rs.	Rs.
By Loan from Government (re-payable)... ...	60,25,100	
Less amount re-paid...	21,78,754	
		38,46,340
By Loan from Government (not re-payable)		17,65,000
By Loan on 4½ per cent. Debentures of 1881		10,00,000
By Loan on 4½ per cent. Debentures of 1883		20,00,000
By Loan on 5½ per cent. Debentures of 1886		30,00,000
Contribution from Government towards purchase of land for new reverside road		74,584
Contribution from Government for landing-stage at Prinsep's Ghat ...		10,000
Contribution from Government for Port Approaches block		6.21,163
From sale of surplus land... ...		4,09,803
„ revenue derived from work since formation of Trust Rs.	80,98,965	
Add amount repaid to end of March 1893 from revenue ... „	21,78,753	1,02,77,719
TOTAL ...		2,30,04,615

3. The year opened with a balance of Rs. 3,69,899, and the income during the year amounted to Rs. 30,30,341. The expenditure, including sinking fund, renewals and improvements, amounted to Rs. 28,29,984, leaving a net revenue balance of Rs. 5,70,255.

4. The exceptional increase both in income and expenditure is due on the one side to the re-imposition of port dues and the levy of a special toll under section 108 of the Calcutta Ports Act, and to the up-keep of the Docks on the other.

5. In consequence of the heavy deficit in the port revenues due to the charges for the interest on the capital outlay and the working expenses of the Kidderpore Docks, the Commissioners considered that the time had arrived for the re-imposition of the port dues, which had been abolished in 1884 when a large surplus revenue was being obtained. A proposal was accordingly submitted to Government to levy a port due of four annas per registered ton on all vessels entering the port, and sanctioned by them with effect from the 1st December 1892. The due is not payable more than once in sixty days. The receipts from this source during the year amounted to Rs. 91,376.

6. In addition to the port dues, it was decided to impose a special toll under section 108 of the Calcutta Ports Act of four annas per ton on all goods landed from or shipped into any vessel lying within the limits of the port, in addition to the tolls, dues, rates, and charges in force. The levy of this toll took effect from the 1st January 1893, and the receipts during the three months of the year amounted to Rs. 2,07,741.

7. The expenditure on the Kidderpore Docks during the year amounted to Rs. 23,88,993, raising the total expenditure from Rs. 2,56,97,370 on the 31st March 1892, to Rs. 2,80,86,363 on the 31st March 1893.

8. The docks were declared to be legally open for traffic on the 13th September 1892. They were not, however, used to any appreciable extent, and the gross receipts amounted to only Rs. 1,02,414, of which Rs. 65,020 were from the graving dock.

9. From April 1892 to the end of the year, 42 steamers and 19 sailing vessels entered the docks. All the arrangements for docking and undocking vessels were satisfactory, and all operations were successfully conducted. The accessories provided for the accommodation and conduct of business are stated to have proved equally successful and satisfactory. The want of traffic in the docks is not attributable to the appliances not meeting the requirements of the vessels. The graving dock has been extensively used.

10. Owing to the failure of the docks to attract a large number of vessels, a special Committee was appointed by the Commissioners to consider the financial position of the port, consequent upon the construction of the docks; their proposals as to the best means of utilizing the docks and for making the expenditure reproductive are now under the consideration of Government.

11. The income under Part I, Jetties, amounted to Rs. 11,41,471, showing a decrease of Rs. 1,25,477. The depression in trade during the year has been great, and for several months the moorings in the Port were blocked with ships which were unable to secure outward charters. The expenditure amounted to Rs. 7,63,907.

12. The income from the petroleum wharf at Budge-Budge continues steadily to advance, the total receipts during the year being Rs. 1,97,111, or Rs. 20,704 in excess of the previous year. The quantity of kerosine-oil imported was 32,543,864 gallons, against 32,117,680 in 1891-92.

13. Messrs. Graham and Company completed their depôt for Russian oil in bulk in the early part of the year, but it was not till the month of February 1893 that the "Turbo," the first tank vessel, arrived. She discharged her cargo of 1,347,584 gallons in four days, or five times as quickly as case oil can be landed.

14. The total quantity of tea which passed through the tea warehouse was equivalent to 45 million lbs., showing a reduction of 3 million lbs. on the previous year. The receipts, however, were Rs. 1,07,295, or an increase of Rs. 2,297 over 1891-92, which is attributed to the fact that there was an increase in the quantity of tea sold by auction in Calcutta, all the operations of which were carried out in the tea warehouse.

15. During the year 214 vessels, with an aggregate tonnage of 485,299, were berthed at the jetties, against 226 vessels and a tonnage of 501,938 in 1891-92. The average number of days each vessel occupied the jetties was 10·7 against 9·6 in 1891-92.

16. The receipts of the inland vessels wharves, amounted to Rs. 4,65,811 against Rs. 5,00,215 in the previous year. The decrease is due to the general depression in trade, which has affected the revenue on nearly all the wharves. The expenditure amounted to Rs. 3,07,022, being Rs. 32,716 less than in 1891-92. The reduction is due chiefly to the fact of there not being any heavy repairs, and to the working expenses being cut down.

17. The income of the Harbour Masters' Department amounted to Rs. 5,82,707 against Rs. 5,20,349 in 1891-92. The increase was obtained from mooring hire, a larger number of vessels having come into the port. The expenditure was Rs. 5,27,291, or an increase of Rs. 54,888 on the previous year, due to the full contribution of Rs. 55,110 having been paid to depreciation account to meet the cost of a new hopper barge.

18. There were 23 accidents to vessels while in charge of Assistant Harbour Masters, against 18 in the previous year. The increase is due to the practice followed of reporting every casualty, however trivial, which was not done in former years. In no case was the casualty attended with serious consequences.

19. The gross revenue of the Port Trust Railway amounted to Rs. 2,62,066 against Rs. 2,91,571 in the previous year, the decrease being due to the depression in trade. The expenditure was Rs. 1,89,710, or a decrease of Rs. 576 on the previous year.

20. Extensive alterations have occurred in the river channel in the Lower Saugor Roads: the width of the bar has increased from 1,500 yards to 3,000 yards, and the depth of water on the bar, after undergoing several changes, is now 15 feet, or one foot less than last year. There is every probability of the Lower Saugor Roads being quite obliterated within a very few years. The Middleton Sand and Lower Long Sand will probably join from end to end and from one flat.

Beyond this the general contour of the southern and eastern portions of the Roads have remained practically the same, excepting that two dangerous patches of 12 and 13 feet have shown up just above and below close to the Middleton Spit Buoy, where nothing under 18 feet existed before.

21. With reference to these changes, the Commissioners write:—"The above is not a very encouraging report to make on the entrance to the Hooghly River, and the condition of things would have been still more serious were it not that there is every indication of a good channel cutting between the Upper and Lower Long Sands just above the Middleton Bar. This channel is apparently opening very rapidly, and is now 1,000 yards broad, running in a south-westerly direction with 16 feet the least water in the Bar. Last year this channel had a bar at both entrances, but the southern one has entirely washed away, and 23 and 24 feet are now showing where only 16 and 17 were reported last year. A matter of still more importance is that the strength and direction of the tide also tends towards this new channel, and consequently it will increase the Middleton extension, and assist to open more rapidly this new channel. There is no foretelling the courses the river Hooghly will take, but it is quite within possibility that vessels will have to be navigated by the western channel within a year or two if the same changes as have been described above continue.

"The western channel will not, for navigation purposes, be so smooth as the eastern channel, and for sailing vessels will not be an easy passage to pilot between the Sands; but otherwise, for steamers, it will not make much difference."

22. The thanks of the Government are due to the Commissioners for their efficient management of the affairs of the Port Trust during the year.

By order of the Lieutenant-Governor of Bengal,

C. W. ODLING,

Secretary to the Government of Bengal.

Rainfall, Weather, and State and Prospects of the Crops.

Statement showing Rainfall, Weather, and State and Prospects of the Crops in the different districts of Bengal, as reported to Government, during the week ending the 7th October, 1893.

No.	District and date of return.	Rainfall at Sadar Station in inches.	Character of the weather and state and prospects of the crops.

BURDWAN DIVN.			
1	Burdwan Oct. 7, '93 Kalna ... Katwa ... Raniganj ...	0·04 0·09 Nil Nil	Weather—fair and hot. Prospects of *aman* crop good. Prices of common rice :— Srs. Burdwan ... ... 10 to 13 Kalna ... ... 9 to 13 Katwa .. .. 12 7/16 Raniganj ... ... 12 per rupee.
2	Bankura „ 7, '93	Nil	Weather—overcast and rainy from date of report. Prospects of *aman* continue good. Common rice selling at 13 seers 3 chitaks per rupee at Bankura and 12¼ seers at Vishnupur.
3	Birbhum „ 7, '93 Rampur Hát ...	Nil Nil	Weather—fine throughout the week; cloudy to-day (7th). State and prospects of rice crops continue good. Price of common rice varies from 10 to 14½ seers per rupee.
4	Midnapore „ 7, '93	Nil	Weather—fair and rather hot. Prospects of standing crops good. Cattle-disease reported from some parts. Fodder and water sufficient. Prices of common rice :— Srs. Sadar ... ... 12¼ Contai ... ... 13 Tamluk ... ... 12 Ghatal ... ... 10 to 12 per rupee.
5	Hooghly „ 7, '93 Serampore ...	0·12 Nil	Weather—hot. Jute steeping finished. Harvesting of *aus* almost completed. Sugarcane and *aman* doing well. Land being prepared for *rabi* crops. Prices of common rice :— Srs. Sadar ... ... 10 Serampore ... ... 10 to 11½ per rupee.
6	Howrah „ 7, '93 Ulubaria ...	0·79 Nil	Weather—dry and hot *Aman* paddy doing well. Price of rice 10 seers per rupee. Fodder and water sufficient.
PRESIDENCY DIVN.			
7	24-Parganas „ 7, '93	Not reported.	Harvesting of *aus* and jute and transplantation of *aman* nearly over. Prospects of crops fair in the northern part of the district, but poor in the south, especially in the thana of Bankipur. Prices of common rice :— Srs. Ch. Sadar ... ... 10 to 11[illegible] Basirhat ... ... 9 13¼ Diamond Harbour ... ... 10 12 Barasat ... .. 11 0 per rupee.
8	Nadia „ 7, '93 Kushtia Meherpur ... Chuadanga ... Ranaghat ..	0·47 Nil Nil Mil 0·89	Weather—dry and hot. Prospects of *aman* not favourable in the subdivisions of Kushtia and Meherpur. Prospects of sugarcane also not favourable. *Kalai* and *mung* are being sown broadcast. Fodder and water sufficient
9	Khulna „ 7, '93 Bagerhat ... Satkhira ...	0·75 Nil Nil	Weather—hot. Prospects of *aman* on high lands good, but on low lands precarious. Common rice sells at 9 to 10 seers per rupee. Water and fodder sufficient.
10	Jessore „ 7, '93 Jhenida ... Magura ... Narail .. Bangaon ...	0·36 Nil Nil Nil Nil	Weather—seasonable. Harvesting of *aus* and extracting of jute finished. Prospects of *aman* fair. Rivers going down. Lands being cultivated for winter crops. No cattle-disease. Fodder and water sufficient. Prices stationary.
11	Murshidabad „ 7, '93	Nil	Weather—seasonable. Winter rice and sugarcane doing well. *Kalai, moshna* and *til* are being sown. Fodder sufficient for cattle. Common rice sells at 11 seers per rupee.

Division	No.	District and date of return.		Rainfall at Sadar Station in inches.	Character of the weather and state and prospects of the crops.
BENGAL—*concld.*					
Chittagong Divn.	12	Chittagong	...	...	Report not received.
	13	Noakhali	„ 7, '93	3·82	Weather—seasonable. Transplantation of *aman* still going on. Prospects very favourable. Fodder and water available. No cattle-disease. Price of rice falling.
	14	Tippera	„ 7, '93	1·41	Weather—seasonable. Harvesting of jute and transplantation of paddy going on. Price of seedlings still very high. Insects causing some damage to *aman* in thana Nasirnagar. Ten to 12 annas of *aman* expected. Rice selling at 8 to 9 seers per rupee. It has slightly fallen at Chandpur. Fodder still insufficient.
	15	Chittagong Hill Tracts.	„ 6, '93	1·97	Weather—fair with occasional showers. Plough-paddy progressing. Price of indian-corn and vegetables high. Common rice selling at 9 seers per rupee. No cattle-disease reported.
Dacca Divn.	16	Dacca	„ 7, '93	0·22	Weather—hot. Harvesting of jute nearly completed. *Rowa* and *shail* paddy being sown. Prospects of *aman* favourable, but it is being damaged by a kind of insect in some places in the Munshiganj subdivision. Common rice selling from 7 to 9 seers per rupee. Fodder not sufficiently available. No cattle-disease.
	17	Faridpur Goalundo Madaripur	„ 7, '93	Nil Nil Nil	Weather—cloudy and fine with occasional slight rain. Prospects of crops remain unaltered. Rivers falling. Rice sells from 9 to 10 seers per rupee. Fodder available at high prices. Cattle-disease still prevailing in Palong.
	18	Backergunge	„ 7, '93	1·04	Weather—seasonable. State and prospects of crops fair. Common rice selling from 8 to 9 seers per rupee. Fodder and water sufficient.
	19	Mymensingh	„ 7, '93	0·17	Weather—hot. Prospects of standing crops very fair. Common rice selling from 8 to 9 seers per rupee. Condition of cattle good except in the Netrakona subdivision where, however, it is improving. Fodder available except in Netrakona and Kishorganj, where the supply is not yet sufficient.
Rajshahi Divn.	20	Dinajpur	„ 7, '93	Nil	Weather—hot. Prospects good. Prices of rice stationary. Condition of cattle good. Fodder and drinking water ample.
	21	Rajshahi Nator Naugaon	„ 7, '93	Nil 0·04 0·45	Weather—seasonable. The present condition of the crops is good almost everywhere; in the Barind it is excellent. Prospects are eminently favourable. Fodder and water-supply ample. There is no cattle-disease. Price of rice varies from 9½ to 13 seers per rupee.
	22	Rangpur Kurigaon Gaibanda Nilphamari	„ 7, '93	Nil Nil 1·06 0·04	Weather warm. Jute steeping progressing. Lands are being prepared for cold-weather crops. Common rice 9 to 10 seers per rupee.
	23	Bogra Sherpur Naukhila	„ 7, '93	0·65 Nil 0·05	Weather—fine and clear. Prospects of *aman* good. Cultivation of land for mustard-seed goes on. Common rice sells at 9 to 10 seers per rupee. Fodder and water sufficient.
	24	Pabna	„ 7, '93	Nil	Weather—seasonable; pleasant in the morning. Prospects of standing crops on the whole fair. Common rice sells in the Sirajganj subdivision at Rs. 4-12 per maund and in the Pabna subdivision at 9½ seers per rupee.
	25	Darjeeling Siliguri	„ 7, '93 ...	0·02 Nil	Weather—bright, cool, seasonable. *In the hills :—Bhutta, chota marua,* potatoes and *bhadoi dhan* being harvested. *Aghani dhan, kalai* and *bara marua* progressing favourably. *In the Terai :—Jute* and *bhadoi* harvested. Prospects of *aghani* favourable. Prices of common rice :— Srs. Hills ... ... 9 } per rupee. Terai ... ... 10 }
	26	Jalpaiguri	„ 7, '93	Nil	Weather—days hot, nights cool. Prospects of the standing crop good. Rain wanted in places. Price of common rice stationary. No want of fodder and water. No cattle-disease reported.

No.	District and date of return.		Rainfall at Sadar Station in inches.	Character of the weather and state and prospects of the crops.
BIHAR.				
BHAGALPUR DIVN.				
27	**Monghyr** **Begusarai** **Jamui**	Oct. 7, '93	Nil Nil Nil	Weather—hot and fair with occasional specks of cloud. Standing crops doing well. *Kurthi* and indigo in good condition. Sugarcane promising. Lands being ploughed for *rabi*. No want of fodder and water. Cattle-disease at Bakhtiarpur. Prices of common rice:— Srs. Sadar ... ... 12 to 20 per rupee. Begusarai ... ... 12 per rupee. Jamui ... ... 12 per rupee.
28	**Bhagalpur** Banka Madhipura Supaul	„ 7, '93	Nil Nil Nil 0 32	Weather—hot, but getting cooler at night. At its present stage a 16-anna outturn of the winter rice crop may be expected. *Kalai* and *kurthi* being sown. Common rice 14½ seers per rupee.
29	Purnea Kishanganj Araria	„ 7, '93	0 10 0·43 Nil	Weather—fine, cool at night, warm by day. *Bhadoi* outturn 12 to 16 annas according to locality. Jute 12 to 14 annas. Prospects of *aghani* excellent except along the Panar where floods have injured it. *Kurthi* and sugarcane doing well. Cultivation for *rabi* in progress. Fodder and water plentiful. Prices inclined to fall.
30	**Maldah**	„ 7, '93	Nil	Fine weather up to yesterday (6th). Cloudy again with a slight shower of rain. Rivers going down. Winter rice plants coming on well. *Kalai* pulse being sown. Lands being prepared for wheat and other *rabi* crops. Coarse rice selling from 11 to 17 seers per rupee. Fodder and water ample.
31	**Sonthal Parganas** Deoghur Jamtara Pakur Rajmahal	„ 7, '93	Nil Nil Nil Nil Nil	Weather—hot in the day, cool at night. Prospects of standing crops continue good, though a little more rain is wanted in the Deoghur subdivision. Fodder and water sufficient. Price of rice steady.
PATNA DIVISION.				
32	Patna	„ 7, '93	Nil	Weather—days hot and clear, nights getting cool. Reports regarding the rice crop continue excellent but some more rain would be an advantage. Prospects of the spring crops are so far very good. Prices of common rice:— Srs. Sadar ... . 16 per rupee Barh ... .. 13 per rupee Behar . 17 per rupee Dinapore .. .. .. 13 per rupee
33	Gaya Nawada Jahanabad Aurangabad	„ 7, '93	Nil Nil Nil Nil	Weather fine, cool at night, but hot in the day. Prospects of paddy crop excellent. Lands being prepared everywhere for spring crops, and some being sown. Prices almost stationary. Fodder and water supply ample.
34	Shahabad Buxar Sasaram Bhabhua	„ 7, '93	Nil Nil Nil Nil	Hot clear weather with cool mornings and heavy dews. *Bhadoi* harvest practically over. The only crop being got in is *serha*. Young paddy is flourishing. Lands are being prepared for *rabi* crops. Cattle-pox very rife in the south.
35	Darbhanga Madhubani Samastipur	„ 7, '93	Nil 0 98 Nil	Weather—mornings getting cool, but days hot. Prospects of rice favourable. Tobacco and *alua* being planted. Lands being prepared for *rabi* cultivation. Slight flood appeared this week, but did no harm. Fodder sufficient. Prices steady.
36	**Muzaffarpur**	„ 7, '93	Nil	Weather—fair. Paddy crop doing well. Lands being prepared for *rabi* sowings. Harvesting of *bhadoi* crops over. High floods again, but no injury expected. Fodder and water sufficient. Condition of cattle generally good. A few deaths among cattle reported from Majorganj in the Sitamarhi subdivision.

No.	District and date of return.	Rainfall at Sadar Station in inches	Character of the weather and state and prospects of the crops.
BIHAR—*concld.*			
Patna Division—concld.			
37	Saran Oct. 7, '93 Siwan Gopalganj ..	Nil Nil 0·75	Weather—days hot and bright, nights getting cool. Crops promise well. Maize all harvested with an average outturn of 11 annas or possibly more. Fodder and water plentiful. Prices of common rice:— Srs. C. Chapra ... ... 15 0 } per rupee. Siwan ... ... 14 12 } per rupee. Gopalganj . ... .. 16 0 } per rupee.
38	Champaran „ 7, '93	Nil	Weather—warm during day, but cool at night. *Aghani* in all parts of the district, excepting those which were affected by the last flood, is in excellent condition. Enquiry regarding the damage done by the flood not yet completed. Prices stationary. Fodder and water sufficient.
ORISSA.			
Orissa Divn.			
39	Cuttack „ 7, '93	Nil	Weather—warm; no rain. Early *biali* being gathered. *Bara biali* ripening. *Sarad* growing. Supply of fodder sufficient. Price of common rice unchanged except in Kendrapara, where it sells at 15 to 21 seers per rupee.
40	Puri „ 5, '93 Khurda ..	Nil Nil	Weather—hot and dry. *Sarad* and *laghu* still being weeded. The damage done to *sarad* by the *kahalia* and *pokachhinda* diseases is not likely to be great. Miscellaneous crops doing well. Prices of common rice:— Srs. C. Srs. C. Sadar ... 13 2 to 15 12 } per rupee. Khurda ... ... 11 0 to 17 1 } per rupee.
41	Balasore „ 7, '93	Nil	Weather—fine and hot. Floods have done damage in the south and south-east of Bhadrak. The break in the rains for the past six days is reported to have been very beneficial, and the crops are coming on well. Rain will be wanted about the 10th *Asu*, *mali* and *kanda* crops are now in ear. A 10 to 12-anna crop is hoped for.
CHOTA NAGPUR.			
South-West Frontier Agency.			
Chota Nagpur Divn.			
42	Hazaribagh Oct. 7, '93 Giridi .	Nil Nil	Weather—fine. Days very warm. *Marua* has yielded an 8-anna crop on average. Sugarcane doing well. Prospects of winter rice very good so far. *Rabi* crops being sown in places. Fodder and water abundant. Prices stationary.
43	Lohardaga „ 7, '93	Nil	Weather—seasonable. Reaping of *gora* paddy finished. Prospect of winter rice continues good. Common rice selling at 15 seers per rupee. Fodder and water plentiful.
44	Palamau „ 6, '93	0·01	Weather—seasonable; getting perceptibly cooler. All crops on the ground promise excellently. *Rabi* sowings going on. *Bhadoi* harvest nearly finished with a very good outturn of paddy and a poor one of Indian-corn. A little cattle-disease reported. Rice selling from 12 to 16½ seers per rupee. Fodder and water-supply ample.
45	Singhbhum „ 7, '93	Nil	Weather—seasonable, cold. Condition of the winter rice crop reported to be good from everywhere, a 16-anna outturn expected. Price of common rice from 12 to 16 seers per rupee. Cases of cattle-disease reported from Chakradharpur station and Baharagura outpost.
46	Manbhum „ 7, '93 Gobindpur	Nil Nil	Weather—bright and cool. Crops doing well. Lands being ploughed for *rabi*. Prices stationary.

Published for general information.

Statiscical Department,

The 7th October, 1893.

M. Finucane,

Offg. Secy. to the Govt. of Bengal.

Abstract of the results of Meteorological Observations taken at the Alipore Observatory in the month of September 1893.

	Inches.	Date.	Hour.
The mean pressure of the month	29·646		
The average pressure of September from 24 years' registers ...	29·682		
The highest pressure in the month	29·895	14th	10
The lowest pressure in the month	29·369	2nd	16
The range of pressure	0·526		
	Hours.		
The total number of hours of bright sunshine during the month	124·2		
The maximum possible number of hours of sunshine ...	376·0		
	⊖		
The mean temperature of the month	82·1		
The average temperature of September from 24 years' registers	83·3		
The highest temperature in the month	89·6	6th and 28th.	
The lowest temperature in the month	73·7	12th.	
The range of temperature during the month	15·9		
The mean daily range of temperature	8·9		
The greatest range of temperature in one day	12·4	13th.	
	Per cent.		
The mean humidity of the month	88		
The average humidity of September from 24 years' registers ...	85		
	Inches.		
The mean vapour tension of the month	0·966		
The average vapour tension of September from 9 years' registers	0·987		
The mean cloud proportion of the month	6·66		
The average cloud proportion of September from 16 years' registers	7·00		
The total rainfall of the month	8·74		
The total rainfall indicated by a Beckley's self-registering rain-gauge (mouth of the gauge about 52 feet above the ground)	8·35		
The average fall of September from 48 years' registers ...	10·18		
The greatest fall in 24 hours	2·59	12th.	
	Days.		
The number of rainy days in the month	17		
The average number of rainy days in September from 24 years' registers	21		
	⊖		
The mean maximum equilibrium temperature of solar radiation during the month	142·0		
The mean difference of sun and air temperatures	55·4		
The greatest sun temperature	158·3	1st.	
The greatest excess of sun over air temperature	71·2	1st.	
The mean temperature of the nocturnal radiation thermometer on woollen cloth	75·6		
The mean depression of the nocturnal radiation thermometer below the minimum air temperature at 4 feet above the ground	2·2		
The greatest depression of the nocturnal radiation thermometer below the minimum air temperature	4·8	30th.	
	Miles.		
The mean movement of the wind per day	114·5		
The greatest movement of the wind in one day	314·0	11th.	
The greatest movement of the wind in one hour	20·0	25th, 11 to noon.	

The number of hours with winds from each of the 8 points—

N. 5, N.E. 68, E. 147, S.E. 175, S. 137, S.W. 37, W. 36, N.W. 29, Calm 86.

The results of observations at the Alipore Observatory are not rigorously comparable with the registers of past years (at the Park Street Observatory). The barometer is about 3 feet higher at Alipore, and, other things being equal, reads therefore ·003 lower. The diurnal range of temperature is also greater at Alipore, and the mean temperature apparently equal; and, finally, the thermometer which furnished the record of temperature at the Surveyor-General's Office during 20 years and upwards is found to read 0·6 higher than the Kew standard thermometer, which is the standard of reference at the present Observatory.

J. H. GILLILAND,

For Meteorological Reporter to the Govt. of India.

METEOROLOGICAL OFFICE, INDIA;

Calcutta, the 9th October 1893.

Meteorological Report of the Province

Meteorological Division.	District.	Representative stations.	STATION OBSERVATIONS. Air Pressure. Highest, 8 A.M., barometer reading.	Lowest, 8 A.M., barometer reading.	Mean, 8 A.M., reduced to 32°.	Mean reduced to sea-level and constant gravity, Lat. 45°.	Variation from normal mean.	Wind. Mean direction at 8 A.M.	Mean velocity in miles daily.	Temperature. Highest of month.	Lowest of month.	Mean daily maximum temperature.	Mean daily minimum temperature.	Mean daily temperature.	Variation from normal mean.	Humidity. Mean, 8 A.M., humidity.	Variation from normal mean.

SUMMARY OF THE METEOROLOGICAL AND RAINFALL OBSERVATIONS TAKEN IN BENGAL, AND OF THE METEOROLOGICAL OBSERVATIONS TAKEN IN ASSAM, FOR THE MONTH OF SEPTEMBER 1893.

It will be remembered that during August the most noticeable feature of the weather was the absence of cyclonic storms and the consequent scanty rainfall. Though depressions occurred, they were peculiar in two respects. They commenced in Burma, and while crossing the Bay they did not intensify, so that they crossed the west coast as diffused low-pressure areas of slight importance. During September three depressions have formed. They began over Burma in much the same way as those of August, but before crossing the north-west coast they became of considerable intensity, and caused stormy weather both in the north-west of the Bay and over the greater part of Bengal, while very heavy rain fell in places during the passage of all three. While in the east of the Bay they remained diffused and shallow, and they deepened rather rapidly during the last day the centre of the disturbance was over the sea.

In several respects these depressions were very similar, but in others there was an important difference. They all commenced in Burma, and remained slight while in the east of the Bay; they followed almost the same north-westerly course, and deepened to about the same extent, defect being half an inch near the centre. The chief difference was in the course taken after crossing the coast. The centre of the first passed between Balasore and Saugor Island, and then continued its north-westerly direction with unusual rapidity at the rate of more than 20 miles an hour. The centre of the second also passed the coast between Saugor Island and Balasore, but moved very slowly almost due west; while the third passed near Puri, and then took a more northerly course than the first, the centre remaining near the western boundary of Chota Nagpur and Bihar till the disturbance reached the Himalayas, when it filled up very quickly. The influence of these depressions was very different in the different districts of Bengal, notwithstanding their similar character while in the north-west angle of the Bay. Owing to the rapid north-westerly motion of the first, the stormy weather moderated in a few hours, and the heavy rainfall was confined to the south-western districts. Though the second took a more westerly course, its rate of motion was so much lower that the stormy weather and heavy rain continued for some days, but was again confined to the southern and western districts. The third caused strong winds and moderate rainfall in the south-western districts, and very heavy rain in the northern half of the province, especially after the disturbance broke up.

On September 1st a shallow low-pressure area covered the north of the Bay, defect at Akyab and False Point being about ·18 inch. It continued to deepen as the centre approached the north-west coast, but when it was near Saugor Island a rapid rise of pressure commenced in Assam and North Bengal—a rise which seemed quite independent of the causes which led to the formation and development of the disturbance. This rise of pressure at first caused very steep gradients over Bengal, and strong squally easterly winds over the whole province; but as the wave advanced quickly, the distribution of pressure underwent a material change in the course of a few hours, and the disturbed weather as quickly moderated. From being nearly half an inch in defect at Balasore on the morning of the 3rd at 8 A. M., and ·2 inch in all the south-western districts, readings on Monday at the same hour were less than a tenth below the normal at all except a few of the extreme western stations. Rain was general and heavy in the south-western districts during these two days, but amounts quickly diminished after the rapid recovery of pressure, and during the two following days, but especially on the 6th, very little rain fell anywhere in the province, while the sky had become almost cloudless in places.

The fine weather that followed the disturbance was interrupted in the northern districts, where a brisk fall of pressure caused a slight local depression and heavy rain in North Bengal and afterwards in Bihar.

As the rapid recovery of pressure on the 3rd did not extend far south, readings became higher in Bengal than in Burma, and the second depression began to form. Its development was accelerated by a brisk fall of pressure in Burma, while the rapid rise continued in the north. It passed into the Bay area as a shallow diffused depression, and moved towards the north-west angle, increasing in a way similar to the previous one. On the 9th the cyclonic circulation of winds was very regular, squally weather was beginning in the east of the Bay, and showers were almost general in Lower Bengal, while the rainfall in North Bengal and Bihar had practically ceased. There was little change at the coast stations on the 10th; but as the centre approached the coast between Saugor Island and Balasore on the 11th, pressure fell very rapidly, and gradients became much steeper to the east and north of the area of lowest pressure. With this increase of gradients weather became squally in Lower Bengal, especially in the south-western districts.

As before a wave of rising pressure advanced from the east, but more slowly, and the steep gradients with rough rainy weather continued till the 14th, when only scattered showers fell in East Bengal and part of South-West Bengal. On the 15th a large number of stations reported no rain, and on the 16th it had almost ceased. During these days a ridge of relatively high pressure formed over Bengal and the north of the Bay; and when pressure began to fall, as it did slowly on the 15th and 16th, this led to rainfall in the more northern districts which had hitherto during the disturbance remained practically rainless.

Settled weather then obtained for some days in Bengal, but a fall of pressure almost immediately began over the Bay, and continued slowly for several days, giving rise to the third disturbance of the month.

The first signs of the commencing disturbance were observable in the northerly winds at the Orissa stations and the faint indraught across the east coast of the Bay on the 18th. Except the continued slow fall of pressure and the more regular cyclonic circulation, there was little change till the 20th, when the depression was better defined, but even then it was so diffused that the position of its centre, though nearer the west coast, was still doubtful. Gradients became steeper in the south-east of the Bay and winds strengthened, but velocity was never above 20 miles an hour at Diamond Island. The depression continued to drift slowly westward on the 21st, and on the 22nd it was near the South Orissa coast. Pressure fell more rapidly at the Orissa stations; and as it was then rising moderately in the east of the Bay and briskly in North Bengal and Assam, the disturbance was becoming more concentrated. Stormy weather rapidly developed, and when the centre of the depression crossed the coast near Puri on the morning of the 23rd, gradients were very steep and strong winds prevailed over the south of Orissa and the adjacent part of the Bay. The squally weather was general in Lower Bengal and Chota Nagpur, and heavy rain was falling. The centre of the disturbance was to the west of Ranchi on the 24th, and on the 25th it was in the west of Bihar, moving in a north-easterly direction. The intensity of the storm had abated very little at that time, as wind velocity in parts of Bihar was as much as 40 miles an hour, and pressure was still nearly half an inch below the normal. On the 26th there was no trace of the depression except defect of a tenth of an inch at Motihari; and as the rapid rise of pressure continued on the 27th, the distribution was then practically normal. The rainfall in Bihar and North Bengal was unusually heavy on the 25th and 26th, especially on the latter date, and the falls on these two days brought up the total for the month in these districts to above the normal, though during the rest of the month rainfall was almost steadily deficient. After the recovery of pressure weather moderated, beginning in Orissa and extending gradually northwards and eastwards. On the 29th a low-pressure area again appeared over Burma; and as readings increased towards the north-west, the wind circulation became northerly, and fine clear weather prevailed both over the province and the Bay.

Pressure.—Large changes of pressure occurred during the passage of the depressions across the south-western districts, and in the last case towards the end of the month in Bihar. As stated above, the depth of the depressions was almost the same, and defect differed little from half an inch near the centre when it crossed the coast. In the first case the recovery was very rapid owing to the depression moving quickly to the westward; while in the two others it came more slowly, and continued for two or three days. Mean pressure for the month is about ·07 inch below the normal in Orissa, ·05 inch in Chota Nagpur and part of South-West Bengal, ·04 inch in Bihar and East Bengal, and about ·02 inch in North Bengal and Assam.

Temperature.—Cloudy weather has been more prevalent than usual, especially in the early part of the month, and day temperatures have at times been many degrees below the normal. The mean maximum temperature is below the normal in all districts except part of East Bengal and Assam, defect varying from half a degree in places to 3° in the west of South Bihar. Night temperatures have not been so low relatively to the normal, the difference being generally less than half a degree except in Bihar, where it is about 1°. The mean daily temperature is normal in East Bengal and below elsewhere by between a half and one degree in all districts except Bihar, where it is 1·2°. Before the approach of the disturbances high temperatures prevailed; and as the cloudy weather extended northwards, the usual fall took place. The cooling effect of the first was very local, but a few days afterwards a cool wave commenced in Assam and spread along the northern districts. During the second disturbance the greatest defect was 7° in part of the south-western districts; during the third there was very cool weather in Bihar, defect remaining between 8° and 10° for several days. The rise of temperature after rainfall ceased was, as usual, rapid.

Rainfall.—As heavy rain fell during the passage of the depressions, which crossed the western districts, there is a large excess in Orissa and Chota Nagpur, and a moderate excess in South-West Bengal and Bihar, while in North Bengal the fall is normal and in East Bengal there is defect of nearly 2 inches. The falls in the northern districts occurred chiefly towards the end of the month, and the large excess in North Bihar as well as the average fall in North Bengal is due to the very heavy rain which fell on the 25th and 26th, when the third depression broke up amongst the hills.

The heaviest rain fell in the neighbourhood of the Orissa coast. Excess at False Point is 14·24, and at Puri, Chandbali, and Balasore between 11 and 12 inches, but it diminishes rather rapidly towards the interior, being only 4 inches at Bhanpur, Bhadrak, and Baripada. There is also a large excess in part of Midnapur, Howrah and Hooghly, Ghatal, Mohesreka and Jahanabad receiving about 10 inches more than the normal. The only other places where excess was more than 10 inches are—Darjeeling, Kalimpong, Chanchal, Churaman, Araria, and Jhumra Hill. Over the greater part of East Bengal defect is generally between one and three inches, and the only places where it is more than 5 inches are Noakhali and Jamalpur in the Mymensingh district. In the other districts falls are all in excess, but by irregular amounts, ranging up to 10 inches.

Actual falls vary from 10 to 25 inches, except in a tract of country running from south-east to north-west, including the greater portion of East Bengal, except the Sunderbans, but becoming much narrower towards the west, where it includes part of the Sonthal Parganas, Monghyr, Patna, Muzaffarpur, and Saran. From this central tract amounts increase towards the north-east and more slowly to the south. The following places in the southern region have received more than 20 inches:—Puri, False Point, Chandbali, Balasore, Garhbeta, and Jahanabad, and most of the other stations between 10 and 20 inches, the distribution being rather irregular. In North Bengal and the east of Bihar falls are generally between 15 and 25 inches, and only three places received more 25 inches, viz. Darjeeling, Kurseong, and Baxa.

The comparison of the actual rainfall of the various large divisions of the province during the month is most accurately shown in the form of a percentage. The figures representing the rainfall for the month calculated in this way are included in the following table under the heading of September. This table really gives a condensed summary of the rainfall statistics of the present year up to date for each meteorological division, the first nine columns giving the actual average falls in each division for each month expressed as a percentage of the normal, while the tenth column gives the actual rainfall of the first nine months as a percentage of the normal rainfall for that period:—

Meteorological Divisions.	January.	February.	March.	April.	May.	June.	July.	August.	September.	Actual rainfall of first nine months of 1893 expressed as a percentage of the normal fall for the period.
Orissa	422	309	238	89	607	99	67	84	186	155
South-West Bengal ...	120	464	160	115	225	183	94	64	138	131
North Bengal	104	377	145	213	96	100	166	90	100	117
East Bengal	80	291	123	149	207	134	103	100	85	123
North Bihar	170	357	134	208	84	100	151	85	143	123
South Bihar	115	602	188	255	171	156	122	74	132	126
Chota Nagpur	155	585	226	151	212	185	121	72	170	141

The following table contains full data for the comparison of the actual and normal rainfall of the month of September in all districts of the province. The figures are derived from the average and actual rainfall of the rain-recording stations in each district, due allowance or weight being made for the area which each station represents. This gives a more accurate average than the arithmetical means given in the weekly and monthly meteorological tables. The first column gives the normal or actual average district rainfall as determined from the rainfall observations of the past fifteen years; the second column gives the actual district rainfall as determined from the weighted actual rainfalls of the month at the reporting stations in each district; the third column expresses the ratio of the actual district fall of the past month to the normal rainfall as a percentage, and the fourth column states as a percentage how much the district rainfall for the month varied from the normal:—

Percentage Table for September 1893.

Explanation.—Summary.—The normal means of air pressure and temperature are the arithmetical average or means of the reading during the same period The *humidity* of the atmosphere is expressed at percentage, saturated air being presented by 100. A clear sky is denoted by 0 and an overcast sky by 01 rainfall the normal mean are the numerical means or average of the rainfall in that district determined from the returns sent in by the subdivisional station district, i.e. from total rainfall at the subdivisional stations in the district sending in returns divided by the number of stations. A rainy day is one of

for the week ending Saturday, the 7th of October 1893.

					DISTRICT OBSERVATIONS.										
					OF WEEK.				RAINFALL.						
									Since 1st of month.			Since 16th May 1893.

Explanation.—... indicates that no rain has fallen. If the return for any day has not been received, the corresponding space is left blank. If any of the returns ar[e] wanting, the corresponding spaces in the total rainfall columns are left blank. With reference to the column of rainy days, the definition of a rainy day is when at leas[t] 0·1 inches of rain has fallen.

CALCUTTA, *the* 10*th October* 1893.

SUMMARY OF THE METEOROLOGICAL AND RAINFALL OBSERVATIONS TAKEN IN BENGAL, AND OF THE METEOROLOGICAL OBSERVATIONS TAKEN IN ASSAM, FOR THE WEEK ENDING 8 A.M., SATURDAY, THE 7TH OF OCTOBER 1893.

FINE settled weather has prevailed over the Bay and the province throughout the week, with the exception of a few scattered showers in the eastern districts, owing to a very shallow depression, which commenced in Burma and moved northwards over the east of the Bay into Lower Bengal, where it filled up. The rainfall was almost entirely confined to Chittagong, Noakhali, and Backergunge, but the falls in these districts were sufficiently heavy to give an average of an inch and a quarter for the whole of East Bengal. At the beginning of the week pressure was lowest in Burma, and gradients were steeper to the west than towards the north, so that light northerly or westerly winds prevailed with almost cloudless weather. Temperature was very nearly normal, there being a small defect in the western and a small excess in the eastern districts. Pressure fell slowly on the 1st and briskly on the 2nd, when there was defect of more than a tenth of an inch in all districts except Orissa, Chota Nagpur, and the west of Bihar. The shallow depression was then over the north-east angle of the Bay, and moderately heavy rain was falling in parts of Chittagong, Chitta-ong and Satkanya receiving nearly 2 inches. The fall of pressure continued slowly on the 3rd, but on the 4th it had begun to rise, and the depression slowly filled up. Rainfall continued in the south-eastern districts for several days, and as the depression, though daily becoming more diffused, was drifting westwards, the rainfall extended to the western districts, and was fairly general in South-West Bengal on the 7th, the last day of the week. The light westerly indraught towards the area of low pressure continued with almost no change, and temperature remained above the normal by about 1° in Assam and North Bengal and by smaller amounts in the other districts, except where local rainfall occurred.

Pressure fell slowly or moderately during the early part of the week, and rose slowly during the latter half. Before the shallow depression began to fill up defect was greatest at some of the East Bengal stations, but was nowhere more than ·15 inch. The means for the month are below the normal everywhere by amounts varying from ·05 inch in Orissa and Chota Nagpur to nearly ·1 inch in the east of the province.

Temperature was low in the western districts for some days, especially in Chota Nagpur, also towards the end of the week in Lower Bengal, while weather was cloudy and local showers were falling. Elsewhere it continued above the normal by one or two degrees. The mean excess is 1° or more in Assam, North Bengal, and South-West Bengal, nearly 1° in North Bihar, and less than half a degree in Orissa, South Bihar, and East Bengal. In Chota Nagpur there is defect of about half a degree.

Rainfall.—No rain has fallen in Orissa, Chota Nagpur, and Bihar. In East Bengal scattered rain fell during the greater part of the week, chiefly in Chittagong, Noakhali, and Backergunge, while showers fell in North Bengal on the 4th, the heaviest being 1·77 inches at Bhagatpur and 1·68 inches at Baxa. In South-West Bengal there was fairly general rain on the 7th. The average fall for East Bengal is 1·22 inches, for South-West Bengal ·4 inch, and North Bengal ·15 inch.

The following table gives the summary of the temperature and rainfall data of each of the seven meteorological divisions of the province for the week ending Saturday, the 7th of October 1893:—

METEOROLOGICAL DIVISIONS.	TEMPERATURE.						RAINFALL.

The total fall from 1st January to 7th October 1893	79·23
The average fall of the corresponding period for 24 years, Surveyor-General's Office	60·55

The mean pressure, temperature, &c., are deduced from the traces of the Barograph and Thermograph and from observations made at 6h, 10h, 16h, and 22h.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed open at the sides and are suspended four feet above the ground.

The barometer readings are corrected approximately to those of the standard, Newman's No. 56, formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed in the Meteorological Office, and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground.

o, overcast; g, gloomy; d, drizzling rain; p, passing temporary showers; t, thunder; ⌓, dew.

PRELIMINARY FORECAST OF WINTER RICE CROPS IN BENGAL UP TO THE 15TH SEPTEMBER 1893.

THE following is published for general information.

REVENUE DEPT.,
The 10th October, 1893.

M. FINUCANE,
Offg. Secy. to the Govt. of Bengal.

DEPARTMENT OF LAND RECORDS AND AGRICULTURE, BENGAL.

Summary of the District Returns of the First Forecast of the Winter Rice Crop in Bengal, 1893 *(to the 15th September).*

N. B.—The district returns appended to this summary include a forecast of the winter rice crop in Angul and the Khondmals.

1. *Character of the season.*—The present season has been characterised by abnormally heavy rainfall in every part of these provinces, and by destructive floods in East Bengal and parts of North Bihar. The frequent and abundant showers which fell during the spring months, namely, from January to April, were generally favourable to the preliminary operations of cultivation. The rainfall during May, June, and July proved to be exceedingly heavy, and was favourable on the whole to the transplanting operations, except in very lowlying areas, such as Uluberia in district Hooghly, Diamond Harbour, in the 24-Parganas, Kushtia, and Meherpur in district Nadia and the Sadar and Jhenida

sub-divisions of district Jessore, which were submerged. Plentiful, though not excessive, rain also fell during August and the first-half of September, and favoured the progress of the operations. During August, however, all the districts of the Dacca Division and Tippera in East Bengal, and parts of Muzaffarpur, Darbhanga, Champaran, and Bhagalpur in North Bihar were visited by sudden and severe floods, which either killed or considerably damaged the standing crop, and also interfered with transplanting of seedlings in many places. On the whole the season has been favourable to the winter rice crop in spite of its excessively wet character. Except in those limited areas where the crop could not be sown or transplanted owing to excessive accumulation of water, or was subsequently damaged by floods, the heavy rainfall of the season has been more beneficial than otherwise.

2. *Area cultivated.*—The total area estimated to have been cultivated with winter rice in the current year is 30,441,364 acres against 29,160,111 acres in 1892, and thus shows an increase of 4·2 per cent. over the area sown last year. The only districts and sub-divisions which show a falling off in area, amounting to 10 per cent. and upwards, are the Tamluk sub-division of Midnapore (14 per cent.), the Howrah (20 per cent.) and Ulubaria (17 per cent.), sub-divisions of Hooghly, 24-Parganas (15 per cent.), Nadia (17 per cent.), Mymensingh (13 per cent.), Darbhanga (11 per cent.), the Jajpur sub-division of Cuttack (13 per cent.), and Palamau (10 per cent.).

3. *Character of the crop.*—It will be seen on reference to the district returns that out of the 46 districts, 16 report a full average (16 annas), or more than a full average crop;* 19 report crops varying in character from 12 to 16 annas;† 10 from 8 to 12 annas;‡ and only one district, namely Backergunge, has reported an 8-anna crop. Besides the district last mentioned, several sub-divisions have reported an 8-anna or less than an 8-anna crop. These are the Ulubaria sub-division of Hooghly (8), the Diamond Harbour sub-division of the 24-Parganas (8), the Kustia (3) and Meherpur (8) sub-divisions of Nadia the Sadar (8) and Jhenida (6) sub-divisions of Jessore, the Madaripur sub-division of Faridpur (6), the Sadar and Bhola sub-divisions of Backergunge (6), Brahmanberia in Tippera (8), Samastipur in Darahanga (8), and the Sadar sub-division of Muzaffarpur (8). The prospects of the standing crop are on the whole evidently better than those of the crop of 1892, which was estimated at not less than 14 annas. Twenty-seven out of the 46 districts have reported the standing crop to be better than that of last year; six have reported equal crops to those of last year; and only thirteen have reported worse crops. The estimated outturn of the present year's crop may be safely assumed to be very nearly an average crop. The actual outturn of the crop will, however, depend, to a certain extent, on the occurrence or otherwise of sufficient rainfall during October.

* Burdwan (16), Bankura (16), Birbhum (18), Murshidabad (16), Dinajpur (18), Rajshahi (16), Rangpur (15¾), Bogra (16), Pabna (17), Gaya (17¼), Champaran (16), Bhagalpur (15½), Malda (16), Sonthal Parganas (17), Hazaribagh (16), Palamau (16).

† Midnapore (14), Hooghly (14), 24-Parganas (11¾), Khulna (12¼), Darjeeling (15), Jalpaiguri (13½), Dacca (12¼), Chittagong (14), Patna (14½), Shahabad (13½), Saran (14), Monghyr (13¼), Purnea (14), Cuttack (13), Balasore (12), Angul (12), Puri (13), Lohardaga (14), Singhbhum (15).

‡ Nadia (9), Jessore (9), Faridpur (9), Mymensingh (11), Tippera (9), Noakhali (10¾), Chittagong Hill Tracts (10½), Darbhanga (11¾), Muzaffarpur (11½), Manbhum (11).

R. NATHAN,
for Director of Land Records and Agriculture, Bengal.

CALCUTTA,
The 4th October 1893.

Preliminary Forecast of Winter Rice Crop up to the 15th September 1893.

1	2	3	4	5	6	7	8	9	10	11
DISTRICT	Sub-division.	Total area of sub-division in acres	Total area estimated to be under cultivation in acres	Approximate normal area under winter rice in acres	Approximate area under last year's winter rice in acres.	Estimated area under this year's winter rice in acres.	Taking 16 annas to represent the average outturn how many annas represented outturn last year?	Taking 16 annas to represent the average outturn how many annas will represent this year's outturn.	Remarks by the District Officers.	Remarks by the Agricultural Department, Bengal.
							Annas.	Annas.		
Burdwan	Sadar	794,880	635,500	424,300	256,000	424,300	7	16	Owing to sufficient rainfall this year all cultivable lands have been cultivated, and unless there be a failure of autumn rains, there will be a very good outturn. The estimate has been based on the supposition that favourable conditions will continue	
	Kalna	276,180	224,000	128,000	128,000	128,000	11	16		
	Katwa ...	225,280	160,600	140,800	123,500	140,600	12	16		
	Raniganj .	429,440	254,700	225,200	165,900	225,200	8	16		
	District Total	1,726,050	1,283,800	918,300	673,400	918,300	9	16		
Bankura ..	Sadar	1,229,440	428,900	364,800	363,500	364,800	9	16	The early and timely rainfall has been very favourable and accounts for the increase in area shown in column 7	
	Vishunpur	448,000	214,000	195,600	148,000	168,000	6	16		
	District Total ..	1,677,440	642,800	559,400	511,500	532,800	8	16		
Birbhum ..	Sadar ..	709,120	290,000	176,000	176,000	176,000	16	18	All available land is under crop. Up to the stage of transplantation, the agricultural operations are the same. The low lands which are sown with winter rice have had plenty water, and the prospects are good.	
	Rampurhat	412,160	169,000	103,000	103,000	103,000	16	18		
	District Total	1,121,280	459,000	279,000	279,000	279,000	16	18		
Midnapur	Sadar	2,081,280	1,229,100	809,900	539,400	612,100	8	12	The outturn is likely to be better this year as there has been sufficient rain, and for the same reason a larger quantity of land has been brought under cultivation for winter rice. Tamluk is the only sub-division where the area of land submerged, and for the time unfit for cultivation, is at all considerable, although in Ghatal also a small portion is so.	
	Tamluk ..	373,120	279,600	264,300	236,800	203,100	10	14		
	Contai ..	563,840	456,300	416,000	328,250	325,340	8	14		
	Ghatal	234,240	146,500	131,800	101,750	119,960	8	14		
	District Total	3,252,480	2,111,500	1,622,000	1,206,200	1,260,500	8	14		

1	2	3	4	5	6	7	8	9	10	11
DISTRICT.	Sub-division.	Total area of sub-division in acres.	Total area estimated to be under cultivation in acres.	Approximate normal area under winter rice in acres.	Approximate area under last year's winter rice in acres.	Estimated area under this year's winter rice in acres.	Taking 16 annas to represent the average outturn, how many annas represented outturn last year?	Taking 16 annas to represent the average outturn, how many annas will represent this year's outturn?	Remarks by the District Officers.	Remarks by the Agricultural Department, Bengal.
Hooghly ...	Sadar	282,880	176,800	141,440	53,040	141,440	10	20 (a)	(a) The increase in the area under cultivation is due to the sufficient rainfall this year. The Sadar sub-division expects a bumper crop this year, and this is more than justified by the rain we have had these two or three days.	
	Serampur	219,520	160,000	100,480	66,987	80,384	12	10 (b)	(b) There was general rain throughout the sub-division. Though the fall was rather too heavy in some parts, the transplantation proceeded on rapidly, except in the low lying tracts, owing to the accumulation of water. The prospect would be favourable if seasonable rainfall comes.	
	Jahanabad ..	280,320	167,680	83,840	60,000	79,533	10	14 (c)	(c) Sufficient rain has fallen, and prospects are good.	
	Howrah	109,440	69,760	60,800	44,260	35,390	12	12 (d)	(d) The decrease in area is due to the rice fields being submerged till now. The outturn is expected to be 12 annas if nothing unforeseen happens.	
	Uluberia	193,920	128,000	108,800	74,000	61,200	8	8 (e)	(e) As there was heavy rainfall during the time of ploughing and sowing, less cultivated area has been shown. The prospects are reported to be very poor, but as the crop is really a speculative one, this was not unexpected.	
	District Total ...	1,086,080	702,240	495,360	298,287	397,947	10¼	14		
24-Parganas	Sadar ...	680,576	462,700	382,000	363,800	231,100	13	11	The decrease in the area under winter rice crop this year is due to the fact that the low lands, which were submerged in consequence	
	Barasat ...	313,600	189,400	147,200	119,400	103,400	12	12		
	Basirhat ...	330,200	261,600	213,100	213,100	203,800	13	16		

	Diamond Harbour	328,320	2-9,000	255,400	255,400	246,100	16	8	of the heavy rains in June 1893, could not be brought under cultivation. The outturn is expected to be worse than the normal.	
	District Total ...	1,671,626	1,263,000	1,527,700	921,700	784,100	13	11¾		
Khulna ...	Sadar	1,006,338	203,400	228,600	192,000	192,000	12	12	The *bil* lands which are submerged with water could not be brought under cultivation, and hence the decrease in the estimated area under winter rice this year. Timely rain has made the prospect somewhat better at Satkhira. Had not the rain been excessive, the outturn would have been expected to be better. The areas under columns 4 and 5 were revised and changed to those shown at present.	
	Satkhira	814,643·2	298,500	232,400	192,000	190,000	10	12		
	Bagerhat	965,523·2	277,100	214,100	192,000	150,000	14	14		
	Area of boundary, khals, rivers of the Sundarbans in this district.	317,440	......	......	......	......	...	......		
	District Total ...	3,103,942·4	779,000	675,100	576,000	532,000	12	12⅔		
Nadia ...	Sadar	497,920	362,800	65,200	42,000	34,000	7	10	The early and excessive rains prevented the preparation of much of land usually cultivated with winter rice in the Sadar Kushtia, and Meherpur sub-divisions. Hence the decrease in the area sown this year. The outturn is at present estimated to be 9 annas, but nothing can be said positively on this point now, as the result will mainly depend on the rainfall of September and October. The rainfall has been much heavier in the north than in the south of this district.	The Collector should in his final forecast give further explanation regarding the figures in column 9 for the Kushtea sub-division. The estimate appears too low in comparison with neighbouring sub-divisions. The effect of the early and excessive rains is allowed for in column 7.
	Kushtia	582,080	278,400	28,600	28,000	21,000	10	3		
	Meherpur	634,880	463,000	24,400	20,000	18,000	8	8		
	Ranaghat	273,280	190,200	12,500	10,000	10,000	8	15		
	District Total ..	1,788,160	1,303,000	130,400	100,000	83,000	8¼	9		
Jessore ..	Sadar ...	368,960	264,000	166,400	150,000	160,000	12	5	Sadar shows decrease in area as compared with normal, Magura and Bangaon also show decrease as compared with normal and last year's. The decrease in all the cases is due to excessive rainfall at the sowing season. In the Bangaon sub-division, where the lands are higher than those of the other sub-divisions, the outturn will be better than that of the last year in which the crop suffered from short rain. In this sub-division the crop has suffered less from the rainfall of June last. In the other sub-divisions the outturn will be worse than last year's owing to the injury done to the young plants by the heavy rainfall. In all the sub-divisions the outturn will fall below normal in consequence of the heavy rainfall.	The Collector should in his final forecast reconcile the estimates in columns 5, 6 and 7 for the Bangaon sub-division. It is not explained why the areas sown should be so much below the normal, nor why, with a more favourable season, the area under cultivation this year should be less than that shown in last year's estimate.

							Annas.	Annas.		
Purnea ...	Sadar	1,646,080	790,000	290,000	282,000	282,000	14	14	The decrease in area sown this year is due to some lands not having been sown in the Kishanganj sub-division for want of rainfall in August sufficient for transplantation. The deficiency in the outturn is to be attributed to the damage done to this crop in the low lands all over the district by the floods. The figures in column 4 have been revised.	•
	Kishanganj	857,600	530,000	352,000	267,000	242,900	16	14		
	Araria	668,160	410,000	320,000	318,000	320,000	15	16		
	District Total ...	3,171,840	1,730,000	962,000	867,000	844,900	15	14		
Malda ...	Whole district ...	1,216,640	811,500	275,218	254,173	277,564	14	16	The rainfall was favourable all along, which helped ploughing and transplantation, and all lands available for cultivation were sown with winter rice; hence the increase in area. The state of the crop up to date is favourable. If it rains in October an average outturn is expected.	
Sonthal Parganas	Dumka	914,560	422,200	181,800	181,800	181,800	14	18	The areas shown in columns 5 and 6 do not tally with those given in the last year's forecast of winter rice owing to the revised figures being furnished by the Sub-divisional Officer of Godda. The increase in the area sown this year, and that in the outturn, are due to ample rainfall during transplantation.	
	Deoghar	610,560	165,120	69,120	66,560	69,120	14	20		
	Godda	618,580	432,900	74,300	71,000	73,000	12	15		
	Jamtara	445,440	124,800	64,000	60,000	64,000	14	20		
	Pakour	437,120	327,040	262,400	220,260	262,400	14	18		
	Rajmahal	673,600	355,200	243,840	240,000	243,000	8	16		
	District Total ...	3,560,160	1,827,260	895,460	840,120	893,321	12¼	17		
Cuttack ...	Sadar	632,960	393,128	289,428	244,200	330,455	12	14	(Figures for columns 4 and 5 were revised; hence there is difference between this and the last year's forecast).	
	Jajpur	716,560	320,700	288,000	288,000	250,000	13	12		
	Kendrapara ...	911,360	410,240	327,680	318,700	300,000	11	10		

	Banki	75,030	37,200	23,040	23,000	23,000	12	13	Except in the Sadar sub-division and Banki, the area under cultivation of the winter rice is less than that of the last year, due to the unusually heavy rainfall in May last which caused a great part of the cultivable area to be under water. In the Sadar sub-division also the area is much less than the approximate normal area owing to the above cause. In Banki a good crop is expected this year, as the rainfall has been adequate till now. But the untimely and excessive rainfall and floods at the time of sowing and germinating, and the scanty rainfall in the other parts of the district at the time of reploughing and transplantation has told upon the crop, and the average outturn is not expected to be more than 13 annas, which is, however, better than that of the last year, when the unusually high flood destroyed the crop.
	District Total ...	2,325,910	1,161,268	1,028,148	573,900	912,455	12	13	
Balasore ...	Sadar	741,120	448,000	409,000	386,700	357,200	11	12	The decrease in area in Sadar is due to excessive rain at the time of sowing crops, and the increase of outturn by one anna is due to sufficient rain later on.
	Bhadrak	581,284	389,100	300,800	300,500	300,800	13	12	The decrease in outturn by one anna in Bhadrak is due to excessive rain.
	District Total ...	1,322,404	837,100	710,400	687,500	658,000	12	12	This year has been generally favourable to the growth of the bhadoi crops, and the full normal area has been utilized. Last year a part of this area was left out for want of seasonable rain and other causes due to irregular rainfall. The outturn of the crops this year is estimated at not less than 12 annas against 6 or 8 annas of last year.
Angul and Khond Mals.	Angul	585,900	128,400	59,600	59,600	59,000	12	12	
Puri ...	Sadar ... ... Khurda	979,200 633,729	460,800 267,300	323,840 161,100	320,000 161,000	220,000 161,100	9 14	12 14	The increase in column 4 is owing to new land being brought under cultivation in Khurda. Last year the rainfall was deficient and in some parts of the district the crop was damaged by heavy flood. This year the rainfall is sufficient and more regular. If everything goes on well a 13-anna crop may be expected, but it is too early yet to make an estimate.
	District Total ...	1,612,929	728,100	484,940	481,100	481,100	11	13

Approximate area under last year's winter rice in acres.	Estimated area under this year's winter rice in acres.	Taking 16 annas to represent the average outturn, how many annas represented outturn last year.	Taking 16 annas to represent the average outturn, how many annas will represent this year's outturn?	Remarks by the District Officer.	Remarks by the Agricultural Department, Bengal.
							Annas.	Annas.		
Hazaribagh	Sadar	2,928,000	1,659,300	665,986	665,986	665,986	14½	16	Rains being plenty, a full 16-anna crop is expected.	
	Giridih	1,565,440	819,200	448,640	448,640	448,640	15½	16		
	District Total ...	4,493,440	2,478,500	1,114,626	1,114,626	1,114,626	15	16		
Lohardaga	Whole district ...	4,568,960	2,558,300	1,491,500	1,491,500	1,491,500	14	14	No noticeable change could be found in the outturn of this year as compared with that of the last year.	
Palamau ...	Whole district ...	3,139,200	768,000	320,000	288,000	261,000	16	16	Up to now the prospects are extremely favourable.	The Deputy Commissioner should explain in final forecast why with a favourable season the area under cultivation is less than that shewn in less year's estimate.
Manbhum	Sadar	2,140,160	764,194	354,296	354,296	354,296	9	12	Heavy rain during the sowing time was favourable, and the prospect of crop so far was good, but heavy rains in September have been injurious to rice crop, which has lately been attacked by blight.	
	Gobindpur ...	513,920	171,306	114,204	114,204	114,204	8	10		
	District Toal ...	2,654,080	935,500	468,500	468,500	468,500	8½	11		
Singbhum	Whole district ...	2,454,720	1,182,073	693,702	220,555*	688,693	12	15	The increase in area cultivated is no doubt due to the favourable rainfall this year.	* This figure is very improbable. Last year the area sown was estimated at 478,136 acres, which was a little short of the normal area as then estimated. The Deputy Commissioner will please reconcile the estimates now furnished with those given last year in the return of the Final Winter Rice Report due in November next.

RESOLUTION ON THE ANNUAL GENERAL ADMINISTRATION REPORT FOR THE RAJSHAHI DIVISION FOR 1892-93.

GENERAL DEPARTMENT—MISCELLANEOUS No. 2364.

Darjeeling, the 16th October 1893.

RESOLUTION.

READ—

The Annual General Administration Report for the Rajshahi Division for 1892-93.

Read also

The Annual General Administration Report for 1891-92, and Resolution of Government thereon.

This report is submitted by Mr. Nolan, who was in charge of the Division throughout the year.

Tours.

Mr. Nolan spent 138 days on tour, during which he inspected all the sadar stations and all the sub-divisions of the Division but one, which, however, was inspected during the first week of April. He made an interesting tour through Sikkim, examined the important settlements in progress in Kalimpong and Jalpaiguri, introduced a prompter system of dealing with complaints of misconduct against police officers in Dinajpur, and secured some improvements in police administration and in the details of collectorate business in Rampur Boalia. All the Collectors and Sub-divisional Officers of the Division appear to have complied with the orders of Government in respect to the duration and nature of their tours, except Mr. Mackenzie, Sub-divisional Officer of Alipore in Jalpaiguri, whose touring, owing to bad health, fell short by 19 days of the prescribed standard, and Mr. Rebello, in whose case the deficiency, amounting to only two days, is not explained. The Commissioner remarks that the Collectors, while themselves doing excellent work in camp, do not take sufficient pains to direct their subordinates in this matter, and the Officiating Lieutenant-Governor agrees with him in thinking that, when District Officers receive Sub-divisional Officers' programmes, they should consider with care whether they are the best that can be devised, and if not they should alter them. The Commissioner and all the District Officers observed the standing orders of Government regarding the inspection of district and sub-treasuries, except the Deputy Commissioner of Darjeeling, who, owing to indifferent health, was unable to visit the Siliguri sub-treasury during the rains. Though the inspections were generally thorough, no irregularities were brought to light by them.

Weather and crops.

2. The rainfall, except in parts of the Rajshahi district, was everywhere sufficient and well distributed, and crops were generally above the average. The Commissioner points out that owing to the system of crop reporting prescribed by the Government of India, under which an average crop is represented as a 16-anna one, while according to local usage sixteen annas represents a bumper crop, there is some risk of confusion in regard to the outturn of crops given in the official reports. Instances of such confusion are noticed, such as where one Collector in the text of his report says the aman crop was almost a bumper one, and yet records it as a 14-anna crop in the tabular statements annexed. The attention of the Director of the Agricultural Department will be called to the Commissioner's remarks, and he will be requested to consider whether, in case the mufassal reports are made out according to local usage, the results may not in his office be translated into the notation prescribed by the Government of India, or, if not, whether any other remedy can be suggested. But whatever excuse

zamindars and other crop reporters may have for misunderstanding the prescribed nomenclature, Collectors at least should make sure that the tabular returns compiled by themselves are consistent with the statements made in the text of their reports.

Public health.

3. The following statement shows the total number of deaths reported as compared with the preceding year:—

			Deaths per mille.	
	1892.	1891.	1892.	1891.
Dinajpur	52,279	58,283	33·6	38·48
Rajshahi	53,733	51,954	40·91	39·04
Pabna	36,847	36,061	27·04	26·46
Bogra	24,018	20,553	29·38	25·14
Rangpur	68,320	82,110	33·07	39·77
Jalpaiguri	23,685	28,186	34·76	41·36
Darjeeling	9,026	7,087	40·41	31·73
Total	267,908	284,234	33·4	35·4

In the Rangpur and Dinajpur districts, the decreased mortality is stated to have been due to abatement of fever and cholera, which had prevailed in the previous year, and in Jalpaiguri it is attributed to better registration.

The registration of deaths appears generally to be more carefully done in this than in some of the other Divisions, the average number of recorded deaths per thousand in the year being 33·4 as compared with 30·46 in the Chittagong district, which is usually regarded as an unhealthy one. The total number of persons vaccinated during the year was 232,998 as compared with 204,847 in 1891-92.

Material condition of the people, emigration, and prices of food and labour.

4. As might be expected in a Division in which rice and jute are extensively grown, with good crops, high prices and moderate rents, the cultivators and traders in produce made large profits, but labourers and the extensive class known as *bhadro lok*, who live by service and on small receipts from rent as petty landlords, suffered greatly under pressure of high prices.

The average wage of a common cooly throughout the Division appears to be about four annas a day, which, though fifty per cent. less than that in the Chittagong Division, is nearly double the wage in Bihar, but shows no tendency to rise with the price of food. Though the masses of the people have little to complain of as regards wages, rent, or abundance of produce, they suffer greatly from fevers and other diseases due to unhealthly climate, bad drainage, and the insanitary conditions of village life generally.

There is no emigration from the Division; on the contrary, a large influx takes place annually of labourers coming to the tea gardens from Nepal, and of palki-bearers, workers on roads, reapers, and so forth, who migrate from the western districts, especially from Saran. Some of these immigrants make their permanent homes in this Division.

Manufactures and mines.

5. The principal industries classified as manufactures are—tea, silk, indigo and cinchona. The year was an exceptionally bad one for indigo, which is a declining industry in Rajshahi. The outturn of manufactured silk, on the contrary, rose from 44,164lbs. to 79,900lbs.; the number of tea gardens increased from 356 to 367, the gross yield from 25,690,346lbs. in 1891 to 28,860,229lbs. in 1892, and the average yield per acre from 377 to 420lbs.

No mines are worked, but a plot of about 850 acres in the Daling subdivision of the Darjeeling district was demarcated during the year, a coal-mining lease for the area having been applied for by Messrs. Octavius Steel and Company. Two applications for licenses to prospect for coal and limestone in the same sub-division have also been received.

Trade and commerce.

6. Among the most important articles of export, the Commissioner enumerates rice, jute, gunny, tea, tobacco, hides, oilseeds, pulses, molasses, ganja, indigo and silk; among imports, piece-goods, salt and kerosine oil; and makes appropriate remarks on each of these articles.

Owing to a partial failure of the rice crop in 1891-92, there was a decrease in the exports of 1892-93. Jute, which as a staple crop of the Division is second only in importance to rice, and as an export now takes precedence of it, yielded an excellent harvest, and the exports of it were the largest on record. The exports of gunny bags from Sirajganj, Jalpaiguri and Darjeeling, and the quantity of tobacco, hides, wheat, pulses and molasses exported increased, while there was a falling off in the exports of oil-seeds owing to the mahajans having had a large stock stored in Calcutta from the previous year.

In Pabna and Rajshahi the imports of piece-goods show a steady increase. No figures are available for Jalpaiguri and Bogra, while in Dinajpur and Darjeeling there was a decrease. The imports of salt also show a large falling off in Dinajpur; in other districts there was an increase, or imports were nearly the same as in the previous year.

The imports and exports of trade with Bhutan show a slight decline. There was an increase in the volume of trade imported from Tibet and Nepal, and in the exports to Tibet and Sikkim, but there was a decrease in the exports to Nepal.

Civil Justice.

7. The following statement shows the number of cases disposed of by Munsifs :—

District.	Sub-division or thana.	Description of Court.	Number of officers.	Number of original cases disposed of— Ordinary.	Small Cause Court.	Details of cases in columns 5A and 5B. Money.	Rent.	Title.	Number of witnesses examined.	Ratio per cent. of witnesses detained over two days to total number examined.	Ratio per cent. of cases pending at end of year to total disposed of.

Note.—The fraction means that an officer was employed for the fractional part of the year.

There was a large increase in the number of suits for money and rent. The increase in the latter was due to the accumulation of arrears because of the bad crops of 1891-92, and in the former to the difficulty found in executing contracts for delivery of produce, especially jute, on account of prices having proved much higher than had been expected.

Police and crime and criminal justice.

8. The following statements show the number of criminal cases disposed of by Stipendiary and Honorary Magistrates, the number of witnesses examined, and the percentage of them detained for two days:—

Stipendiary Magistrates.

District.	Subdivision.	Class of officers.	Number of officers.	Cases disposed of.	Persons disposed of.	Ratio per cent. of persons convicted to disposed of.	Number of witnesses examined.	Ratio per cent. of witnesses detained over two days to total number examined.	Ratio per cent. of cases confirmed in appeal to total appealed.	Number of A cases disposed of.	Number remanded six times and more.	Average number of cases disposed of per officer.	Average number of witnesses examined in each case.	Ratio per cent. of column 12 to column 11.

NOTE.—The fractions mean that one officer was employed for the fractional part of the year.

Though the figures given in these tables afford useful indications of the work done by the different classes of Magistrates and by individual Magistrates, it would, in the Officiating Lieutenant-Governor's opinion, be a mistake to judge the efficiency or industry of Magistrates by reference solely to them. The ratio of witnesses detained by Stipendiary Magistrates over two days to the total number examined was 3·1 in the year under review, against 6·8 in the preceding year, and the Lieutenant-Governor is glad to acknowledge a great and satisfactory improvement in this very important matter. There has been a marked diminution during the last two years in the objectionable practice of adjourning cases in order to postpone unpleasant work. The Commissioner has made the following remarks on the practice of dealing with complaints by calling on the prosecutor to produce his witnesses, or summoning them to appear without issue of process against the accused :—

"The procedure is called a 'judicial enquiry,' though it is held *ex parte*, and is supposed to be under section 202, Criminal Procedure Code, though the record of reasons required by that section is seldom made. In false cases it gives the informant the opportunity of getting his calumnies set down without the chance of their being exposed by the persons defamed; in true cases it causes delay, and harasses witnesses by a double attendance. The object apparently is to secure a higher percentage of convictions to persons summoned—a result which is of little or no benefit when obtained by such expedients. The attendance of witnesses and the adjournments on such enquiries elude all check, as they do not appear in the returns."

There may in many cases be an advantage in enquiring into the complaint by examining witnesses before calling on the accused to appear. But it is easy to push the practice too far, and when the complainant on first appearance shows sufficient *primâ facie* ground for action, probably no sensible officer would decline to act on the complaint.

The average number of cases disposed of per officer and the average number of witnesses examined in each case was less than in the previous year, while the number of cases remanded six times or more fell from 241 to 62. The working of Honorary Magistrates' Benches also shows an improvement.

9. The following table shows the results of sessions trials :—

	Districts.							Total.
	Dinajpur.	Rajshahi.	Pabna.	Bogra.	Rangpur.	Jalpaiguri.	Darjeeling.

Darjeeling ...	239	170	65	4	69
Divisional total ...	4,147	3,650*	434	843	1,277

* Include attendance out of turn.

There was an increase in the total number of cognizable cases from 13,499 in 1891-92 to 14,277, which is attributed to the high prices which prevailed until towards the close of the year.

Special preventive measures were adopted in Jalpaiguri, Rangpur, and Dinajpur, by establishing patrols, stationing police to co-operate with chaukidars, and providing alarm signals to be beaten when dacoits approach. As the Commissioner remarks, it is yet to be seen whether these tins will, after the fashion of scarecrows, have any effect in frightening away thieves, but the device is said to be popular with the people in the localities concerned.

Police.

11. The number of cases reported to the police and brought under inquiry was 11,701, of which 10,040 were investigated, and 713 were declared to be false.

Sixty-one charges of a serious character, including torture, extortion, and embezzlement, were brought against the police; of these 42 occurred in the Dinajpur district alone. The Lieutenant-Governor notes with dissatisfaction that these charges were not investigated in the manner prescribed for such cases, and that many of them were not specially reported.

Registration.

12. The number of deeds registered increased from 76,106 in 1891-92 to 87,034 in 1892-93. The increase is normal and due to the increasing confidence of the public in registration. Two new offices were opened in Bogra.

The work done by the different registration offices is shown below:—

District.	Class of Registration Office.	Number of offices.	Number of documents registered.	Average per office.
1	2	3	4	5
Dinajpur	Special	1	5,654	5,654
	Rural	4	10,765	2,691

The total demand of land revenue recoverable within the year was Rs. 51,85,289, and the total collections Rs. 50,72,430. The prescribed standard of collections from permanently-settled estates, *i.e.*, 99 per cent., on the current annual demand, was reached in all the districts of the Division except in Rangpur. In that district the deficiency was due to the fact that a sum of Rs. 9,357, which was presumably paid within the year in another treasury, was received by transfer receipt after the close of the year.

The realizations on private estates temporarily leased to farmers were everywhere above the prescribed standard of 95 per cent., except in Rangpur, where they amounted to only 67·2 per cent. on the current demand. The deficiency has since been made good, but the Lieutenant-Governor agrees with the Commissioner in thinking that the arrears should have been realized within the year. The farming system of management has little to recommend it other than the facilities it ought to afford in realizing the Government demand with punctuality; where it fails of the attainment of this object, it may be said to have failed altogether.

On estates directly managed for proprietors, class III (*a*), the pecentage of collections on demand was below the prescribed standard of 90 per cent. in Pabna on account of diluvion and the want of an adequate record of rights. Proceedings are, however, now being taken under chapter X of the Tenancy Act to prepare a record of rights of these estates.

The collections in Government estates managed direct, class III (*b*), were not up to the standard (90 per cent. on the current annual demand) in Rajshahi, Pabna, Bogra, and Jalpaiguri. The not altogether satisfactory results as regards this class of estates are attributed in Rajshahi to bad harvests, in Pabna to diluvion and deterioration of land by deposit of sand, and in Bogra to the fact that a sum of Rs. 4,638, realized by the Manager of the Jaipur estates a few days before the close of the year, could not be remitted to the treasury, 30 miles off, and credited in the accounts within the year. The Lieutenant-Governor is inclined to agree with the Commissioner that sums thus actually collected should not be shown as an arrear, though not brought on to the treasury books within the year.

In Jalpaiguri the demand from Government estates managed direct was increased by the sum of Rs. 82,087 obtained from the recent settlement operations in the Maynaguri tahsil. Owing to the lateness of the period when the new rent-rolls were furnished, the whole of this amount could not be collected within the year, but the Officiating Lieutenant-Governor observes with much satisfaction that the whole of this increased demand was paid up without objection after the close of the year.

The total collections of land revenue show an increase of Rs. 63,200 on those of the previous year.

The collections on account of road and public works cesses, with an increased demand, show an improvement both as respects the total amount realized, and relatively to the demand.

Settlement.

14. The settlement of the Maynaguri tahsil, resulting in an increase of revenue from Rs. 1,28,000 to Rs. 2,08,000, or 62·5 per cent., was completed, and for other tahsils rate reports and the work of actual assessment made considerable progress during the year. In these latter tahsils also a considerable increase of revenue is expected. The Lieutenant-Governor is glad to observe that the settlement of Maynaguri has stood the test of collections, and that no opposition to the assessments has been offered. It is satisfactory that so large an increase of revenue was obtained without opposition and paid without difficulty, and the results are very creditable to the Settlement Officer and the officers who supervised his proceedings. The Commissioner will doubtless keep a close watch on the future working of the settlements already concluded, and on the progress in the work that remains to be done.

The resettlement of the Kalimpong estates in Darjeeling resulted in an increase of revenue of Rs. 8,408, or 100 per cent. on the previous revenue.

Improvements in communications, sanitation, agricultural improvements in Government estates.

15. Sums amounting to Rs. 9,862 for miscellaneous improvements, Rs. 8,100 for sanitary improvements, and Rs. 2,000 for agricultural public works, were expended in Government estates. Rs. 15,285 were spent in repairs of existing

roads, besides Rs. 27,900 in opening out new routes in the backward part of the Government estates in Jalpaiguri. Naini Tal potato seeds were supplied to the cultivators in the Duars by the Agricultural Department, and the cultivation of them proved a success. A model farm for agricultural experiments and cultivation of new staples was started at Maynaguri.

16. The number of certificates issued during the year shows an increase from 5,571 to 6,914, the bulk of which were for arrears of road and public works cesses.

Certificates.

The following statement shows the number of cases disposed of, amount realized, and number pending at the close of the year:—

District.	Department.	Number pending at beginning of the year.	Number issued during the year.	Total for disposal.	Amount of certificates.	Number disposed of during year.	Amount realised.	Number pending at close of year.

17. The number of excise shops was reduced by 162, but the revenue remained almost stationary, being Rs. 8,86,862, against Rs. 8,86,594 in the preceding year.

Excise.

The Commissioner gives the following particulars regarding the cultivation of ganja:—

Districts.	Area cultivated in bighas.		Number of cultivators.		Produce in maunds.		Average produce per bigha.	
	1891-92.	1892-93.	1891-92.	1892-93.	1891-92.	1892-93.	1891-92.	1892-93.

There was a large increase in the area under cultivation in 1892-93, but the outturn was short and deficient in quality, as it contained little resin and much

leaf. Much improvement is reported to have been effected in the punctual issue of storage licenses. The cultivators are said as a rule to act honestly and fairly, and petty pilfering and smuggling has, in the Commissioner's opinion, been minimized by constant supervision.

Stamps and income-tax.

18. There was an increase of Rs. 1,20,195 from the sale of stamps, attributable to the general progress of the country in wealth and population, and a slight increase to Rs. 3,12,890 from Rs. 3,08,009 in the income-tax demand. Great difficulty was experienced in realizing income-tax from the tea-planters of Jalpaiguri.

Education.

19. The following table gives the principal educational statistics for the Division, exclusive of private institutions:—

District.	Class of schools.	Number of schools.	Number of pupils on rolls.	Cost. Provincial.	District Board.	Municipality.	Fees.	Other.	Total.	Cost per head of pupils.	Population of district.	Number of boys of school-going age.	Percentage of boys at school to boys of school-going age according to Director of Public Instruction's report.

NOTE.—In the above statement the cost of buildings, furniture, inspection, scholarships and miscellaneous charges, amounting to Rs. 6,265, is not included.

There were altogether 3,361 public schools, with 98,439 pupils out of a population of 8,019,187. There were also 249 private institutions with 2,660 pupils, which are not included in the above statement, giving a total of 3,610 schools with 101,099 pupils. The number of boys of a school-going age calculated at 15 per cent. of the male population is 616,909, and only about one in every seven of the boys who ought to be at school is really receiving any kind of literary instruction. These figures show that education is lamentably backward in all the districts of the Division, not alone absolutely, but relatively to other parts of Bengal. The Chittagong Division may be taken by way of example. In it as a whole the ratio of boys attending school to the total number of a school-going age is 47 per cent., while in the Noakhali district it is as high as 62·3 per cent. The number of schools increased since the preceding year by 21, and of pupils attending them by 2,226. But the progress made is, as Mr. Nolan remarks, very slow and partial:—

"It would," he adds, "be much accelerated were we to abandon all half measures, and introduce in the Regulation districts the system of payment by results in its entirety. The expenditure on stipendiary schools in 1891-92 was Rs. 24,646 out of a total grant for primary education of Rs. 60,569. This year it was Rs. 25,707 out of a total of Rs. 64,669—figures which give little support to the assumption that there has been any marked change in policy. In Pabna, Bogra and Rangpur the proportion of the grant spent on stipends seems excessive. It is seldom that any good reason can be assigned in such districts for giving one school an allowance, and perhaps the examination rewards also, while another gets the rewards only. The true explanation would generally disclose some forms of favouritism, inconsistent with obtaining the greatest possible results from the very limited means available."

The total expenditure on education, with only 98,439 pupils at school, was Rs. 4,30,701, exclusive of miscellaneous charges, cost of inspection, buildings

and scholarships, against Rs. 3,92,703 in Chittagong, with a school-going population of 142,306 pupils, and the cost per pupil in Rajshahi was Rs. 4-6 against little more than half that amount (Rs. 2-12) in Chittagong. In the Officiating Lieutenant-Governor's opinion the state of things disclosed by these figures demands inquiry and explanation by the Educational authorities. Why is it that 62·3 per cent. of boys of a school-going age attend school in the Muhammadan district of Noakhali, while only 13·4 per cent. of them are at school in the Rajshahi district; and why does the average cost per pupil amount to Rs. 5-4 in the latter against Re. 1-10 in the former district? A technical school was opened during the year at Pabna, but it is yet premature to say what degree of success may attend it.

Dispensaries.

20. The following table gives the statistics relating to dispensaries:—

District.	Number of dispensaries.	Income from— Government.	District Board.	Municipality.	Subscriptions.	Total.	Daily average patients. In-patients.	Out-patients.	Ratio per cent. of out door patients to total population.
1	2	3	4	5	6	7	8	9	10

* One dispensary (Dighapatia) is maintained by the Dighapatia estate. Figures not available.

Though the people of the Rajshahi Division appear to be unwilling to send their children to school, they display readiness to avail themselves of medical aid, and more liberality in providing it than the inhabitants of Chittagong. The number of patients treated at dispensaries was 206,173, or more than double the number of children at school, while the private subscriptions to dispensaries amounted to Rs. 34,365, or more than four times the amount subscribed in the Chittagong Division.

The dispensaries, of which there are 50, have, the Commissioner remarks, done excellent work, not only directly, but also by diffusing a knowledge of English medicines.

Local Self-Government Institutions.

21. The Lieutenant-Governor is glad to observe that the Commissioner is able to report that the local bodies generally worked well during the year, and that in no case was there any marked neglect of duty on their part. There is a tendency shown by them to increase establishments, which, however, is duly checked by the Commissioner.

State of public feeling.

22. On this subject Mr. Nolan makes the following remarks:—

"The planters of Darjeeling were much exercised during the year by the recruiting in their neighbourhood for employment in the army and on police work; those of Jalpaiguri by the proposed extension to their estates of the chaukidari system; and in both districts by the orders directing the assessment of commission paid to Managers for income-tax. I did not notice any manifestation of opinion among other classes in this part of the Division. In the Regulation districts the sentiments entertained are those of Lower Bengal generally, without any local colouring that I can discern. The Muhammadans are concerned mainly about their supposed decline as a community in position and power, through the introduction of competition for public offices, and of educational tests which do not recognize their special attainments in Persian or Arabic. Among the Hindus the lawyers, and generally those under the influence of English education, are more or less in sympathy with the views expressed by the vernacular press and by the Congress Association. They joined in the agitation against the notification altering the list of offences triable by jury, and I have no doubt really felt considerable interest in the subject. The members of the general community, including the trading and productive classes, whose education is confined to oriental languages, take no part in the discussion of such topics. They consider the politics of the day in Bengal,—except where, as in the case of Muhammadans, a religious sentiment

is touched,—to be beyond their control and out of the sphere of their interests. The power of exercising influence has, in their view, fallen into the hands of the few who speak the dominant language, and it is useless for others to attempt interference."

Conduct of the zamindars.

23. Regarding the conduct of zaminders of this Division, the Commissioner makes the following remarks:—

"According to Bengal tradition, the work of agriculture belongs exclusively to the raiyat; that of keeping correct accounts to the Government patwaris, if such there be; while the functions of the zamindar are to collect as much as he can, to pay the inevitable revenue, to support the established Government, and to be liberal according to his means. Judged by this standard, our landholders have behaved very well. They do not contribute to the cost of cultivation, whether by effecting improvements, reclaiming jungle, or otherwise; they have never regarded the provisions of the Permanent Settlement, and of many subsequent laws, that only a fixed rent shall be levied, to the exclusion of occasional cesses; so many of them have purposely prepared their papers to support claims to rates higher than those in force, that their accounts are not to be trusted; but they satisfy the public dues, help the Administration in many ways, and are very charitable."

As a class the zamindars bear voluntarily a great part of the expense of education. It is by them the principal temples are built, and they take more than their share of the burden of supporting the poor in a country where poor laws are unknown. But, on the other hand, several of them, in Pabna especially, are unfavourably mentioned as provoking agrarian riots and fomenting disputes which are carried on not merely by open violence, but also by the aid of false accusations in the Courts and by perjury; this evil is, however, decreasing.

Babu Kali Prasanno Bhaduri of Porjona in Pabna, Nawab Abdus Sobhan of Bogra, the Maharaja of Dinajpur, Rai Govinda Roy Sahib Bahadur, Babu Krishna Roy Chowdhry, and Chaudhrani Saudamini of Dinajpur, are specially mentioned for their public spirit and liberality.

The Maharani Surnamoyi, C.I., maintained a higher English school and well equipped dispensary in Rangpur; Raja Mohima Ranjan Rai of Kakina maintained a dispensary and two English schools, and is also a popular and considerate landlord. His Highness the Maharaja of Kuch Bihar was most generous in supporting schools and dispensaries on the estates owned by him in the Jalpaiguri district.

Political.

24. The Government of Bhutan was conducted with firmness, the interregnum in the office of the Deb Raja was brought to a close, and the delimitation of the boundary with Jalpaiguri was completed during the year. The administration of Sikkim was conducted by a council of Lamas, Dewans, and Kazis acting in cordial cooperation with Mr. White, the Assistant Political Officer, under the general supervision of the Commissioner.

25. The Officiating Lieutenant-Governor's thanks are tendered to Mr. Nolan for his able and efficient administration, as well as for his excellent report. The remarks on the character of the officers will be communicated to the Appointment Department.

By order of the Lieutenant-Governor of Bengal,

M. FINUCANE,

Offg. Secretary to the Govt. of Bengal.

RESOLUTION ON THE ADMINISTRATION REPORT OF THE PORTS IN ORISSA FOR 1892-93.

No. 2315Marine.

GOVERNMENT OF BENGAL—MARINE DEPARTMENT.

Dated Calcutta, the 5th October 1893.

RESOLUTION.

READ—

The Administration Report of the Ports in Orissa for 1892-93.

1. *False Point.*—The receipts of the port show a decrease of Rs. 171 as compared with those of the preceding year. The details are given in the table below:—

PARTICULARS.	1891-92.	1892-93.	Increase.	Decrease.	REMARKS.
	Rs.	Rs.	Rs.	Rs.	
Port-dues on vessels—					
Foreign trade ...	1,268	1,700	432	......	
Coasting " ...	821	620	......	201	
Native craft ...	34	23	......	11	
Mail steamers ...	7,404	7,008	......	396	
Miscellaneous ...	4	9	5	......	
Total ...	9,531	9,360	437	608	

The increase in the port-dues from foreign-trade vessels is attributed to the higher tonnage of the vessels visiting the port, while the decrease under the other heads, except "Miscellaneous," is due to fewer visits paid by vessels during the year.

2. The charges which amounted to Rs. 7,588, against Rs. 6,146 during the previous year, are summarized below:—

NATURE OF CHARGES.	1891-92.	1892-93.	Increase.	Decrease.	REMARKS.
	Rs.	Rs.	Rs.	Rs.	
Establishment	3,542	3,061	......	481	
Boat establishment ...	2,201	2,206	5	......	
Travelling	112	105	......	7	
Contingencies	101	257	156	......	
Dockyard services and supplies	190	1,959	1,769	......	
Total ...	6,146	7,588	1,930	488	

The decrease in establishment charges is due to the reduced rate of salary of the Port Officer, who was officiating during the absence on furlough of the permanent incumbent. The increase under "Contingencies" is owing to the payment of the charges for blowing up a wreck off False Point. In the report as received the expenditure on dockyard services and supplies for 1891-92 is shown as *nil*, but on a reference to the excluded local funds accounts, it has been ascertained that Rs. 190 was expended. No information has been given as to the reason of the large expenditure during 1892-93, further than that it is due to transfers made by the Accountant-General. The sum of Rs. 7,588 shown above is exclusive of Rs. 1,822, expended by the Public Works Department in repairing the existing buildings, roads and revetments.

3. The following table shows the number and the tonnage of the vessels that entered and cleared during the year as compared with 1891-92:—

Year.		Entered.		Cleared.	
		No.	Tonnage.	No.	Tonnage.
1891-92	...	78	96,389	78	96,389
1892-93	...	56	74,559	55	74,522

Of the 56 vessels that entered the port, 36 were steamers, all of which were engaged in the coasting trade. Of the 20 sailing vessels, 8 were engaged on the foreign trade and 12 on the coasting trade.

Of the vessels that cleared, 37 were steamers, of which 4 were employed on the foreign trade and 33 on the coasting trade. Of the eighteen sailing vessels that cleared 10 were employed on the foreign trade and 8 on the coasting trade. There is a fall both in the number and the tonnage of the vessels entering the port, which is ascribed chiefly to a smaller export of rice to foreign and coast ports.

4. The following statement shows the value of the trade of the port during the years 1891-92 and 1892-93:—

		Private trade.		Government stores.		Total.	
		1891-92.	1892-93.	1891-92.	1892-93.	1891-92.	1892-93.
		Rs.	Rs.	Rs.	Rs.	Rs.	Rs.
Exports	...	41,55,994	32,35,162	......	14	41,55,994	32,35,176
Imports	...	38,840	1,61,261	2,336	18,729	41,176	1,79,990
Total	...	41,94,834	33,96,423	2,336	18,743	41,97,170	34,15,166

On comparing these figures with the value of the trade given by the Collector of Customs in his report, it is observed that while there is no difference in the total value of the export trade, the whole of it is shown as private trade by the Collector of Customs. The discrepancy is very slight. Under imports, however, the discrepancy is larger, as will be seen from the table below:—

		Figures given by Commissioner.	Figures given by Collector of Customs.
		Rs.	Rs.
Private trade ..	...	1,61,261	1,61,506
Government stores	...	18,729	18,754
Total		1,79,990	1,80,260

As both officers profess to give the same result, the figures should agree.

5. No cases of throwing ballast under the Indian Ports Act X of 1889 were reported. The officers of the port are of opinion that if stone ballast is deposited on the old ballast ground inside the harbour, it can be utilized in improving and strengthening the buildings at Hookeytollah and in protecting the seaface in front of the Refuge-house at that station. Separate proposals on the point have been called for by the Commissioner and are awaited.

6. The buoys marking the Fairway Channel have been painted and overhauled, and are in good order; those in the Bakud and Jamboo Channels are reported to be mostly very old, and nearly worn out. The Collector has been requested to take steps towards replacing them.

7. The canal communication between Cuttack and False Point was interrupted during May 1892 for the repairs of the canal, and from the 25th July to the end of the year for repairs of the breaches caused by the high floods of July 1892. During these periods communication was carried on *viâ* the Gobri river and the Kendrapara Canal.

8. *Puri.*—The receipts of the port amounted to Rs. 1,789, against Rs. 2,796 during the previous year. * Details are shown in the table below:—

PARTICULARS.	1891-92.	1892-93.	Increase.	Decrease.	REMARKS.
	Rs.	Rs.	Rs.	Rs.	
Port-dues on sailing vessels ...	39	240	201	......	
Ditto on British India Steam Navigation Companys' Steamers.	2,738	1,524	......	1,214	
Port-dues on other steamers ...	19	25	6	......	
Total ...	2,796	1,789	207	1,214	

The decrease is ascribed to fewer visits of steamers exporting rice, owing to the high prices prevailing in the district, and to a reduced demand from foreign ports.

9. The disbursements of the port during the past two years are shown below:—

PARTICULARS.	1891-92.	1892-93.	Increase.	Decrease.	REMARKS.
	Rs.	Rs.	s.	Rs.	
Light-house establishment ...	312	306	......	6	
Ditto contingencies ...	14	34	20	......	
Vessels and boats establishment	318	318	......	......	
Ditto contingencies	132	79	......	53	
Total ...	776	737	20	59	

10. The number and tonnage of the vessels entering and clearing the port as compared with those of the preceding year are shown in the following table:—

Year.	Entered.		Cleared.	
	No.	Tonnage.	No.	Tonnage.
1891-92 ...	33	47,012	33	47,012
1892-93 ...	20	26,603	20	26,603

Of these, 16 were steamers and 4 sailing vessels.

11. The total value of the export and import trade is shown below:—

	Private trade.		Government stores.		Total.	
	1891-92.	1892-93.	1891-92.	1892-93.	1891-93.	1892-93.
	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.
Exports ...	6,00,608	3,30,232	......	......	6,00,603	3,30,232
Imports ...	6,362	139	1,123	22	7,485	161
Total ...	6,06,970	3,30,371	1,123	22	6,08,093	3,30,393

A comparison of these figures with those given by the Collector of Customs shows that while the two authorities agree as to the value of the import trade, there is a large difference in the value of the exports.

The amounts given by each officer are shown below:—

	Figures by Commissioner.	Figures by Collector of Customs.
	Rs.	Rs.
Private trade	3,30,232	3,04,838
Government stores	......	......
Total ...	3,30,232	3,04,838

The attention of the Commissioner will be invited to this large difference.

12. *Balasore.*—Under this port are also included the minor ports of Churaman, Laichhunpur, Chanua, Subarnarekha, Dhamra (Chandbally), and Sartha. The total receipts as compared with those of the preceding year are shown in the following table:—

Particulars.	1891-92.	1892-93.	Increase.	Decrease.	Remarks.
	Rs.	Rs.	Rs.	Rs.	
Port-dues on European vessels	......	......	......	......	
Ditto on Native craft ...	1,419	809	......	610	
Ditto ditto steamers	1,493	1,600	107	......	
Registration fee under Act X of 1841.	......	7	7	......	
Sale-proceeds of unclaimed property.	1	35	34	......	
Miscellaneous	4	20	16	......	
Total ...	2,917	2,471	164	610	

There has been a large decrease in the collection of port-dues on native craft, which is said to be due to a falling off in the export of rice, consequent on the failure of the crop in a part of the district, but in the Commissioner's opinion this decrease is due to a reduced demand from foreign markets.

13. The table below compares the disbursements of the year with those of the preceding year:—

Particulars.	1891-92.	1892-93.	Increase.	Decrease.	Remarks.
	Rs.	Rs.	Rs.	Rs.	
Establishment	5,660	5,934	274	......	
Travelling allowance ...	157	70	......	87	
Contingencies	36	50	14	......	
Miscellaneous ...	760	540	......	220	
Pensions	135	5	......	130	
Dockyard services and supplies.	4,955	4,551	......	404	
Light-house establishment ...	3,208	3,381	173	......	
Ditto contingencies ...	21	......	......	21	
Percentage paid to Government.	91	101	10	......	
Total ...	15,023	14,632	471	862	

14. The accounts of this port have always shown a deficit, which has to be met from Provincial Funds, and in order to reduce this deficit, the rate of port-dues has from the 1st May 1893 been raised to the maximum of 4 annas per ton, and a Bill is now before the Legislative Council to amend the Act so as to enable the dues to be levied on mail steamers and coasting vessels once in 30 days, instead of once in 60 days, as at present.

15. The total number of vessels which entered and cleared as compared with that of the previous year is shown below:—

	Entered.		Cleared.	
	No.	Tonnage.	No.	Tonnage.
1891-92	345	78,380	364	78,869
1892-93	339	82,019	339	81,556

Of the number which entered the port, 275 were steamers and 64 sailing vessels—all of which were from coasting ports, with the exception of 4 sailing vessels. Of the number cleared, 271 were steamers and 68 sailing vessels, 4 of the latter going to foreign ports and the remainder to coasting ports. The

decrease in the number of vessels visiting the port is ascribed to a reduced export of rice, consequent partly to failure of crops in the north of the district, and partly to export by land.

16. The value of the export and import trade is shown below:—

Particulars.	Private trade.		Government stores.		Total.	
	1891-92.	1892-93	1891-92	1892-93.	1891-92.	1892-93.
	Rs	Rs.	Rs	Rs.	Rs.	Rs.
Exports .	48,49,130	41,29,697	125	350	48,49,255	41,30,047
Imports	74,92,971	64,34,096	1,77,213	1,82,577	76,70,184	66,16,673
Total ...	1,23,42,101	1,05,63,793	1,77,338	1,82,927	1,25,19,439	1,07,46,720

There is a small difference in the value of the import trade as shown in the statement above and that shown by the Collector of Customs. The latter officer has shown the value of the private trade at Rs. 64,33,585, or Rs. 511 less than what is shown by the Commissioner.

17. A weekly steamer service was maintained throughout the year between Calcutta and Chandbally by three steamer companies. From December 1892 to March 1893 almost every week four or five steamers arrived at Chandbally from Calcutta, some of them making double trips. The river having become shallow, the steamer to Alba sometimes stopped at Balpal and sometimes went to Chandbally. The steam service between Balasore and Calcutta was kept up by the S.S. *Bassein* alone, the other steamers having been withdrawn. Communication between Cuttack and Chandbally was kept up *viâ* the Kendrapara Canal by the canal steamers.

18. There was no accident to the Tower and subsidiary lights of Shortt's Island. The Balasore light at Chandipur is visible at a distance of 10 miles, and is in good order.

19. All the buoys at Chandbally were overhauled and painted; those at Balasore remain to be done.

20. The channels at the Brahmani and Byturni rivers gave rise to no inconvenience, nor was there any complaint. There has been no improvement in the channel of the Boiobalong river. The guts are narrow, and can only be used by vessels of light draught and during high tide.

By order of the Lieutenant-Governor of Bengal,

C. W. ODLING,

Secretary to the Govt. of Bengal.

RESOLUTION ON THE ANNUAL REPORT OF THE PORT OFFICER OF CALCUTTA FOR 1892-93.

No. 2382Marine.

GOVERNMENT OF BENGAL—MARINE DEPARTMENT

Dated Calcutta, the 13th October 1893.

RESOLUTION.

READ—

The Annual Report of the Port Officer of Calcutta for 1892-93.

THE department was presided over by Lieutenant E. W. Petley, R.N., throughout the year. The report is submitted by his successor, Captain Creagh, who relieved Lieutenant Petley on 1st April 1893.

2. The strength of the Pilot Service at the close of the year was 60 pilots and 15 leadsmen, showing an increase of two leadsmen, consequent on new appointments. Two leadsmen were admitted locally, and two were brought out from England.

3. The table below exhibits the number of arrivals and departures of steamers and sailing vessels during the past three years:—

		Arrivals.	Departures.	Average tonnage.
Steamers ...	1890-91 ...	811	816	2,569
	1891-92 ...	897	887	2,633
	1892-93 ...	844	841	2,697
Sailing ships	1890-91 ...	233	236	1,635
	1891-92 ...	220	200	1,489
	1892-93 ...	221	220	1,409

To this have to be added eight light-vessels, 10 pilot brigs, and 30 other Government vessels; also 10 vessels put back, and three inland steamers and tugs. There has been a slight reduction in the number of steamers visiting the port, but the average tonnage has increased. On the other hand, the number of sailing vessels shows a small increase with a reduction of the average tonnage.

4. The subjoined statement shows the number of vessels drawing 21 feet and over, which were piloted inwards and outwards during 1891-92 and 1892-93:—

Years.	Steamers or sailing ships.	21 to 22 feet.		22 to 23 feet.		23 to 24 feet.		24 to 25 feet.		25 to 26 feet.		26 to 27 feet.		Total.	
		Inward.	Outward.	Inward.	Outward.	Inward.	Outward.	Inward.	Outward.	Inward.	Outward.	Inward.	Outward.	Inward.	Outward.
1891-92	Steamers	49	94	55	111	36	155	10	90	..	26	1	3	151	479
	Sailing ships	39	49	26	33	12	20	1	3	...	...	...	.	78	105
	Total ...	88	143	81	144	48	175	11	93	..	26	1	3	229	584
1892-93	Steamers	45	65	41	96	37	134	10	88	..	24	..	2	133	409
	Sailing ships ...	36	54	23	39	6	18	1	6	.	1	.	...	66	118
	Total ..	81	119	64	135	43	152	11	94		25	..	2	199	527

The number of outward vessels drawing more than 23 feet of water has decreased from 297 to 273.

5. There were 33 cases of groundings and 6 cases of collisions during the year, against 32 and 9 during the previous year. No damage was done to any vessel in the casualties by grounding, except in the case of the S.S. *Anglia*, which was totally lost. The result of the enquiries into the casualties by collision shows that they were all accidental. The percentage of casualties during the year was 1·83 against 1·86 and 2·81 during the two previous years. This improvement is satisfactory.

6. The receipts and expenditure on account of pilotage for the last three years are shown below:—

	Receipts.	Expenditure.
	Rs.	Rs.
1890-91	8,57,952	8,03,610
1891-92	9,01,447	8,20,617
1892-93	8,50,200	8,41,527

The expenditure does not include the payments made in England, which are approximately Rs. 2,00,000 per annum.

7. The question of reducing the strength of the pilot service to 50 pilots and 14 leadsmen was under the consideration of Government during the year. It has been decided to limit the annual recruitment of leadsmen apprentices up to the year 1899, when it is expected the service will be reduced to 50 pilots and 14 leadsmen. This measure, though not causing any direct saving to Government, will in the future effect a saving under leave and pension allowances, and thus help to produce equilibrium between the total receipts and expenditure.

8. Slight changes have occurred in the Eastern Channel. The Gasper Channel has remained very steady. Extensive alterations have occurred at the lower end of the Saugor roads. The Jellingham Channel was fairly good,

excepting for the formation of moveable lumps to which it is liable. With the loss of the *Anglia*, a dangerous bar formed across the river, and, although to the southward of the wreck, is still there. One inward bound and one outward bound vessel were neaped for want of sufficient water over the bars.

9. The steamer *Guide* was twice docked during the year and extensive repairs executed. The pilot brig *Sarsuti* was in the hands of the Dockyard authorities on three occasions, the last in March 1893, when she was thoroughly overhauled. The brig *Fame* was docked twice, and in addition to the repairs she received, she was supplied with a new jibboom and top gallant yards in place of those carried away by bad weather.

10. A new pilot brig, to be named the *Alice*, is under construction in the Government Dockyard at Bombay, to replace the *Coleroon*, which was lost in the cyclone of November 1891. She is expected to be ready for service at the end of 1893.

11. The number of certificates of each class granted to Masters, Mates, and Engineers after examination at Calcutta, is shown in the table below:—

Nature of certificate.	Candidates.	Total number examined.	Result. Passed.	Result. Failed.	Result. Ineligible.	Provincial certificate granted.	Renewal of certificates.	Remarks.

	Second ditto ...	11	8	3		.	.	
	Total ..	250	166	84	2	......	.....	

12. In addition to the above, one certificate as ship surveyor was issued during the year.

13. One vessel was registered under the Merchant Shipping Act, 1854, and two under Act X of 1841. The registry of one vessel under the latter Act was cancelled.

14. Two vessels were detained under the provisions of Act VII of 1880 as unseaworthy, and were not allowed to proceed to sea until the surveyor reported that the causes for complaint had been removed. One vessel was detained, as her boats were found to be defective, and the biscuits for the crew unfit for consumption. On the Marine Surveyor and the Health Officer reporting that these defects had been made good, she was released and permitted to proceed to sea.

15. The ship *Crofton Hall* which left Calcutta on the 3rd June 1892 returned on the 13th idem on account of what was supposed to be an outbreak of cholera on board. An enquiry was held by the Health Officer of the Port, assisted by Drs. Simpson, Cunningham, Ranking and Crombie, and the outbreak was clearly shewn to be the result of poisoning from the use of putrid meat. There was no reason to believe that the meat when shipped was bad, though that in the particular cask to which the outbreak is attributed might have been; its condition was, however, sufficiently accounted for by the fact that it was kept for four months in what is known as the harness cask, without the brine being renewed. The attention of masters of ships was called to the necessity of care in this respect.

16. The appointment of Port Officer has, under the orders of the Secretary of State, been declared to be terminable at the end of five years and to be ordinarily reserved for an officer of the Royal Indian Marine. In accordance with this ruling Lieutenant E. W. Petley, R.N., vacated the appointment on the forenoon of the 1st of April 1893. The good services rendered to the Bengal Government by Lieutenant E. W. Petley during the five years he held the appointment were acknowledged by a special Resolution published in the *Calcutta Gazette* of the 5th of April 1893.

By order of the Lieutenant-Governor of Bengal,

C. W. ODLING,

Secretary to the Government of Bengal.

RESOLUTION ON THE ADMINISTRATION REPORT OF THE HOWRAH BRIDGE FOR 1892-93.

No. 2391Marine.

GOVERNMENT OF BENGAL—PUBLIC WORKS DEPARTMENT.

Dated Calcutta, the 13th October 1893.

RESOLUTION.

READ—

The Administration Report of the Howrah Bridge for 1892-93.

THE following statement shows the actual receipts and expenditure of the bridge during the year under review, as compared with the previous nine years:—

PARTICULARS.	1892-93.	1891-92.	1890-91.	1889-90.	1888-89.	1887-88.	1886-87.	1885-86.	1884-85.	1883-84.

Proportion of salary of Traffic Manager	...	..	...	375	4,500	4,500	...	.	...	. .
Total	1,55,675	1,67,732	1,47,066	1,41,771	2,04,241	1,52,607	1,87,021	2,14,925	1,90,346	1,91,721
Net revenue	6,024	. .	31,958	27,055	60,475	3,07,662	4,11,235	3,15,087	2,70,070	3,44,974
GRAND TOTAL	1,62,499	1,67,732	1,79,024	1,68,826	2,64,716	4,60,269	5,98,256	5,30,012	4,60,416	5,36,695

2. The income during the year amounted to Rs. 1,62,499, being less than that of the previous year by Rs. 4,696. Railway traffic exhibited a falling off of Rs. 5,632, and under the head of interest there was a further decrease of Rs. 4,349 on account of the loan without interest of rupees two lakhs to the Corporation of Calcutta from the reserve fund. The loan, alluded to above, was sanctioned in connection with the construction of the Harrison Road, and is repayable within three years. On the other hand, the earnings of the steam-tug *Hetty*, which was at work throughout the year, showed an increase of Rs. 7,179 over the receipts of the preceding year.

3. The expenditure amounted to Rs. 1,55,675, or a decrease of Rs. 12,057 over that of 1891-92. The wearing surface of the bridge was maintained in thorough order, a large quantity of planks and battens having been renewed. The wood used for the wearing surface is specially imported by the Commissioners from Johor, near Singapur. The footpaths on both sides were also renewed. The superstructure, timbers, fenders, and sheathings of pontoons were renewed as found necessary. All the other works which were found to be necessary to keep the bridge in thorough order, were carried out.

4. In addition to the ordinary receipts, the following sum, which may be classed as "extraordinary," was received:—

	Rs.
Interest on Government securities of pontoon renewal fund ...	2,000
The corresponding expenditure under the same head was—	
Sinking fund or loan	3,401

4. This is the first complete year the bridge has been lighted by electricity, and it is observed that the actual expenditure has amounted to Rs. 12,386, against an estimate of Rs. 4,660. No explanation of the heavy increase has been given. A detail of this expenditure should be supplied so as to show whether any abnormal expenses have helped to swell this charge.

5. The bridge was opened for the passage of vessels on 148 occasions during the year, of which 103 were on the ordinary fixed days of the week and 45 were Sundays on special application. The number and description of the vessels which passed through the bridge on these occasions are given in the table below:—

	1892-93.	1891-92	1890-91.	1889-90.	1888-89.	1887-88.	1886-87.	1885-86.	1884-85.	1883-84.
Sea-going vessels	309	254	414	362	389	331	295	368	403	469
Inland steamers and flats	1,129	1,400	1,059	911	878	809	818	1,102	944	733
Steam-tugs ..	153	366	549	491	456	397	387	406	342	361
Port Commissioners' vessels ..	183	66	92	53		46	56	69	56	58
Government steamers and flats	....		3	16		6	10	6	10	
Total .	2,074		2,110	1,863			1,596	1,949	1,755	1,621

6. No sea-going vessels collided with the bridge, but there were 52 collisions of other vessels, against 95 during the previous year. This is the lowest number on record.

By order of the Lieutenant-Governor of Bengal,

C. W. ODLING,

Secretary to the Govt. of Bengal.

DISTRICT ROAD FUND.

No. 5978R.C.

GOVERNMENT OF BENGAL—PUBLIC WORKS DEPARTMENT.

Road Cess.

Dated Calcutta, the 12th October 1893.

RESOLUTION.

Receipts and expenditure of the several District Road Committees in Bengal for the 1st quarter of 1893-94.

READ—

Letter from the Accountant-General, Bengal, No. 543L.F., dated 5th October 1893, submitting an abstract of receipts and expenditure of the several District Road Committees in Bengal for the quarter ending 30th June 1893.

RESOLUTION.—The Lieutenant-Governor directs that the accounts of the receipts and expenditure of the several District Road Committees in Bengal for the 1st quarter of the year 1893-94 be published in the *Calcutta Gazette* and circulated to the officers concerned.

ORDER.—Ordered that a copy of this Resolution, together with a copy of the abstract of receipts and expenditure, be published in the Supplement to the *Calcutta Gazette.*

Ordered also that a copy of this Resolution and of the abstract referred to, be forwarded to the Commissioners of the Rajshahi, Bhagalpur, Chittagong, and Chota Nagpur Divisions; to the Superintending Engineers of the Northern and Western Circles; to the Inspector of Works, Eastern Circle; and to the Financial Department of this Government, for information.

By order of the Lieutenant-Governor of Bengal,

F. J. JOHNSTONE,

Secretary to the Government of Bengal.

	No.	District and date of return.		Rainfall at Sadar Station in inches.	Character of the weather and state and prospects of the crops.
BENGAL—*concld.*					
	12	Chittagong	...	...	Report not received.
CHITTAGONG DIVN.	13	Noakhali	...	...	Report not received.
	14	Tippera	Oct. 14, '93	3·84	Weather—seasonable. Transplantation and sowing of *aman* paddy being vigorously pushed on as the water is subsiding rapidly. Prospect of crops has on the whole improved in the whole district. Price of rice and other articles of food is gradually falling.
	15	Chittagong Hill Tracts.	„ 13, '93	2·16	Weather—seasonable. Foggy in the early morning. Prospect of plough-paddy good. Vegetables progressing. No cattle-disease reported. Common rice being sold at 8 seers per rupee.
DACCA DIVN.	16	Dacca	„ 14, '93	0·80	Weather—hot with occasional rain. Harvesting of jute nearly completed and that of paddy commenced in some places. Prospect of *aman* favourable. *Rowa* and *shail* paddy being sown. Common rice selling from 7 to 10 seers per rupee. Fodder not sufficiently available. No cattle-disease.
	17	Faridpur Goalundo Madaripur	„ 14, '93	3·77 2·11 1·58	Weather—fine with occasional showers. Weather favourable for standing crops. Rivers falling. Rice 9 to 11 seers per rupee. Still some cattle-disease at Palong.
	18	Backergunge	„ 14, '93	2·69	Weather—cloudy and fine with occasional slight rain. Prospects of crops remain unaltered. Ordinary rice selling from 7 to 10 seers per rupee. Fodder and water sufficient.
	19	Mymensingh	„ 14, '93	0·58	Weather—seasonable. Prospects of standing crops good. Common rice selling at 8 to 9 seers per rupee. Condition of cattle good. Supply of fodder sufficient except in the Kishorganj subdivision.
RAJSHAHI DIVN.	20	Dinajpur Thakurgaon	„ 14, '93 ...	0·75 1·48	Weather—cloudy and rainy. Prospects favourable all over the district. *Bhadoi* rice selling at Sadar from 13 to 14 seers per rupee and *haimanti* rice 12 seers per rupee. Price of rice at Thakurgaon stationary. Condition of cattle good. Fodder and drinking water sufficient.
	21	Rajshahi Nator Naugaon	„ 14, '93	Not reported 1·17 3·10	Weather—seasonable. Prospects of crops good almost everywhere; in some places excellent. Yesterday's (13th) rain will do much good. No cattle-disease. Water and fodder-supply ample. Rice selling from 10 to 12 seers per rupee.
	22	Rangpur Gaibanda Nilphamari Kurigaon	„ 14, '93	0·50 2·04 0·62 0·17	Weather—cloudy. Jute steeping in progress. Lands under preparation for tobacco and other cold-weather crops. Prospects of *aman* very favourable. Price of common rice 8½ to 10 seers per rupee.
	23	Bogra Sherpur Naukhila	„ 14, '93	1·64 4·62 3·97	Weather—fine with occasional heavy showers. Prospects of *aman* good. Lands are being cultivated for mustard. Common rice sells at 10 to 11 seers per rupee. Fodder and water sufficient.
	24	Pabna	„ 14, '93	0·52	Weather—cloudy and foggy with hot day and cool night. State of standing crops fair. *Rabi* crops being sown. Rice selling at Rs. 4-12 per maund in the Sirajganj subdivision and 9½ seers per rupee in the Sadar subdivision. Fodder and water-supply ample.
	25	Darjeeling Siliguri	„ 14, '93 ...	Nil 0·12	Weather—bright: cool. *In the hills :—Bhutta* has been harvested. *Haimanti dhan, bara marua, kalai, phaphur,* and *toree* progressing favourably. Potatoes being planted. *In the Terai* :—Jute and *bhadoi* harvested. Prospects of *aghani* very favourable. Prices of coarse rice:— Srs. Hills ... ... 9 } per rupee. Terai ... ... 11 }
	26	Jalpaiguri	„ 14, '93	0·14	Weather—seasonable: nights getting cool. Steeping of jute going on. Prospects of *aman* good. Price of rice stationary. Fodder and water sufficient.

No.	District and date of return.	Rainfall at Sadar Station in inches.	Character of the weather and state and prospects of the crops.
BIHAR.			
BHAGALPUR DIVN.			
27	Monghyr Oct. 14, '93 Begusarai ... Jamui ...	Nil Nil 0·08	Weather—hot and clear. State of standing crops good. *Kurthi* being sown. Indigo and sugarcane doing well. Lands being prepared for *rabi* crops. Fodder and water sufficient. Small-pox among cattle reported from Nawadih, Sekundra, Ballia, and Kharakpur. Prices of common rice:— Srs. Sadar ... ... 11½ to 18 } per rupee. Begusarai ... ... 12 Jamui 12½
28	Bhagalpur „ 14, '93 Banka ... Madhipura ... Supaul ...	1·81 Nil Nil Nil	Weather—hot in day, cool at night. Prospect of winter rice good. *Rabi* and indigo are being sown. Cattle-disease reported to be prevailing in Amarpur.
29	Purnea „ 14, '93 Kishanganj ... Araria ...	0·46 0·08 Nil	Weather—cool in the mornings, hot during the day. Slight fog in the early morning. Prospects of *aghani* continue good. Lands being prepared for *rabi* everywhere. Fodder and water sufficient. No cattle-disease. Prices of coarse rice:— Srs. Sadar ... ... 12 to 18 } per rupee. Kishanganj ... ... 12 to 13 Araria 18
30	Malda „ 14, '93	1·97	Weather—hot and bright with occasional light showers. Prospect of winter rice continues favourable. Sowing of *kalai* in progress. *Rabi* crops being sown in some places. Ordinary rice sells from 11 to 15 seers per rupee. Fodder and water sufficient. Cattle-pox reported from English Bazar thana.
31	Sonthal Parganas „ 14, 93 Deoghur ... Godda ... Jamtara .. Pakur ... Rajmahal ...	3·33 0·86 0·47 1·77 1·37 0·22	Weather—cool at night, but hot in the day with occasional specks of cloud. All standing crops continue to do well. Linseed, mustard and gram being sown. Lands being prepared for wheat, barley and other grain. Fodder and water sufficient. Price of rice stationary.
PATNA DIVISION.			
32	Patna „ 14, '93	Nil	Weather—hot but getting cooler slowly. Prospects of rice continue excellent. Potatoes and tobacco doing well. No rain has fallen since the beginning of the month, and it is wanted everywhere. Prices of common rice:— Srs. Sadar ... ... 15 } per rupee. Barh ... . 13 Bihar ... ... 17 Dinapore 13
33	Gaya „ 14, '93 Nawada ... Jahanabad ... Aurangabad ...	Nil Nil Nil Nil	Weather—cloudy, humid and unseasonably warm. Prospects of standing crops very good, but some rain would be very beneficial. *Rabi* lands being prepared and sowings going on everywhere. Prices of rice:— Srs. Gaya ... ... 14 } per rupee. Jahanabad ... ... 14 Aurangabad ... ... 14½ Nawada ... ... 16 Supply of fodder and water ample.
34	Shahabad „ 14, '93 Buxar ... Bhabhua ... Sasaram ...	Nil Nil Nil Nil	Weather—cloudy with bursts of sunshine. Crops very promising indeed. Paddy being largely irrigated. Ploughing for *rabi* going on. Rain would be very welcome.
35	Darbhanga „ 14, '93	Nil	Weather—days hot and bright; nights getting cool. Prospects of rice continue favourable. The break in the rains has facilitated the planting of tobacco and *alua*, as also the preparation of lands for *rabi* sowings. Prices remain steady. Fodder for cattle sufficient.
36	Muzaffarpur „ 14, '93	Nil	Weather—hot and clear. Prospects of paddy good. *Rabi* sowing has commenced. Floods subsided. A few cases of cattle-disease reported from Bela and Sarsund. Fodder and water sufficient.

	No.	District and date of return.	Rainfall at Sadar Station in inches.	Character of the weather and state and prospects of the crops.
BIHAR—*concld.*				
PATNA DIVISION—*concld.*	37	Saran Oct. 14, '93 Siwan ... Gopalganj ...	Nil Nil Nil	Days hot. Clouds about. Rain would be beneficial. Prospects of crops good. Fodder and water plentiful. Prices of common rice:— Srs. c. Chapra ... ... 15 0 } Siwan ... ... 15 8 } per rupee. Gopalganj ... ... 16 9 }
	38	Champaran „ 14, '93	Nil	Weather—hot during day, cool at night. Prospects of winter rice crop excellent. Prices stationary. Fodder and water sufficient.
ORISSA.				
ORISSA DIVN.	39	Cuttack „ 14, '93	Nil	No rain. Weather warm. Harvesting of late *biali* in progress. *Sarad* growing. Want of rain beginning to be felt in places. Fodder sufficient. Average selling price of common rice:— Srs. c. Srs. c. Sadar ... ... 10 8 to 13 2 } Jajpur ... ... 13 2 to 17 6 } Kendrapara ... ... 15 0 to 22 0 } per rupee. Banki ... ... 15 12 }

* Mean of 5 days. | † Mean of 6 days.

Explanation.—Summary.—The normal means of air pressure and temperature are the arithmetical average or means of the reading during the same period
The *humidity* of the atmosphere is expressed at percentage, saturated air being presented by 100. A clear sky is denoted by 0 and an overcast sky by 01
rainfall the normal mean are the numerical means or average of the rainfall in that district determined from the returns sent in by the subdivisional station
district, *i.e.* from total rainfall at the subdivisional stations in the district sending in returns divided by the number of stations. A rainy day is one of

for the week ending Saturday, the 14th of October 1893.

					DISTRICT OBSERVATIONS.										
					RAINFALL.										
					OF WEEK.				Since 1st of month.			Since 16th May 1893.			
Variation from normal mean.	Mean 8 A.M. temperature.	Average humidity at 8 A.M.	Average cloud amount at 8 A.M.	Rainfall of week at observing station.	Mean for district.	Normal mean.	Average number of rainy days.	Normal number of rainy days.	Mean for district.	Normal mean.	Variation.	Mean for district.	Normal mean.	Variation.	DISTRICT.

Explanation.—... indicates that no rain has fallen. If the return for any day has not been received, the corresponding space is left blank. If any of the return wanting, the corresponding spaces in the total rainfall columns are left blank. With reference to the column of rainy days, the definition of a rainy day is when as 0·1 inch of rain has fallen.

CALCUTTA, *the 17th October* 1893.

SUMMARY OF THE METEOROLOGICAL AND RAINFALL OBSERVATIONS TAKEN IN BENGAL, AND OF THE METEOROLOGICAL OBSERVATIONS TAKEN IN ASSAM, FOR THE WEEK ENDING 8 A.M., SATURDAY, THE 14TH OF OCTOBER 1893.

During the first week of October pressure was low over Burma and the east of the Bay, and the westerly indraught towards this low pressure area was accompanied by fine, settled and almost rainless weather in all districts, as well as in the north of the Bay. During the present week the area of lowest pressure has been in the west of the Bay or over the peninsula, and though weather has never been disturbed, the easterly wind circulation has caused numerous local storms and irregularly distributed rainfall over the greater part of the province throughout the week. Pressure changes have been very slight, and the distribution remained uniform over the province, even when a depression was developing in the south-west of the Bay. Hence, though the general tendency for winds was to blow from the east, they were always light and frequently variable as to direction. Temperature, notwithstanding the showery weather, has been considerably above the normal, a fact which may be accounted for by the maximum temperatures being generally little affected by the passing showers which were soon followed by bright sunshine.

A shallow low pressure area developed off the Madras coast, but filled up before reaching the land. It began to show about the 8th, and deepened slowly till the 10th, when cloudy, rainy weather was general along the whole of the Madras coast. There was then little change in the wind velocity, and during the two following days, while the centre of the disturbance was moving slowly westward, these conditions continued on the Coromandel coast, but there was a considerable increase of velocity at Paumben and on the west coast of Ceylon. On the 13th it had almost entirely filled up, and moderate south-westerly winds were blowing at most of the Madras stations. During the early part of the week winds strengthened somewhat in the east of the Bay, but otherwise comparatively fine weather with passing showers prevailed.

Pressure has remained very steady throughout the week, rising and falling by small amounts. Readings were generally below the normal by about a twentieth of an inch, and the means for the week are therefore in defect in all districts by about ·04 inch in the east of the province and ·06 inch in the western districts.

Temperature has generally been above the normal except in the eastern districts, where there has been at times a moderate defect. The mean temperature for the week is above the normal except in Assam, where there is defect of 1°, and in East Bengal, where it is practically normal. Excess is half a degree in South-West and North Bengal; in Orissa it is 1·3°, in Chota Nagpur nearly 2°, and in Bihar more than 2°.

Rainfall.—Scattered rain has fallen in nearly all districts during the greater part of the week. A few showers fell in Purnea and Bhagalpur, but in the other districts of North Bihar none has been recorded, while South Bihar, Shahabad, Gaya and Patna have been practically rainless. In the other districts the showers have been fairly evenly distributed, but as they were due to local thunder-storms, the amounts are very irregular. The average fall in South-West Bengal is 2·2 inches, almost double the normal, and in North and East Bengal, with an average fall of about an inch-and-a-half, there is a small excess. In Orissa rather more than a third of the normal has fallen, in Chota Nagpur and part of South Bihar about half, and in North Bihar about a tenth.

The following table gives the summary of the temperature and rainfall data of each of the seven meteorological divisions of the province for the week ending Saturday, the 14th of October 1893:—

Meteorological Divisions	Temperature.						Rainfall.									
			Averages for week.				In week.			Rainy days.			Since 1st of month.		Since 16th May 1893.

	Inches.
The total fall of rain from 8th to 14th October 1893	3·79
The average fall of the corresponding period for 24 years, Surveyor-General's Office	1·17
The total fall from 1st January to 14th October 1893	83·02
The average fall of the corresponding period for 24 years, Surveyor-General's Office	61·72

The mean pressure, temperature, &c., are deduced from the traces of the Barograph and Thermograph and from observations made at 6h, 10h, 16h, and 22h.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed open at the sides and are suspended four feet above the ground.

The barometer readings are corrected approximately to those of the standard, Newman's No. 86, formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed in the Meteorological Office, and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground.

o, overcast; g, gloomy; d, drizzling rain; p, passing temporary showers; t, thunder; <, lightning; ⏏, dew.

OFFICIAL PAPERS.

CONTENTS.

SURVEY AND RECORD OF RIGHTS IN BIHAR.

THE following papers in connection with the cadastral survey of North Bihar are published for general information by order of the Officiating Lieutenant-Governor. It is to be understood that the draft Bill for maintaining the land records, and the draft of the rules proposed under the Bill, are subject to further examination in detail, with a view to the adjustment of expenditure and the regulation of village inspection on the most moderate scale compatible with securing an efficient maintenance of accurate village maps and Record of Rights.

M. FINUCANE,

Offg. Secy. to the Govt. of Bengal.

No. 1130T.-R., dated Darjeeling, the 21st September 1893.

From—M. FINUCANE, ESQ., Offg Secy. to the Govt. of Bengal, Revenue Dept.,
To—The Secretary to the Government of India, Revenue and Agricultural Dept.

I AM desired by His Honour the Officiating Lieutenant-Governor to forward, for the information and orders of the Government of India, a draft Bill (Appendix C to this letter) for establishing an agency for the maintenance of records of rights made under Chapter X of the Bengal Tenancy Act, and to request the permission of the Governor-General in Council to the introduction of the Bill into the Bengal Legislative Council on a suitable opportunity. I am at the same time to forward a Minute, dated 20th September 1893, which Sir Antony MacDonnell has recorded in connection with the cadastral survey and record of rights now being carried into effect in Bihar, and with the maintenance of the record when made.

2. A memorial, without date, received on the 1st September 1893, forwarded under separate cover, has been submitted to the Officiating Lieutenant-Governor by the British Indian Association, the Bihar Landholders' Association, the Bhagalpur Landholders' Association, and the Zamindari Panchayat, and the Indian Property Association, for transmission to Her Majesty's Secretary of State, in which the legality, necessity, and utility of the record of rights have been again called in question; and Sir Antony MacDonnell has thought it right to examine this memorial, to point out its defects and inaccuracies, and generally to re-state the whole case for a survey and record of rights of North Bihar. The Minute is therefore submitted in the hope that it will not only justify the legislation which it is necessary to undertake in order to maintain the record, but also that it will show in a compendious form the reasons which, operating over a long series of years, have led Government to undertake these operations in Bihar. On the margin of paragraph 7 of the Minute will be found references to the portions of the Minute in which the statements made in the memorial of the Zamindari Associations are discussed.

3. I am to invite attention to the opinions (Appendices A and B to the Minute) of both Members of the Board of Revenue, in which they express their concurrence with the views of the Officiating Lieutenant-Governor. I am also to invite attention to paragraphs 73A and 73B of the Minute, in which the President and Secretary of the Indigo Planters' Association intimate a willingness to accept the scheme for maintaining the record, subject to a condition with which Sir Antony MacDonnell wishes to comply.

4. The question whether the Land Record establishment may be utilized for registration of titles to and transfers of land under the General Registration and Transfer of Property Acts, is one which has been brought to His Honour's notice. Provision has been made for the communication to the Land Record-keepers of registrations effected under the former Act; but after much consideration Sir Antony MacDonnell thinks that, before going further in this direction, it will be better to bring the Land Record system now proposed into working order, and then to graft on to it any expansion that may be considered to be practicable.

5. Advantage has been taken of the opportunity afforded by the Bill to spread the realisation of the expenses of the survey and record of rights over a period of years, thus lightening the burden of costs on the zamindars and raiyats, and at the same time facilitating their collection. I am in this connection to invite special attention to section 12 of the Bill and paragraph 74 of His Honour's Minute.

MINUTE II ON THE CADASTRAL SURVEY AND RECORD OF RIGHTS IN BIHAR, BY HIS HONOUR THE OFFICIATING LIEUTENANT-GOVERNOR.

PART I.

INTRODUCTION.

Object of the Lieutenant-Governor's Minute of 24th June 1893, and orders passed by the Government of India upon it.

In discussing the question of the cadastral survey and settlement of North Bihar in a Minute dated the 24th June last, my chief objects were to secure the assent of the Governor-General in Council to the following two principles:—

(a) That no person should be employed in making the survey or preparing the record who was in the employment of their landlord or tenant, or who was not entirely under the control of the Government and liable, as a public servant, to punishment for misfeasance.

(b) That when the record of rights had been correctly completed, it should subsequently be maintained up to date, and that immediate steps should be taken to create an official agency for maintaining it.

The Minute and its appendices also set forth proposals both as to the agency to be employed in making the survey and record, and in maintaining it when made; and I had the satisfaction of being able to cite the joint opinion of the Members of the Board of Revenue, endorsing and accepting those proposals.

The Government of India was pleased to approve fully of my proposals, His Excellency in Council pointing out that those concerning the maintenance of the record of rights were in point of fact in agreement with, though in amplification of, the scheme which had been previously put forward by Sir Charles Elliott, the addition consisting in the provision for map amendment and for correction of the record on the spot, without which no scheme for maintaining the record of rights could be effective or complete.

Action taken by the Lieutenant-Governor on receipt of the approval of the Government of India of proposals made in the Minute of 24th June 1893.

2. Having received these orders of the Government of India, I caused a draft scheme for maintaining the records to be sent for consideration to the Indigo Planters' Association and the Bihar Landholders' Association—the two great bodies charged with safeguarding landlords' interests in Bihar; and at the same time the Board of Revenue was requested to prepare a draft Bill upon the subject, with such draft subsidiary rules as might be necessary for giving effect to its provisions. My intention was—an intention subsequently carried into effect—to lay the draft scheme, Bill, and Rules before a representative Conference of all interested in the question, on the occasion of a visit to Muzaffarpur which I had decided to make.

3. I went to Bihar at the end of July, and at a Public Darbar held on the 31st idem at Bankipore, referred to the question of the survey and record of rights then in progress. The question whether a survey should or should not be made being no longer an open one, I limited my observations to two points, namely, "how the work can be best and most cheaply done; and how, when done, its good effects may be perpetuated." This meant, as I went on to explain, whether the survey was to be carried out by Government patwaris or by amins; and whether the records were to be maintained by the Government (or registered) patwaris or by the kanungos of the draft scheme which had been circulated for criticism to the Indigo Planters' and Landholders' Associations, as stated in paragraph 2 above. My object in my Darbar speech

was to place the issues with their limitations clearly before all interested parties, and that object was fully secured by the publicity given to my observations. I attach to this Minute a copy of that portion of my speech in Darbar which is concerned with the question under notice.

Memorial from the Indigo Planters' Association, and reply thereto.

4. Before leaving Calcutta for Bihar, I had received the draft of a memorial against the record of rights, purporting to proceed jointly from the planters, zamindars, and others landholders of North Bihar, which it was proposed to present to me at Muzaffarpur. In the sequal it turned out that the memorial was practically an expression of the views of the Indigo Planters' Association only; but as such it was entitled to the greatest consideration, and this it received. The memorial, besides raising some very important questions, indicated the existence in the minds of its framers of such extreme misconceptions as to the official attitude of this Government and as to the meaning of the Bengal Tenancy Act, that I welcomed the opportunity its presentation gave me of supplementing my remarks in Darbar by a further statement, which well-nigh covers the entire ground in controversy. I attach to this Minute a copy of the memorial and of my reply.

Conferences with zamindars and indigo planters at Muzaffarpur and result.

5. These preliminaries over, the Conferences for which I had gone to Bihar took place at Muzaffarpur under the presidency of the Hon'ble Mr. Stevens, Senior Member of the Board of Revenue, and the results are recorded in the Minutes of the proceedings and in Mr. Stevens's report dated the 14th August, both of which documents are enclosures to this Minute. Briefly stated, the results are that the zamindars are still opposed to the maintenance of the record of rights; but in view of the contingency of their opposition proving futile, they express preference for the maintenance of the record through kanungos or Land Record-keepers to its maintenance through patwaris; that is to say, they prefer the scheme of maintenance indicated in Appendix B of my Minute of the 24th June and the draft Bill submitted to the Conference, to the enforcement of Regulation XII of 1817, or the resuscitation of the patwari. I have accepted the choice made by the zamindars.

It is quite true that their choice is a conditional choice, but that is because they object to the maintenance of the record altogether, and not because they do not think the scheme a good one. The truth is that the great majority of Bihar landholders do think the scheme as good as, in the prescribed conditions, could be devised, and that they are immensely relieved in mind by my acquiescence in their conditional acceptance of it in preference to the patwari scheme. They said so at the time, and they again express their satisfaction in the Resolution printed in the enclosures, which of their own motion the Tirhut Landholders' Association have forwarded to the Government.

Reasons for accepting the result of the Conference and suspending the registration of patwaris under Regulation XII of 1817.

6. In paragraph 31 of my Minute of the 24th June last, reasons were given why it was thought desirable to enforce the provisions of Regulation XII of 1817, and the registration of patwaris in the districts under settlement. Briefly, these reasons were primarily that the cost of survey might be cheapened by employing the registered patwari instead of an amin in surveying his village; secondly, that an agency for maintaining the record might be created and put into training. There was, however, general reluctance on the part of landlords to register their patwaris or bring them in any way under Government control. If the patwaris were not to remain their private servants, while working under the Government in making the survey or framing the record of rights, then the zamindars would prefer that the Government should make its own arrangements for survey and framing the record, and leave the patwaris alone. This state of feeling, the difficulties attaching to any effort to work patwaris under Regulation XII of 1817, and the choice as to the agency for future maintenance made by the zamindars—all these three considerations induced me to abstain from enforcing a general registration of patwaris, and to instruct the Director of Surveys to employ amins or professional surveyors only in survey work in Bihar, care being taken that, though local men may, without objection, and indeed with advantage, be trained as surveyors, no amin shall be employed in surveying a village, with which, or with the

owner or raiyats of which, he has or had any connexion. It is true that this decision destroys the hope I had entertained of cheapening the survey by employing registered patwaris to do the measurements which, under the Regulation, they are bound to do as part of their statutory duties; but the objections of the zamindars gave conclusive force to the consideration that it would be undesirable to register patwaris under Regulation XII of 1817, make them Government servants, and train them to survey work, when on the completion of the survey, that is after the lapse of a few months, their services were no longer to be made use of. The men to be employed on survey work henceforward will form a body from which we can pick and choose our agents for subsequent maintenance of the record. It may be added here that the zamindars, seeing my difficulty and appreciating my wish to reduce the costs, have offered me free of cost the unskilled labour required by the Survey Department. This will be a material help for which I am much obliged to the zamindars.

Action to be followed in future.

7. So far the way is clear, and it is to be hoped that all the uncertainties which had gathered around the operations in connexion with the agency for survey and for subsequent maintenance of the record will now disappear. I have already given the necessary orders, both as to the agency for making the survey and framing the record, and as to the procedure to be followed by it, and my orders on these points are being separately reported to the Government of India for information and approval. These orders will, I trust, have the effect of securing accuracy in preparing the record, as the amins will be entirely precluded from making any entries affecting the status of the tenant or the rate of his rent. Entries regarding these all-important matters will be made by superior officers only. It now remains for me to submit to the Government of India the legislative proposals by which the agency for maintaining the record is to be legalized and funds for its support provided. But as I have just received from the British Indian and Bihar Landholders' Associations a Memorial* for submission to Her Majesty's Secretary of State, in which the legality, expediency and usefulness of the survey and record of rights, and its subsequent maintenance, are again called in question, it may be useful to recapitulate the reasons and emphasize the necessity for such legislation as I propose, and generally for such a survey and record of rights as we are now carrying into effect in Bihar. This procedure will enable me to answer the memorialists and justify the action of the Government on all points which they raise. This has indeed been already done many times: but the memorialists are rich, active and influential, and amid the often refuted contentions which they attempt to revive, the true issues are apt to be lost site of, and the voice of reason and justice to remain unheard. It is well to remind those who interest themselves in the controversy that the question lies not between the Government and the zamindars, but between the zamindars and their raiyats, and that the only interest the Government has in the matter is, as Lord Ripon's Government said, "the diminution or prevention of human suffering." It is true that the raiyats do not make their grievances known through public meetings, telegrams to the newspapers, and all the other devices of an exotic system of agitation. But the grievances are

Fresh Memorial of Zamindari Associations against the record of rights.

* The specific objections to the cadastral survey urged in this memorial may be classed under the following heads. The paragraphs of this Minute on which the objections are specially answered are given in brackets, but the objections are generally dealt with in Part IV of the Minute.

(*a*) The zamindars were kept in ignorance of the intention of the Government to survey Bihar. "They were not aware that such a measure was in contemplation until the Secretary of State's sanction had been obtained." [24.]

(*b*) The cadastral survey of Bihar should not have been undertaken without special legislative sanction. The survey of a district is not authorized by the provisions of section 101, Tenancy Act, which only applies to a "local area," which must necessarily mean a limited area possessing some special features. [25-27A.]

(*c*) The cadastral survey of Bihar is required for "administrative purposes," and if it is to be continued, the Government should bear all the costs, which ought not to be imposed on landlords and tenants under section 114 of the Act, and which, if imposed, will impoverish them. [57, 58, 61.]

(*d*) All District Officers having local knowledge are, as shown by the Parliamentary Return published in May last, against the cadastral survey. [49.]

(*e*) The cadastral survey will cause general litigation which will not be conducted in the ordinary courts, "which are well known and 'trusted' by the people," but must be heard and determined by Revenue officers, "whose decisions for obvious reasons will not be considered with the same respect." The experience of the cadastral survey in the Srinagar estate is an illustration of this. [56, 59.]

(*f*) No provision has been made for any agency for maintaining the record when it has been completed. [28, 55.]

there all the same—deep-seated, growing, continuous; they make the administration of Bihar a most anxious task for this Government at all times, and when the crop of even a single season fails, a task which becomes well-nigh insupportable.

Let there be no mistake, no misapprehension of the issue now. While we wish to deprive the zamindars of no privilege to which they are justly entitled, and while we would increase their facilities for managing their estates and collecting their rents, our principal object in undertaking the survey and record of rights in Bihar is to protect the legal rights of the raiyats, which have been so lamentably neglected in the past. The zamindars seek to defeat the existing law: the Government seeks to enforce it.

Argument to be developed in this Minute.

8. In the following remarks, then, I shall briefly traverse the entire ground covered by legislative and executive action in Bengal during the past century, in connection with the subject of recording of raiyats' rights. I shall first deal with the record of rights in its historical and legal aspects. I shall next consider the necessity of a record of rights in Bihar as it existed before the passing of the Tenancy Act. I shall then examine whether that necessity has been removed or mitigated by the operation of that Act. The evidence we have as to the usefulness of a record of rights as a remedy for the agrarian abuses which exist will afterwards be stated, and on convenient opportunities the various objections raised in the Zamindars' memorial now submitted will be noticed. Lastly, the expediency and effectiveness of the Bill I propose for the maintenance of a record of rights will be discussed.

PART II.

THE SURVEY AND RECORD OF RIGHTS AND IN ITS HISTORICAL AND LEGAL ASPECTS.

Origin of agrarian difficulties in Bihar.

9. The agrarian difficulties in Bihar which now confront us are the fruits of the mistake which Lord Cornwallis committed in making the Decennial Settlement of the land revenue permanent without first recording the relative rights and interests of zamindars* and raiyats in the soil. It is a matter of history that the settlement in perpetuity of the land revenue of these Provinces had been the subject of prolonged consideration before Lord Cornwallis ever came to India. It was one of the subjects over which Francis and Hastings disputed, and more than a century ago it ranged Bengal officers into two opposing schools—the zamindari and the raiyatwari. Helped by English or feudal notions of property in land, the zamindari view prevailed against indigenous custom and immemorial practice, and for years before 1793 preliminary enquiries were prosecuted with the object of ascertaining the true assets of the various estates preparatory to a settlement of the revenue in perpetuity. Among other means taken to ascertain those assets was farming the estates to the highest bidder a plan which was naturally objectionable to the old zamindars, who memorialized the Government in England on that and other alleged grievances. In passing orders on that memorial in 1784, the Court of Directors clearly showed that it was not their intention that a permanent settlement of the revenues should be made without full enquiry into the rights of all parties, and without the provision of adequate safeguards for the immemorial rights of the raiyats. The Court's orders dated 1784 accordingly directed that an enquiry should be made into the rights of all descriptions of persons according to the established usages of the country. These enquiries, which were

---

* The article under the head "Zamindar" in the Glossary to the Fifth Report prepared by Sir Charles Wilkins, the Orientalists, explains the original and derived meaning of zamindar. "A zamindar," he says, "is an officer who, under the Muhammadan Government, was charged with the superintendence of the lands of a district financially considered, the protection of the cultivators and the realization of the Government share of its produce either in money or kind, out of which he was allowed a commission amounting to about 10 per cent. and occasionally a special grant of the Government share of the produce of the land of a certain number of villages for his subsistence, called *nankar*. The appointment was occasionally renewed; and as it was generally continued in the same person so long as he conducted himself to the satisfaction of the ruling power, and even continued to his heirs, so in process of time and through the decay of the ruling power and the confusion which ensued, hereditary right, at best prescriptive, was claimed, and tacitly acknowledged, till at length the zamindars of Bengal in particular, from being the mere Superintendents of the land, have been declared to be the hereditary proprietors of the soil, and the before fluctuating dues of Government have under a permanent settlement been unalterably fixed in perpetuity."

preliminary to the permanent settlement of the land revenue, resulted in voluminous reports from the Collectors of districts, the Board of Revenue, and other public officers in the Lower Provinces of Bengal, and these reports were summarised and examined by Mr. Shore (afterwards Lord Teignmouth and Governor-General of India) in his Minutes, dated 18th June 1789, for Bengal, and 18th September following, for Bihar, which are printed as appendices to the well-known Fifth Report of the House of Commons on Indian Affairs. But the information then gathered was merely of a general character: it afforded very inadequate knowledge as to the financial resources of the various districts, as only in a few districts was any attempt made to institute detailed enquiries or to establish a record of rights. The want of precision which characterised the information which had been gathered so convinced Mr. Shore of the inexpediency, both in the financial interest of Government and in the interest of the raiyats, of basing any permanent arrangements on it, that all the weight of his great influence was directed towards inducing the Governor-General to conclude a settlement in the first instance for ten years only, and a decennial settlement was actually made. It was Mr. Shore's hope that during that term these special enquiries and record of facts might be completed which had already been begun in the 24-Parganas and other places under the orders of Government.*

Mr. Shore opposes the Permanent Settlement on the ground of inopportuneness.

* See Mr. Colebrooke's Minute of 1st May 1812, and Mr. Justice Field's "Regulations of the Bengal Code," page 56.

10. Unfortunately Mr. Shore's prudent counsels did not prevail with the Governor-General, who in his Minute of 3rd February 1790, declared his belief that the objects which Mr. Shore had in view might be secured by speedier means than a detailed and tedious enquiry. It was Lord Cornwallis' opinion that by limiting the Government demand upon the zamindar, and by imposing on him the obligation of coming to terms with his raiyats, subject to specific rules and restrictions, the purposes of a detailed enquiry in the interest of the raiyats would be effectually and expeditiously fulfilled, while the immediate advantages to the revenue derivable from a permanent settlement would at once accrue. The advice of Mr. Shore was therefore rejected, and the decennial settlement was declared permanent without any definite knowledge having been acquired of the resources of each estate, and without any precise record having been made of the reciprocal relations of zamindar and raiyat. Rules, however, were provided in the Settlement Regulation, whereby it was believed that those relations would be established on a permanent and satisfactory basis. To these rules I shall presently refer at length: but here I would note that the outcome of Lord Cornwallis' policy has unfortunately justified Mr. Shore's fears rather than the Governor-General's hopes. While we are to-day under the necessity, which Mr. Shore foresaw, "of correcting abuses by new rules," we do not find that the zamindars verify Lord Cornwallis' expectations by welcoming these corrections or by accepting that interference on the part of Government which the Governor-General asserted to be "undoubtedly necessary for effecting an adjustment of the demands of the zamindars upon the raiyats" On the contrary, this interference, which was foreseen to be possible, and expressly declared to be justifiable by the authors of the Permanent Settlement themselves, is now resented as an infraction of a solemn engagement of which a chief stipulation was the reservation of this very power of interference.

Lord Cornwallis, while agreeing with Mr. Shore as to the necessity for protecting the rights of the raiyats, differs from him as to means. Raiyats' rights consequently not ascertained before the Settlement.

11. The modifications which the Permanent Settlement introduced into the relations between the Government and the zamindars are specifically set forth in the Proclamation dated 22nd March 1793, which was afterwards enacted into Regulation I of the same year. That Proclamation contained two principal provisions: it fixed for ever the revenue which had been assessed on the various estates at the Decennial Settlement which had just been concluded, and it declared the settlement-holders, whom it designated "proprietors of the lands," privileged to transfer "to whomsoever they think proper, by sale, gift or otherwise, their proprietary rights in the whole or any portion of their estates without applying to Government for its sanction to the transfer." There were some subsidiary stipulations, to which it is unnecessary to refer here more specifically; but the

Effect of Permanent Settlement on status of zamindars.

intention and effect of the Proclamation was to abandon, on the part of Government, the right to increase the revenue which had been assessed on the estates of the zamindars, and, subject to summary sale for non-payment of that revenue, to constitute the zamindars, *as far as the Government was concerned*, owners of these estates.

Effect of Permanent Settlement on status of raiyats.

12. Now the rights which the Government possessed were admittedly not exhaustive of all the interests in the land. Under the customary law of the country, as admitted by the authors of the Permanent Settlement, the raiyats, too, had rights which it was not discretional with the Government to alter or annul. Those customary rights of the raiyats the Permanent Settlement neither did nor could affect or prejudice in any degree whatever (see section 15, Regulation VII, 1799, clauses 7 and 8). The zamindars do not complain that the effect of the survey and record of rights, or the measures proposed for the maintenance of the records, will be to enhance the revenue for which their estates are liable, nor to fetter the free transfer, by sale, gift or otherwise, of the whole or any portion of their rights. As far as the relations between them and the Government are concerned, there can therefore be no ground for any charge of breach of faith, and there is no allegation of any such breach. The charge is that, by recording the various rights in the soil and maintaining the record, the Government of today is violating a pledge given in 1793. No charge could be more baseless than this; for in 1793 not only was the power to intervene reserved, but by the provisions regarding the delivery of pattas, the appointment of patwaris, and the stereotyping of the official unit of measurement under the Regulations of the Decennial and Permanent Settlements, the intention was to record the areas of the holdings, the status of the tenants, and the rates of rents, and to fix the last-mentioned for ever. Had the Government in 1793 not contented itself with the elaboration of rules and theoretic plans alone, and had it followed Mr. Shore's advice and translated these rules into practice, and actually recorded rates and status before declaring a settlement permanent which had been framed on confessedly defective and inaccurate information, until the defects had been made good and the inaccuracies rectified, there might have been no need for such a reservation as that contained in Article VII. As it was, however, the reservation was essential, and it is upon it that we are now acting, so far as the altered facts permit.

Safeguards for raiyats' rights provided by Permanent Settlement Regulations, and neglect of them by zamindars. Effects of neglect.

13. The safeguards by which Lord Cornwallis hoped to protect the interests of the raiyats were, briefly put, three in number. The first was the injunction on zamindars to prepare pattas, subject to the approval of the Collector (to preclude the introduction of new clauses or covenants); the second was the deposit in the collectorate of the standard of measurement, whereby the areas of holdings might be guaranteed; and the third was the maintenance of the accounts of the raiyats by the village patwari, whereby the permanency of the rates might be secured. It was intended by these safeguards to assure to the raiyats the possession of a certain area of land on certain specific conditions and at specific rates of rent: in other words, to certify the information we shall furnish to all parties by the record of rights now in progress. This intention was completely defeated by the persistent refusal of the zamindars to give pattas, or to recognize the patwaris as the custodians of the raiyats' rights. It has also been stated, with some plausibility, that the raiyats were not always eager for these pattas. They were apprehensive that the consolidation of all demands in the patta would be only the creation of a new *asul* or original rent, upon which fresh cesses or *abwabs* might be calculated, and that the acceptance of a patta would diminish the force of their customary right to hold their lands as long as they paid the pargana rate for it; but the obligation on the zamindars to fulfil this intention of the Regulations, and on the Government to see it fulfilled, has not been weakened by the lapse of time, though time has shown that the method of fulfilment preferred in 1793 was ineffectual, and certainly not suitable to circumstances as they are today.

14. To understand the refusal of the zamindars to give pattas, one has only to consider what a patta meant. It meant a lease renewable in

perpetuity, prepared by, and at the expense of, the zamindar, and delivered to the raiyat through the Collector, specifying the area of the holding, the conditions of the tenancy, and the amount of rent which was never to exceed the established pargana rates. In other words, the Permanent Settlement provided that the pargana or customary rates of rent should remain fixed and unalterable for ever, just as it provided that the revenue payable by the zamindars to Government should also remain fixed in perpetuity. Obviously the zamindars had the very strongest reasons for not complying with their obligations in regard to the delivery of pattas. Compliance would have effectually limited the zamindar's control over his raiyats and put an end to all enhancements of existing rent. It would have compelled the zamindars to look for an increase in their rent-roll to the reclamation of the waste land only, as was indeed intended. The zamindars therefore opposed a passive resistance to the orders of Government; and as Lord Cornwallis, while insisting on the delivery of pattas as a stipulation of the settlement, provided no standard, such as a record of rights, and no agency other than the Civil Courts (an inadequate, novel, and exotic institution) to which the raiyats could appeal, the result was that the provisions of the settlement regarding pattas were not observed.

In theory, Lord Cornwallis' plan for securing the record of raiyats' rights was excellent. The accuracy of the area of the holding was provided for by the unit of measurement deposited for safe custody with the Collector; the integrity of the conditions of the holding, and the exclusion of all new covenants, were guaranteed by the provision requiring the Collector's approval to the pattas. The permanency of the rates of rent, and the maintenance of fair dealing between raiyat and zamindar, were vouched for by the appointment of the patwari as a public servant to keep the village accounts. Nothing could be better *on paper*, but the whole plan was a complete failure in practice, simply because no executive agency to enforce the arrangement was provided. For precisely similar reasons has the Bengal Tenancy Act hitherto failed in Bihar, and we are now endeavouring to correct this failure by creating that executive agency which, taught by experience, we have provided for in Chapter X of the Tenancy Act.

15. It is not uncommonly believed that the terms of settlement of the land revenue made with the zamindars in 1793, by Lord Cornwallis' Government, were easy, and that the revenue assessed was light. I am disposed to doubt this view, and to think that, at all events in the Bengal districts, the settlement was for the time a severe one. In his Minute of June 1789, Mr. Shore wrote:—

Nature and incidence of the Permanent Settlement

> "A proportion of nine-tenths of the zamindars' receipts is surely as much as our Government ought to demand if it means to regard the welfare of their subjects by zamindars' receipts. I should hope that the profits of the zamindars would in time exceed this proportion by a due attention to the improvement of their lands and encouragement of their raiyats."

And this was the basis on which the Permanent Settlement was made—90 per cent. of the assets (*i.e.*, then existing rentals) as then ascertained were taken by the Government, and 10 per cent. left to the zamindars. To modern notions this would be a harsh assessment, but it must be remembered that the zamindars had their *nankar* or *nij-jot* lands free; that they were secured all the prospective income from waste lands; and that, finally, many of the best officers of the day believed there had been concealment of [illegible]ts, and that as a matter of fact Government [illegible]not get nearly 90 per cent. of the assets of the estates. And this belief seems to have been better grounded as regards Bihar than as regards Bengal. Mr. Sarishtadar Grant, in his Analysis of the Finances of Bengal, published in 1788, estimated the concealment of assets at more than a crore of rup[illegible] or one-fourth of the whole. But Mr. Shore disputed this; and I myself believe that we have, in the rapidity, especially in Bengal, with which estates were sold up for arrears of revenue at the end of the last century, some proof that the revenue assessed was at the time excessive. The sales of estates in Bihar were comparatively few compared with Bengal, thus indicating the greater lightness of the settlement in the former province. Of course the refusal of raiyats to pay rents, owing to the zamindar's demand of rent at rates above the pargana rate to which I have adverted, might explain to some extent the enforced sales, without the assumption that the settlement was itself harsh; but my impression is that the assessment made in 1793 was

severe for the time. After a very few years, with the reclamation of waste lands and the unauthorised enhancement of rents, the case was entirely reversed, the income of the zamindars, which was represented by one-ninth of the Revenue in 1793, having become more than fivefold the Revenue in 1893. *In three generations the income of zamindars of North Bihar has increased eighty-fold* (in the Darbhanga district it has been increased an hundred-fold).*

	Revenue assessed in 1793 (Permanent Settlement).	Rental in 1793 (calculated on Government revenue plus 1/9th zamindars' allowance.	Rental as shown in existing road cess returns.	Year of valuation of rental.
	Rs.	Rs.	Rs.	
Darbhanga	10,55,395	11,72,661	71,37,044	1883
Muzaffarpur			67,27,909	1891
Champaran	13,27,533	14,75,036	30,73,556	1888
Saran			59,87,760	1883
	23,82,928	26,47,697	2,39,16,269	

I am myself disposed to think that the true income in 1793 was higher than would appear from the above figures, but in any case the increase is still enormous. The present Government revenue of the four districts of North Bihar is Rs. 34,05,149, the increase in the century being due to resumptions, escheats, &c. The existing rental thus varies from five times the revenue in Saran to ten times in Darbhanga. The valuation of the Darbhanga district is now in process of being revised, and I am informed by the Collector that the present rental will show an increase of 10 per cent. over the rental of 1883. If this be so, the rental will be eleven times the revenue of that district (7 lakhs of rupees), or, put in another way, the revenue will be only 9 per cent. of the gross rental. With what show of reason, then, can Bihar, and especially Darbhanga, zamindars claim that the general tax-payer shall pay for that record of rights which they are, and always have been, under a legal obligation to establish ?

Effects of the settlement on the course of legislation. Regulation VII of 1799.

16. Reverting to my narrative, I wish to point out that after the Permanent Settlement had been concluded the zamindars at once began to evade tender of pattas, or tendered them at more than the customary rates. The raiyats refused to accept these pattas, which they either did not understand, or found to be unfair. There was a withholding of rents, much confusion soon prevailed, and many estates were sold, especially in Lower Bengal, for arrears of revenue. (In Bihar, where, as I have said, the settlement seems to have been made, though ostensibly on similar, yet really on more lenient, terms than in Bengal, the sales of estates were much fewer.) This circumstance caused the East India Company, which had to pay its dividends and to meet the expenses of the great war with Tippoo, in which Lord Wellesley was then engaged, some alarm for the security of its own revenue. The zamindars declared they could not pay the revenue unless their hands were strengthened against the recusant raiyats; and the Government, pressed by want of money, agreed to strengthen the hands of those on whom it immediately depended for the punctual payment of its revenue.

The notorious *Haftam*, or Regulation VII of 1799 (which ought to be a lesson and a warning to those who would now undertake to devise a summary procedure for realizing rents), was therefore enacted "for enabling

* The following figures have been furnished by the Board of Revenue :—

		Rs.
Zamindars' gross increase (on which revenue was assessed) in 1793		26,47,697
Government revenue as assessed at Permanent Settlement		23,82,928
	Zamindars' profit	2,64,769(a)
Zamindars' gross income (rental) in 1893 (excluding increase in Darbhanga) ...		2,39,16,269
Government revenue in 1893		34,05,149
	Zamindars' profits in 1893	2,05,11,120(b)

Therefore (b)=eighty times (a).

proprietors and farmers of land to realize their rents with greater punctuality; for providing against unnecessary delay in the payment of the public revenue assessed upon the lands; and for securing the ultimate recovery of arrears of revenue by a sale of the landed property, from which it may be due, at the close of the year." This Regulation gave the landlords practically unrestricted right of distraint. They were empowered "to distrain, without sending notice to any court of justice or any public officer, the crops and products of the earth of every description, the grain, cattle, and all other personal property, whether found in the house or on the premises of any other person." Moreover, with a view to give the landlords greater power still over their tenants, Magistrates were required to punish by fine or imprisonment raiyats who could not establish the truthfulness of complaints of hardship made against landlords or their distraining agents, and the Civil Courts were directed to indemnify zamindari officers or others employed in the collections when improperly summoned. It was further declared that if any person should wantonly and without cause be the means of summoning to the Courts of Justice, Civil or Criminal, the principal officer or any officer engaged in collecting the rents of any zamindar, talukdar, or other landholder or farmer of land, and a loss of rent or other evident damage should be sustained by the landholder or farmer in consequence of such wanton and unnecessary summons, an action should lie against the party who caused the summons for such loss or damage, and on proof thereof the party injured should be entitled to recover the amount with all costs of suit.

Evil effects of Regulation VII of 1799 on the rights of the raiyats.

17. This Regulation was not meant to define or limit the actual "rights of any description of landholders or tenants, which could properly be ascertained and determined by judicial investigation only, but merely to point out in what manner defaulting tenants might be proceeded against in the event of their not paying the rents justly due from them, leaving them to recover their rights, if infringed, with full costs and damages in the established courts of justice." These last provisions, says Mr. Justice Field,* scarcely required comment. "There is scarcely a country in the civilized world in which a landlord is allowed to evict his tenant without having recourse to the regular tribunals; but the Bengal zamindar was deliberately told by the Legislature that he was at liberty to oust his tenants if the rents *claimed by him* were in arrear at the end of the year, leaving *them* to recover their rights, if infringed, by having recourse to those new and untried courts of justice, the failure in which might be punished with fine or imprisonment."

* 'Landholding in various countries.'

The result of this Regulation was that in 12 years the ancient rights of the raiyats throughout Bengal were on the verge of obliteration.† The student of Indian history, as it has hitherto been written, remembers the administration of Lord Wellesley for the victories of Seringapatam, Assaye and Laswari. But these brilliant episodes have their antitheses in the evils produced by this bad law.

† See the Minute dated November 1814, by Mr. Henry Colebroke. Enclosure VI.

Remedies applied (Regulation of 1812). Revival of the Patwari System (Regulation XII of 1817).

18. There was, however, no intention to abrogate the rights of the raiyats by Regulation VII of 1799, and when, during Lord Minto's Administration, the evil effects of the Regulation became known, there was a strong revulsion of official feeling, which produced Regulation V of 1812 (the *Panjam*), whereby it was hoped to correct the bad effects of Regulation VII of 1799. "Under‡ the *Haftam* process the person of the raiyat could be seized in default; under the *Panjam* process his property could be distrained, and in either case the proceedings commenced by what has been described as a strong presumption equivalent to a knock-down blow against the raiyat." The effect of Regulation V of 1812 was unsatisfactory, and at last it was clearly recognized that the zamindars would never of their own accord define the legitimate rights of their raiyats, nor place any limitation to their own claims upon them. Lord Cornwallis' plan of giving pattas had failed totally, and it was therefore resolved to strengthen and reorganise the indigenous system of patwaris and kanungos as an independent agency for maintaining a record of the reciprocal

‡ Bengal Administration Report 1872-73, page 81.

rights of both parties. The zamindars were bound by section 62, Regulation VIII of 1793, to maintain a patwari in every village, who was to be a Government servant; but in this, too, they neglected their obligations, and gradually converted the patwari into their own private servant or gomasta. The reform now embarked on was embodied in Regulation XII of 1817.

Endeavours to enforce Regulation XII of 1817 frustrated. Proposal to have a regular record of rights.

19. When that Regulation became law, the Board of Revenue proceeded to take action on it by prescribing what the duties of the patwaris should be.[1] But the Board had not even in 1817 sufficiently gauged the steadfastness of zamindari opposition to all reform affecting raiyats' interests and they afforded an effective means of resistance to the zamindars in the dual allegiance which the Regulation imposed on the patwari—a means which zamindars have not failed to make full use of from that day to this. The Court of Directors were better advised, as will be seen from the extract from their valuable letter of 12th July 1820 (Enclosure VII). They feared that the Regulation would prove futile, and their fears were only too well founded. It soon became apparent that as an engine for the protection of the tenant, by bringing on record and maintaining the established rates and rules by which rents were to be regulated, Regulation XII of 1817 was as useless as the provisions of Regulation VIII of 1793 had been. The objects of the Government in 1817, as in 1793, were entirely frustrated by the systematic opposition of the zamindars to every attempt of the Revenue Officers to obtain any satisfactory record of the relations between landlord and tenant.

20. Things had now been advanced to this stage. The failure of Lord Cornwallis' method of a record of rights by means of pattas had been recognized; the failure of the Patwari Regulation XII of 1817 was being fast admitted; all advocates of raiyats' rights were coming to an agreement that the only effective plan for securing agrarian quiet and fair dealing was by a survey and record of rights. To-day the zamindari advocates in the newspapers and in Parliament would fain have the public believe that the record of rights such as we now propose to make is a new-fangled notion—the product of anti-landlord feeling. Nothing could be more untrue. *The proposal made by Mr. Shore, but rejected by Lord Cornwallis in the last century, to have a detailed record of rights of Bengal, was accepted as essential by the Government more than 70 years ago.* Convinced by the failure of Lord Cornwallis' plan of the interchange of pattas, and satisfied that the Patwari Regulation XII of 1817 would of itself do no good, the Government of India, 70 years ago, saw that the only effective means of securing agricultural quiet and prosperity in Bengal was by a record of rights. In a Despatch, dated 1st August 1822,* to the Court of Directors, the Government of India wrote as follows:—

* Bengal Revenue Selections, Vol III, page 141.

"In the ceded and conquered provinces, our separate despatches relative to the settlement will show that we design, as far as practicable, to adjust through the agency of the Collectors, the rights and interests of every raiyat in every village as it may be settled, and specifically to [illegible] the zamindars [illegible] reference to the mufassal jamabandi so made. *The existence of the Permanent Settlement in the Lower Provinces does not, in our judgment, oppose any [illegible] to the adoption of a similar course there,* if we can command a sufficiency of [illegible], and the scheme be generally deemed expedient; the Government, in limiting [illegible] reserved the option of such an interference, and if the zamindars [illegible] to assess the [illegible], and to issue pattas on equitable terms as provided, [illegible] would require no other justification than the proof that it could be [illegible]."

* * * * * *

[illegible], admit that even though the raiyats of Bengal had possessed no [illegible] holding their lands at determinate rates, considered [illegible] on to the Sovereign, it was unquestionably competent [illegible] its own [illegible], to fix also the rate at which the malguzari was to [illegible] *[illegible], to render perpetual the rates existing [illegible] Permanent [illegible] alteration being declared, the rule is of course [illegible]*

---

[1] [illegible] of the [illegible] maintenance of measurement chittas, khasras, or field-books [illegible] area of each plot of land in each raiyat's possession, the rent payable, the crops grown [illegible] soil. On this point I would invite reference to the Board's letter dated [illegible] annexed to this Minute. I do so because the zamindars of Bihar have [illegible] that [illegible] of the village was not among the patwaris' statutory duties but the zamindars' [illegible]. I believe [illegible] the error of that contention even before my recent visit to Bihar.

Thus the Government of India, so far back as 1822, proposed a record of rights of the permanently-settled districts of Bengal as being the only effectual means of defining and maintaining the rights of the raiyats, all other means having proved useless.

21. In reply, the Court of Directors in 1824,* far from thinking such proceedings an invasion of the rights of the zamindars, wrote thus:—

* Revenue Selections, Vol. III, page 443.

"It is in the highest degree important that your design of adjusting the rights and interests of the raiyats in the villages as perfectly in the Lower as in the Upper Provinces should be carried into effect. The doubts which we have already expressed with respect to the sufficiency of the Collector's agency will receive from you a due degree of attention. The complaint you make with respect to the limited extent of the machinery which you can apply is of serious importance. You certainly do not estimate too highly the danger of performing such enquiries precipitately, and without due security for their being sufficiently exact; and from your assurance that the matter will continue to command your most anxious attention, we feel confident that no unnecessary delay will be incurred. If the great cause of delay is the inadequate extent of the agency you can employ, it is important to consider by what means it may be practicable to enlarge it. We shall have the greatest satisfaction in receiving the result of your deliberation upon this subject, and shall be ready most zealously to co-operate with you for the speedy accomplishment of so desirable an end. Should you succeed in securing to the raiyats those rights, which it was assuredly the intention of the Permanent Settlement arrangements to preserve and maintain, and should you in all cases where the nature and extent of those rights cannot be now satisfactorily ascertained and fixed, provide such a limit to the demand upon the raiyat as fully to leave to them the cultivator's profits under leases of considerable length, we should hope that the interests of that great body of the agricultural community may be satisfactorily secured."

22. On the receipt of these orders in India, it would seem that an exhaustive enquiry was set on foot to ascertain precisely what had been the precise effect of the endeavours to reorganize the patwari and kanungo systems on the basis of Regulation XII of 1817. The results of this enquiry were reported to Government in the Board of Revenue's letter No. 2199 of 11th May 1827, which is printed in Enclosure IX. Practically it amounted to this, that—to quote from the letter—"until means are devised for ensuring the authenticity of the documents furnished, whether they relate to accounts, mensuration, or raiyatwari assessments, the office of kanungo will mislead instead of giving any useful information." In other words, nothing could be done without a record of rights.

Course of legislation after the enactment of Regulation XII of 1817, and frustration of efforts to enforce it.

23. It would be tedious to trace what further steps were taken after 1827 till our own times to carry out a record of rights in Bihar. But the history of Bengal legislation shows that from 1827 till the Mutiny the views of the zamindari party were unduly in the ascendant. If it were part of my present purpose to trace the progress of agrarian legislation in Bengal, I should here have to devote much space to considering the utterly ruinous effects which the sale laws, from Regulation XI of 1822 to Act XI of 1859, have had on the rights and condition of the raiyats. "The mischievous power of annoyance, interference, and extortion," says Mr. Justice Field† (who was by no means a raiyat's advocate), "which these sale laws have given to the auction purchaser, have been fatal obstacles to agricultural improvement, and have proved at once the source and the instrument of oppression and wrong. We can talk of it and write of it with indifference; but to the tenant of an estate, as remarked by Sir Henry Ricketts, the sale was 'the spring of a wild beast on the fold, the bursting of a shell in a square. It was the disturbance of all they had supposed to be stable.'" An auction purchaser had power to annul all rights and eject all tenants who could not prove they held a particular status, and few of them could prove this, because there was no record to which the raiyats could appeal in defence of their rights, which the laws always saved and guaranteed.

† "Landholding in various countries," page 670.

Contention refuted that Chapter X of the Bengal Tenancy Act is not applicable to the survey of an entire district. Meaning of "local area."

24. But if I abstain from following the course of legislation between 1827, when the necessity of the record of rights was admitted by the East India Company, and 1885, when it was begun under the Government of the Queen-Empress, I wish to say a word on the new contentions [marked (a) and (b) in the margin of paragraph 7 above]

raised by the Zamindari Associations in their memorial to the Secretary of State, submitted after the twelfth hour had struck, that they have had no notice of the intention to survey Bihar, and that Chapter X of the Tenancy Act is inapplicable to the survey of so large an area as a district, still less of four entire districts.

I had myself special opportunities of becoming acquainted with the intentions of the Legislature in framing Chapter X of the Tenancy Act, and I might declare from personal knowledge that there never was, from first to last, any intention of restricting the discretion of the Government as to the extent of country to which the chapter might be applied. I might assert from special information on the point that it is an entire mistake to suppose that the provisions of the Act regarding surveys and record of rights were not intended to be applied by Government of its own motion to whole districts or divisions like the Commissionership of Patna, without application from the landlords and tenants. But in this matter I do not ask the Government of India to accept my own remembrance of the facts as authoritative evidence on the point. I prefer to cite the evidence of the declarations of Governor-General in Council, the Bengal Government, and the Legislative Council, as to their intentions in framing Chapter X of the Act. In their Despatch No. 6 of March 1882, paragraph 100, asking sanction to the legislation which eventuated in the Bengal Tenancy Act, the Government of India particularly pointed out that by far the most important of their proposals was "that a general field survey should be undertaken, and that a system of village records and accounts shall be introduced."......"Whether," they wrote, "we have regard to the prevention of famine or to waste of life or waste of money, which may result from official ignorance; whether we look to the need for actual administration which shall search out and expose deep-seated evils, or the need of some assurance that the facts affecting agricultural interests shall be so notorious and indisputable that none shall be able to pervert them to the injury of the weak, we perceive in the circumstances of many portions of Bengal, *and particularly of Bihar*, strong reasons for placing the Bengal officials on a level, in point of administrative advantages, with their brother officers in other provinces. We seek no fiscal advantages, but the prevention or diminution of human suffering." This evidence leaves no doubt as to what the intentions of the Government of India were when it first approached legislation on the subject; and as the despatch was published for general information, the zamindars had specific and early information as to what the intentions of the Government were in regard to the survey of Bihar. It will be manifest from what follows that the intentions of the Government in this matter were never altered, and that the zamindars for three years before the Act was passed were well aware that it was intended to effect a cadastral survey and record of rights. The intention was expressed in section 164 of the first edition of the Tenancy Bill, on which the Zamindari Associations reported in 1883. The intention was repeated in section 117 of the second edition of the Bill, on which they reported in 1884;* and the provisions of section 101 of the Act as we have it now are not materially different from the corresponding sections of the Bill which preceded it. I would in this connexion particularly call attention to the following extract from the letter of the Tirhut Landholders' Association, referred to on the margin, in which, speaking of the record of rights, &c., they quote with approval the following extract from the Minute of dissent which, as member of the Select Committee on the Bill, the Hon'ble Kristo Das Pall wrote in reference to these provisions:—

* Letter No. 73, dated 14th September 1884, from the Vice-President of the Tirhut Landholders' Association, to the Secretary to the Government of Bengal, printed on pages 521—536 of the Report of the Government of Bengal on the Tenancy Bill, 1884.

"The chapters relating to these subjects (Record of Rights, Settlement of Rents, &c.) are doubtless in accordance with modern ideas of land administration in periodically settled India; but as far as Bengal is concerned, the rights and interests of different parties are generally well defined, and where there might be disputes between landlords and tenants in matters dealt with in these chapters, common sense would suggest that the application of the law should be left to the self-interest of the parties concerned. But the essence of these chapters is that, while liberty is accorded to both landlord and tenant to move the machinery provided in them, the Local Government is empowered to bring of its own motion the machinery into action. * * * And yet power is taken by the Local Government to order the preparation of table of rates for special areas, and to charge the landlords and tenants

with the cost of this work, though they may not in the least benefit by it. *In the same way the expenses which may be incurred by enforcing the provisions relating to record of rights and settlement of rents will be cast upon the landlords and tenants, though no application had been made by them.* Thus a new cess will be imposed upon the land for the purposes of proceedings which may do more harm than good to the landed classes."

The preceding observations of the zamindars' own Representative in the Legislative Council, fully concurred in by the Tirhut Landholders' Association, had probably escaped the attention of the Zamindari Associations in framing their present objection. They will now, however, perceive that they are, as a lawyer would say, estopped by their own admissions from again renewing these objections. As a matter of fact they had (and availed themselves of) the amplest opportunity of urging objections to the measures now under notice, and they will perhaps be therefore ready to concede what is, indeed, obvious, that further "special legislative sanction" is not required. The quotation I give from the Proceedings of the Legislative Council of the Governor-General in paragraph 26 below would be by itself a conclusive refutation of this most unhappy contention.

25. The next piece of evidence I shall site in support of the position that a cadastral survey and record of rights was one of the objects for passing the Tenancy Act, is the declaration of the Bengal Government, made in its letter No. 3T.-R., dated 24th May 1884, to all Commissioners of Divisions when the Tenancy Bill had assumed practically its final shape. Commenting upon Chapter X, the Government of Bengal said:—

"To the provisions regarding the record of rights and the settlement of rents, the Lieutenant-Governor attaches the highest importance, because it is the first earnest attempt to carry out what has often been contemplated, but never attempted, viz, to record by authoritative enquiry the rights in their holdings of the entire agricultural community in Bengal. The proposal is one of very great magnitude, and its execution must extend over a long period of years; but to its successful accomplishment alone can we look for the great administrative advantages which must ensue in the security of the cultivating classes in their possessions, and the establishment of proper relations generally between landlords and tenants. The Lieutenant-Governor specially requests that, with the observations upon them contained in paragraphs 71 to 77 of the Select Committee's Report, and in paragraphs 19 to 21 of the letter of the Government of India, the sections of this chapter may be carefully considered by you and by your Collectors, both with reference to the facts to be recorded, the adequacy of the powers taken for the purpose of ascertaining and recording them, and the appropriateness of the procedure for the object in view. He also invites your attention to section 116(2), and begs that you will give your careful opinion as to whether it is desirable that only a presumption should arise in favour of the correctness of facts ascertained with due care in the full light of publicity, and with ample opportunity to the parties interested to contest them; or whether it is to the general interest that the facts as ascertained (and if not all, then what facts) should be regarded as conclusively established for a certain specified period."

Here again there can be no doubt as to the intentions of the Government of Bengal, which were to make a survey and record of rights of the entire agricultural community of Bengal.

26. I now come to the debate in Council on the Final Report of the Select Committee on the Bill, after which it became law without any further change. This debate is most instructive, as it shows not only what meaning the Legislative Council itself attached to Chapter X of the Act, but also indicates what the zamindari representatives in the Council themselves understood to be its meaning and value—

"The Hon'ble Babu Peari Mohan Mukerji moved that sections 101 to 115 be omitted. He said:—'When giving his sanction to the provisions regarding record of rights, Her Majesty's Secretary of State expressed his apprehension that the difficulties of carrying out the measure may prove greater than the Government of India anticipated. But the practical difficulties of the measure are not the most prominent among its objectionable features. It would cause irritation among landlords and raiyats, and convulse rural society to an extent of which those who are not thoroughly acquainted with the details of our agrarian economy can have little idea. Landholders and raiyats alike have repeatedly prayed the Legislature to expunge these provisions from the Bill, as they would do good to neither. They involve an amount of expense and irritating enquiry which will be far from compensated by the result, and it is on this account that to no part of the Bill have the raiyats from different parts of the country offered more opposition than to this.'

"The Hon'ble Mr. Evans said:—'I do not agree with the hon'ble member. There is no doubt that when a record of rights is sought to be made over a particular area there will be a considerable amount of contest at the time. But when it has been made, every landlord and every tenant will really be better off, and these records will give facilities in dealing with

cases. If such a thing as a cadastral survey and record of rights is carried out over the whole of Bengal, it will remove a large source of litigation and uncertainty. Much must be left to the discretion of the Local Government as regards when and where and to what extent the survey and record is to be made. I stated my opinion on this matter when this Bill was referrrd to the Select Committee. I quite understand that friction must be produced to obtain it, but the ultimate benefit will be so great as to counterbalance the friction.'

"The HON'BLE MR. REYNOLDS said:—'I think the hon'ble member has overlooked the fact that this chapter, which he desires to omit, will apply to Government settlements. The settlement procedure law is at present contained in Bengal Act VIII of 1879, which this Bill proposes to repeal, and I do not observe that the hon'ble member has any motion for the omission of that Act from the Schedule of Acts to be repealed. The result of this amendment would therefore be to leave the Government no means of conducting a settlement of revenue in Government estates, except the old Regulation of 1822. I do not think he contemplated any such result.'

"The HON'BLE MR GIBBON said:—'I oppose the amendment. I think the chapter as now drafted in the Bill will be more beneficial to landlords than to tenants. In fact, speaking personally as a landholder, I look forward to the operation of this chapter to undo much of the harm which will be done to the landlord's interests under section 18. When it was first proposed, and as it stood in Bill No. II, I objected to this chapter, but the Select Committee has removed every objection I had to it, and I look forward to the beneficial effects of this chapter both in the interests of the landlord as well as in those of the raiyat.'

"HIS HONOUR THE LIEUTENANT-GOVERNOR said:—'I am glad to find from quarters so different a concurrence of opinion in favour of this chapter as one of great importance and necessity. For myself I would sooner omit very many other portions of the Bill than this one. It provides for the first serious attempt to secure that which is absolutely required, by means of a careful record of rights, not only for the better administration of the country, but for a better understanding between landlords and tenants of their respective positions. Until such a record has been made, we shall have made no progress in the settlement of disputes arising between landlords and tenants. The difficulties to which the hon'ble member refers are difficulties which I am sure we can get over. For if such difficulties have been overcome in a province like the Panjab, we need fear no serious difficulty in a province like Bengal. We are not intending to press on this process with anything like undue haste, or to force it on with undue precipitation. With the sanction of the Secretary of State and of the Government of India the utmost we should attempt in the first instance would be one single district, and we shall be guided much by the success we meet with in that district before proceeding further. I am sure I speak the conviction of the Hon'ble Rao Saheb Mandlik and of every person who comes from that part of India which he represents, when I say that, where a record of rights prevails, it has been found to be good and beneficial for all sections of the landholding community.'

"The HON'BLE SIR STEUART BAYLEY* said:—'I can hardly be expected to accept a proposal for the omission of this chapter, in the settlement of which the Select Committee has taken an immense deal of pains, and which I think has been reduced to a shape in which it may be worked beneficially and without serious risk of danger to any one. The chapter covers very large ground and can be applied to various cases, individual and general; *it may be applied to a tenure or part of a tenure or to a whole district*. But I think there has been some misapprehension in the mind of the hon'ble mover of the amendment as to the Secretary of State's opinion, and I may be allowed to quote his words. He says:—

'While fully admitting the advantages which would attend the establishment of village records and accounts, the formation of a record of rights, and the introduction of a field survey, I cannot avoid the apprehension that the difficulties of carrying out these measures in those parts of Bengal in which village accounts and accountants, if they ever existed, have long ago entirely disappeared, even from tradition and remembrance, may prove greater than you anticipate. Your present proposal, however, merely contemplates an experimental commencement of the work in the Patna Division of the Province of Bihar, where the need for it is, you think, most pressing, and the conditions least unfavourable; and to this I will make no objection.'

"You have heard just now from His Honour the Lieutenant-Governor that this order of the Secretary of State is still in full force, and that at present he has no intention of going beyond it. Certain provisions of this chapter are of course applicable everywhere. A landlord in Bengal proper may apply to have these settlement operations brought into effect in regard to his estate or a portion of his estate; or on a riot taking place in any single landlord's estate, the Local Government may apply to the Government of India for permission to put it in force in that estate. But with regard to a general record of rights, not only is it distinctly understood that the Lieutenant-Governor will apply it only in some one selected district in Bihar and abide by the results of that experiment, but it is also certain that, as the Secretary of State has not sanctioned anything beyond that, nothing beyond it will be carried out until the Secretary of State does sanction it. The result I am unwilling to prophesy, but I do not say that, as in the neighbouring district of Benares the operation has been most successfully carried out without much friction, and has been the salvation of the tenant, a similar operation may be conducted in the province of Bihar, which is in almost all respects similar to the districts bordering it in the North-Western Provinces. I do not see why what has been worked so successfully in the North-Western Provinces should be inapplicable to

* Sir Steuart Bayley was in charge of the Bill.

Bihar. There is one portion of the chapter to which further allusion will be made when the Hon'ble Rao Saheb Mandlik makes his proposal. I will only say that we look on the provision to which the hon'ble member's amendment refers (section 112) as particularly necessary to be kept in the Bill, but we hope sincerely never to have occasion to use it. It is a very strong power kept in the background, to be used when the operation of the ordinary law is not found sufficient. With these remarks I oppose the motion.'

"His Excellency the President observed that he had been very much struck by the almost complete unanimity of opinion which prevailed in the Council as to the utility of this chapter. At the same time he was perfectly able to comprehend the natural anxiety which its unreserved application over very extensive areas would occasion both to the raiyats and the zamindars. Regarding the question in the abstract, it was perfectly obvious that one of the first steps towards the cessation of litigation and ill-feeling between two antagonistic interests, was that they should each know exactly what belonged to them; therefore no one, His Excellency imagined, not even the hon'ble member himself, could in theory be opposed to the introduction of this chapter. At the same time His Excellency could assure the hon'ble member that not only in deference to the suggestions made to them by the Secretary of State, but also from their own appreciation of the exigencies of the case, the Government of India would be indisposed to consent to the application of the sections referred to, otherwise than in the sense and spirit recommended by Lord Kimberley. By applying the machinery of the chapter to a special and limited area in a tentative method, they would be able to observe how the clauses were likely to work, and there was every hope that by that cautious method of procedure they would be able to obviate those objections to which the hon'ble member had referred."

"The amendment was put and negatived."

This extract from the proceedings of the Legislative Council on the passing of the Bengal Tenancy Act shows what the views and intentions of the Legislature were on the meaning and application of Chapter X of the Tenancy Act. They were (1) that, in the words of the Hon'ble Member in charge of the Bill, "the chapter covers very large ground and can be applied to various cases, individual and general; it may be applied to a tenure or part of a tenure *or to a whole district*; (2) that "the machinery of the chapter was to be applied to a special and limited area in a tentative method," and if found to work successfully, was to be extended to the entire Province of Bihar; (3) that the Government of India were satisfied that "as in the neighbouring districts of Benares, the operations had been most successfully carried out without much friction, and had been the salvation of the tenant, a similar operation might be conducted in the province of Bihar, which is in almost all respects similar to the districts bordering it in the North-Western Provinces."

It is, I believe, in India a rule of construction of Statutes, that the intention of the Legislature may be inferred from the debates in Council on the passing of an Act. If this be so, then there can be no doubt, in view of the preceding extract from the debate in Council, that the expression "local area," as used in Chapter X of the Tenancy Act, may mean either a tenure or a whole district. And if this conclusion were still in doubt, it would borrow further confirmation from clause (*d*) of section 101, inasmuch as settlements of revenue are, as the Legislature well know, undertaken, not for estates alone, but also for whole districts such as Chittagong, and whole Provinces such as Orissa, both of which are now under settlement under Chapter X of the Tenancy Act. Moreover, under section 39 of the Act, price-lists have to be prepared for "local areas," and the unit of area for the purposes of that section is under the Tenancy Act rules, which have the force of law, a sub-division of a district. These rules were, before they acquired the force of law, published in the Gazette and circulated for criticism among all Zamindari Associations and other public bodies, but no objection was ever taken to them on the ground that a "local area" must mean "a limited area presenting some special features."

27. An experimental and tentative survey and record of rights was, in accordance with the undertaking given in Council, carried into effect under Mr. Collin's supervision, in a typical tract of the Muzaffarpur district, and was declared by the Governments of Bengal and of India to have proved successful. The Secretary of State agreed in this opinion,* and subsequently, on the submission to him of proposals for the extension of the survey and record of rights to the whole of North Bihar, accorded his sanction to them. It is therefore manifest that the contention now raised by the zamindars is wholly without foundation, and that in all that has been done in this connexion, the

Page 52, Parliamentary Return, East India (Bihar correspondence), dated 17th May 1892.

* Parliamentary Return (Bihar correspondence), dated 17th May 1892, page 53.

Government of Bengal has acted well within its powers, and in strict conformance with the letter of the law, and with its spirit as declared by the Legislative Council at the time the Act was passed.

I may finally call attention again to paragraph 9 of my Minute of 24th June last, in which the words of the Government of India were quoted directing the Bengal Government in 1884 to take in hand at once the organisation of the patwaris in Bihar, in view to their employment on the survey and settlement of that Province.

27A. After this paper had been put into print, I was requested by the Government of India to take the opinion of the Advocate-General as to the interpretation to be placed on the term "local area" in Chapter X of the Tenancy Act. The Hon'ble Sir Charles Paul having been accordingly consulted by the Board of Revenue, gave the following opinion:—

Section 101 of the Tenancy Act is divisible into two parts—

(1) Where a survey is ordered by the Local Government with the previous sanction of the Governor-General in Council.

(2) Where a survey is ordered without such sanction in certain specified cases [clauses (*a*), (*b*), (*c*) and (*d*)].

With regard to (1), a survey may be ordered *in any case* in respect of lands in a local area. This in my opinion, regard being had to the general terms used, authorises the survey of a province, district or sub-division of a district.

With regard to (2), a survey may be ordered of the lands of a local area which, in my opinion, should be limited by the object in view, denoted by the occasion or cause which necessitates the exercise of the powers conferred on the Local Government. These occasions or causes are mentioned in clauses (*a*), (*b*), (*c*) and (*d*).

This opinion confirms what I had written, and the latest objection of the Zamindari Association is thus shown to be devoid of foundation and unworthy of any further notice.

28. In paragraph 7 of their memorial [see marginal note to paragraph 7 above, head (*f*)], the zamindars now say: "Had section 101 with its express limitation of 'local area' been intended to apply to a Government survey of a whole province, or of the greater part of a Province, provision would have been made in the Act for maintaining and keeping up to date the records of such survey, but no such provision is made." I welcome this statement: it is as full an admission as the zamindars could be expected to make, that the maintenance of the record of rights is the logical consequence of its preparation. But the memorialists are wrong in thinking that provision should have been made in the Tenancy Act for maintaining the record. The intention of the Government, before and at the passing of the Tenancy Act, was that there should be special legislation for creating a Land Record agency, and the Government of India in its letter No. 196A., dated 20th November 1884, instructed the Lieutenant-Governor to undertake such special legislation in the Bengal Legislative Council. The words of the Governor-General in Council are—

"It is hardly necessary to remark that the value of the survey and record of rights (under the Tenancy Bill) will be incommensurate with the cost unless an efficient staff of patwaris and supervisors is organized. * * * If it be decided to commence operations in 1885 or 1886—and on this point the Government of India will expect to be advised hereafter by the Government of Bengal—His Excellency the Governor-General in Council trusts that no effort will be spared to obtain at an early date the requisite legal powers to organize the patwari staff, and that the work of organization will be vigorously prosecuted."

In accordance with those instructions, I introduced the Patwari Bill into the Bengal Legislative Council on the 31st January 1885 (that is, before the Tenancy Act was passed) as a supplementary measure. My words were: "Without this supplementary measure the Tenancy Bill will fail of its full beneficial effect in Bihar, where its beneficial effect is most needed." The Bill was not sanctioned by the Secretary of State for a reason which no longer operates: but the steps taken in 1885 clearly show the fallacy of the argument of the Zamindari Association on this point.

Summary of arguments as to historical and legal justification for the record of rights in Bihar.

29. The preceding observations have shown, on the authority of the Regulations and Orders of the Government of the day, that from the beginning there never was on its part any intention to interfere with, abrogate or annul the rights of the raiyats; that under the arrangements made by Lord

Cornwallis it was intended to record and uphold their rights by enjoining on the zamindars to deliver pattas to them, renewable for ever at pargana rates, to maintain patwaris and to register the unit of measurement; that the pattas were not delivered nor the patwaris maintained; that it was attempted to correct these omissions and wilful negligence by the enactment of Regulation XII of 1817; that this measure having also proved nugatory, it was proposed in 1822 to carry out a record of rights, similar in character to that we are now undertaking in Bihar; that the Court of Directors cordially approved of this proposal; that the measure was not carried out because of the want of suitable agency at the time; that the matter was again taken up in 1882 with the express object of effecting a record of rights throughout the whole of the Lower Provinces of Bengal, but *particularly in Bihar*; that when the Tenancy Bill was on the point of becoming law, the Bengal Government was directed to take immediate steps to reorganize the Patwari system in Bihar with the object of maintaining the record in that province; and finally, that on the declarations of the Government of Bengal, the Government of India, the Secretary of State, the Legislative Council, and the Hon'ble the Advocate-General, there cannot be any doubt as to the applicability of the Survey and Settlement provisions of Chapter X of the Tenancy Act to entire districts as well as to any portion of them, or as to the intention of applying them to the entire province of Bihar. From the historical and legal point of view, then, the right of the Government to make this survey and record of rights throughout Bihar, and to maintain the record when made, is incontestable.

PART III.

NECESSITY OF THE SURVEY AND RECORD OF RIGHTS IN BIHAR.

Section I.—Before the passing of the Tenancy Act.

30. The preceding part of this Minute was concerned with the relative rights of raiyats, zamindars and Government under the Permanent Settlement, with a discussion of the manner in which the rights of the raiyats had been infringed, and of the attempts made by the Government from time to time to afford them protection. Reference has also been made to the tardy objections (now declared by the Advocate-General to be unfounded) to the survey raised on the wording of section 101 of the Tenancy Act, and it was shown that from the very first inception of the Bill, which is now Act VIII of 1885, it was the settled intention to make a survey and record of rights in the Patna Division. From that intention the Government of India never wavered, and in drafting the Act such language was used as was deemed suitable to give the intention its full effect. I now proceed to consider the question whether it is, as matter of practical expediency, necessary or desirable to make such a survey and record of rights. The necessity is being daily denied by the zamindars and their advocates, while the raiyats are voiceless and the Government averse from entering the dusty arena of newspaper controversy. The story of the hardships of the Bihar peasant is a thrice-told tale, which it would be unnecessary to repeat were it not that we have on the side of the raiyats nothing but ignorance, poverty and helplessness, while we have on the side of the zamindars education, wealth and power, and all the trained intelligence and advocacy that wealth can purchase. I deem it necessary, therefore, for I trust the last time, so far as I am concerned, to re-state the evidence on the point.

Necessity for the record of rights in Bihar.

31. It is unnecessary for my present purpose that I should retrace the condition of Bihar further back than the famine year of 1874. In that year there was a more or less severe failure of the crops throughout the whole of Bihar, the failure being greatest in the district of Tirhut. So impoverished were the raiyats of that district, so utterly without resource, and so unable to bear up against the failure of a single season's crop, that one-third of the population was at one period in the receipt of relief from the Government. Had it not been for the relief operations set on foot by the State, at least half a

Material condition of the Bihar tenantry.

The Famine of 1874.

million people would have died of starvation in this single district. The financial effect of the relief operations in the single Darbhanga district is thus described in the report of the Director of Agriculture in Bengal for the year 1885-86 :—

"In 1874 a scarcity occurred in Darbhanga—a district which is one of the most fertile, best cultivated, and highly favoured by nature in all India. It was necessary for Government to expend in that year, by way of charitable relief, no less than 37 lakhs of rupees in cash, and to expend 118,000 tons of grain, valued in Burma at nine pounds sterling per ton, thus costing in all more than one hundred and twenty lakhs of rupees. If to this be added the cost of freight from Burma, the cost of transport to Tirhut, and the cost of famine establishment there employed, and if the amounts realized by sale of part of the grain be allowed as a set-off against these latter items, it follows that it will not be too much to put down the net cost of famine to Government in a portion of this single district at a crore and a half of rupees, the Government revenue of that part of the district as it then stood (the boundaries have since been changed) being less than five lakhs per annum. It thus appears that the famine expenditure on this district, in one year, was more than thirty times the amount of the Government revenue, or far more than its capitalized value.

The revenue of the district as it now stands is a little over seven lakhs, and the rental was Rs. 71,37,044 according to a valuation made in 1883 (it is now 10 per cent. more, or eleven times the Government revenue as shown in paragraph 15 above . This enormous unearned increment, *amounting to about one hundred-fold the zamindars' income, as taken for revenue assessment purposes three generations ago*, has, with very few exceptions, been secured without any expenditure of capital by the landlords, without their having fulfilled many of the obligations which English notions of landed property attach to the ownership of land. I do not make this a special ground of complaint against Bihar landlords. They are what their training and environment have made them. But I do say that this enormous enhancement of rents, which the law had fixed in permanence, has helped to reduce the raiyats to a very precarious condition, and that it should now give them the greatest claims upon their landlords' liberality. The vicissitude of a single season, the early cessation of one year's rains, brought the entire district across the threshold of disaster twenty years ago. The population is now denser than in 1874, all efforts to promote emigration have failed, and the people have less to fall back upon, as their rents, which were high in 1876, amounting to 63 lakhs of rupees, have since risen to 78 lakhs, or by nearly 25 per cent. A reference to pages 8 and 73 of the Government of India blue-book of 1892, on "Prices and Wages in India" (ninth issue), will show that within this period prices of staple food crops have risen by not less than 12 per cent. As there was in 1876 little or no room for extension of cultivation, it seems to follow that rents in Darbhanga have since the Famine been enhanced at least twice as much as the law contemplated they ought to be. If it be remembered that the failure of the *kharif* crop of 1874 brought a million of hungry people on our hands in the single district of Tirhut, who, if the Government had not come to their aid, would have starved, and that since 1874 there have been no less than four scarcities in the district, necessitating the distribution of relief by Government, the full significance of these unprecedented enhancements of rent will be appreciated.*

Enquiry into the material condition of the people of North Bihar in 1876.

32. In the autumn of 1875 there was again a slight failure of the crops in North Bihar, and careful enquiries were made into the condition of the people. The results were very disquieting, and Sir Richard Temple's Government, in communication with the Government of India, appointed a Commission, consisting of the late Mr. Geddes and myself, to enquire into the whole agrarian condition of North Bihar. We reported in 1876, and I invite special attention to the following remarks by Mr. Geddes, in which I concurred. Mr. Geddes was, I may add, an officer of altogether exceptional competency for an enquiry of the sort:—

"How comes it that, with the present not very grave vicissitude of season, the Imperial Government should be expected to interpose in regard to a most fertile region, the great bulk

* During the famine of 1874, the great Darbhanga estates were under the management of the Court of Wards, and the management did as much as could be expected to relieve the starving tenantry After attaining his majority, the Maharaja, Sir Lachmeswar Singh, approved of all that had been done, and is thus justly entitled to the praise attaching to public benefaction. The same remarks apply, though in a modified degree, to the Maharaja of Hatwa, Sir Krishna Pertab Sahi, and the late Maharaja of Bettia. In Champaran, however, and in Saran, the scarcity was much less than in Darbhanga.

of whose agricultural profits go elsewhere than to the Imperial Exchequer? How comes it that Bihar, with an industrious population, the most fertile soil in India, a territory comparatively very lightly assessed in land tax—how comes it that this Bihar should be seeking imperial relief oftener and more extensively than the regions less fertile and far less (more?) heavily assessed by Government?" * * * "The explanation as to why the three northern sub divisions should not tide over the vicissitude by falling back on food reserves, or on money resource, summarises itself briefly thus. The whole conditions of agricultural industry there are such as to render it precarious. There is no sufficient certainty as to tenure. It is impossible for the population to fall back this year solely on accumulated reserves, whether of grain, of property, of money, or of credit. For the whole conditions of life, as will be seen from the Collector's reports, are such as to preclude any sufficient accumulation of the kind. The raiyats cannot fall back on any credit fund like the tenant-right of other parts of Bengal, for practically there is no such right available to offer in pledge. The people who plough and sow, and who ought to reap, have not a reasonable assurance as to the fruits of their industry."

The *thikadari* and indigo system.

Mr. Geddes went on to describe the unsatisfactory character of rent suits in Bihar, and the *thikadari* or farming system, consisting in the assignment to rent speculators of the control which the landlord is able to exercise over the tenant, including therein almost unlimited powers of distraint, enhancement and ejectment. The report also alluded to abuses connected with the cultivation of indigo, and reasons were given for the inference that in Muzaffarpur and the northern sub-division of the Bhagalpur district one-third of the culturable area was under *thika* assignment to indigo planters. The practice of illegal distraint, or of sending out bailiffs to prevent the reaping of the crop, as a means of pressure in order to enforce compliance, whether with legitimate demands or exactions, was very fully described; and the points where violations of the law habitually occurred were specified with precision. The general effect was to show that in North Bihar the raiyat had practically no rights allowed him at all, and that all the worst abuses of the days of Regulation VII of 1799 prevailed throughout a region where Act X of 1859 had been nominally in force for nearly 20 years.

Sir Richard Temple, in reviewing Mr. Geddes's Report, remarked that the condition of the peasantry was undoubtedly low in Bihar,—lower than that of any other peasantry with equal natural advantages which he had seen in India. He considered that a remedy should be applied to the abuse of the power of distraining the raiyats' crops. The Government of India promised the Lieutenant-Governor its support in any measures he might propose for ameliorating the condition of the people of North Bihar; and the observations of the Secretary of State* upon this correspondence were as follows:—

* Despatch No. 32, dated the 19th October 1876.

"Your Lordship in Council is fully aware that the situation in North Bihar is one of grave anxiety. The well-being of the population is described in the able report of Mr. Geddes as resting on foundation of a very precarious character, and it will demand the utmost vigilance and discrimination of the Government of Bengal to deal with the complication with which the whole question is embarrassed. Your Excellency in Council has wisely determined not to have recourse to immediate and necessarily incomplete remedies, but to leave the subject to the attentive consideration of the Government of Bengal, which will gradually introduce such ameliorations as full experience and extended inquiry may dictate. I fully approve of the resolution of Your Lordship in Council, and shall await with interest the result of the measures which the Lieutenant-Governor, under the sanction of your Government, shall deem it his duty to adopt."

33. The measures adopted by the Lieutenant-Governor (Sir Ashley Eden) consisted in the appointment of a Committee of Bihar officials and non-officials to consider the whole question of the relations of landlord and tenant in that province. Meanwhile, the zamindars of Bengal, unlike their fellow landlords of Bihar, were being worsted by their raiyats, and were pressing for special facilities for the realization of their rents. Following the precedents of former years, a Bill for the more summary realization of rents was introduced into the local Council; but times had changed: the sufferings of the raiyats had touched the conscience of the Government, and it was recognized that the rent question had become the great question of the day, and that the time had come for dealing with it in a full and comprehensive manner. Accordingly the Bill just referred to was withdrawn, and the whole question of the rent law of both Bengal and Bihar was referred to a Commission. That Commission produced the first draft of

Opinion of the Government of India on the material condition of Bihar in 1882.

the Bengal Tenancy Act, and the Government of India in 1882, in recommending legislation on the lines of the draft to Her Majesty's Secretary of State, wrote of the depressed condition of the Bihar tenantry thus:—

"The evidence before us of the depressed and precarious position of the tenantry in that part of India is full and conclusive. It would be altogether a mistake to suppose that the unfortunate state of things which there exists is mainly, or even very largely, due to indigo planting. The facts connected with the cultivation of indigo, which were brought to notice some years ago, testify indeed to the possibility of serious oppression, and strikingly exhibit the manner in which persons exercising the authority of landlords could trample upon the rights of defenceless peasants. But these facts, taken by themselves, merely illustrate abuses of proprietary power which are rife throughout Bihar. The area under indigo cultivation is an insignificant fraction out of the 23,670 square miles which constitute the Patna Division. It is manifest that the majority of the raiyats in the whole of that large tract of country are rack-rented. The raiyats of the Shahabad district appear to be better off than others; but for a general view we would refer Your Lordship to the note drawn up by Mr. Reynolds on the 11th December 1880, after a visit to Bankipore, during which he had conferred with experienced officers. It was urged upon him that the great evil which calls for remedy in Bihar is the arbitrary enhancement of rent at the will of the landlord. The Collector of Patna reports that the mass of the tenantry are now paying rents which have doubled within the last 16 years. The Covenanted Deputy Collector of Gaya calculates that the rental of the different districts is at present from twice to four times the amount paid at the time of the Permanent Settlement. Mr. Reynolds shows from the road cess returns that the incidence of rent is higher in the Patna district than in any other district of Bengal; higher in Darbhanga and Saran than in any other districts except Hooghly and Burdwan; and higher in Gaya, Shahabad and Muzaffarpur than in any other districts except the above and five more, of which two, Rajshahi and the 24-Parganas, pay the same average rental as Gaya, and one (Rangpur) pays the same average rental as Shahabad. The only district of the Patna Division, where the average rental does not appear to be unusually high, is Champaran, of which the circumstances are exceptional, as the proportion of waste land is very large.

"Without entering upon any detail in support of our opinion that the Bihar raiyat is poor and oppressed, we will cite briefly a few descriptions of prevailing circumstances or practices given by zamindars or planters themselves. Major Hidayat Ali, an important landholder in Bihar, writes on 20th September 1877: 'The raiyats of this province, viz., the heads of families, and even the women and the male adult children of the agricultural classes, though they labour hard, are yet in a state of almost utter destitution, and that owing to the heavy assessments laid on them.' His opinion is characterised by Colonel Emerson, the Cantonment Magistrate of Dinajpur, as unprejudiced and valuable. Mr. Worsley, Collector of Muzaffarpur, reports on 9th October 1877—

'That illegal distraint was universally practised in this district I well know, but I had not expected to receive the following naive confession from all the principal zamindars of Hajipur sub-division: 'The zamindars confess that they resort to private distraint in preference to distraint through the Court, the latter involving expense which has to come on the raiyat, and diminishing his means of paying his legitimate dues, as well as of leaving a sufficient balance for his own support.'"

The rest of the quotation is connected with a description of abuses in connexion with indigo planting, many of which have been remedied through the influence of the Indigo Planters' Association.

Material condition of Bihar immediately before and after the passing of the Tenancy Act.

34. This, it will be admitted, is no measured condemnation of the whole land and rent system of Bihar, but it was not so forcibly put as it might have been had the Government in 1882 been in possession of the detailed information which came to light a few years later. At the risk of anticipating what I have to say regarding the condition of Bihar after the Tenancy Act had become law, I reproduce this information here. In paragraph 11 of my Minute of 24th June, I stated the circumstances under which Mr. Collin was appointed to carry out an experimental survey and record of rights in the Muzaffarpur district. The report, which after his operations were brought to an end, Mr. Collin submitted, is a most valuable document, and throws a flood of light not only on the past practices and existing condition of Bihar, but also demonstrates beyond reasonable doubt the benefits which the raiyats will derive from a survey and record of rights. Mr. Collin's report,* which was submitted to Government in 1887, shows that in the tract settled by him, which was selected as being typical of the worst difficulties to be anticipated in the Muzaffarpur district, rents had been illegally and arbitrarily enhanced out of all proportion to what is justified by law, and that this illegal and arbitrary enhancement, as might naturally be expected with an increasing population, had gone on during the 10 years

* Printed on Parliamentary Return, dated 17th May 1892.

before 1887 to even a greater extent than was previously the case. The general principle which usually regulates legal enhancements of rent in these Provinces is known as the Rule of Proportion, and it depends on the rise in prices of staple crops. Under this rule the enhanced rent must bear to the former rent the same or a less proportion than the existing prices bear to prices at the time the former rent was fixed. Now in the period dealt with by Mr. Collin the rise in prices was 29 per cent. (paragraph 70). Yet he found the increase in rent rates in one village, named in Appendix F of his report, to be 314 per cent. since 1840, the average increase in 33 villages named in that Appendix was 137 per cent., and the average increase in 36 villages named in Appendix G 116 per cent. (paragraph 69). This enormous increase in rates was unconnected with extension of cultivation, which was taken into account in striking the rates, or with improvement in productiveness of the soil (paragraph 69), and was doubtless effected by extra-legal means.

Excessive enhancements of rent and illegal exactions.

35. Mr. Collin brings to notice that periodically recurring enhancements of rent had only come into vogue since 1840 (paragraph 68), and he draws attention (paragraph 9) to the very significant fact that it was also in 1840 that the zamindars adopted the system of giving thika leases or assignments of villages at high rents. What that meant will be apparent from the remarks made in paragraphs 34, 36 and 46 of this Minute. There is no doubt that these enhancements stand to these assignments as effect to cause. It was the rare thing for a Bihar zamindar to sue for enhancement in the courts. One way of enforcing an enhancement is described in paragraph 36 below, or, if the owner wished to be saved the trouble of that, he often gave a lease of the village to a thikadar or farmer, if indeed the mere threat to give the village in lease was not sufficient, as it very often was, to reduce the raiyats to submission. This system of leasing or assigning the rents of a village, with power to the assignee to exercise the full authority of the landlord during the currency of the lease—the *thikadari* system, as it is called—has been the curse of Bihar. How far it has been used to compel raiyats to grow a particular crop against their will I do not now stay to consider; but if this compulsion still exists, I do not attach to it anything approaching to the evil effects on the people which has been produced by the continuous worrying and excessive enhancements of their rents which have been effected through this bad system of land management. I have heard it maintained that the prosperity of the indigo industry depends on the continuance of this *thikadari* system, and that under the European planter the system is shorn of many of its evil attributes; that rents are not raised, nor illegal exactions, enforced, nor the raiyats exposed to the rapacity of money-lenders or other members of the horse-leech tribe. I do not deny that there are farmers and farmers; and probably most indigo planters are considerate and helpful landlords. But I do think that the industry would thrive better if it could shake itself free of the *thikadari* system, and I do not believe that the raiyats will ever be adequately protected from its abuses until a record of their rights is made and maintained.

Further evidence of continuation of excessive rent enhancements after the passing of the Tenancy Act.

36. That the system of illegal and arbitrary enhancement was in 1887 still in operation in Bihar is shown beyond dispute by the facts mentioned in paragraphs 73 to 80 of Mr. Collin's report, and in his remarks on Appendices F and G. An examination of these Appendices will show that in village Kamtowl the rates all round were raised in 1876 and again in 1884 to 230 per cent. over the rates of 1840, in Burdaha by 46 per cent. since 1885, in Kinaru by 11 per cent. since 1880, in Balra Karum Chand by 90 per cent. since 1877, in Chowsewan by 65 per cent. since 1880, in Bishunpore Bhagwan by 16 per cent. since 1880, and in Panapur Khoord by 24 per cent. since 1883. A striking instance of the helplessness and ignorance of the raiyats is given in paragraph 72, where it is stated that an occupancy raiyat, holding at Rs. 3 per bigha, and entitled by law to hold at that rate, yet took in the year 1884-85 a lease for three years, by the terms of which he agreed to pay Rs. 6-14 per bigha, to give up his land at the end of that period and at any time during the currency of the lease, and further contracted not to build any house or cowshed or farm building on his land, or to dig a well or to plant trees, all of which things he is, it is true, entitled to do under the Tenancy Act, with or without his landlord's consent, and notwithstanding such agreement,

but which he will not do, and will not know of his right to do, unless his rights under the Tenancy Act are brought home to him by the prosecution of a survey and record of rights. A still more striking instance of the methods by which rents are being enhanced by landlords is mentioned in the same paragraph, where it was reported in July 1887 that the agents of a certain zamindar "were attempting to induce the raiyats to execute agreements to pay enhanced rents." A number of Muhammadans refused, and the zamindar's agent, in November last, went to the village to reason with them. The day after his arrival a case was put in against the Muhammadans for the slaughter of a bullock. The case was found to be false. In February last a case was brought against some other raiyats in the criminal courts. These raiyats executed agreements (*sharahnamahs*), and the case was compromised. In March an attempt was made before the Registrar at Muzaffarpur to have a *sharahnamah* registered, which the raiyats would not admit to have executed. The Registrar found that most of the raiyats were not present when the deed was said to have been executed by them, and that their signatures had been written by the patwari. Again, in April another criminal case was filed against a refractory raiyat, which was dismissed. "This is, perhaps," adds Mr. Collin, "as good an instance as any that could be given of the operation of free contract, by which the raiyat, in his generosity, voluntarily consents to forego a part of the profits of his land."

Such was the state of things before and for two years after the Tenancy Act was passed. I shall presently show that there has been practically no amendment up to date; and that, unenforced by executive action, the Act has remained as much of a dead letter in Bihar as Act X of 1859 had done.

Proposal of the Famine Commission regarding Bihar. Record of rights recommended.

37. I conclude my references to the condition of Bihar before the enactment of the Bengal Tenancy Act of 1885, by quoting the remarks of the Famine Commission of 1880 on the state of Bihar. After describing the vario abuses found to prevail in Bihar, which they visited, and suggesting remedies, *prominent among which was a survey and record of rights*, the Famine Commission remarked: "Where, as in Bihar, the relations of landlord and tenant are too often those of a high-handed proprietary body on the one hand, habitually disregarding the law, and on the other a tenantry ignorant, very helpless, sunk in the most abject poverty, the onus of bringing complaints of oppression ought not to be laid upon the tenants. The first and imperative duty of the Bengal Government and the local officials would seem to be to guard zealously against infringements of the law by the rich, and to put them down as if they were offences against the public peace."

Page 121, paragraph 37 of their Report.

Comparison of the material condition of raiyats of Bihar in 1788 and 1888.

38. Before I pass on from this part of the subject it may be useful to compare the condition of Bihar as it is at present with what it was a hundred years ago in the early days of British rule. There is a large element of uncertainty in all such comparisons, especially when applied to periods so removed from each other by lapse of years, and so differentiated by growth of population and its pressure on the soil. But such comparisons are instructive and point an useful moral. The following extract from Mr. Grant's Analysis of the Bengal Finances (1788) shows how things were a century ago:—

"Generally, the Soubha of Bihar derives its superiority over most of the other provinces of the Mogul Empire, from the great natural advantages of a temperate climate, high and fertile soil, well watered, productive of the drier grains and all the luxuries required by the more active, warlike inhabitants of the north; with a centrical situation, having easy communication internally, and serving as an emporium, or by means of the river Ganges, a thoroughfare to facilitate the commercial intercourse between Bengal, as well as foreign maritime countries, and the more interior provinces of Hindustan. These advantages drew arts and manufactures from abroad; and after the Pathan conquest produced an increased population in soldiers or emigrants of that martial agricultural people, who were induced to become settlers, either from local allurement, or the political encouragement of Government, in establishing a national feudal militia towards the eastern imperial frontier. The revolution in favour of the royal descendants of Timoor, first brought about in 933 Hejirah, or A.D. 1527, and finally effected on the accession of Akbar in 963 of the former, or 1555 of the latter era, with the regular civil administration established then, and ever since continued in almost its original form, heightened greatly the prosperity of the Soubah, under the crown of Delhi;

while the independent state of numerous Mussalman jagirdars, joined to the refractory spirit of a hardy warlike race of Hindu land-holders and peasantry, differing greatly in bodily temperament, nourished by the heartier food of wheat and barley, from their effeminate neighbours of Bengal, living chiefly on the watery diet of rice, served in some measure to preserve internal tranquillity and resist the tyranny of lawless foujdari usurpers in time of recent public anarchy.

"Accordingly, agriculture, manufactures and commerce have always highly flourished in this favoured province. Opium, which may be considered the peculiar produce and staple commodity of the country, might fairly be estimated to return in gross, under rules of a private or public monopoly of necessary existence everywhere in India, twenty lakhs of rupees for about four thousand chests exported yearly; including a moderate charge of sovereign territorial rent, with full cost of labour, and profit on stock, amounting in value to one-half of the whole quantity produced Saltpetre, manufactured chiefly in the Circars of Hajeepur and Saran, reckoned at two lakhs of maunds, might moderately be calculated to yield to the labourer and sovereign, or favoured merchants, ten lakhs of rupees; cotton cloths for exportation on all sides, twenty additional takhs; while the ordinary productions of grain, sugar, indigo, oil, betel-leaf, &c., carried out for sale, returned at least fifteen lakhs more, after deducting an equal sum for the annual imports of Bengal; salt being almost the only article required from abroad for home consumption: thus leaving perhaps on the whole a clear balance of trade to the Soubah of fifty lakhs of rupees to answer a yearly drain of specie to the like amount, constituting the net tribute to be derived from a gross rental of near a million sterling per annum; besides a profit of ten lakhs, accruing from the usual State monopolies of opium with saltpetre. And all this, after complete comfortable subsistence, on the most ample equitable scale of political economy in Asia, of a population probably of three millions of souls, exclusive of the Civil and Military establishments necessary for the internal administration of the province. It may further be observed that, if such were the affluent circumstances of the country under the despotism of the Moguls, its mercantile prosperity forming the basis of actual wealth and revenue, hath surely not diminished within the period of the freer, more lenient government of its present rulers, as might be sufficiently evinced by reference to the Custom House accounts of Patna during the term elapsed, exhibiting comparatively a view of great increasing commerce."

What the condition of things is now is indicated by the result of the enquiries which, entirely unconnected with the operation of the Rent Law, Lord Dufferin instituted in 1888 into the condition of the poorer classes throughout India Enquiries were then made in typical villages, in every district and subdivision in Bengal and Bihar. The actual rents and areas of holdings and population in these villages were ascertained, together with profits of cultivation, extent of indebtedness, cost of food, of clothing, and of general subsistence, and the result was declared by the Commissioner of Patna to be that 40 per cent. of the population of the division, which contains 16 million souls, were insufficiently fed, to say nothing of clothing and housing; that they had to undergo long fasts, having for a considerable part of the year to satisfy themselves with one meal a day.

Now my own belief is that this picture is greatly overdrawn, and that in average years the destitution is not nearly so great as was supposed in 1888. But there is still no doubt that the condition of a considerable portion of the people of Bihar has deteriorated, that it is now precarious to a degree, that many live from hand to month, and that owing to over-population and excessive rents, a slight vicissitude of season would bring them in vast numbers on the hands of the Government for relief.

Comparison of material condition of Bihar zamindars in 1788 and 1888.

39. While the Bihar raiyat was in 1788 described by Mr. Grant as prosperous, the Bihar zamindar was, on the other hand (see Appendix No. 5 to Mr. Shore's Minute, dated 18th September 1789), in a degraded condition compared with the zamindars of Bengal; "unnoticed," says Mr. Grant, "by Government, and left at the mercy of the aumils or farmers. They, in fact, considered themselves proprietors of only a tithe of their real estates." Since then the circumstances have entirely changed. The Bihar zamindars, when they have not squandered their substance in extravagance, are now rich, their income from the land having, as shown in paragraph 15 above, increased stupendously in three generations. They are powerful and united, and have advocates in the Press and in the Legislatures both here and in England. Every prejudice that can arise from possession of great wealth or from European ideas of property is entirely on their side. On the other hand, the condition of the raiyats has become most lamentable. In Sir Ashley Eden's words, which are truer now than when they were uttered 15 years ago, they are "poor, helpless, discontented men, bound down to a state of extreme depression, tenants of the richest province in Bengal, yet the poorest and most wretched class in the country."

It has been contended that exaction of excessive rents and insecurity of tenure have had nothing to do with bringing about this state of things, which, it is said, is all due to over-population. If there were fewer people in Bihar they would doubtless be better off than they now are, but at the same time I point out that the Bengal districts of Dacca, Backergunge and Mymensingh, where rents are not excessive and where the people are prosperous, well-fed and well-clothed, are more densely populated than Darbhanga, Champaran and Gaya, where 40 per cent. of the population, according to the estimates of 1888, but let us say only 20 per cent., subsist on one meal a day. Over-population no doubt has much to do with the poverty of the Bihar raiyats, but there can be as little doubt—every competent witness, official and non-official, admits it—that insecurity of tenure and rack-renting are largely responsible for the difficulties with which we are now, and have been for twenty years, confronted, in connection with them. We *cannot* deal effectively with over-population; our best efforts to induce the people to emigrate have proved failures, for emigration is a plant of very slow growth, which cannot be forced. We *can* by means of the record of rights deal effectively with illegal enhancements of rent and illegal ejectments, and on these facts who can say that we ought not to hasten the completion of a work from which such good results are to be expected?

NECESSITY OF THE SURVEY AND RECORD OF RIGHTS IN BIHAR—*continued.*

Section II.—After the passing of the Bengal Tenancy Act (VIII of 1885).

Improvement in Rent Law affected by Bengal Tenancy Act.

40. So far I have dealt with the condition of the raiyats of Bihar before the passing of the Tenancy Act in 1885. The evidence as to the intolerable nature of the abuses which prevailed in the province was conclusive, and suitable remedies were applied in the Tenancy Act. The remedies applied were of two kinds. The first kind consisted chiefly of legislative declarations conferring greater fixity of tenure, provisions regarding receipts, and limitation on enhancements of rent. The second or executive remedies, as they may be called, consisted in the record of rights which had been recognized in 1822, after all other possible means had failed, as indispensable, and had been recommended by the Famine Commission as the only certain way of securing to the Bihar raiyats the enjoyment of the benefits of security of tenure at fair rents, which the law assigned him. It is now alleged by the zamindari advocates that the first kind of remedy is sufficient without its executive complement; and shutting their eyes to the lessons of the past, they say that without executive action the raiyats will henceforward, by the mere operation of the Tenancy Act, have all the protection they stand in need of. In my reply to their memorial at Muzaffarpur, I differed from that view, and said that "the record of rights was far more important to the raiyats than the recent change in the organic written law; for the written law among an ignorant, struggling people remains a dead letter—witness Act X of 1859—unless executive action steps in to do for the people what they cannot do for themselves. This is the justification of Chapter X of the Tenancy Act, as it is of protective agrarian legislation wherever it has been undertaken." But I shall not content myself on this occasion with utterances which may be criticized as academic. I proceed to show that the amended Tenancy law does as a matter of fact afford no sufficient protection to the depressed and ignorant raiyats of Bihar, that its most important provisions have been already systematically set at naught by the zamindars, and that since its enactment in 1885 the same illegalities have prevailed as before. If I can do this, the necessity of a survey and record of rights will not, I presume, be any longer contested even by partizans, nor doubted by careless observers.

Improvement in connection with receipts for rent: nugatory.

41. I begin with the provisions of the Tenancy Act regarding receipts for rent. It has been asserted that these provisions, which required the landlords to give receipts to their tenants, specifying the area of the holding and amount of the rent, would in the long run have the same effect as a record of rights in certifying to the raiyats the amount of the landlords' demand upon them and the areas and incidents of their holdings, and that these receipts would in the course of time furnish the Civil Courts with trustworthy evidence on which disputes might be adjusted and arbitrary enhancements checked.

This I say has been asserted; but on historical grounds was the assertion reasonable? If Lord Cornwallis' injunctions upon zamindars to adjust the rights of the raiyats by the grant of pattas proved to be wholly ineffectual, was it reasonable to expect that the same object could be effected by an injunction to grant receipts? If for 100 years we had failed to compel zamindars to give in pattas information as to the area of the raiyat's holding and the amount of his rent, were we likely to succeed by merely enjoining on them to give it in receipts? The Bengal Government, when engaged on the Tenancy Bill, was under no such delusion, and pinned its faith, as regards Bihar especially, to the record of rights.

42. But passing from the region of speculation to the domain of fact, what has actually happened? These things have happened. Mr. Collin found that, after the passing of the Tenancy Act, receipts in the prescribed form were not being generally given by native landlords; that where they were in some cases given, fictitious rentals had been entered in the landlord's part of the counterfoil receipts; and that the provisions regarding granting of receipts were in reality being had recourse to in order to fabricate evidence to show that rentals in excess of what were really paid were the then existing rentals, and that unless and until the raiyat becomes an educated man with a knowledge of his rights and power to enforce them, or unless and until the area and incidents of his holding and the amount of his rent are certified to him by a public officer in the manner contemplated by Chapter X of the Tenancy Act, he will continue to be in the hopeless condition that he occupied before the Act was passed.

Evidence of Local Officers as to continuance of abuses against which Tenancy Act was aimed.

Again the Hon'ble Mr. Stevens, who was Commissioner of Patna in 1890, wrote thus:—

"In Shahabad the number of books and forms sold from the Government treasury is given in the margin. Many zamindars, among whom is the Maharaja of Dumraon, now prefer to make their own arrangements for these forms; but it is feared that a considerable proportion, especially of the smaller landlords, neglect the law. The Collector suggests that the civil courts should be instructed to report to the Magistrate all cases of omission, that he may take action under sub-section (3); he further remarks that he does not see why neglect or refusal to grant receipts should not also be punishable by a Magistrate, since the present procedure laid down in sub-section (2) is not resorted to. He would also in patwari cases require the counterfoil receipt and account books of the village to be filed, and the landlord or patwaris brought to book, according as the one or the other is to blame. As at present advised, I cannot support this last proposal, for I think it would seriously complicate these cases. I should fear that side issues would be raised, and the proceedings drawn out to an inordinate degree.

Years.	Books.	Forms.
1885-86	102	60,023
1886-87	934	900
1887-88	184	31,000
1888-89	691	36,200
1889-90	159	13,700
1890-91	277	14,900

"In Darbhanga it is reported that the provisions of the law regarding giving of receipts are neglected. The following remarks of the Munsif of Darbhanga are quoted:—

'In the majority of rent suits that came before me for trial, *I found that the landlords had systematically neglected to follow the provisions of sections 56 and 57 of the Bengal Tenancy Act.* I found that in 99 cases out of 100 the landlords still followed the old system of granting rent receipts in unprinted slips without specifying at all the particulars pointed out in section 56. Counterfoil receipts are seldom kept by the landlords.'

"The Collector of Saran reports that the forms prescribed by law are regarded as unfavourable to the landlords. Only the larger ones use them.

"The Collector of Champaran makes the following remarks:—

'Landlords in many instances either do not grant receipts at all, or grant them in some manuscript form of their own. Much litigation would possibly be avoided and many cases would certainly be more easily decided by the courts were proper and formal printed receipts regularly given and received. It is not always, however, the landlord who is in fault, for it is often the raiyat who refused to accept the receipt. Where either party is actuated by a dishonest motive, the receipt is ignored, the landlord taking care not to grant it if he wishes to have his hands free in the future, and the tenant declining to accept it when he hopes that on the occasion of the next landlord he will be able to obtain better terms than those on which he actually holds his land, and which he thinks he would not be able to dispute if he accepted receipts setting them forth. The Act provides penalties for neglect or refusal on the part of the landlord to grant receipts, but the provisions are practically, so far as this district is concerned, a dead letter, while there is no penalty that I am aware of for refusal on the part of a tenant to accept a receipt. If both the granting and the receiving of receipts in the prescribed form could be insisted on, results would be much more satisfactory, but so long as neither party interests himself in the matter, it is not easy to recommend any remedy for the existing state of affairs."

The present Commissioner, Mr. Forbes, in March of the present year, writes to the same effect:—

"I have frequently brought to notice the almost universal disregard of the civil courts to the provisions of sections 56, 57, and 58, regarding the giving of receipts. * * I think I am correct in saying that it is still a common practice to allow rent receipts of any form and kind to be filed before them."

It may, I think, be regarded as certain that the provisions of the Tenancy Act regarding rent receipts are wholly insufficient to give protection to the ignorant raiyats of Bihar. A typical illustration of the insufficiency will be given in paragraph 44 below.

43. It has not been, so far as I know, alleged that any of the other provisions of the Act can without a survey and record of rights have any more practical effect than the provisions of the previous law in certifying to the raiyat the land he holds or amount of the rent he is to pay for it, or in checking illegal and arbitrary enhancements. Act X of 1859, as well as all the previous rent laws, gave the raiyats extensive rights in theory, but left them to assert them in the Civil Courts if infringed; this they were unable to do, because, owing to the subjection of the patwari to the landlords, the latter monopolised all the evidence as to the occupancy of the lands and the amount of the existing rent, and when landlords sought an enhancement, they did not resort to the Courts in order to obtain it, but simply demanded the enhanced rent as being the existing rent already agreed upon. The raiyat having no document in his possession to show the amount of the previously existing rent, was unable to resist the landlord's demand, and thought in practice it was safer to yield at once rather than be harassed in the first place in the Civil Courts and be worsted in the end. What the raiyat primarily wants is a document which will be accepted by the Courts as proof of the actual rent payable by him. This the proceedings under the survey and record of rights alone can give him, and it is as futile to expect that the provisions regarding giving receipts will secure this end now, as it was in Lord Cornwallis' day to suppose it could be attained by the grant of pattas. The experience of the past ten years confirms the futility of expectation.

Character of surveys made by zamindars, and possibility of utilizing them.

The zamindars' memorial calls attention to the fact that some landlords have had surveys made of their estates at considerable expense, and that it is unfair to call on them to bear the burden of a further measurement. I am personally acquainted with some of the cases alluded to, and as regards others I am advised that the surveys were not made with scientific accuracy, while there was no real record of rights made out at all. A record of rights is an impartial document defining and limiting the reciprocal duties and rights of all parties claiming an interest in the soil. These zamindari surveys and records were made out for rent collecting purposes only, and I am advised in none of the documents was the *status* of the raiyat shown, nor had the officers who made the surveys any legal authority to make out a record of rights Moreover, had a record been prepared under the Rent law as it then stood, it would necessarily fail to exhibit rights and *status* conferred on raiyats by the Tenancy Act of 1885. We shall in our cadastral operations use the landlords' survey maps and record of rents payable so far as they are correct and sufficient, and thereby we shall strive to spare him expense; but as the best kept zamindari papers fall of necessity far short of a Record of Rights, we must ourselves prepare such a record.

Evidence of Local Officers as to continued existence of old abuses—*contd.*

44. Turning now to the question whether the same illegalities prevail in Bihar since the passing of the Tenancy Act, as before, I find that the Commissioner of Patna (the late Mr. Boxwell) reported in 1889* that—

* Parliamentary Return, page 65.

"uncertainty about rent and tenure prevailed generally over the whole division, not equally of course in all places, and perhaps to an excessive degree in some ascertainable smaller tracts, but uncertainty was the rule for which a survey and record of rights was the best known remedy."

The Collectors of the northern districts wrote thus in the same year:—

The Collector of Darbhanga—

"There are many estates in this district in which Government may properly interfere if the propriety of a judicial determination of rents, as effecting a survey and record of rights,

is held to depend on the grounds of dispute or confusion * * * has of late years very greatly and severely enhanced his rents, but he managed to get kabuliyats out of his raiyats. There are various stories as to how he effected this, but it would be useless to repeat them."

"By far the worst offender is * * *, who has been implicated in several criminal cases during the past year, some of whose men now stand charged with riot and murder brought about in trying to coerce a jeyt raiyat of a village to come to terms. This gentleman's property extended over 115 villages. I strongly recommend a survey and record of rights of his property."

The Collector of Muzaffarpur writes —

"It is reported * * *, who bears the worst character for unscrupulousness, and who lately sued in the Civil Courts on a bond which was judicially declared to be forged, is in constant turmoil with his neighbours and the raiyats in his district."

The Sub-divisional Officer of Tajpur in this district wrote—

"In spite of legislation the tendency of rent is to rise. Some of the parganas are unusually fertile. Many of the landlords are unusually rapacious."

The Collector of Champaran reported in the same year thus—

"The * * *, who is a zamindar, claims more than double the rents which the raiyats are willing to pay, and successive District Officers have failed to bring about agreement. The dispute was in full force previous to the discussions which took place in connection with the Tenancy Act, and is no nearer settlement now than it was ten years ago. In the general interests of the peace, a survey and record of rights is essentially necessary."

Writing of villages not leased to indigo planters, he remarked :—

"That they are practically auctioned to native farmers whose income solely depends upon any increase of rents they are able to collect on the head rents they pay to the proprietors; their object is to obtain from the raiyats as large a rent as possible, and to effect this they are compelled to resort to devices which sufficiently show that the tenants generally require further safeguards than those provided by the Tenancy Act."

All these abuses are identical with those which Sir Ashley Eden so vigorously denounced in 1875.

45. I shall finish this portion of my remarks by quoting from a letter which the Settlement Officer of one of the North Bihar districts has just written to the Secretary to the Board of Revenue :—

"In a case in which * * * was personally interested, but was acting nominally, as the Agent of * * *, he caused a patwari to prepare and have filed before me a number of rent receipts for the years 1296 and 1297 *Fasli*, which were written on forms bearing the * * * press mark 9-12-91, a date about half-way through the *Fasli* year 1299. I enclose one of the receipts for your inspection. The raiyats had been instructed to swear that they had recorded these receipts in the course of the years for the rent of which they purport to have been given."

A common abuse illustrated by an actual case.

I have the "receipt" before me as I write. The headings are printed in Nagri and the details filled up in manuscript in the same character. It purports to have been executed partly in the month of Asin, partly in the month of Jeyt, and partly in Bhadro 1596 *Fasli*. The paper bears the following press mark:—"* * * No. 47. 9-12-91. 200,000." Could there be a more significant or a more pitiable episode? The wretched raiyats are induced to swear to the execution in 1888 of a document (showing a fictitious rental) the very form of which had not been printed till 1891! What a comment the case affords on the state of things in Bihar, and how it emphasises the necessity of carefully scrutinizing all so-called agreements, and every entry that is made in the record before it becomes final! I am quite certain that the landlord (and chief manager) of the estate in which these raiyats live knew nothing of what was being done in his name in this matter, but the moral I wish to point is that if such things can happen in an estate claiming to be well managed, what things do not happen in the many estates which are ill-managed? If we have such things in the green tree, what have we not in the dry?

Evidence of enhanced illegal enhancements of rent deduced from road cess returns filled by zamindars.

46. I now come to a portion of my demonstration to which I invite special attention; for it depends, not on the reports or opinions of local officers, but on the figures of rentals furnished by the zamindars themselves under the Road Cess Act. I quote in support of my case the evidence of rent enhancements which zamindars themselves admit. According to the Road Cess papers filed by the zamindars in the Collector's

office, the rental of the Muzaffarpur district was in 1876 Rs. 44,15,325. According to the papers filed at the valuation of 1891 it had risen to Rs. 67,27,909. In other words, it had increased during the 15 years preceding 1891 by more than 50 per cent. There was no appreciable room for extension of cultivation, and there was no such rise in prices* during this period as would justify more than a small part of this enormous increase in rent. How far this increase, as well as the increase in the other three districts, is due to a higher valuation (at the recent revision) of *nijjote* or home-farm lands cultivated by the landlords themselves, I am unable to say. No doubt there has been some increase in the valuation of these lands, to keep touch with raiyati rates. Possibly also there may have been some concealment of assets at the first valuation in 1876. But discounting these sets-off, and allowing for the considerations noted in the next succeeding paragraph, enough remains to prove that since the passing of the Tenancy Act, as well as before, there have been heavy enhancements of rent in this district, which were not authorized by any provision of the law, and must have been effected in an arbitrary and illegal manner.

* See paragraph 24 above for the legal rule for the enhancement of rent; the average price of rice during the quinquennial period, 1876—1880, in North Bihar was 16·88 seers the rupee; from 1887 to 1890 it was 15·01 seers, the rise being thus 12 per cent. against an increase of rent of 50 per cent. in Muzaffarpur.

The rental of the Darbhanga district, in which there was little or no culturable waste land, increased from Rs. 63,19,138 in 1876 to Rs. 71,37,004 in 1883, or by more than 8 lakhs, or 12 per cent., in seven years. The district, as stated in paragraph 15 above, is now being revalued, and the estimate of the Collector is that the valuation will show the rental to be 78 lakhs of rupees, or an increase of 25 per cent. in 17 years.† During four out of these 17 years, the Government was compelled to open relief works in the district and distribute charitable relief in aid of the destitute. Further comment is superfluous.

† I believe the smaller comparative increase in Darbhanga to be due to the greater poverty of the people and the greater prevalence of large estates.

The district of Champaran was revalued under the Road Cess Act in 1888, the previous valuation having been made in 1876. The rental increased from Rs. 26,20,942 in 1876 to Rs. 30,73,556 in 1893, or by 4½ lakhs of rupees, equal to 17 per cent. on the previous rental. In this district there was and still is room for extension of cultivation, and this fact may account for the increase in rental, as well as for its comparatively moderate pitch, without importing the idea of enhancement. When there is much unoccupied culturable land, raiyats will desert their holdings if pressed for more rent than they care to pay.

In Saran the first valuation made in 1876 gave a rental of Rs. 55,06,769. By the revaluation made in 1883, the rental was Rs. 59,87,760, or an increase of about 9 per cent. in six years. Rent rates are very high in Saran, and as there is hardly an acre of culturable land lying idle in the district, the increase of rent is great and, apart from the possible sets-off referred to in the case of Muzaffarpur, must be entirely dne to enhancements of raiyats' rents. A revaluation now would bring out no doubt a still further increase.

Enhancements of rent by legal process insignificant in number.

47. How small a part the civil courts have taken in effecting these enhancements will be understood from the fact that the total number of suits for enhancement or abatement of rent instituted in the four districts of North Bihar during the seven years 1886 to 1892 inclusive, is, according to returns for which I am indebted to the High Court, only 760, or 109 on an average per annum in an area embracing more than 12,000 square miles, and in which the size of agricultural holdings is not on an average more than three acres each! While the number of holdings is Muzaffarpur and Darbhanga is over eight hundred thousand, and enhancement of rent very heavy as we have seen, the *suits* for enhancement and abatement of rent do not average more than 90 per annum!

48. The only other legal method, apart from a suit in court, of enhancing an occupancy raiyat's rent, is by registered agreement out of court. The Registrar-General of Assurances has supplied me with the following statistics as to the extent to which this method has been utilized since the passing of the Tenancy Act. In Muzaffarpur from 1886 to 1892 only 830 agreements to enhance rents had been registered, and this means that sections 29 and 43 of the Tenancy Act, which were intended as a check upon arbitrary and excessive enhancements of rent, have been practically inoperative in the Muzaffarpur

district. In Champaran, during the same ...ments were registered, and all of these exceeded the limit on enhancements prescribed by section 29 of the Tenancy Act! But in addition to these ten illegal agreements, 680 *sharanamahs* were registered in Champaran. A *sharanamah* is an admission by the raiyat that rent is payable at a certain rate, and as the document makes no reference to the rate payable before its execution, it evades the limitation on enhancements prescribed by the Bengal Tenancy Act. What effect such practice can have on an ignorant tenantry will be perceived from my remarks in paragraph 45 above.

In Saran only 36 agreements for enhancement of rent out of Court have been registered since the passing of the Tenancy Act, and the total amount of the enhancement under them was only Rs. 259-1-8. In Darbhanga* not a single agreement for enhancement properly so called was registered, but I hear that in parts of Darbhanga the *sharanamah* business has been, and is being, sedulously worked.[1] Enough has been said to show that enhancements are not effected now any more than they were before the passing of the Tenancy Act by recourse to the Civil Courts or by the other methods provided in that Act. They are effected in an arbitrary and illegal manner, as of old, by entering the enhanced rent in the patwari papers as the existing rent, and leaving the raiyat at his peril to dispute the demand. Could there be any better demonstration of the practical necessity of that appeal to the Civil Courts before enhancements are allowed, which I dwelt upon in my reply to the memorial of the Planters' Association, or of the urgent need of the record of rights which will afford the raiyat a means of resisting these illegal and never-ending enhancements of his rent?

* If in the estates of the Maharajas of Darbhanga and Hatwa there has been harsh treatment, I shall, from my acquaintance with them, acquit both Maharajas of personal knowledge of it. Besides, the great zamindar is always a more lenient and considerate landlord than the petty proprietor.

Opinions of Executive Officers as to necessity of Survey and Record of Rights. Inaccurate statements of Zamindari Association on this point.

49. And if all the preceding considerations combine to prove that the Bihar raiyat is in a wretched condition, and that his position has been in no way alleviated by the mere substitution of Act VIII of 1885 for Act X of 1859 or its Provincial equivalent, and that the only hope of alleviation lies in the Record of Rights which we are striving to make, we are not without tangible evidence to show that the alleviation will, as a matter of fact, and not of mere speculation, be afforded by that Record when made. From the nature of the case the evidence cannot be abundant, as it is connected only with the experimental area settled by Mr. Collin, but so far as it goes it is most significant. Writing of the results of these operations, Mr. Halliday, the Commissioner of the Patna Division, reported† as follows in 1886:—

Practical evidence as to the beneficial effect of the record of rights.

† Board's Land Revenue Report for 1885-86, paragraph 246.

"The survey operations under the Bengal Tenancy Act are progressing as smoothly as possible; disputes as to boundaries and possession are few, and are chiefly connected with pieces of waste land and roads; organised opposition there is none; and it is now clear that apprehensions as to relations between landlords and tenants being embittered by the survey are groundless. Among the zamindars the survey seems on the whole not unpopular, inasmuch as they see that it will provide facilities for identifying the whole of their lands and for realising their dues on account of every portion of their estates. The raiyats are quite indifferent in the matter, and see no cause for resistance or opposition to the proceedings.

"The criminal cases connected with the demarcation and survey proceedings have been extremely few, and have mostly on investigation turned out to be false or exaggerated. Nothing in the shape of a riot has been proved in any instance. The survey will effect much good in the way of determining rights and facilitating the identification of land. *It is probable that the survey record will be looked upon as a charter of rights by all classes interested in land, and no transfer will be negotiated without reference to it.*"

It will be noticed that Mr. Halliday, who wrote the preceding observations while still Commissioner of Patna and personally acquainted with the facts, is one of the officials whom the Memorialists (paragraph 13 of memorial and head (*d*), paragraph 7, above) quote as among the chief opponents of the cadastral survey. When subsequently Member of the Board of Revenue,

[1] See on this point the Hon'ble Mr. Stevens' Note (Appendix A), paragraphs 14 and 15.

Mr. Halliday at first counselled caution in extending the survey operations to the whole Patna Division,* and afterwards expressed his views in the following words:—

* Parliamentary Return, 17th May 1892, page 62.

"The Board's own view, on the fullest consideration of the case, is (1) that to the Government it would not be worth the cost at eight annas per acre unless it was accompanied by a reorganisation of the patwari system for the continuous maintenance of the records; and (2) that at the same cost, whether with or without the reorganisation of the patwari system, the survey would not repay the zamindars and raiyats. It seems to them that in view of the difficulty as to cost, and so long as it is not removed, the Government should confine itself to the survey of estates in which uncertainty as to rents are proved to exist on the evidence of constant disputes between the landlords and tenants." (Parliamentary Return, pages 156 and 157.)

From the preceding it will be seen that although Mr. Halliday apparently modified the views he held while Commissioner of Patna, as to the survey being regarded as "a charter of rights by all classes interested in the land," he still remained of opinion that the survey, if made, should be maintained up to date.

The memorialists in the same paragraph go on to say that "the only District Officer who would seem to have favoured the idea of this present survey, with perhaps the exception of Mr. Beadon, was Mr. Boxwell, the late Commissioner of Patna." Some relevant opinions of the local officers have been quoted in paragraph 44 above; but I would now invite a reference to the Parliamentary Return, pages 64 to 71, which will show (I restrict my observations to North Bihar, though the evidence from the southern districts is also significant) that Mr. Henry, Collector of Champaran, Mr. Beadon, Collector of Darbhanga, and Mr. Bourdillon, Collector of Saran, that is to say, the Collectors of three out of the four districts of North Bihar, have all expressed opinions to the effect that "in these districts uncertainty about rent and tenants' right does prevail to an extent that calls loudly for a survey and record of rights." Mr. D'Oyly, Collector of Muzaffarpur (an officer of small knowledge of the district), was the only District Officer of North Bihar who said that the survey was wanted only in isolated villages—an opinion which is contradicted by the actual results of Mr. Collin's enquiries, by the facts as to excessive enhancements noted in paragraph 46 above, and by general repute. It is thus clear that the memorialists have been misled as to the opinions of local officers in Bihar regarding the necessity of the Survey and Record of Rights, and have been betrayed into endorsing a statement which is entirely incorrect. It may be added that of three high officers whose names are mentioned in the same paragraph of the memorial, Mr. Beames alone had any local experience of North Bihar, and Mr. Beames' connexion with that locality ceased a quarter of a century ago. Moreover, what Mr. Beames wrote had, it seems, reference, not to North Bihar, but to the Purnea, Malda, and Monghyr districts of the Bhagalpur Division (Parliamentary Return, page 63).

As a matter of fact the necessity for such a Record as we are now engaged in has been a commonplace of administrative reform with Bihar officers, and in proof of this I may say that the following Commissioners of the Patna Division from 1874—namely, Sir Steuart Bayley, Mr. Metcalfe, Mr. Halliday, Sir John Edgar, Mr. Boxwell, Mr. Stevens, Mr. Lyall, and Mr. Forbes—have been uniformly in favour of a survey and record of rights of North Bihar.

Opinions of Judicial Officers as to effects produced by Survey and Record of Rights.

50. The late District Judge of Muzaffarpur, Mr. Brett, who had had long experience of that district, has the following remarks on the result of the experimental operations, in his annual report for 1888:—

"An administration report of this district would be incomplete without some observation on the recent cadastral survey which had been commenced in two parganas of Muzaffarpur.

"I pointed out in my last report the immense good that was expected to result from the measure, and I mentioned also that the work had been stopped. I regret to have to record that in the numerous villages in which the work remained incomplete, the mischief caused has been so great as to make one wish that the work had never been commenced in these villages at all. The work embraced survey and determination of the rents of the lands of each tenant. False hopes were raised, and at the outset the proceedings created a disturbing influence in the minds of the peasantry. This disturbing effect could have been obviated only by the completion of the work; *for in the villages in which the work has been completed, the result has been beneficial, and both the landlord and tenant have in most cases agreed to the entries in the jamabandi slip as correctly giving the incidents of the*

tenancy. This is further apparent from the very small ratio of appeals which were referred to me as Special Judge from the decisions of the settlement officers. But in the villages which were surveyed and the ascertainment of rents was not completed, or, in which the final publication of the jamabandi could not be made, the tension which had arisen between the parties remained, and is manifesting itself in the large number of rent disputes and rent suits that are coming before the courts."

And the Munsif of Muzaffarpur writes thus in a letter to the Government in the present year:—

"There has been a marked decrease in litigation in the surveyed tract since 1889. In the few cases which are contested, areas and boundaries of holdings and rates or amounts of rent are seldom disputed. Even if they are disputed, the opposite side produces an extract from the record of rights, and this settles the dispute. Contested cases of this tract are now much simpler, inasmuch as in most of them the only point to be determined is whether the amounts claimed have been paid or not."

Finally, the Collector of Muzaffarpur, in his Annual Administration Report for the past year, makes the following remarks, in which the Commissioner of the Patna Division, Mr. Forbes, agrees:—

"Although the measure (the cadastral survey) is yet unpopular, especially with the zamindar, the advantages of a record of rights is now better appreciated by all classes, the spirit of opposition and consequent agitation which existed before the introduction of the measure has disappeared, and, as far as I have been able to ascertain, the action of the Government is now regarded as beneficial to all parties interested in the land, as likely to place the present unsettled relations of landlord and tenant on a better footing. * * The comparatively low condition of the raiyats and peasantry in these parts is due largely to the want of an accurate record of each tenure and each raiyat's holding within the estate, and the status of everyone who has rights in the land, and of the rent paid by each raiyat to the tenure-holder. That the object of the Government is simply to supply this want is now understood by the tenants and landlords alike."

This statement agrees with my own belief. The opposition to the cadastral survey now comes from the zamindars alone, and not seriously from all of them.* "It is," writes the Commissioner of the Patna Division, "the class of petty zamindars, who prefer unsettled relations with their raiyats, who are the chief opponents of the measure." Owing to the unlimited exercise of the right of partition or subdivision of landed property, the number of petty zamindars in North Bihar has grown enormously, and the increase still continues. Every addition to the number of these petty landlords connotes an enhancement of the raiyats' rents and increased exaction afterwards. The Government of Bengal has more than once considered the propriety of imposing some limitation to this subdivision of property which injuriously affects the general administration of the country, as well as the raiyats; but it has not hitherto seen its way to effective action. The record of rights will check this abuse, among others, affecting the agrarian condition of North Bihar.

51. This concludes what I have to say on the condition of Bihar after the passing of the Tenancy Act, and I think it has been conclusively shown that the Act has been in no may effective in Bihar to suppress the evils at which it was aimed; that it will remain ineffective so long as the people continue in their present terribly depressed condition, or a record of rights is not made and maintained; and that where a record of rights has been made, the results have been in every way satisfactory and beneficial to all concerned. There is not now, and there has not hitherto been, any practical limitation to the power of the Bihar landlord to enhance rents, except his own sense of moderation and the capacity of the raiyats to pay. That this should be so is unfair to the general tax-payer, and a negation of the moral responsibility which rests upon the Government to see justice done to people who are among the poorest and most helpless of Her Majesty's Indian subjects.

PART IV.

THE MEMORIAL OF THE ZAMINDARI ASSOCIATIONS.

Summary of the objections which have been already answered.

52. In the margin of paragraph 7 above I summarised the chief objections to the Survey and the Record of Rights which are urged in the memorial submitted by the Zamindari Associations for transmission to the Secretary of State. One objection is that

* See paragraphs 73A and 73B below. I think these paragraphs justify me in saying that the Indigo Planters, who are landlords to a very large extent, are no longer in opposition.

the zamindars were kept in ignorance of the intention of the Government to survey Bihar, that "they were not aware that such a measure was in contemplation until the Secretary of State's sanction had been obtained." The refutation of this objection was given in paragraph 24 by quoting the words of the Government of India and of the zamindari representative in the Legislative Council, the Hon'ble Kristodas Pal, which leave no doubt that it was from the very beginning the openly expressed intention of the Government to survey Bihar, and that this intention was perfectly well understood by the zamindars at the time, as evidenced by Rai Kristodas Pal's words, "the expenses which may be incurred by enforcing the provisions relating to record of rights and settlement of rents will be cast upon the landlords and tenants, though no application has been made by them."

53. Another objection noticed is that the Cadastral Survey of Bihar should not be undertaken without legislative sanction, and that the provisions of section 101 of the Tenancy Act do not provide for the survey of a whole district, still less of a whole province. The refutations of these objections are given in paragraphs 25, 26 and 27, which place beyond question, *first*, that the survey of Bihar was one of the particular objects for which the Tenancy Act was passed, and *secondly* that, in the words of the Hon'ble the Advocate-General (repeating in substance the explanation given in the Legislative Council on the passing of the Act), section 101 "authorizes the survey of a province, district or sub-divisions of a district."

54. A third objection noticed is the assertion that all District Officers having local knowledge were opposed to the survey. In paragraph 49 it is pointed out on the authority of the Parliamentary Return that this assertion is altogether incorrect, that three out of the four District Officers concerned declare that the circumstances of these districts "call loudly for a Survey and Record of Rights," that the fourth—a gentlemen of limited local experience—says the operations are required in isolated villages, and that for 20 years the necessity for a Survey and Record of Rights had been a common place of Bihar administrative reform.

55. A fourth objection, that no provision had been made for maintaining the record, was dealt with in paragraph 28, where it is shown that it always was the intention to legislate on this subject by way of supplement to the Tenancy Act, and that before the Tenancy Act became law, the Bengal Government was called on to give effect to that intention. The zamindars further complain (paragraph 17 of their memorial) that the Government of Bengal has not stated the agency by which it intended "to maintain the survey records when finished, and whether the zamindars and the raiyats are to pay for the expense of this agency, and if so, what additional burden will be thrown upon them." The memorial ignores everything that has occurred on this subject since Sir Charles Elliott went on leave. But after the publication of the results of the Muzaffarpur Conference, the zamindars were in possession of sufficient information as to (1) the agency by which it is proposed to maintain the survey records and (2) as to the liability of zamindars and raiyats for the cost of that agency, and (3) as to the additional burden to be thrown upon them—though, as will presently appear, I prefer to regard the matter of cost more in the light of a relief afforded to, than a burden imposed upon, the zamindars. The Associations' complaints on these points, then, are somewhat misplaced, and their attitude would have been more helpful if they had addressed themselves to the actual facts, as communicated to them through the *Calcutta Gazette* of 10th of last August.

Objections based on the Cadastral Survey of the Srinagar estate in the Purnea district.

56. A fifth objection made in the zamindars' memorial is that the Cadastral Survey will cause general litigation, be a great expense to all concerned, and do no good; and the case of the Cadastral Survey and Record of Rights made in the Srinagar estate is cited in proof and illustration of these assertions. These are the facts about the Cadastral Survey and Record of Rights in the Srinagar estate.

The Srinagar-Banaili estates were taken under charge of the Court of Wards in 1882, with a total nominal rental of Rs. 4,48,715. The arrear demand was Rs. 14,68,440, or 3¼ times the current demand.

In 1884 a sum of Rs. 10,15,036 out of this arrear had to be remitted because it consisted of fictitious and illegal demands which the raiyats

repudiated, and which the Court of Wards was legally unable to enforce. The Court of Wards, with all its power under the certificate procedure, was only able to realize 72 per cent. of the current demand in 1884, owing to the inextricable confusion that prevailed in the zamindars' accounts. In 1885 difficulties arose in connection with giving receipts under the Tenancy Act; the raiyats alleging that the receipts offered exhibited fictitious rentals and areas. In 1886 the collections amounted to only 63 per cent. of the current demand, and the arrears had increased by more than 3 lakhs of rupees. To extricate the estate from this intolerable state of confusion, a survey and record of rights was undertaken with these results. All the confusion that had prevailed was cleared up, the raiyats were given, and they accepted, documents showing the exact area of their holdings and the amount of their rents, while the landlords' rental was increased to Rs. 4,96,498, or by Rs. 47,783. The total cost of survey and settlement was Rs. 2,94,328, which will be recouped in six years by the mere increase in rental. For the landlords, therefore, the operations have been a signal financial success.

The immediate result of the operations was that whereas only 63 per cent. of the current demand could be realized before the record was made, the collections in 1889-90 amounted to 112 per cent. on the current demand, and in 1890-91 to 125 per cent., or nearly double the amount realized in 1886. All this was effected without having recourse to compulsory processes for realization of the rent.

As to the "litigation" which attended the operations, the facts are these—

(a) 1,883 "suits" were instituted by landlords against tenants, and 1,079 suits by the tenants against the landlords, under sections 104 and 106 of the Tenancy Act, for settlement of a fair rent. As the tenants, &c., in the estate number 69,561, the number of suits filed was less than 6 per cent. of the number of holdings, which is an excellent proof of the judgment with which the preliminary proceedings were conducted.

(b) Of these 2,962 suits, 1,153 were decided in favour of the landlords and 803 in favour of the tenants, and 1,006 were compromised, withdrawn or never came to trial.

(c) Besides the suits between landlord and tenant, there were 517 suits for settlement of fair rents between tenants, thus making a total of 3,484 suits, which is considerably less than the figure given in the Memorial.

(d) The total number of appeals was 338 (not 388, as stated in the Memorial): of these 67 were appeals on questions of boundaries under the Survey Act, and 271 were appeals on the merits to the Special Judge in connexion with settlement of rents.

If it be remembered that the settlement of fair rents under section 104 of the Tenancy Act is one of the particular objects of such proceedings (should the parties so wish), and that applications to have fair rents settled *are* in fact the "suits" in question, it must, I submit, be admitted that the litigation in connexion with the settlement of the Srinagar estate, with its 69,561 tenants, the management of which had fallen into such confusion, was extraordinarily small. It would have been smaller still if the landlords had not, as they were quite entitled to do, sought to enhance their rents by "suits" or applications to the Settlement Officer.

As to the attitude of the raiyats, the Settlement Officer, Mr. Collin, reported in 1891 as follows:—

"The raiyats as a rule showed no disposition to hold aloof from the proceedings They readily came to the Settlement Officer's camp to have the entries explained, and appeared to take great pains to have the records correctly prepared. The large number of objections filed is a proof of the interest taken in the proceedings."

The objections, which numbered 20,777, or one objection to every three holdings, had reference to measurement of fields, to mistakes in writing up the records, and generally to the adjustments of petty errors and discrepancies inseparable from every undertaking of the sort. These objections, which are disposed of as the work goes on, and which every Settlement Officer

knows to be a proof of the people's healthy interest in his proceedings, are construed by the Memorialists into damnatory evidence of embitterment and litigation!

It is true, as the Memorialists observe, that the cost of the Srinagar survey and record of rights was in excess of the estimate of eight annas an acre. But if the condition of confusion in which the estate was involved, and the fact that the lands were scattered throughout five separate districts and 23 parganas be considered, I think it will be admitted that the actual cost of 10 annas 9 pies per acre is not in itself excessive, while the benefits to zamindar and raiyat were cheaply bought at the price. If it cost only 10¾ annas per acre to settle the Srinagar estate, we may confidently expect that it will cost much less to make a record of rights in North Bihar, where the land to be dealt with is of course not scattered, but can be surveyed continuously. The only drawback to the satisfaction which the whole episode inspires is that no adequate arrangements could be made to maintain the record up to date. Without such a law for maintaining the records as I now propose, this was impossible.

I may, on the authority of the Board of Revenue, say that since the record of rights has been completed in this estate two years ago, suits for arrears of rent have been instituted against 1,759 tenants, or about 1½ per cent. of the total number per annum. In 1,663 of these, decrees for the full demand were readily procured on the basis of the record of rights. In 80 cases only was there any modification of the sum claimed, and this was owing to clerical discrepancies in the abstracts of the records produced by both parties. Six cases only were dismissed, and out of the total number of 1,759 decided cases, there were only ten appeals. In the Banaili portion of the estate, in which a record of rights was also made, 701 suits for arrears of rent were within the same period instituted, and decrees were given on the basis of the records of right in 699 cases. In only two cases was there any modification of the demand. The conclusion is that the record of rights was entirely effective in enabling the landlords to recover their rents without delay or difficulty, and in restoring order, peace and contentment to nearly 70,000 tenants.

I think it will be admitted that if the Zamindari Associations had desired to cite a remakable instance of the necessity and advantages of a survey and record of rights, they could not have selected a better example than the Srinagar estate. The settlement, as a matter of fact, has been a financial success for the landlords, and for the raiyats it has been a charter of peace and protection. And this is only one of many examples* which could be cited of the immediate substitution of order and contentment for chaos and strife under the operation of Chapter X of the Bengal Tenancy Act.

* I mention a few Dubulhati, Churaman, Sunkerpur, Maldwar, Mollarpur, Dakhin Shabazpur, and others containing an aggregate area of about 2,500 square miles.

Now I do not for a moment believe that the signatories to the memorial have cited the Srinagar case in support of their views, knowing what the real facts were. The gentlemen who have signed the memorial are all honourable men who would never knowingly put forward misleading statements or endorse inaccuracies of this description. But the very circumstance that on a material point the memorial is so misleading affords a suggestive illustration of that levity of assent with which many of the great zamindars of Bengal and Bihar receive representations made to them in depreciation of the Cadastral Survey.

Objections raised in Zamindars' Memorial considered, that Bill is intended to meet "adminstrative purposes."

57. In paragraph 7 of the Memorial, some words of Sir Charles Elliott's are quoted, and on them the assertion is based that the survey is required for "administrative purposes," or collection of economic facts merely, and as such is outside the scope of the Tenancy Act. The objection, if seriously made, is surely not supported by the Lieutenant-Governor's words. It should be perfectly well known to everybody that the record of rights in North Bihar has been undertaken, not with a view to collecting economic statistics, but in the interests of the population of that part of the province. The chief object of the survey and record of rights is more of a judicial than of an executive nature. The statistics which the record of rights will establish are those which will tend to prevent disputes, facilitate the decision of disputes when they arise in the courts, and secure the enjoyment to ten millions of people of their legitimate

rights. These rights have been withheld for a century, and the memorialists must excuse me if I do not take their word for it, that the raiyats are now animated by a violent desire to forego these rights still longer! We are not without ample knowledge on this head. We know, from the constant enquiries of a quarter of a century, what the raiyats do really think upon the matter, and we have been lately told by the President of the Indigo Planters' Association that that the raiyats are willing to pay four times as much for the record of rights, as they will be charged. And as for the maintentance of the record, I would again call attention to the words of Mr. Gibbon, Mannager of the Bettiah Raj (quoted in paragraph 62 above): "Half the amount of money now expended by zamindars on the present (patwari) staffs, if paid into Government treasuries, would be sufficient to secure the services of efficient men to maintain the record." We undertake to do it for a small fraction of that amount.

Zamindars' objection to contribute towards cost of survey and Record of Rights further considered.

58. The Zamindars in paragraph 8 of the memorial [head (c), paragraph 7 above] raise an objection to the enforcenment of section 114 of the Tenancy Act, by which the expenses of making a survey and record of rights in Bihar are to be defrayed by the landlords and tenants concerned. It is, I understand, now contended that this section is invalid, inasmuch as the public had not full notice of the intention of the Legislature to enact it. That this objection is founded on a misapprehension of fact will have been observed from the quotation given in paragraph 24 above from the Hon'ble Kristodas Pal's Minute of dissent from the report of the Select Committee on the Tenancy Bill. The fact is that the section as it stands now consolidates and modifies clauses 163 and 164 of the first edition of the Tenancy Bill published in the English and vernacular Gazettes in 1883. These provisions were reproduced with amendments in clauses 121 and 133 of the second edition of the Tenancy Bill, which was published in the English and Vernacular Gazettes in 1884, and was widely commented upon by the public of Bengal during 1884 and 1885. Those sections provided for charging the costs of settlement operations to landlords and tenants. It was this second edition of the Bill as modified in Select Committee that became Act VIII of 1885. It is therefore incorrect to say that the proposal to charge the expenses of the survey and record of rights to landlords and tenants was not specifically before the public for a long period before the Act was passed.

In regard to the fairness of this provision of the Act, I would again call attention to the fact that the Zamindars of North Bihar have now a rental of about 2½ crores of rupees (Rx. 2½ millions), out of which they only pay 34 lakhs (Rx. 340,000) as Government revenue, while at the time of the Permanent Settlement their rental was only a quarter of a crore (Rx. 250,000), out of which they paid something over 22 lakhs (Rx. 220,000) to the State. Their net income now is about 80 times greater than it was three generations ago. They have always been under the obligation to certify to their rayats *at their own expense* the facts which the survey and record of rights will now establish; they have persistently refused to fulfil this obligation; and the Government is now only doing for them what they have themselves failed to do. This plea of hardship because of their being made to fulfil their obligation is, therefore, an unreasonable plea to put forward.

Zamindar's objection to Bill as withdrawing suits from Civil Courts.

59. In paragraph 16 [head (e), paragraph 7 above] of their memorial, the Zamindars object to the survey and record, because they say the litigation it may produce will not be conducted in the ordinary courts, "which are well known and trusted by the people," but must be heard and determined by Revenue officers, whose decisions for obvious reasons will not be considered with the same respect." Herein the memorialists are altogether mistaken, for, as stated in paragraph 34 of my Minute of the 24th June, and in my reply to the Indigo Planters' memorial at Muzaffarpur, it will rest with the Zamindars whether they will, in any litigation they may wish to raise, take the matter into the ordinary Civil Courts' or have it dealt with by the Settlement Officers. In the latter case the Appellate Court is the Principal Court of Civil Jurisdiction of the district, or a special Civil Court of equal rank with such Principal Court. The objection therefore is based on a misconception of law and fact.

60. Before ending this portion of my paper, I wish to quote the following extract from the despatch of the Secretary of State, No. 95 (Revenue), dated 24th December 1891, on the point of the costs of the survey:—

Secretary of State's opinion as to reponsibility of zamindars for costs of survey.

"In regard to the third objection, it is true that in other parts of India the general treasury bears the cost of a cadastral survey and record of rights. But in temporarily-settled districts the treasury reaps an immediate increase of land revenue as the result of these operations; and so it is just that the cost should be borne by the general tax-payer. Although in the permanently-settled districts of the Benares Division the landed classes were not called upon to pay directly for the recent resurvey and record of rights, it must be remembered that one-half the cost of those operations was defrayed from the unexpended balance of a special fund contributed by the landholders. The other half was paid from the general treasury. In the case of North Bihar it is proposed that the general treasury shall bear one-eighth of the cost, the remainder being defrayed, half by the landlords and half by the tenants. The reason for thus limiting the State share of the cost is apparently because the decision of 1877 regarding the cost of the Benares survey is regarded as an unnecessarily liberal concession, and because the land revenue paid at present by the Benares districts is very much heavier than that paid by North Bihar. The North West Provinces' Government orders of the 15th June 1889 show that the five permanently-settled districts of Benares pay on the average a land revenue of 26¼ annas for each acre of cultivated land, and that the total land revenue amounts to 39 per cent. of the corrected rental. At present there is no precise information of this kind regarding North Bihar; but I am informed that the land revenue there probably does not exceed 10 annas per acre, and perhaps does not exceed 20 per cent. of the total rental. I consider that there are good reasons for the treasury bearing a smaller share of the cost of the Bihar survey than it did of the Benares survey."

Circumstances have somewhat changed since this despatch was written. It will be perceived from paragraph 15 above that the Government revenue of North Bihar is in round numbers 34 lakhs, while the rental is in round numbers 250 lakhs. The Land Revenue, therefore is now less than 14 per cent. of the rental, as the rental of two districts was valued ten years ago, and one six years ago, no doubt the percentage of revenue on rental is at present appreciably less than 14 per cent., and probably not more than 12 per cent. I am informed that the zamindars of the permanently-settled districts of the Benares Division do pay a cess for the maintenance of the settlement records.

61. I have seen it stated on behalf of the zamindars that the Cadastral Survey will cost over one million pounds sterling, and, more recklessly still, that it will cost more than the capitalized value of the land Now what are the facts? The area of North Bihar is 12,821 square miles, or 8,205,440 acres. The estimated cost of the Cadastral Survey is eight annas an acre, which would, if not exceeded, give in round numbers a total expenditure of 41 lakhs of rupees, of which Government pays one-eighth under present arrangements. I am in hopes that the estimate will not be exceeded, but assuming that the cost will even be so much as Rs. 400 per square mile, which I am assured it will not reach, even then the total cost would be about 51 lakhs, of which the Government pays one-eighth, leaving 45 lakhs to be shared between landlords and tenants in equal parts. That would still be only about £300,000, or less than a third of the sum which the zamindari advocates estimate. It would be only 4½ pence per acre each on the landlord and tenant. The expense, whether it be four pence or three pence per acre, I propose to recover at or about the rate of one penny per acre per annum. Where then is the probability of impoverishment to either landlord or raiyat from the cadastral survey?

Costs of the Cadastral Survey.

PART V.

THE LAND RECORDS ESTABLISHMENTS BILL.

62. I now return to the point at which, in paragraph 7 of this Minute, I disgressed, and proceed to comment on the Bill which I propose for the creation and maintenance of a Land Record Establishment. The Bill itself, with a Statement of Objects and Reasons, is printed in the Appendix C; and as the Government of India may wish to know at once how I should propose to give effect to its provisions if passed into law, I also append a draft set of rules (to be made under the Bill) which might form the basis of further discussion. The rules would of course be susceptible of such amendments as experience

The Land Record Establishments Bill. Complaints of Zamindari Associations of want of information.

might show to be necessary on all points, more especially as to the unit of area to be entrusted to each Land Record-keeper, the salary to be allotted to him and to all supervising officers, and the number of inspections to be made. I should welcome, and so far as possible give effect to, any suggestions which, consistently with maintaining a correct record, will be acceptable to the landlords, and guarantee the status and trustworthiness of the Land Record staff.

Objection to Land Record Establishments Bill.

63. The objections against the Bill may be considered as falling under three heads—

(a) that the cess for which it provides is a violation of the terms of the Permanent Settlement, and an excessive burden on the landed interest in Bihar;
(b) that it is unnecessary to maintain the record at all, or, if necessary, that a decennial revision would suffice;
(c) that the scheme proposed in the Bill will lead to an intolerable degree of interference with landlords, and would be ineffectual for the object in view.

Objection on the ground that the Bill conflicts with Permanent Settlement considered.

64. The first and the most important objection to the Bill is that the cess it provides for is a violation of the Permanent Settlement and an excessive burden on the landed interest in Bihar. The last portion of the objections is the burden of much of the memorial to the Secretary of State. I shall deal with this objection at some little length.

In Part II of this Minute I stated that when making the Permanent Settlement, Lord Cornwallis reserved complete power to interfere in any way the Government liked for the protection of the raiyats. This reservation is contained in article VII, Regulation I of 1793, which runs thus:—"It being the duty of the ruling power to protect all classes of people, and most particularly those who from their situation are most helpless, the Governor-General in Council will, whenever he may deem it proper, enact such regulations as he may think necessary for the protection and welfare of the dependent talukdars, raiyats, and other cultivators of the soil; and no zamindar, independent talukdar, or other actual proprietor of the land, shall be entitled on this account to make any objection to the discharge of the fixed assessment which they have agreed to pay."

Apart from the general and indefeasible power of the Government to make laws as circumstances require, that is the authority which empowers the Government to pass the land Records Bill into law, and who can say that its terms are limited, or its meaning or expression doubtful? There is here no question of enhancing the Government revenue. The Government "seeks no fiscal advantage, but the prevention or diminution of human suffering." It is merely a question of providing "regulations for the protection and welfare of the dependent talukdars, raiyats, and other cultivators of the soil." But besides this authority, there is another and a more specific justification for this clause of the Bill, which I proceed to state.

Objection to the Bill on the ground that it imposes a cess on the land considered. The origin and nature of the system of kanungos and patwaris.

65. When introducing the Bill for amending the law relating to kanungos and patwaris into the Bengal Legislative Council in 1885, I thus explained the status and functions of the kanungo and the patwari, and their relationship to the zamindars: "I will now say a few words regarding the collection of the revenue under the Muhammadan system. The revenue was actually collected by officials who were the prototypes and doubtless in some few cases the progenitors of the zamindars of to-day. But to secure the interests of Government, it was obviously essential that the dealings of these tax-collectors and their subordinate agents, or gumashtas, with the actual cultivators should be subjected to some check. Accordingly, in order to obtain and preserve the accounts necessary to exercise such a check, the system of patwaris was remodelled, and the system of kanungos established. As originally constituted, the kanungo, or 'expounder of the laws,' was an agent of the Imperial Government who was associated with the tax-collector or zamindar for the purpose of checking and supervising the zamindar's proceedings in regard to the collection of public revenues. The patwari was the kanungo's subordinate, just as the village gumasta was the zamindar's, and he

bore to the gumastha the same relation that the kanungo bore to the zamindar. Thus there was created a double check on the proceedings of the zamindar, while where was also established an office of record and account to which the cultivators could appeal in defence of their rights and privileges."

The kanungo and patwari were therefore under Abkar's system entirely unconnected with the actual collection of revenue. Their business was to see that no more than the due amount was taken from the people by the zamindar and his agent, the village gumashta: that the fact of payment was duly recorded; and that other matters connected with the agricultural well-being of the community were duly attended to. In the language of the Fifth Report of the House of Commons on Indian Affairs, "the kanungo was the confidential agent of Government—the depository and promulgator of the established Regulations—whose office was intended as a check on the conduct (in financial transactions) of all the other village officials. Under the superintendence of the kanungo or of one of his appointed agents was placed a certain number of adjacent villages, the accounts of which, as kept by the patwaris, were constantly open to his inspection, and the transactions in which, with regard to the occupancy of land and the distinction of boundaries, came regularly under his cognizance in a form which enabled him, at any time when called upon, to report to the Government the quantity of land under cultivation, the nature of the produce, the amount of rent paid, and generally the disposal of the produce. To this officer, moreover, reference might be had to determine contested boundaries, the use of rivers or reservoirs for irrigation, and generally in all disputes concerning permanent property or local usage without the limits of his official range."

Responsibility of the zamindar under the Permanent Settlement for payment of patwaris.

66. The preceding extract makes it clear that under the *régime* to which we succeeded in Bengal, the kanungo and the patwari were public servants and in no way subordinate to the zamindar, but on the contrary a check upon his proceedings. But in the lapse of years, and amid the confusion attending the break up of the Mogul Empire, the office of kanungo fell into abeyance; and when we took over the Dewany or fiscal administration of the country, the kanungo was little more than a name. In the arrangements for the Permanant Settlement, therefore, no provision was made for him; but "the allowances of the kazis and kanungos heretofore paid by the landholders" were added to the jama (section 34, Regulation VIII, 1793), the Government taking on itself the payment of kanungos should the same institution be again revived, of course on the same basis. But the parwari system met with a very different fate. In origin Hindu, and not Muhammadan, it had all the vitality among the Hindu population which an indigenous institution always posseses. So that in 1793, Lord Cornawallis found it in full vitality in Bihar. He resolved, as I have stated in paragraph 13 above, to make use of it as one means of effecting that record of rights which he intended to establish, and he accordingly (by section 62, Regulation VIII of 1793) reaffirmed the obligation imposed by ancient custom on every zamindar of maintaining a patwari in each village to keep the accounts of the raiyats. The words of the law are these:—

"Every proprietor of land who may not have established a patwari in every village in his or her estate to keep the accounts of the raiyats, as required by the original rules for the decennial settlement of the three Provinces (*i.e.*, Bengal, Bihar, and Orissa), shall immediately appoint a patwari in each village for that purpose."

I invite particular attention to the words "to keep the accounts of the raiyats." The patwari was under the Regulation to be, not the zamindar's servant, but the custodian of the raiyat's interests as against the encroachments of the zamindar, which was indeed his true position and function from immemorial times.

Subsequent regulations provided that, if the zamindar failed to appoint the patwari, the Collector was to do so; that where there were more proprietors than one, the Collector was to appoint without reference to the zamindar (section 4, Regulation I of 1819); and that the Board of Revenue might "increase or reduce the amount of remuneration paid to the patwari, and alter or modify the mode of its payment," whenever they deemed this necessary (section 18, Regulation XII of 1817).

Financial effect of zamindar's responsibility for the payment of patwaris in North Bihar.

67. It is thus established (and indeed it never has intelligently questioned) that at the [illegible] the zamindars of Bihar are [illegible] the conditions on which they [illegible] estates, [illegible] salary of a patwari for every village—such patwari to be, not their pri[illegible] servants, to keep *their* accounts, but public servants, "*to keep the accounts of the raiyats.*" Now if it be remembered that the Board of Revenue has authority, under section 18, Regulation XII of 1817, to fix the remuneration of patwaris and the mode of paying it; that Rs. 8 per month, or say Rs. 100 per annum, is not too high pay for a patwari; and that according to the last census there are over 18,000 villages in North Bihar, it will be apparent that if the Government decided to maintain the record of rights through patwaris, it could recover, under the existing law and the terms of the Permanent Settlement, more than 18 lakhs of rupees annually from the zamindars of North Bihar on account of the pay of patwaris, unless in the rare cases where the zamindars could show that by immemorial custom the patwari was paid by the raiyats. *The Government can do this without any legislation whatever, and merely by enforcing the legal obligations which now rest upon the zamindars.** The zamindars at the Mazuffarpur Conference knew this as well as I did, and they very naturally rejected the patwari, and chose a scheme for maintaining the record, which, with a manimum of interference, will probably not cost them one-fifth of what they are now liable to pay for the patwaris. I acquiesced in their choice for reasons which I stated at length in my Minute of the 24th June, although by doing so I was throwing on the raiyats one-half of a mitigated obligation which under the terms of the Permanent Settlement the zamindars should as a general rule bear. It is, then, surely too unreasonable for the zamindars of North Bihar, when a choice was allowed them, and their selection of a greatly reduced responsibility conditionally approved, to ignore all reference to these transactions, and say they cannot be made responsible for any contributions at all! If the zamindars unsay what they have said, and the Land Records Bill fail to become law, then they should remember that the Government can fall back on Regulation XII of 1817, and enforce the registration of patwaris, their payment in such mode as the Board of revenue directs, and the maintenance of the record of rights through them. But that the zamindars of North Bihar will not face that extremity, and that in their hearts they are thankful for what I have done for them in this matter, can be perceived clearly enough from the Resolution (among the enclosures to this Minute), in which the Tirhut Landholders' Association express their gratitude to me for the arrangement I have made.

Reasons for clause of Bill imposing on zamindars and raiyats joint responsibility for payment of Land Records establishment.

68. I have thought a good deal over the clauses of the Bill, which following the Road Cess Act, make the land records cess of one-fourth of an anna per rupee of rent† recoverable in equal shares from the raiyats and the landlords. I was induced to have the Bill drafted as it stands by the consideration that, no matter what was the case in the distant past, it certainly is the case now that the raiyats do pay for the patwari either in the shape of customary fees or of an enhancement of rent, and that the zamindars have in the process of time, to some extent, transferred their own liability in this respect to the raiyats' shoulders. We cannot undo the past: we can only take precautions for the future; and therefore in this, as in other points, I accept existing facts, and do what is best for the future on that basis. *I am the more willing to do so, as the land record establishment now proposed will, I estimate, not cost the raiyat more than one-half anna or about one-half penny per annum per acre of his holding.* I trust that the full significance of this fact will not be lost on the opponents of this measure both in England and in India. For a cess of one-half anna (or one-half penny) per acre *per annum* each raiyat will enjoy the means of protection form illegal enhancements of his rent and arbitrary ejectment from his land. This is surely an insignificant price to pay for such

* On this point reference is invited to the opinion of the Hon'ble Sir Griffith Evans (Enclosure IIa, pages Xa to Xc) which confirms that of the Hon'ble the Advocate-General referred to in paragraph 31 of my Minute of 24th June last.

† I notice that in replying to a question put in the House of Commons by Mr. Henniker-Heaton in August last, Mr. Russell, Under-Secretary of State for India, said: "The cost of maintaining the record of rights would be about $\frac{3}{4}$ of an anna per rupee of rent" Mr. Russell was, it will be noticed, incorrectly informed as to the facts, and made the cess three times more than I propose it should be.

advantages, and no sensible addition to the raiyats' existing burden incidence the zamindar of the land record cess will be no heavier than on the raiyat.

But I shall not, when the facts are known, be surprised if the Bill on this point is adversely criticised as unfair to the raiyat, having regard to the landlord's existing responsibility for the whole pay of the patwari when he cannot show that by custom before Regulation XII of 1817 the raiyats were responsible; and I should not object to leaving the point an open one for the Legislative Council to decide, without any declaration of policy from Government, except that the rate of ¼ of an anna per rupee of rent shall not be reduced, nor any greater burden be imposed on the raiyat than that one-half of that rate (or ⅛ of an anna—that is, one farthing—per rupee of rent) which the Bill as drafted imposes.

Objection that the Bill is unnecessary considered.

69. I now propose to consider the second of objection stated in paragraph 62 above. In my speech at the Bankipore Darbar, I referred to this objection in the following terms:—"I have spoken to many landlords within the last two months on this subject, and there was not one who did not confirm my own long-standing conviction, that if the survey is made at all, it ought, when completed, to be maintained up to date. We know that changes in holdings are of constant occurrence through deaths, transfers, successions, reclamation of waste lands, division of fields (and I might have added, enhancements or divisions of rent). So that, if no means of annually adjusting the record to these change is adopted, the record will have become wholly obsolete in a few years, while from the first year it would be growing and more discredited for judicial and administrative purposes." Experience in other provinces where records of rights are maintained shows that the annual changes vary from 5 to 10 per cent. of the entries. If no adjustments were periodically made, we should be in a very few years confronted with the state of chaos and the numberless embarrassments we suffer from to-day. If the record be not maintained, the survey and settlement of Bihar will be a very one-sided business indeed. In my letter of the 6th July to the Government of India, it was said: "By the survey and record the landlords will gain substantially not only in that the recovery of existing rents will be materially facilitated and its cost reduced, but by the increase of rents in cases in which the survey enables the landlord to prove that the tenant is holding land in excess of the area for which he is paying rent. * * * They will further gain by the stereotyping of *sir* or demesne land, which plays so important a part in the agricultural system of Bihar, and over which raiyats henceforward will be debarred from acquiring occupancy rights. The planters who are not solely landlords, and who regard the acquisition of rights in land as merely subsidiary to the cultivation and manufacture of indigo, will find their position enormously strengthened and their initial expenditure reduced by the survey placing on record the exact nature and extent of all proprietary rights; so that in future the planter will know exactly with whom to deal when taking a lease of a village. He will also be enabled, on occasions, to ignore the zamindars and to acquire effective rights for the purpose of cultivating indigo by entering into agreements with the raiyats direct. So far, then, looking at the matter from the raiyat's point of view, it will be seen that for a survey and record which will lead probably to an enhancement of their rents, and certainly to a curtailment of the area within which the rights conferred on them by the Tenancy Act can take effect, the raiyats will have to pay a sum amounting in the aggregate to one-half of the charges imposed upon the land. Clearly they have the strongest equitable claim to some substantial counterbalancing equivalent for proceedings which are likely, or which have a tendency, to produce such results. This equivalent is chiefly to be found in the maintenance of the record of rights, which, if it mulcts the raiyats now, will, it must be hoped, give them freedom from illegal demands and adequate protection in the future."

Maintenance of the record of rights essential in the interests of the raiyats.

The maintenance of the record up to date thus, in my opinion, lies at the very root of the whole matter, and it is not to be wondered at that the zamindars are concentrating their opposition on this point. If they are successful—if even

by agreeing to the survey the zamindars can avoid the subsequent maintenance of the record—then in a very few years the raiyats will be in as bad a plight than if we had never interfered on their behalf. The examples of Chittagong and of Cuttack have been cited in support of the view that a survey without subsequent maintenance of the record confers a lasting benefit on the raiyats. But I submit that the cases are not in point, for the raiyats in Chittagong and (in a lesser degree) in Cuttack were strong and their landlords weak, while in Bihar the case is entirely reversed; even in Chittagong and Cuttack it is certain that the condition of the raiyats would be better than it now is had the records been kept up. Moreover, the experience of the Benares district, which adjoins North Bihar, points the other way, and indicates the necessity of maintaining the record. My great fear is that to the ignorant Bihar raiyat the survey alone would, after a very few years had passed, be a mere fig-leaf of protection.

Desirability of taking power in the Bill to revise the record at such periods as may be found necessary by experience.

70. At the Muzaffarpur Conference the zamindars met my proposal for an annual revision of the record by a counter-proposal for a decennial revision. But it was pointed out that, having regard to the frequency of changes in the record, a decennial revision was practically equivalent to no maintenance at all. I objected, and still object, to any limitation on the discretion of the Government as to the time when the record shall be revised. We are to be responsible for the accuracy of the record, and we must not be fettered as to the time or method of keeping it up to date. The only limitations we can allow are those imposed by financial considerations. For these we have provided in the Bill, and subject to them we must have power to revise the record at such periods as we may find most desirable. If we find an annual revision necessary, we must be able to make an annual revision; if we find a biennial revision will suffice, we must be at liberty to make our revision biennial. If in well-managed estates, where we find that changes are regularly reported to the Land Record-Keeper, a revision once in three years will meet practical requirements, we may have a triennial revision; but no longer period than three years should ever be permitted to pass without revising the record. Three years is the period of limitation which the law allows in regard to the recovery of arrears of rent. On one point perhaps I ought to guard myself against misconception. There is no intention to have the whole of the record re-written each year, but merely to have entered up annually mutations or changes which have taken place during the year. The re-writing of the record *de novo* will depend on the number of intermediate mutations that may have been entered, and administrative convenience.

Objection to Bill on the ground of interference between landlord and tenant considered.

71. The third objection (see paragraph 62 above) I have to notice is that our scheme of maintenance of the record involves intolerable interference between landlord and tenant. To see the fallacy of this, one has only to consider what information has to be maintained in the record. In Appendix B to my Minute of the 24th June, I gave provisional forms of records of rights, and an examination of them will show that they involved no unnecessary interference between landlord and tenant at all. All that they involved was the adjustment of the record of a previous year to the circumstances actually existing at the subsequent time when the Keeper of the Land Records visited the village. If all the changes are reported by the landlord and raiyat, or by either, at the time of occurrence, and before the date of the land Record-Keeper's visit, all the Keeper will have to do is to verify their accuracy on the spot. Wherein, then, does the intolerable interference exist? Where does it come in? There is to be no interference by the Land Record-Keeper with agreements regarding rents, no interference with the letting or resumption of lands, no meddling in the zamindari management of the village. There is to be no interference at all beyond the adjustment of the record to the existing facts. The people who make this charge of "intolerable interference" are themselves either unacquainted with the scheme which is before them, or, being averse from the check on arbitrary action which a record of facts and legal conditions implies, they permit their judgments to be warped by baseless apprehensions.

But it is said the Officiating Lieutenant-Governor's scheme for main[taining] the record will be ineffectual. No reasons are given; the scheme is condemne[d]

off-hand by those who have had themselves little or no practical experience in such matters. My reply is that the scheme as it stands is the handiwork of men who have been dealing with land records on the largest scale now in operation in India. It is no doubt susceptible of improvement—every human contrivance is—and it will be improved with time and experience; but it is, as it stands, based on principles which underlie all valid schemes of the sort, that have been from time to time approved by men competent to form an opinion on the subject. We have succeeded in the Central Provinces, and we must be given some credit for knowing what we are about when we say that with ordinary care and attention the Land Records of North Bihar can be maintained up to date.

Attitude of Indigo Planters to the Bill considered.

72. At the Muzaffarpur Conference the scheme found a critic in Mr. T. M. Gibbon, C.I.E., whose advocacy of Chapter X of the Tenancy Act (concerning surveys and record of rights), when he was a member of the Legislative Council of the Governor-General, will have been noticed in paragraph 26 above. But Mr. Gibbon has not always been in opposition on this question. In 1878, in a communication to the Bihar Rent Law Committee, he advocated the maintenance of the record of rights in the following terms:—

"The patwari should be nominated by the district officers, be the servant of Government paid by the Government he should be, as originally intended, 'record-keeper,' and nothing but a record-keeper, entrusted with no executive powers. He should have nothing to do with the village collections, granting receipts, giving pattas and kabuliyats, &c., &c., the zamindar should be compelled to do all this through his own servants

"The patwari being the record-keeper, the zamindar should be compelled to hand him copies in duplicate of the past year's rent roll (*jamabandi*) and balance sheet (*wasil baki*), the current year's ticca land accounts (*arsatta*) and instalments paper (*bahi*), quarterly returns of all assessment papers (*khasras*), and also collections made (*siahas*), memoranda of lands relinquished by raiyats and new lands bandobusted (settled) with raiyats, with a list of pattas given and kabuliyats received.

"One copy should remain with the patwari, the other be signed by the patwari and returned to the landholder. The patwari should be a good accountant and know something of surveying, in case you think it necessary that all measurement of jotes should be made by the patwari. The raiyats should at all times have access to the patwari's papers and the patwari be bound to afford him all information as to the state of his account.

"Instead of each petty village of from one to two hundred rupees rent-roll having a patwari of its own, the district should be divided into circles with rent-rolls of not less than Rs 5,000, not more than Rs. 10,000. It should be optional with landholders to dispense with the present staff of men Half the amount of money now expended by zamindars on the present staffs paid into Government treasuries would be sufficient to secure the services of efficient men, and would be a saving to the zamindars, as it would enable them to get rid of the men who cannot afford to be honest on the small salaries they receive

All returns called for by district officers should represent the exact terms of the holdings, however ridiculous to them such terms may appear."

These were the proposals regarding the maintenance of a record of rights which Mr Gibbon advocated in 1878. He was not, I believe, against some sort of maintenance in 1892, but we are unfortunate in finding him in apparently an altered mind in 1893. The following extract from the Minutes of the Conference shows the grounds which Mr. Gibbon gives for his change of opinion, and the support my proposals borrow from his earlier views. I quote from Mr. Stevens' remarks in the Minutes of the Conferences:—

"He (Mr. Gibbon) replied * * that there was nothing in it (his letter to the Bihar Rent Law Committee) regarding which he had changed his views as to the conditions which then existed, but that circumstances have since become altered. When the letter was written there was no survey or immediate prospect of one. But the difference which this change has made seems to me to be at the most one of convenience rather than of principle. In other words, the suggestions then made were proper in themselves, though the survey now, in Mr Gibbon's opinion, makes it unnecessary that they should be carried out. You will notice that the following considerations underlie those suggestions:—

(1) It is right that Government should have at its disposal a local agency of contemporaneous record.

(2) That agency should have no connection with the collection of rents, but should be entirely at the service of Government, and should be nominated and paid by Government officers.

(3) It is reasonable that the zamindars should pay at least a share of the necessary expenditure direct into the Government treasury.

(4) It is possible to secure, consistently with due economy, the services of efficient men.

(5) The areas to be dealt with by these record-keepers should be re-adjusted, and the district divided into convenient and fairly uniform circles considerably larger than those of the existing patwaris usually are.

(6) The present staff of patwaris should be placed at the disposal of the zamindars, to keep or to dispense with at their option.

"These considerations, gentlemen, are, you will perceive, exactly those on which the scheme now before you is based, and the only question is whether the survey has superseded them. In the opinion of Government it has not done so."

73. Reading this extract with the memorial presented by the Indigo Planters at Muzaffarpur, it might be inferred that the attitude of the Planters' Association towards the survey and records of rights was somewhat of this kind. They desire to have the survey made, but do not want to have the record subsequently maintained; they want to have rent assessed summarily by the revenue officers and not by the judicial tribunals on "excess" areas which the survey may apparently bring out; they want to have patwaris abolished, without any substitute being supplied in their places, and the last potentiality of Government control over village agrarian economy thus wiped out; and lastly they want to have a summary method for recovering arrears of rent. In my reply to the memorial* presented to me at Muzaffarpur by the Indigo Planters' Association, I endeavoured to show what these claims really signify, and I am now loath to believe that the Bihar Indigo Planters do mean all this. I prefer to think that they wish as earnestly as I do that there should be impartiality and fair dealing throughout this business. They wish for the survey and record of rights; so do I. But I wish further to have the record maintained, so that we may escape the errors of the past and secure in future protection and certainty for all concerned where there is now none. The Planters agree, as I understand, to the theory, but fear corruption, interference or harassment in practice. I have dealt with this objection in paragraph 71 above, and here I would only add, cannot the Planters' Association bring itself to let us try? If it agrees with us on all other points, why should it break away from us on this question of maintaining the record up to date? I can understand the opposition of the zamindars who object to the survey and every consequence of it. But I am unable to understand the attitude of the Indigo Planters, who profess good-will to the raiyats, are eager that the Record should be made, but oppose its maintenance up to date,—the only good the raiyat can get out of the whole business I can only indulge in the hope that further reflection will bring the Indigo Planters' Association round to see that on the ground of expediency as well as of justice, the maintenance of the record up to date is conducive to their own best interests, and as essential for the protection of the raiyat as it is for the more speedy recovery of arrears of rents through the Civil Courts.

* See Enclosure II.

73A. I caused the preceding paragraphs to be communicated to Mr. Macnaghten, Secretary to the Indigo Planters' Association, who happened to be in Darjeeling, and I have his permission to quote from his reply as

"Indigo planters of Bihar as a body approve of the survey and record of rights, but they hold that a very much larger proportion, if not the whole, of the costs should be borne by Government.

"They believe that the proposed method of keeping up the record is a fair one, but they recognise more than any Government servant can do, the wide opportunities for bribery and corruption that will be open to subordinate officials. They do not think that a record will be kept up with any degree of accuracy, and they have reason for believing that such record is not kept in the North-West Provinces.

"Many planters think that the officers appointed for a circle, a subdivision, or whatever it may be called, should be of superior grade, a European if possible, and of the Survey Department; that the area of each circle should be such that the officer in charge would complete it in the ordinary course in three years. He may, if necessary, have to visit some villages oftener in the interval.

"Objection is not taken to the Government cess. If the record is to be kept up it must be paid for; but planters do most strongly urge on Government the absolute necessity of curtailing, so far as possible, the opportunities for the exaction of illegal cesses, the extortion, bribery, and corruption which will inevitably follow the introduction of the record, and which will, in the opinion of many, more than do away with any good that should otherwise accrue.

"It is by spreading the Government employés over as large an area as is consistent with efficiency, and widening the intervals between their visits, that this may be most easily effected."

73B. The preceding extract went far to justify my belief that in point of principle there is no substantial difference between the Indigo Planters' Association and ourselves in connection with the cadastral survey and the maintenance of the record, and that, whatever differences do exist, touch matters of detail which are susceptible of adjustment. I have since communicated these proposals to Sir William Hudson, President of the Indigo Planters' Association, who now authorizes me to to say that while endorsing Mr. Macnaghten's remarks, he accepts my scheme for maintaining the record, subject to the condition that an European officer of the Survey Department with the powers of a Deputy Collector (*i.e.* of a revenue officer) be appointed to supervise the working of the scheme in each district.

Compliance with Sir William Hudson's condition is consistent with my scheme; and it is in itself desirable that expert survey officers who have had experience in making the record should be employed in maintaining it. It may therefore be, I think, assumed that we shall be able to satisfy the Planters' Association, and that they will not persist in their opposition to the maintenance of the record. In matters of detail I need hardly add we shall be forward to meet all reasonable wishes.

74. There is one clause of the Bill—clause 12—on which I am particularly anxious to say a few words. The Memorialists are very pressing in their representations that the costs of the Cadastral Survey and Record of Rights will be a heavy burden on the landlords and tenants. I have shown in paragraph 61 above that there is extreme exaggeration in this complaint, but I admit that the work cannot be done for nothing, and I am anxious to adapt the method of recovering the cost to the convenience of all concerned. The method of recovering the cost of a Cadastral Survey and Record of Rights prescribed in section 114 of the Tenancy Act has been found by practice to be in some cases defective. It is suitable in the case of small estates; it is less suitable when large areas are concerned. In the latter cases it involves very intricate calculations, especially where subinfeudation has gone to any considerable length: it must cause some, though transitory, inconvenience to the poorer classes of people by making the debt payable in a single instalment; and by necessitating the employment of a collecting agency of tahsildars, peons, &c., it not only adds something in the shape of fees to the original burden, but opens the door to the irregularities which the memorialists connect with the employment of low-paid and ill-supervised agency. To the preceding objections against the existing arrangements from the landlords' and raiyats' side might be added the additional objection from the side of the Government (which advances the cost of the operations), that when the expenses are divided among and have to be collected from several millions of people, there is risk of short collections, unauthorised exactions on the part of process servers or collecting peons, and the certainty of intricate accounts and protracted proceedings. All these conditions point to the desirability of devising some means whereby the costs of the Cadastral Survey and Record of Rights may be recovered in such instalments as will not be felt by any party, and under such conditions that there will be no addition to the original apportionment, and no opportunity for exactions on the part of a collecting agency. By the plan proposed in clause 12 of the Bill, those requirements will, I think, be met, and if the clause becomes law, I should propose to spread the recovery over so many years, that in any one year the raiyat or landlord would not have to pay more than one anna per annum per acre of the holding or estate.

Costs of survey and recovery thereof.

To prevent such a transitory cess being continued in permanence, it would be specially mentioned in the "*parcha*" or extract from the record given at attestation time to each raiyat that the additional anna would only be payable for the number of years which might be fixed as the period over which recoveries might be spread.

This proposal ought, I think, to obviate the objections raised to the Cadastral Survey on account of the cost and hardship to raiyats and zamindars which the collection of the expenses would, it is alleged, entail, while it is

desirable on its merits. The procedure I now propose would be an alternative to that provided in section 114 of the Tenancy Act.

Summary of conclusions.

75. With those remarks I bring this Minute to a conclusion, hoping that I have shown—

(1) that in these Provinces raiyats were from the earliest times entitled to have a record of their rights in their holdings prepared at the landlords' expense;

(2) that it was the duty and intention of the Government from the earliest times to establish a record of rights;

(3) that the raiyats of Bihar have grievously suffered from the non-fulfilment of that duty and intention;

(4) that the rentals of Bihar landlords have within three generations increased to an amazing extent (the figures show eighty fold), and out of all proportion to what was contemplated at the time of the Permanent Settlement, or to what was justifiable by any subsequent legislation;

(5) that this increase in rent and the destruction of raiyats' rights which it entailed have reduced the raiyats of Bihar to an extreme state of poverty and depression;

(6) that illegal enhancements of rent are still going on, and that the same abuses exist now in Bihar, and the same necessity for a record of rights, as before the Tenancy Act was passed;

(7) that without a Cadastral survey and record of rights maintained up to date, these abuses cannot in Bihar be adequately and permanently checked;

(8) that a Cadastral survey and record of right, wherever undertaken, have proved an immediate remedy for such abuses as exist now in North Bihar, and that they have, far from stirring up litigation and strife, produced peace and good-will between landlord and tenant;

(9) that our proposals to create a Land record agency are justified alike by law, expediency, and moderation; that the cess proposed, *one-quarter anna (or one farthing) per rupee of rent*, is not only moderate in itself, but must be regarded, not as fresh taxation, but as a great alleviation of a legal obligation which now rests upon zamindars; that the *annual* incidence of this cess on the *land* will not exceed one anna (one penny) *per acre*, payable half by the landlord and half by the tenant; and that for such an insignificant charge the landlord will be able to recover arrears of rent though the Civil Court more speedily than at present, while the raiyat will secure protection against illegal demands and arbitrary eviction;

(10) that it is not incumbent on the Government to make, at the expense of the general tax-payer, any large contribution to the expenses of operations rendered necessary by the laches of landlords, whose income from the land has, largely through extra-legal means, increased enormously in three generations, and who now contribute far less to the public Exchequer than landlords similarly circumstanced in any other part of these Provinces or perhaps of the Empire;

(11) that the Memorial of the Zamindari Associations submitted to me for transmission to the Secretary of State is inaccurate on all material points.

The draft of this Minute has been considered by the Board of Revenue, and I am glad to be able to append to it the opinion of both Members of the Board, endorsing and accepting it. I would especially invite attention to Mr. Stevens' interesting and valuable note.

A. P. MacDONNELL,

Offg. Lieutenant-Governor.

The 20th September 1893.

APPENDIX A.

Note by the HON'BLE C. C. STEVENS, *Senior Member of the Board of Revenue, on His Honour the Officiating Lieutenant-Governor's Minute, dated* 20*th September* 1893.

[Referred to in paragraph 75 of the Minute.]

1. I have read this Minute carefully, and have no hesitation in expressing my complete concurrence with both the statements of fact and the arguments which it contains. Both are dealt with so fully that very little besides acquiescence is left for any other writer.

2. Too much prominence cannot be given in the refutation of the wholly groundless assertion that the survey and record of rights in North Bihar constitute a violation of the Permanent Settlement. For the nature of the English people is to abhor a breach of faith, and the assertion, by persons who profess to be well informed, that an offence so repugnant to the national character has been committed, will always command attention. This charge has been persistently pressed against the Tenancy Act, and is now being urged against these proceedings, which have for their purpose the enforcement of the provisions of that Act, defining and maintaining the rights of the raiyats. And, just as the light thrown on the project of law by the discussions in and out of the Legislative Council dissipated the baseless accusations brought against the legislation as a whole, so it is well that the futility of these same accusations should be exposed, now that they are revived and directed against its practical application.

3. The position of the zamindars before the introduction of the English rule may readily be understood from the following facts:—

(1) All the settlements, from that of Todar Mull downwards, dealt primarily with the individual raiyat, and fixed by an Act of State the payments to be made by him.

(2) The profits of the zamindar were derived, partly from lands granted to him on account of official services, and partly from a definite share or a commission upon the revenue collect d from the raiyats.

(3) The commission received by the zamindar was very small, not exceeding 5 per cent. of the gross produce of the soil.

(4) That the zamindar was an official rather than a proprietor may be inferred from his responsibility for the police, for the administration of justice, for the collection of transit duties, for the preservation of roads and bridges, and (when occasion required) for military service.

(5) The zamindars were liable to dismissal.

(6) Zamindars were appointed and hereditary successors received sunnuds. These were asked for by petition, and granted on conditions including promises to conciliate and protect the raiyats, to pay in the rents after receiving credit for their own allowances, to refrain from prohibited exactions, and to deliver the official village accounts.

(7) Incompetent zamindars were excluded.

(8) Zamindaris were not transferred as of right without the sanction of the State.

(9) Kanungos and patwaris were appointed to declare the law, to keep the village accounts for the protection of the raiyats, and generally to check the zamindars.

4. In 1769, shortly after its succession to the Dewani, the East India Company appointed supervisors to enquire into the condition of the lands and the revenues in addition to other duties. The following passages from the orders appointing these officers are instructive—

"A third and equally important object of your attention under this head is to fix the amount of what the zamindar receives from the raiyats as his income or emolument, wherein

they greatly exceed the bounds of moderation, taking advantage of the personal attachment of their people and of the inefficiency of the present restrictions upon them. When the sum of the produce of the land and of each demand on the tenant in thus ascertained with certainty, the proportion of what remains to him for the support of his family and encouragement of his industry will clearly appear, and lead us to the reality of his condition.

"Among the chief efforts which are hoped for from your residence in that province, and which ought to employ and never wander from your attention, are to convince the raiyat that you will stand between him and the hand of oppression; that you will be his refuge and the redresser of his wrongs; that the calamities he has already suffered have sprung from an intermediate cause, and were neither known nor permitted by us; that honest and direct applications to you will never fail producing speedy and equitable decisions; that, after supplying the legal due of Government, he may be secured in the enjoyment of the remainder, and finally teach him a veneration and affection for the humane maxims of our Government."

A third passage directs that—

"The raiyat should be impressed in the most forcible and convincing manner . . . . that our object is not increase of rents or accumulation of demands, but solely by fixing such as are legal, explaining and abolishing such as are fraudulent and unauthorized, not only to redress his present grievances, but to secure him from all further invasions of his property."

Seven years later a Committee was appointed by the Governor-General (Warren Hastings) to enquire in detail into the value of the land. It was suggested as an object, among others, of the enquiry—

"to secure to the raiyats the perpetual and undisturbed possession of their lands, and to guard them against arbitrary exactions. This is not to be done by proclamations and edicts, nor by indulgences to the zamindars and farmers; the former will not be obeyed unless enforced by regulations so framed as to produce their own effect, without requiring the hand of Government to interpose its support; and the latter, though it may feed the luxury of the zamindars or the rapacity of the farmers, will prove no relief to the cultivator, whose welfare ought to be the immediate and primary care of Government. . . . . It is the interest of the zamindar to exact the greatest rent he can from the raiyats; *and it is as much against his interest to fix the deeds by which the raiyats hold their lands and pay their rents to certain bounds and defences against his own authority. The foundation of such a work must be laid Government itself.*"

Sir Philip Francis, in the course of these discussions, though opposing the Governor-General generally, confessed that—

"the idea of guarding the raiyats against arbitrary exaction is just and attainable."

Mr. Barwell said—

"I deem it to be the first object of this Government to fence and secure the raiyats against the arbitrary power of the zamindars; otherwise, no one regulation we may resolve on can, in its immediate or remote consequences, answer the beneficient design for which it was formed......I acknowledge the task is extremely difficult and arduous; *but unless the rights of the common people are well defined and well secured, I am persuaded that all our speculations will only tend to enrich the zamindars.*

5. Thus we see that in the times preceding the British rule, the raiyat was the person with whom the State had to deal, the zamindar was the agent of the State, and officers were appointed for the purpose of keeping the raiyats' accounts and of serving as checks upon the zamindars. The necessity for defining and securing the rights of the raiyats was recognized and forcibly expounded by the British rulers in the earliest days of their accession to power; and it was even then clearly seen that such a definition and maintenance of the raiyats' rights was not a work in which the zamindars could be expected to co-operate, but that its foundation must be laid by Government itself.

6. I can find no evidence whatever that in the 24 years which elapsed between the accession to the Dewany and the Permanent Settlement, there was any change, either in England or in India, of sentiment on this question. On the contrary, the Statute 24, Geo. III, cap. 25, was interpreted by the Court of Directors in their letter of the 12th April 1786, as intending to declare general principles for the regulation of the conduct of Government to the natives—

"Not to introduce any novel system or to destroy those rules and maxims which prevailed in the well-regulated periods of the native princes, an adherence to which must be most satisfactory to the natives, and most conducive to the safety of our dominion."

In the discussions which ensued in India, the protection of the raiyats was the first consideration with the disputants on both sides—

"We know from experience" (says Mr. Shore in his Minute of the 18th September 1789) "what the zamindars are; and I am not inclined, in opposition to that experience, to suppose that they will at once assume new principles of action, and become economical landlords and prudent trustees of the public interests. The necessity of some interposition between the zamindars and their tenants is absolute; and Government interferes by establishing regulations for the conduct of the zamindars, which they are to execute, and by delegating authority to the Collectors to enforce their execution. If the assessment of the zamindaries were unalterably fixed, and the proprietors were left to make their own arrangements with the raiyats, without any restrictions, injunctions or limitations, which, indeed, is a result of the fundamental principle, the present confusion would never be adjusted."

The necessity for imposing these restrictions, injunctions and limitations is thus used as an argument against the hasty conclusion of the Permanent Settlement. But the Governor-General, in his reply, maintained most vigorously that the prevention of arbitrary and unjust conduct on the part of the zamindars was in no way inconsistent with the contemplated measure—

"To permit him (the zamindar) to dispossess one cultivator for the sole purpose of giving the land to another, would be vesting him with a power to commit a wanton act of oppression from which he could derive no benefit . . . The rents of an estate can only be raised by inducing the raiyats to cultivate more valuable articles of produce, and to clear the extensive tracts of waste land which are to be found in almost every zamindari in Bengal."

7. In his Minute dated 18th September 1789, Lord Cornwallis writes—

"I understand the word permanency to extend to the jama only, and not to the details of the settlement; for many regulations will certainly be hereafter necessary for the further security of the raiyats in particular, and even of those talukdars who, to my concern, must still remain in some degree of dependence on the zamindars; but these can only be made by Government as abuses occur, and I will venture to assert that either now or ten years hence, or at any given period, it is impossible for human wisdom and foresight to form any p'an that will not require such attention and regulation. I cannot, however, admit that such regulations can in any degree affect the rights which it is now proposed to confirm to the zamindar, for I never will allow that in any country Government can be said to invade the rights of his subject, when they only require for the benefit of the State that he shall accept of a reasonable equivalent for the surrender of a real or supposed right which in his hands is detrimental to the general interest of the public, or when they prevent his committing cruel oppressions upon his neighbours or upon his own dependents."

8. The views of the Court of Directors may be ascertained from the following extracts from their letter dated the 19th September 1792:—

"We therefore wish to have it distinctly understood that while we confirm to the landholders the possession of the district which they how hold and subject only to the rent now settled, and while we disclaim any interference with respect to the situation of the raiyats, or the sums paid by them, *with any view to any addition of revenue to ourselves*, we expressly reserve the right which clearly belongs to us as sovereigns of interposing our authority in making from time to time all such regulations as may be necessary to prevent the raiyats being improperly disturbed in their possessions, or loaded with unwarrantable exactions. A power exercised for the purposes we have mentioned, and which has no view to our own interests except as they are connected with the general industry and prosperity of the country, can be no object of jealousy to the landholders, and instead of diminishing, will ultimately enhance the value of their proprietory rights."

Again—

"Our interposition, when it is necessary, seems also to be clearly consistent with the practice of the Moghul Government under which it appeared to be a general maxim that the immediate cultivator of the soil, [illegible]uly paying his rent, should not be dispossessed of the land he occupied. *This necessarily s[illegible]poses that there were some measures and limits by which the rent could be defined, and that it [illegible] not left to the arbitrary determination of the zamindar, for otherwise such a rule would be nu[illegible]ory*; and point of fact, the original amount seems to have been annually ascertained and [illegible]xed by the act of the sovereign."

9. Such being the plainl[illegible] expressed opinions and intentions of those who framed, and directed the [illegible]actment of, the regulations constituting the Permanent Settlement, ther[illegible] can be little difficulty as to the true meaning of the right of interference [illegible]ved in section 8 of Regulation I of 1793—

"It being the duty of the [illegible]ing power to protect all classes of people, and more particularly those who from situati[illegible] are most helpless, the Governor-General in Council will, whenever he may deem it prop[illegible] enact such regulations as he may think necessary for

the protection of the dependent talukdars, raiyats, and other cultivators of the soil; and no zamindar, independent talukdar, or other actual proprietor of land, shall be entitled on this account to make any objection to the discharge of the fixed assessment which they have respectively agreed to pay."

10. It ought never to be forgotten that the Permanent Settlement was a transanction between the Government and the zamindars, to which the raiyats were not parties, and that whatever rights and privileges were bestowed on the zamindars were carved out of those belonging to the State, and not out of those belonging to the cultivators. The zamindar was never intended to be, and never was, the absolute proprietor of the soil. Yet there is no doubt that the use of the word "proprietor" and of others gave rise in early times to misunderstanding on the part of persons unfamiliar with the history of the zamindari tenure in Bengal. And precisely this ignorance is the great hope of the agitators in England at the present day. "The use of these terms" (say the Court of Directors in their Revenue letter to Bengal, dated 15th January 1819)—

"which has ever since continued current, has in practice contributed with other causes, to perplex the subject of landed tenures, and thereby to impair, and in many cases to destroy, the rights of individuals; yet it is clear that the rights which were actually recognised to exist in that class by the enactments of the Permanent Settlement were not intended to trench upon the rights which were possessed by the raiyats."

And further on they say—

"It is also a circumstance which is not to be overlooked, that although so many years have elapsed since the conclusion of that settlement, yet no resort has been had to the exercise of the power we then expressly reserved, of interfering for the purpose of defining and adjusting the rights of the raiyats."

10A. The truth is that it is not the zamindars, but the raiyats, who have just cause to complain of us They may righteously say—

"Before the British rule our dealings were with the State, whose officers the zamindars were; our right to hold our lands without disturbance, so long as we paid the established rent, was acknowledged; exactions beyond this were forbidden; kanungos and patwaris were appointed by the State to keep our accounts and to protect our rights against the zamindars; when the British took the Dewany it was thoroughly understood that we were entitled to these privileges and to the protection of the State; your own Governor-General saw that the obvious interest of the zamindars is to exact the most he can from us, that it is against his interest to accept any limits to his authority, and that to establish such limits is the work of Government. When the Permanent Settlement was being arranged, it was understood that our rents were to be paid according to fixed rates, and the zamindars' profits were to be derived only from inducing us to grow more valuable crops, and from the settlement of waste lands. At the Permanent Settlement made 'with a view to promote the future ease and happiness of the people,' the Government reserved to itself the fullest power to interfere for our protection. Now what have you done? How have you fulfilled your acknowledged obligations? In 1799, thinking your own revenues in danger, you handed us over to the zamindars practically without reserve, that they might realize their rents by summary measures of the severest kind. In 1812, to remove the 'considerable abuses and oppressions' which you had enabled the zamindars to practice, you empowered them to distrain our property. Up to 1817 you had admittedly neglected to afford us any of the promised protection. You made a feeble effort to revive and strengthen the kanungo and patwari for our benefit; but the kanungo has vanished, and the patwari has become the servant of the zamindar, on whom he was intended to be a check. Your sale laws and laws for partition of estates have brought us nothing but mischief. In 1859 you passed a Rent Law which in Bihar was inoperative, except as authorising distraint and enhancement against us. In 1885 you passed Tenancy Act, which was intended to limit the mischief caused by your previous negligence. But up till now what have you done to secure to us the benefits of that law? Have you educated us to a knowledge of our rights? Have you defined those rights? Have you recorded them, so that, surrendering as lost for ever all that of which we have been deprived, we may maintain the residue safe against future encroachments?"

And to this complaint it would be difficult to give any satisfactory reply; the institution of the survey and record of rights now going on in Bihar can only be regarded as a tardy realization by the Government of the obligations which in theory it has always recognized. It is not the zamindar, but the raiyat, who has had reason to complain of disregard of the Permanent Settlement.

11. The importance of the subject must be my apology for writing at such length on the origin of the general question, and I feel that after all I have added little, and perhaps need have added nothing, to the exposition contained in the Minute.

12. It appears to me that paragraphs 24 to 26 of the Minute effectually dispose of the zamindars' contentions that the survey of Bihar has taken them by surprise, and that a district is not such a "local area" that the Government is justified by the Act in surveying it. As for the latter point, it has always been a matter of surprise to me that the zamindars, holding the views which they profess, should not at the outset have protested against the Act itself. But allowing that they have permitted the opportunity to pass, it is strange that, if they believed the action of Government to be illegal, they should not have taken the advice of counsel. The adverse opinions of a few eminent lawyers would have doubtless induced the Government to pause in its undertaking. Or the institution of a test suit would have procured a judicial decision long ago. That these obvious measures have not been taken leads to the interference that the advisers of the zamindars have more hope from popular agitation then from law and facts. And this is confirmed, now that the Advocate-General has given an unequivocal opinion in support of the wider interpretation of the law, which has commended itself to all the responsible authorities.

13. I can think of nothing either to modify, or to explain or illustrate, in that large part of the Minute which deals with the necessity of the survey and record of rights in Bihar up to the passing of the Tenancy Act.

In reference to paragraph 40, in which it is shown that the remedies supplied by the Act are of two kinds—the legislative and the executive—I would invite attention to a passage which I have already quoted from Warren Hastings, to the effect that the "perpetual and undisturbed possession of their lands" is not to be secured for raiyats by "proclamations and edicts" unless "enforced by regulations so framed as to produce their own effect, without requiring the hand of Government to interpose its support." This is a prophecy which has been exactly fulfilled. A right known by all concerned to exist is more than half secured, and in Bihar the great difficulty has been, and still is, that the people know to little of their rights. The Board are now frequently receiving applications from landlords or tenants in other parts of the province for survey and record of rights; and it is argued that it would be wiser to take up only cases in which interference is thus applied for. But the obvious answer is that, where both parties are fully aware that the law is available, the objects of the law are in some measure attained, even without direct recourse to it. But, where one party knows the law and takes advantage of it, while the other is ignorant, the case is quite different. Here "the foundation of such a work" (as Warren Hastings said) "must be laid by Government

14. In paragraph 45 of the Minute His Honour the Officiating Lieutenant-Governor mentions a case which has come to light in the course of the proceedings now in progress in Bihar, in which the raiyats have been induced by an unscrupulous agent to swear to the authenticity of certain forged receipts to their own detriment. I may mention another instance of a different kind, which has still more recently come to my notice. It is that of a document which has been impounded by a registrar, and has been brought before the Board for adjudication of the proper stamp duty, but deserves consideration on account of the nature of its conditions. The following is a translation of extracts from the body of it:—

"That I am jeyt raiyat and cultivator in the said   bearing tauzi No.   in the proprietary right of   and for the above reason the collection of rent from tenants of the said mauza is entrusted to me.

II. That I being the jeyt raiyat have no power of making any settlement, &c., without a written order from the   or some one appointed in his behalf, with the exception of collecting rents from the tenants, and if I do so it will be null and void.

III. I, the jeyt raiyat, will not allow any one to excavate a tank or well in the culturable or fallow land, situated within the aforesaid mauza, belonging to the raiyats or *sir*; nor will I do so myself. I will not plant bamboos and groves, nor will allow any raiyat to do so, and nor will I erect houses myself or allow others to do so. In case tanks and wells are dug or gardens and bamboo groves are planted or houses are built, the tanks and wells will be liable to be filled up and the gardens and bamboo groves will be liable to be dug up and the houses will be liable to be demolished. If any raiyat without the sanction of the Maharaja Bahadur or his amlas and mukhtars aforesaid (tries) to excavate tanks, dig wells, plant gardens and bamboos and erect houses forcibly, I will not allow him to excavate, plant and

build. In the event of failure to carry out these actions (orders) I will be held responsible for them and will have to make up the loss which will accrue to the Raj and shall pay it (loss) out of my own person and property to the aforesaid malik.

* * * * * * * *

V. That I shall collect rent according to the prevailing rates of the village and remit the same to the Tahsil Amla, instalment by instalment, receiving my annual commission of Rs. 17, *commencing from* 1290 *Fasli*, which will be set off against my rent, and that I shall discharge the duties of jeyt raiyat faithfully.

* * * * * * *

VII. I, the jeyt raiyat, will pay the rent my jote lands which are in my possession up to the present time and the details of the rates of which are given below, with effect from the beginning of 1290 according to the *Bhawli*, rate detailed below, and another (*sic.*, in original) and the fixed rates of the villages, year after year, kist after kist, without objection. I will take receipts and *Farighkhati* (written acquittance), (for payments). If I fail to pay in due instalment, I shall be liable to pay *khelāfi* (interest on arrears) as is customary in the village. In the event of my non-payment and repeated default (of the payment) of instalment, the * * * and his heirs and representatives and amlas and mukhtears will be at liberty to take such steps for the realization of the amount, as they may deem proper. I, the jeyt raiyat, will not have any right of any objection to their claims.

* * * * * * * *

A list of rates of rents is attached.

15. The points to be particularly noticed are these. The conditions of the third clause are in direct violation of sections 76-79 and 82-83 of the Tenancy Act, although section 178 of that Act lays down that nothing in any contract between a landlord and a tenant shall take away or limit the right of a tenant, as provided by the Act, to make improvements and claim compensation for them. It is further to be observed that the rents are fixed with *ten years' retrospective effect*. What the exact object of this last stipulation is cannot be ascertained from the document itself, but it can scarcely be consistent with the interests of the raiyat. This document comes from a very large estate in North Bihar, and the reason why the stamp question is brought before the Board is that many such contracts have been executed.

16. It is perhaps unnecessary for me to say that I entirely concur in the reply given by paragraph 62 *et seq.* to the argument that to compel the zamindars to pay for the maintenance of the record is a breach of the Permanent Settlement. The argument is otherwise of a very hollow kind since it appears only too certain that, unless very stringent precautions are taken, the raiyat will ultimately pay all and the zamindar nothing. I do not feel quite sure that the maintenance of the records will cost so little as an anna per acre, but the rough calculations which have been made show little more than that amount. I have little hope that the raiyat's share will be but half this; but I have no hesitation in expressing my belief that it would be to his interest to pay the whole expense if only his tenancy and the rights and conditions attached to it are recorded.

C. C. STEVENS.

The 16*th September* 1893.

Postscript.—Since the above was written I have had the advantage of seeing Mr. Lyall's note, and I now desire to add a few words which it has suggested to me.

2. I differ from Mr. Lyall in the opinion that the opposition to the survey and record of rights has been increased by the precipitation with which the work was begun. It appears to me that the opposition was lessened by the belief prevalent (to some extent wrongly) among the zamindars, (1) that, where they chose, their own patwaris would be used to do the work; (2) that the patwaris as Government servants would be abolished without the substitution of any other machinery; (3) that a summary procedure for the realization of rents would be given them; (4) that there would be considerable enhancement of rents; (5) that, to facilitate this enhancement, there was at least a chance that the former zamindars' measurements might be accepted as a basis. They have now been disabused by the later proceedings, and have seen that they are not likely to gain some of these expected advantages; the result is that the opposition has, for the time, gained something in strength,

But, on the whole, it appears to me by no means greater than might have been anticipated. From the earliest times it has been thoroughly understood that the interests of the raiyats and those of the zamindars, as understood by the zamindars, are antagonistic; and it would have been unreasonable to suppose that a measure, primarily intended to define and defend the rights of the tenants against the landlord, was likely to pass unopposed by the party whom it was meant to restrain. The opposition in this country is strengthened by the belief which is to some extent current, that, after Bihar has been dealt with, the turn of Bengal will come. I do not think that the Government can very well disclaim such an intention, though it is conceivable that wholesale proceedings may not be regarded as necessary. In what has reached me of the opposition in England, I can trace little knowledge of the subject from original sources, but much repetition of information more or less inaccurate, and argument more or less unsound, which have been furnished from India. It is to be hoped that when the real facts and the correct law are better known, the British virtue of candour will re-assert itself.

3. I am sorry to find that Mr. Lyall is still in favour of a summary system of enforcing the payment of rents. There was far greater excuse for such measures in 1799 and 1812, when the Government revenue was in a very high—probably an excessive—ratio to the assets; and if under such conditions the revenue was to be punctually paid, extreme punctuality must in time be exacted from the raiyats. Now even our most recent settlements of revenue are by far more liberal; and the ratio of assets to revenue elsewhere, as the Officiating Lieutenant-Governor has shown, has increased enormously.

The advocates of a summary system appear to be searches for a scheme, rather than supporters of one already thought out. Those who have given up the attempt to square this circle have done so on the broad ground that they can consent to no plan which would be based on misplacing the burden of proof on the raiyats' shoulders. They hold that, when a private person wishes to make use of the machinery of the State to collect debts, whether they are his rents, or whatever they may be, he must be compelled to make a statement of his claim. And this he must authenticate with some solemnity, being subject to a severe penalty for fraud. Such a claim having been made, it is manifest that it would be unjust to proceed at once to seize the property or person of the alleged debtor, without giving him an opportunity of stating his own case. It is easy to imagine to what oppressive uses such a power could be put; and if it could, there are certainly cases in which it would. Notice then must be given to the debtor. He comes forward and contests or admits the claim, and an order is given. Suppose he does not appear, it then becomes necessary to proceed further; but equity requires that, if he presents himself before the court, explains his absence, and proves the injustice of the order, that order must be rescinded. But this is the procedure of a regular suit, and can no more be abbreviated than a proposition of Euclid.

4. I am, however, decidedly in favour of giving the zamindars such assistance as can legitimately be given in realizing their rents. The most important step in this direction is to make a survey and record of rights and to maintain the latter up to date. This being done, the existence and conditions of the tenancy are beyond dispute, and except in special cases the only question will be that of payment; therefore, though the form of procedure remains unchanged, the practical facility of proof will remain much increased. Then arrangements may be made executively to provide for a sufficient staff of officers to try rent suits; perhaps some of these might be peripatetic, if such a course should be convenient. When decrees have been obtained, excessive indulgence should not be shown in execution to judgment-debtors who have defaulted without reasonable cause. Perhaps stamp duties might be reduced. But, however this might be, when the results of the survey and record of rights have once been secured, anything more that can be done for the zamindars will be in the way of executive orders rather than of shortening the judicial procedure.

C. C. STEVENS.

The 18th September 1893.

APPENDIX B.

Note by the HON'BLE D. R. LYALL, C.S.I., *Member of the Board of Revenue, on the Officiating Lieutenant-Governor's Minute, dated 20th September* 1893.

[Referred to in paragraph 75 of the Minute.]

I AM at one with His Honour the Officiating Lieutenant-Governor in nearly every point of his Minute II, and agree in all the vital points. But to avoid any appearance of inconsistency—as I was, and still am, opposed to some parts of the Tenancy Act, particularly as applied to East Bengal—I think it well to record my views on the Minute at more length, instead of noting a simple concurrence.

2. I look on the settlement chapter of the Tenancy Act as quite the most valuable part of the Act, and I hold it was necessary to work it in North Bihar.

At the same time I should oppose it being worked in the same wholesale way, *i.e.*, by districts or divisions, in a very large part of Lower Bengal, because such a settlement is not needed there, the raiyats being the stronger party and not requiring to have their rights safeguarded.

3. I think that much of the opposition in Bihar is due to the work having been begun too precipitately, but I fully recognise that the work was a necessary one.

4. Coming to details, I strongly endorse what His Honour says in paragraph 15 regarding the Permanent Settlement terms being very severe on the zamindars. The cause of this is explained in paragraph 9. Estates had been let out to ijaradars over the heads of the zamindars, provided they paid higher rates, and these rates were very generally adopted as the basis of the Permanant Settlement.

While Collector of Dacca I made detailed enquiries into this point, and the percentage of estates which passed out of the hands of the original zamindars in the first 20 or 25 years after the Permanent Settlement was enormous. In fact comparatively few representatives of the original zamindars were found to still hold estates. We now allow 10 per cent. for cost of collection alone. In the Permanent Settlement 10 per cent. was nominally allowed to recover cost of collection and profit of the zamindar, and, as above stated, the percentage really fell short of this figure. Now 25 per cent. is given to outsiders and 30 to zamindars, of which 10 per cent. is for cost of collection and 15 to 20 per cent. for profits.

5. I am still of opinion that where there has been a survey and settlement, and where the record is kept up, zamindars should have a summary procedure for the realization of rents admittedly due (paragraph 16 of the Minute). I would not re-enact Regulation VII of 1799, but even that law would have worked very differently had there been a record of rights.

6. I support the views of the Officiating Lieutenant-Governor in paragraph 38. During the short time I was in Bihar, I had to deal with a year of scarcity, and looking at the reports of 1888, I expected that relief works would be wanted in the early part of the cold weather. This was not the case, and the people of Darbhanga held out nearly three months longer than they would have done had the reports of 1888 been correct.

In Gaya, where the harvest was exceedingly bad, and which Mr. Grierson has recently depicted as a district normally deficient in its food-supply, no relief at all was necessary, and there was no importation of grain.

7. I have no doubt whatever that local area may be held to include a district or even a division. The phrase was intentionally inserted to include large as well as small areas; and apart altogether from the dictionary meaning of the word, the discussion in Council shows that large as well as small areas were included.

8. I have also no doubt of the legal right of Government to pass such an Act as that proposed, but it should apply in the first place only to Bihar, and I doubt if it will ever be wanted in East Bengal. It would be equally legal there, but as the conditions are so widely different from those of Bihar, it is not wanted there, and it would be impolitic to introduce it.

D. R. LYALL,

Member, Board of Revenue, L.P.

The 18*th September* 1893.

APPENDIX C.

(1) *The Land Records Maintenance Bill, with Statement of Objects and Reasons.*

(2) *Draft Rules under the above Bill.*

(1)

A

BILL

TO

Provide for the maintenance of Land Records in the Lower Provinces of Bengal.

Preamble.

WHEREAS it is expedient to provide for the maintenance of survey maps and of records of rights and of settlement records and to repeal the law relating to kanungoes and patwaris in Bengal, it is hereby enacted as follows:—

Short title.

1. This Act may be called "The Land Records Maintenance Act, 1893."

Extent.

It shall come into force only in districts or parts of districts *in which a survey and a record of rights has been made under Chapter X of the Tenancy Act*, or under any other law for the time being in force, to which the Lieutenant-Governor may from time to time extend it by an order published in the *Calcutta Gazette*;

Commencement.

and thereupon this Act shall commence and take effect in the districts or parts of districts named in such order, on the day which shall be in such order provided for the commencement thereof.

Enactments repealed.

2. On the commencement of this Act in any district or part of a district, the enactments specified in Schedule A shall be repealed to the extent mentioned in the third column thereof.

Power to form and alter circles of villages.

3. The Collector of the district, with the previous sanction of the Board of Revenue, may for the purposes of this Act combine the villages in the district of which he is Collector into circles and may fix the number of circles in the district or part of the district to which this Act may be extended, and the respective limits of such circles, and may, with the like sanction, from time to time alter the number and limits so fixed. Section 23 of India Act XIX of 1873.

Appointment of a sub-kanungo to each circle.

4. For each such circle the Collector shall appoint a keeper of the land records of the circle, who may be styled Land Records Keeper or by such other name as the Board of Revenue, having regard to local custom, may designate.

Levy of a cess for payment of land record-keepers' salaries and charges incurred for efficient maintenance of records.

5. From and after the commencement of this Act all immoveable property situated within the districts or parts of districts in which this Act may from time to time be in force, shall be liable to the payment of a cess (hereinafter called "The Land Records Cess") to be applied for the purpose of defraying the salaries of the keepers of the land records appointed in such district, and any charges incurred on account of the correct Section 2 of Bengal Act II of 1877.

and efficient maintenance and supervision of the records, and it shall not be lawful, save under the provisions of this Act, to levy, or continue to levy within such districts, or parts of such districts, any cess, whether under the name of patwari *neg* or other designation, and whether credited separately in the zamindars' accounts or consolidated with the rent, for the purpose of keeping the accounts of the raiyats or for any similar purpose.

Section 3 of Bengal Act II of 1877.

Valuations under the Cess Act, 1880, to be deemed to be valuations under this Act.

6. All valuations of immoveable property which have been, or may from time to time be, determined under the Bengal Cess Act, 1880, shall be deemed to be valuations of immoveable property for the purposes of this Act:

Provided that in local areas in which a record of rights has been made under Chapter X of the Bengal Tenancy Act or any other law for the time being in force, the aggregate amount of the rents recorded as payable or settled, as the case may be, may, in the discretion of the Collector, be deemed to be the valuation of immoveable property for the purposes of this Act.

Section 4 of Bengal Act II of 1877.

Rate of cess to be levied not to exceed a quarter of an anna in the rupee.

[NOTE.—So far as enquiries have gone, it is anticipated that this rate need not be exceeded.]

7. The Local Government shall, by an order published in the *Calcutta Gazette*, determine the rate at which the cess for the maintenance of land records shall be leviable in each district or part of a district, and the date from which it shall take effect; such rate shall not exceed *one-quarter of an anna* in the rupee of the annual value of the lands in such district or part of a district.

Section 41 (1) of Bengal Act IX of 1880.

Proportion of cess to be paid by holders of estates.

8. Every holder of an estate shall yearly pay to the Collector the entire amount of the cess for maintenance of land records calculated on the annual value of the lands comprised in such estate at the rate which may be determined for such cess as in this Act provided.

Section 41 (2) of Bengal Act IX of 1880.

Proportion of cess to be paid by tenure-holders.

9. Every holder of a tenure shall yearly pay to the holder of an estate or tenure within which the land held by him is included the entire amount of the cess for the maintenance of land records calculated on the annual value of the land comprised in his tenure at the rate which may have been determined for such cess as in this Act provided.

Section 41 (3) of Bengal Act IX of 1880.

Proportion of cess to be paid by cultivating raiyats.

10. Every raiyat shall pay to the person to whom his rent is payable his proportionate amount of the cess for maintenance of land records calculated at *the rate not exceeding one-eighth of an anna* in the rupee upon the rent payable by him, or upon the annual value ascertained under the provisions of the Bengal Cess Act, 1880, of the land held by him.

Provisions of sections 42-49 of Cess Act to apply to the land records cess.

11. The provisions of sections 42 to 49 (both inclusive) of the Bengal Cess Act, 1880, shall apply as far as practicable to the cess for the maintenance of land records.

12. It shall be lawful for the Local Government, instead of passing an order of apportionment under section 114 of the Bengal Tenancy Act, to recover either in one year or several years, and in the manner specified in sections 8, 9, 10 and 11 preceding, all costs, declared by the Local Government to be recoverable from

landlords and tenants, which have been incurred in making a survey and record of rights and a settlement of rents under the Bengal Tenancy Act, such costs not having been incurred for the purposes of a settlement of land revenue.

Section 32 of India Act XIX of 1873.

Salaries of Land Record-keepers.

13. The salaries of the Keepers of the Land Records and of their establishments, if any, and of all establishments entertained for the supervision of them, shall from time to time be fixed by the Board of Revenue under the order of the Local Government.

Successions to proprietary rights to be reported to Land Record-keepers.

14. Every person succeeding, whether by purchase, inheritance, gift or otherwise, to any proprietary right in any estate or revenue-free property, and every manager of such estate or revenue-free property shall within six months from the date of such succession or assumption of charge give notice of the fact (i) to the Collector, or (ii) to the Land Record-keeper of the circle in which the estate or property is situated, in such form as may be prescribed by the Board of Revenue.

Notice given to the Land Record-keeper may under the orders of the Collector be held to be a compliance with the provisions of section 42 of the Land Registration Act VII (B.C.) of 1876; and on receipt of such notice the Collector shall take the action prescribed in sections 47, 48, and following sections of that Act. The Collector shall inform the Land Record-keeper of any mutations ordered by him under section 55 of the Land Registration Act.

15. Nothing in section 43 of Act VII (B.C.) of 1876 shall be held to exempt proprietors and managers of petty estates and petty revenue-free properties from the obligation to give the Land Record keeper the notice required by section 14.

Succession to tenures, under tenures, raiyati holdings at fixed rates, and occupancy holdings, to be reported to Land Record-keeper.

16 (i). Every person succeeding, whether by purchase, inheritance, gift, or otherwise to the position of a tenure-holder or under tenure-holder as defined in section 5 (1) of the Bengal Tenancy Act VIII of 1885, or to a raiyati holding at fixed rates within the meaning of section 4 of the same Act, or to the holding of an occupancy raiyat as defined in section 4 of the same Act, shall within four months from the date of such succession give notice to the Land Record-keeper of the circle in such form as may be prescribed by the Board of Revenue.

(ii) Such notice shall be held to be sufficient compliance with section 15 of the Bengal Tenancy Act VIII of 1885.

(iii) It shall be the duty of the Land Record-keeper to notify the fact of such reported succession to the landlord or landlords of such person in the manner which may be prescribed by the Board of Revenue.

Provided that, when the person succeeding has caused the instrument by which the transfer has been made to be registered in the office of a registering officer, it shall not be compulsory on him to give notice also to the Land Record-keeper of the circle. It shall be the duty of the registering officer in all such cases to inform the Land Record-keeper of the succession or transfer.

17. A person giving the notice required under sections 14 to 16 shall be bound at the same time to tender such fee in cash or in stamps as may be prescribed by the Board of Revenue.

Such fees, other than fees payable to landlords, shall be credited to a fund to be called the "Land Record Fund" for the district.

All fees paid for copies of records maintained under this Act, searching fees and fines imposed under this Act, shall be credited to the same fund.

Section 65 of the Land Registration Act VII (B.C.) of 1876, so far as regards proprietary rights.

18. Whoever being required by this Act to give notice of succession to a proprietary right, tenure, or holding, shall omit to give such notice within the prescribed time, shall be liable to such fine as the Collector may see fit to impose, not exceeding one hundred rupees, and to a further daily fine not exceeding fifty rupees for each day during which he shall omit to apply for such registration after a date fixed by the Collector in a notice requiring him to apply for registration. Such fines shall be credited to the Land Record Fund of the district.

New.

Holders of estates and tenures and cultivating raiyats to file prescribed returns.

19. Every holder of an estate or tenure, and every raiyat, shall, if so required by the Collector, within such time and in such manner as the Collector shall in a notice to that effect prescribe, and may at any time of his own motion, file in the office of the Land Record-keeper for the circle in which the land is situated such statements and shall furnish such information relating to the records and the changes to be made therein as the Board of Revenue shall from time to time by rule direct.

New.

20. It shall be the duty of the Land Record-keeper of the circle to verify statements filed under the last preceding section or under sections 14 to 16 by local enquiry in the villages in such manner as the Board of Revenue may by rule direct.

New.

21. If any holder of an estate or tenure or any raiyat fail to file, or is not required to file statements under section 19, the Land Record-keeper shall prepare such statements, from information gathered by local enquiry on the spot or otherwise as the Board of Revenue may by rule direct.

New.

22. All Courts of Justice shall have regard to the statements prepared and verified under sections 19, 20 and 21 so far as they may be relevant in any question under enquiry before it affecting—

(a) the situation, quantity, or boundaries of any holding,
(b) the class to which any tenant belongs,
(c) the rent payable,
(d) the incidents of the holding,

and the contents of such statements may be proved by producing a certified copy signed by the Land Record-keeper.

23. When any mutation entry made by the Land Record-keeper or brought upon his records has been attested by a Revenue Officer, in a manner to be prescribed by the Local Government, the Courts shall presume that all entries shown as undisputed entries are correct until the contrary is proved.

New.

Land Record-keeper to grant a receipt for accounts filed.

24. Whenever the holder of an estate or tenure, or whenever any raiyat, shall file in the office of the Land Record-keeper, the statements mentioned in the foregoing sections, the Land Record-keeper in whose office such statements are filed shall forthwith grant a receipt for the same, which shall bear the signature of such Land Record-keeper.

Section 18 of Bengal Act IX of 1889.

Penalty for omitting to furnish accounts.

25. All holders of estates or tenures, and all raiyats, who shall without sufficient cause being shown to the satisfaction of the Collector, refuse or omit to furnish statements required under section 19, shall be severally liable to such fine as the Collector may think fit to impose, not exceeding fifty rupees, for each such omission, and the Collector may impose such further daily fine as he may think proper, not exceeding ten rupees, for each day during which such holder or raiyat shall omit to furnish the statements required after a date to be fixed by the Collector in a notice warning the holder or raiyat that such daily fine will be imposed.

Such notice shall be served by tendering to the person to whom it may be directed a copy thereof attested by the Collector, or by delivering such copy at the usual place of abode of such person, or to some adult male member of his family; or in case it cannot be so served, by posting such copy upon such conspicuous part of the usual or last known place of abode of such person; and in case such notice cannot be served in any of the ways hereinbefore mentioned, it shall be served in such way as the Collector issuing the notice may direct, and the date fixed by such notice shall not be less than fifteen days after service thereof.

The Collector may proceed from time to time to levy any amount which has become due in respect of any fine imposed under this section, notwithstanding that an appeal against the order imposing such fine may be pending:

Provided that, whenever the amount levied under such order shall have exceeded one hundred rupees, the Collector shall report the case specially to the Commissioner of the Division, and no further levy in respect of such fine shall be made otherwise than by the authority of such Commissioner.

26. All fines imposed under this Act shall be recoverable by process of any law in force for the recovery of arrears of Government revenues.

Section 19 of Bengal Act IX of 1889.

Disability to sue for rent, unless accounts filed.

27. From and after the expiry of the time allowed by the notice issued by the Collector under section 19, or from and after the time the statements are prepared under section 21, no holder of an estate or tenure and no raiyat shall be entitled to sue for or recover rent for any land or tenure situated in the district, or part of a district in which this Act is in force, unless at the time of instituting such suit or proceeding such holder or raiyat shall

file in the Court in which such suit or proceeding is instituted an extract from the record of rights relating to the holding, together with extracts of mutations of the khatian (if any) prepared and verified under sections 19, 20 or 21, or

afford such other proof as shall satisfy the Court that such holder or raiyat has filed in the office of the Land Record keeper the statements mentioned in section 19 of this Act.

Section 33 of India Act XIX of 1873.

Appointment of Land Record Inspector.

28. One or more Land Record Inspectors may be appointed in each local area for the proper supervision and control of the Land Record-keepers in the discharge of their functions under this Act.

29. One or more District or Sub-divisional Supervising Officers of the rank of Deputy or Sub-Deputy Collector, who may be called Superintendents and Assistant Superintendents of

Land Records, may be appointed for each district for the supervision and control of Land Record-keepers and Inspectors of Land Records.

New.

Power to enter upon land for purpose of obtaining authorized information.

30. It shall be lawful for a Land Records Superintendent and Inspector within the limits of his local area, or part of a local area, and for a Land Record-keeper within the limits of his circle, to enter upon any lands situated within such limits respectively, and to make such enquiries and investigations as may be necessary for the purpose of obtaining information which he may be authorized to obtain under rules in that behalf made by the Local Government.

All persons shall, so far as possible, supply such information and facilitate such enquiries and investigations, subject to the penalties provided by Chapter X of the Indian Penal Code concerning contempt of the lawful authority of public servants.

Section 35 of India Act XIX of 1878.

Land Record Registrars and Keepers to be public servants, and their records public records.

31. Every Land Record-keeper, every Land Record Inspector, every Land Record Superintendent, and every person appointed temporarily to discharge the duties of any such office, shall be deemed to be a public servant within the meaning of the Indian Penal Code, and all official records and papers kept by any such officer under this Act shall be held to be public records and the property of Government.

Every order passed by an officer engaged in the maintenance of Land Records in any district shall be appealable to the Collector of the district.

Appeals.

32. Every order passed by the Collector of the district under section 18 or 25 shall be appealable to the Commissioner within one month of the date of such order, and the decision of the Commissioner shall be final.

Power to make rules for selection, &c., of Land Record Registrars and Land Record keepers.

33. The Local Government and the Board of Revenue, subject to the sanction of the Local Government, may from time to time make rules consistent with this Act—

(a) regulating the appointment, control, discipline, and payment of all Land Record establishments;

(b) prescribing the method and periods for making entries of mutations in the record of rights and village maps, preparing new editions of such records and maps and republishing them from time to time, or otherwise making them available for public information;

(c) generally for the purpose of giving effect to the provisions of this Act;

and may from time to time, with the like sanction, repeal or alter any such rules.

Interpretation clause.

34. In this Act the words and expression "annual value of land" (subject to section 6), "district," "estate," "holder of an estate or tenure," "the Collector," and "the Collector of the district," shall have the meanings attributed to them, respectively, in the Bengal Cess Act, 1880.

SCHEDULE A OF ENACTMENTS TO BE REPEALED.

See Section 2.

Number of year.	Enactments repealed (abbreviated titles).	Extent of repeal.
Regulation VIII of 1793	Decennial settlement ..	Section 31 so far as it relates to kanungoes, and section 62.
Ditto V of 1816	Kanungoes, Katak, &c.	So much as has not been repealed.
Ditto XII of 1817	Patwaris	Ditto ditto.
Ditto I of 1819	Ditto ..	Ditto ditto.
Ditto VII of 1822	Settlement, Ceded and Conquered Provinces Katak.	Section 53, clause third.
Ditto XIII of 1825	Kanungoes	Sections 2, 3.

STATEMENT OF OBJECTS AND REASONS.

1. A survey and record of rights has been undertaken of Bihar under Chapter X of the Tenancy Act, with the previous sanction of the Governor-General in Council, and similar operations have been completed in various parts of Bengal; but as circumstances alter from time to time, and a record of facts and rights true in one year will be inaccurate the next if there be no competent agency for its correction up to date, it is obviously desirable that such an agency should be provided.

2. The zamindars of Bihar and Bengal are bound by section 62, Regulation VIII of 1793 and Regulation XII of 1817, to keep in every village or circle of villages a patwari, one of whose duties it would be under the existing law to keep the village accounts corrected up to date, and by whom therefore the records might be maintained under the present law; but as the Patwari Regulation is cumbrous and some of its provisions difficult to work, while the agency of patwaris is deemed to be unnecessarily expensive; and as the landholders prefer to it a more economical agency, by which it is considered that the records can be properly maintained with less expense to the landholders and less inconvenience than would be entailed by the rigid enforcement of the provisions of Regulation XII of 1817, it is therefore deemed expedient to repeal Regulation XII of 1817, and to make provision for the maintenance of the record of rights in the manner provided in this Bill.

3. The Bill will be only extended to areas in which a record of rights has been made under Chapter X of the Tenancy Act, or any other law for the time being in force.

4. The maximum rate of cess leviable under the Bill will be altogether one-quarter of an anna per rupee on the rental, or about half-an-anna per acre to be realized from the zamindars and raiyats respectively. This amount will be about one-fifth of the cost of keeping a patwari in every village under Regulation XII of 1817.

5. Advantage has been taken in the Bill of the opportunity to facilitate the recording of changes of proprietary rights and generally to make more efficacious the provisions of the law for notifying transfers of proprietary and occupancy raiyats to the landlords and tenants concerned.

6. Power is taken under the Bill to make rules regulating the selection, duties and procedure of the establishment engaged in the maintenance of the records, but the maintenance of the land records will be confined to a record of changes in the more permanent facts of holdings and estates, and will not include facts relating to the payment or non-payment of rent for any particular period or holding.

7. Power is also taken to recover the costs of a survey and record of rights and a settlement of rents (not incurred in connection with a settlement of land revenue) by means of a temporary cess, instead of apportioning the costs under section 114 of the Tenancy Act. The effect of apportionment would be in the case of Bihar to necessitate the issue of some millions of bills, upon each of which recovery would have to be made. The issue of those bills, besides involving great delay, intricacy and inconvenience, would impose on the people additional cost in the shape of peons' fees and the pay of tahsildars and similar establishments. Doubtless also there would be the possibility of illegal exactions, all of which would be avoided by the procedure now proposed. Moreover, under the proposed procedure the cost of recovery of the survey and record of rights can be spread over a series of years instead of being realized in one lump sum.

(2)

DRAFT RULES UNDER THE LAND RECORDS MAINTENANCE BILL.

Chapter I.

Pay, appointment, and punishment of Land Record-keepers.

"Collector" in these rules includes a Deputy Collector.

Extent of Land Record-keeper's circles.

1. The extent of the circle of one Land Record-keeper may be regulated, in the discretion of the Collector, either by extent of cultivated area or by amount of rental. If regulated by extent of area, it shall not ordinarily contain less than 20,000 nor more than 30,000 survey numbers.

Pay of Land Record-keepers.

2. The monthly pay of each Land Record-keeper shall be fixed by the Board of Revenue, but shall ordinarily not be less than Rs. 25 nor more than Rs. 50.

Qualifications of Land Record-keepers.

3. No person shall be appointed Land Record-keeper who is under the age of 18 years, or over the age of 45, or who has not passed a satisfactory examination in the following subjects:—

(1) Reading and writing clearly in the language current in the district.
(2) Elementary arithmetic.
(3) Surveying by chain and offsets or by plane-table, map drawing, and elementary mensuration.
(4) The rules regarding the duties of Land Record-keepers.
(5) Board's Survey and Settlement Rules.
(6) The Bengal Tenancy Act.

Disqualifications for the office of Land Record-keeper, fines and dismissal of Land Record-keepers.

4. The holding of any land, whether as tenant or proprietor, within or without his circle, shall be reported by every Land Record-keeper to the Collector, and may be a reason for his removal or dismissal if the Collector considers that he is thereby prejudiced in the proper performance of his duties.

5. A Land Record-keeper shall not engage in trade or money-lending.

6. Every Land Record-keeper shall reside within the circle, unless he shall receive the written permission of the Collector to reside without it.

7. If, after due enquiry, misconduct or neglect of duty is proved against a Land Record-keeper, he may be punished as a public servant under the Penal Code, or fined in a sum not exceeding three months pay, or suspended, or dismissed, by order of the Collector.

8. A Land Record-keeper who is in debt to a zamindar or cultivator of his circle, or is in such a condition of pecuniary embarrassment as to render him, in the opinion of the Collector, unfit to discharge his duties, may be dismissed.

Chapter II.

Duties of Land Record-keepers.

It shall be the duty of every Land Record-keeper appointed under the Land Records Maintenance Act—

I.—To make local enquiries and village inspections in the manner hereinafter prescribed for the purposes of preparing returns of mutations or changes to be made in the survey and settlement records and returns of areas sown under the principal crops of each harvest.

II.—To receive from the landlords, tenure-holders and raiyats of his circle, and to preserve and maintain, reports of successions to proprietary, occupancy or other rights, and the returns and statements hereinafter prescribed, and to verify such returns and statements in the prescribed manner.

III.—To keep up such registers, to prepare such returns, and to perform such other duties not inconsistent with the Land Records Maintenance Act, as the Board of Revenue may prescribe.

Statements to be prepared by Land Record-keepers, or to be filed by landlords and tenants and verified by the Land Record-keepers.

I. The following statements and returns shall be filed by landlords and tenants, if so required by the Collector, in the Land Record-keeper's office:—

(1) *By landlords.—Dakhil kharij khewat* statements showing mutations occurring from time to time in the character or extent of proprietary interests.

(2) *By landlords.—Dakhil kharij khasra* statements showing the mutations necessary to be made from time to time in the khasra, so far as they relate to lands unoccupied by raiyats, such as parti jungle, waste, &c.

(3) *By landlords, or tenants, or both.—Dakhil kharij khatian* statement showing the mutations necessary to be made in the khatians.

These statements when filed will be verified by the Land Record-keeper in the manner hereinafter prescribed.

II. Should the landlords and tenants not be required by the Collector to file these statements, or, if being required to file them, they fail to do so, the statements shall be prepared and verified by the Land Record-keeper himself in the manner hereinafter prescribed.

The dakhil kharij khewat.

The proprietary rights and interests of every person who holds any right or interest in each mahal is recorded in the settlement khewat.

1. Every proprietor shall, if so required by the Collector, file in the Land Record-keeper's Office, within two months of the termination of each year, a statement showing the changes, if any, in the character and extent of proprietary interests which occurred during the preceding year.

2. The Land Record-keeper shall file the *dakhil kharij* statement given by the proprietor under the preceding rule in the Collector's or subdivisional office. He shall also note in his diary, and report from time to time to the Collector, any changes in proprietary interests of which he may have received information in the course of the year.

The dakhil kharij khasra and khatians and field inspections.

3. The Land Record-keeper shall make one or more visits to the village within the year, for the purpose of ascertaining the changes which should be made in the khasras and khatians, and for ascertaining the crops grown at the time of inspection. The dates of these inspections shall be fixed by the Collector of the district.

4. Before the date of the first visit after the commencement of the agricultural year of the district, the Land Record-keeper shall notify to the landlord the date of the proposed visit, and shall call upon him, if he wishes, to file in his office before such date, which shall not be less than two months after the termination of the agricultural year, a written statement showing the changes, if these have not been already reported, in the entries in the previous year's khasras and khatians which he (the landlord) alleges to be necessary on the ground of change of occupancy or otherwise, since the settlement records were made by the Settlement Officer, or since the last annual visit, as the case may be, and he shall also call upon him to attend personally or by authorised agent at the time of such visit. He shall also notify to the tenants collectively the dates of his visits, and shall call upon those of them in respect of whose holdings changes may have occurred since the commencement of the previous year, to attend for the purpose of causing such changes to be entered if such changes have not been already reported.

5. If the landlord file statements in accordance with the preceding rule, the Land Record-keeper shall proceed on the specified date to verify them in the village by enquiry from each tenant regarding the correctness of each proposed entry. Discrepancies between the landlord and tenant's statements will be dealt with in the manner prescribed below:—

I. If the landlord and the tenants concerned agree that the proposed change should be made, it shall be recorded accordingly, a note being made that it was made by mutual consent and is *an undisputed entry*. No entry to which the landlords and tenants do not agree shall be recorded as an *undisputed entry*.

II. If the landlord and tenant differ as to the propriety of the proposed change, the change shall not be entered in the record of mutations as an undisputed entry, but a note shall be made of the statements of both parties.

III. If the proposed change relate to the transfer of a holding or part of a holding to which the landlord has not already agreed or does not agree, it shall be dealt with according to the following rules:—

(*a*) If the tenant named in the settlement record is dead, the holding should be recorded in the name of all the sons inheriting, and a remark to that effect will be made in the remarks column.

(*b*) If a tenant has sold the whole or part of his holding, and the purchaser holds a registered deed of sale and is in possession, his name will be entered in the khasra and khatian under the name of original tenant, and a remark will

be made in the column of remarks that the transfer has or has not been recorded in the landlord's office, as the case may be. The same applies to a holding or part of a holding alienated in any other way.

(c) Holdings purchased at auction sales by the owners of the estate, if cultivated by a tenant, will be entered in the name of the tenant, and the words "purchase at auction sale by the owner" will be entered in the column of remarks.

(d) When a tenant has purchased a holding at an auction sale in execution of a decree of a Civil Court, the name of the purchaser will be entered, and if mutation has not been recorded in the landlord's office, the name of the original tenant and the fact of sale will be recorded in the remarks column.

(e) In the case of holdings sold in execution of decrees for debt to mahajans, &c., if the mutation has not been recorded in the landlord's office, but the purchaser is in possession, the name of the original tenant will be entered and the name of purchaser shown below it.

(f) In the case of partitions of holdings by mutual consent which have not been recorded in the landlord's office, the name of the tenant given in the lists of tenants in the settlement records will be entered first, and the names of co-sharers after as joint-tenants, and a remark may be made that partition has not been recorded in the landlord's office.

6. If the landlord or tenant do not file the statement mentioned in Rule 4 on or before the date specified, or do not attend himself or by agent at the time of inspection the Land Record-keeper shall make the inspection in his absence, and shall prepare the *khasra* and *khatian dakhil kharij* statements from information obtained from the opposite party or otherwise in the village, and the party who does not attend is, for the purposes of sections 22 and 27 of the Land Records Maintenance Act, bound by such statements so prepared.

7. Either landlord or tenant may, at any time during the course of the year, before the date of the Land Record-keeper's inspection, notify to the Land Record-keeper any change which he may consider necessary to be made in the khasras and khatians in consequence of change of occupancy or otherwise during the year, and request him to make a record of the proposed change. It shall be the duty of the Land Record-keeper, as soon as conveniently may be after receipt of such request to verify the correctness of the proposed change by enquiry from the opposite party. If the proposed entry is admitted by the opposite party to be correct, a record of the change shall be made accordingly. If not so admitted, the statements of both parties shall be recorded and filed in the Land Record-keeper's office.

8. It will be the duty of the Land Record-keeper, on the request of any party who is interested, to survey any plot which may be the subject of dispute, or in respect of which it may be necessary to make a change in the khasras and khatians, and to assist so far as practicable either landlord or tenant in the preparation of the *dakhil kharij khewat, khasra and khatian* statements.

Dakhil Kharij Khatians.

9. *Dakhil kharij khatians* shall be filed by the landlord or tenants or both, if so required by the Collector, on the same date, or prepared by the Land Record-keeper himself and verified in the same manner as the *dakhil kharij khasra*, provided that the Land Record-keeper shall himself prepare a statement showing the names of non-occupancy raiyats who have, by lapse of time, become settled raiyats.

Correction of maps at annual field inspection.

10. During every annual tour the Land Record-keeper will carry a certified copy of the last year's khewats, khasras, khatians and map with him, and before making any fresh entry will himself ascertain whether any alleged change in the condition or occupation of the land has really taken place. The corrections, if any, will also be entered up in the original record.

Rabi and Aghani field inspections.

11. At the time of making annual visit for the purpose of correcting up to date the khewat, khasras, khatians and map described in the preceding rules, the Land Record-keeper will ascertain and record, field by field, the crops grown at each harvest of the agricultural year.

*12. He will, if possible, make two other inspections on dates to be fixed in accordance with Rule 3 of this Chapter, for the purpose of ascertaining and recording separately the crops grown, field by field, for the *aghani* and *rabi* harvests.

13. He will ascertain the crops grown in each field by personal inspection, and shall himself prepare the statements of cropped areas in such forms as the Collector may direct with reference to the principal crops grown in the circle.

SUPERVISION OF LAND RECORD-KEEPER.

CHAPTER III.

Revenue Supervising Officers, or Superintendents of Land Records, of local areas.

1. Land Record-keepers will be supervised by Land Record Inspectors, and both Land Record-keepers and Land Record Inspectors by Supervising Officers of the rank of

---

* One inspection per year may probably be sufficient for all purposes.

Deputy Collector, and Sub-Deputy Collector to be called Superintendents and Assistant Superintendents of Land Records.

Pay and Establishment of Land Records Inspectors.

2. One or more Land Records Inspectors will be appointed in each local area for the supervision, maintenance, and correction of Land Record-keepers' records.

The salaries of Land Records Inspectors will, from time to time, be fixed by the Board of Revenue.

3. Ordinarily one Land Records Inspector will be in charge of 15 to 30 Land Record-keepers' circles.

4. There will be one Land Records Inspector at the head-quarters of each local area, who will be called the Sadar Land Records Inspector, to whom all the other Land Records Inspectors shall be subordinate.

Qualification and appointment and duties of Land Records Inspectors.

5. A list of approved candidates will be maintained in the Revenue office, and a copy of it will be forwarded to the Board of Revenue.

6. No person will be qualified for the office of Land Records Inspector unless he satisfies the Collector—

(1) That he has passed the Entrance examination of the University, or is educated up to that standard.
(2) That he bears a good character.
(3) That he is not incapacitated by any physical infirmity for the performance of the duties of a Land Records Inspector.

7. Approved candidates will be required to pass examination in the following subjects before being appointed Land Records Inspectors:—

(1) Mensuration, *i.e.*, surveying by plane-table and by chain and offset; computation of areas.
(2) Land Record-keepers' and Land Record Inspectors' rules.
(3) The Bengal Tenancy Act, Bengal Land Registration Act and Bengal Cess Act, and rules made under these Acts.
(4) Board's Survey and Settlement Manuals.

But if the candidate has a certificate of competency as a surveyor from the Superintendent of Surveys, he will be excused from passing in (1), and will *cæteris paribus* have a preferable claim to appointment.

N.B.—*The intention is that ultimately all Inspectors shall be certificated by the Survey Department.*

8. The Land Records Inspector may be vested with the powers of a Revenue officer, under the Tenancy Act, for the purpose of section 23 of the Land Records Maintenance Act, and when vested with powers of a Revenue Officer shall attest all the undisputed entries of mutations made by the Land Record-keeper.

9. The Land Records Inspector will be responsible that the maps and records of every village in his circle shall be corrected and brought up to the prescribed date in accordance with these rules within four months of the termination of the agricultural year by the Land Record-keeper.

10. Each Land Record-keeper will be allowed a chainman-muharrir to be paid out of the Land Record Fund. One set of measuring instruments will be furnished by the Field Land Records Inspector to each Land Record-keeper in his circle, for the safe custody of which he will be responsible.

Duties of Office Land Records Inspectors.

11. The Sadar Office Land Records Inspector will be responsible—

(1) For the custody and issue of forms to Land Record-keepers.
(2) For the distribution of Land Record-keepers' salaries and keeping their pay accounts under such rules as may be issued by the Board.
(3) For the supply of any information required by the Collector or other duly authorised public officer respecting entries in village records.
(4) For the carrying out of procedure connected with the mutation of proprietary rights.

12. The Sadar Office Land Records Inspector will also maintain, under the control of the Superintendent of Land Records, registers showing—

I.—Statistics of each year's cropped area.
II.—Abstracts of mutations.

Superintendents of Land Records.

13. One or more officers for the supervision of Land Record-keepers and Inspectors will be appointed by the Local Government for every subdivision of a district.

The Superintendent of Land Records appointed under these rules will be a gazetted officer of the Imperial Civil Service, the Provincial Civil Service, or the Survey Department. He will be vested with all the powers of a Collector under the Tenancy Act, and with the powers mentioned in section 189 *b*, *c*, of that Act, provided that, except where otherwise prescribed by law, all orders passed by the Superintendent of Land Records shall be subject to the supervision and control of the Collector of the district.

Duties of Superintendent of Land Records.

14. The Superintendent of Land Records shall be generally responsible for the supervision and control of the Land Record-keepers and Land Records Inspectors of his local area.

15. It shall be the duty of the Superintendent of Land Records to visit the circle of every Land Record-keeper at least once every year, to examine registers kept in the Land Record-keeper's office, to attest the accuracy of as many as possible of the undisputed entries which have not been attested by a Revenue officer in the manner prescribed.

16. He shall be responsible for the preparation and maintenance, in accordance with these rules, of all such registers, returns, and reports as are prescribed, or as may hereafter be prescribed.

Rules relating to reporting of transfers of proprietary and occupancy rights, sections 13, 14 *and* 15.*

(1) All transfers of proprietary rights shall be reported to the Land Record-keeper under section 14 in the form given in the Appendix (Form E of Board's Land Registration Manual, page 65).

(2) Every such notice for recording mutations shall, as at present (rule 4, chapter V, Board's Land Registration Manual), bear a stamp of 8 annas.

(3) The Land Record-keeper, on receipt of such notice, shall satisfy himself that the form has been properly filled up, and that the application has been subscribed and verified by the applicant, and shall transmit such notice through the post-office in a cover prepaid with service stamps to the Superintendent of Land Records.

(4) The Collector shall ordinarily delegate to the Superintendent of Land Records, under section 84 of the Land Registration Act, all the powers which he is empowered or required to perform under that Act, except in respect of appeals; and the Superintendent shall exercise *all such powers* on receipt of such notice under rule 4, section 85 of the Land Registration Act Rules.

(5) Every order passed by the Superintendent of Land Records shall be appealable to the Collector of the district.

(6) The Superintendent of Land Records shall discharge the functions of a Collector for the purposes specified in sections 12, 13, 14, 15 and 16 of the Tenancy Act, and in the rules made by the Local Government under these sections relating to the service of notices (rule 1, chapter V of the Tenancy Act Rules).

(7) The scale of fees for service of notices to be served by the Superintendent under the preceding rule shall be those prescribed in chapter VII of the Bengal Tenancy Act Rules.

(8) Notice of succession to occupancy holdings, whether by purchase, inheritance, gift, or otherwise, shall be given to the Land Record-keeper in a form to be prescribed by the Board.

(9) The Land Record-keeper, on receipt of notice under the preceding rule, shall cause it to be served on the landlord in the manner prescribed in rule 7, chapter V of the Tenancy Act Rules.

(10) A mutation fee of shall be payable on each transfer reported under the preceding rule, and a fee for service of notice on the landlord in the scale prescribed in chapter VII of the Tenancy Act Rules (1, 2, 3 and 4).

* NOTE.—The effect of these rules will be that notice of mutations in proprietary rights will be given to the Land Record-keeper in the circle instead of to the Collector at head-quarters of the district. The Land Record-keeper will transmit the notice to the Superintendent, who will take such action as the Collector now takes, subject to appeal to the Collector. The scale of fees will be that now paid.

As regards successions to occupancy rights, the effect of the rules will be that notice of such successions will be served on the Land Record-keeper, who will have them given to the landlord. The scale of fees to be paid for service of such notice will be that now paid for service of notices under chapter V of the Tenancy Act Rules, with an additional mutation fee of eight annas for each succession.

ENCLOSURES TO MINUTE II, DATED 20TH SEPTEMBER 1893, ON THE CADASTRAL SURVEY OF BIHAR,—BY HIS HONOUR THE OFFICIATING LIEUTENANT-GOVERNOR OF BENGAL.

Enclosure I.—Extract from the Officiating Lieutenant-Governor's speech delivered in Darbar at Bankipore on the 31st July 1893. (Referred to in paragraph 3 of the Minute.)

Enclosure II.—Memorial presented to the Lieutenant-Governor at Muzaffarpur, on the 4th August 1893, by the Bihar Indigo Planters' Association, and His Honour's reply thereto. (Referred to in paragraph 4 of the Minute.)

Enclosure II-A.—Opinion of the Hon'ble Sir G H. P. Evans, K.C.I.E., on the position and duties of patwaris.

Enclosure III.—Letter No. 826A., dated the 14th August 1893, from the Hon'ble C. C. Stevens, Senior Member of the Board of Revenue, to the Secretary to the Government of Bengal, in the Revenue Department, to which are appended the Minutes of the proceedings of two Conferences held at Muzaffarpur on the 3rd and 5th August 1893, and a letter, dated the 7th August 1893, from Babu Ram Dhari Sahai, Honorary Secretary, Tirhut Landholders' Association, to the Secretary to the Board of Revenue, Lower Provinces, and Government order, dated the 15th August 1893, addressed to the Board of Revenue. (Referred to in paragraph 5 of the Minute.)

Enclosure IV.—Letter from Babu Ram Dhari Sahai, Honorary Secretary, Tirhut Landholders' Association, dated the 21st August 1893, to the Secretary to the Government of Bengal, Revenue Department, forwarding two resolutions of the Tirhut Landholders' Association, and letter No. 896T.—R., dated the 1st September 1893, from the Officiating Secretary to the Government of Bengal, Revenue Department, to the Honorary Secretary, Tirhut Landholders' Association. (Referred to in paragraphs 5 and 57 of the Minute.)

Enclosure VI.—Minute by Mr Henry Colebrooke, Member of the Board of Revenue, dated the November 1814, referred to in paragraph 17 of the Minute.

Enclosure VII.—Extract from a letter from the Court of Directors, dated the 12th July 1820, to the Government of India, Territorial Department. (Referred to in paragraph 19 of the Minute)

Enclosure VIII.—Mr. Chamberlain's letter, dated the 18th April 1819, to Board of Revenue; Board's letter, dated the 18th May 1819, to Mr. Chamberlain ; and Board's Resolution, dated the 11th June 1819, regarding the salary of, and forms of accounts to be kept by, patwaris. (Referred to in the footnote to paragraph 19 of the Minute.)

Enclosure IX.—Letter from the Members of the Board of Revenue, No 2199, dated the 11th May 1827, to the Hon'ble Vice-President in Council. (Referred to in paragraph 22 of the Minute.)

ENCLOSURE I.

Extract from the Officiating Lieutenant-Governor's speech delivered in Darbar at Bankipore on the 31st July 1893, referred to in paragraph 3 of the Minute.

GENTLEMEN, I now wish to say a few words to you in connection with a subject which is engaging your thoughts, namely, the survey and settlement in progress in the northern districts of the Division; and the points to which on this occasion I wish particularly to invite your attention are how the work can be best and most cheaply done; and how, when done, its good effects may be perpetuated. I will first speak to you on the second point, namely, the maintenance of the record when it has once been correctly made. Gentlemen, I have spoken to many landlords within the last two months on this subject, and there was not one who did not confirm my own long-standing conviction that if the survey is made at all, it ought, when completed, to be maintained up to date. We know that changes in holdings are of constant occurrence through deaths, transfers, successions, reclamation of waste lands, division of fields, and so forth. So that, if no means of annually adjusting the record to these changes is adopted, the record will have become wholly obsolete in a few years, while from the first year it would be growing more and more discredited for judicial or administrative purposes. That would mean the speedy renewal of the state of chaos and the numberless embarrassments we suffer from to-day. No one, and perhaps least of all myself, can regard that result with equanimity; and in this I only express the view of the Government of India. The case with which we have to deal is therefore simplified. We have to maintain the village map and revise the village record by annual corrections made on the spot; for under these conditions only can the record be effectively used for those judicial and administrative purposes for which it is intended. The maintenance of the record can be effected by more agencies than one, and the initial question for you, gentlemen, now to consider is, will you have the record maintained through the patwari after he has been brought under Government control in all respects, or will you have it maintained through another agency to the exclusion of the patwari altogether?

It is to learn your wishes on this point among others, and having learnt them to discuss with you a plan of maintenance, that I am going to Muzaffarpur. The survey and settlement now in progress will bring on record such essential facts as the proprietary rights in each estate, the ownership and occupancy of each field, the status of the tenants, the conditions of the holding, and the rent payable. These are facts which the State should have permanently on record. If such a record were available always, we might with confidence look forward to an era when there would be in Bihar due protection of agrarian rights and due and speedy disposal of disputes in the courts or out of them.

The other point to which I referred above, namely, the means by which the survey and record can be most cheaply and efficiently made, is one of detail, which can perhaps be more conveniently discussed in conference than in Darbar, but there is one important aspect of it on which I wish to say a word, and that is the employment of the patwari on survey work. I have invited the landlords of Bihar to register their patwaris under Regulation XII of 1817, and thus enable the Government to employ them as public servants in making the survey whereby a substantial reduction would be effected in the cost of the work. But my invitation has not been largely responded to, landlords being unwilling to give patwaris the status of public servants, though willing, I understand, to lend us their services gratuitously, while themselves retaining the control of a master over them. Gentlemen, I am entirely opposed to employing any person in making the survey or preparing the record who is not absolutely under the control of the Government and liable to punishment as a public servant for misfeasance. The survey and the record must be prepared under conditions which shall relieve it, so far as we can guarantee, from any suspicion of one-sidedness, and for this reason I cannot agree that a mere servant of the landlord or of the raiyat shall make the survey or prepare the record. As the record is to be an impartial statement of the rights and obligations of both landlords and raiyats, it is obviously unreasonable that the work should be done by a partisan of either party. No; there must be no room for doubt in this matter or for such a rebuke as the Judicial Committee of Her Majesty's

Privy Council recently administered to the authorities in another Province who allowed a record of rights to be prepared by one of the parties to a settlement. I cannot allow any patwari to be employed in these operations unless he has been previously registered under Regulation XII of 1817, and so brought under Government control as a public servant.

Gentlemen, when I invited you last June to register your patwaris under Regulation XII of 1817, my object was to reduce the cost of the survey, the registered patwari being bound to survey his village as part of his statutory duties. I had not at that time worked out the problem of the subsequent maintenance of the record. I have since done this to some extent, and I now wish to say that if you elect for maintenance of the record through the patwari under Regulation XII of 1817, or such amendment of it as may be found necessary, the patwari must be registered, and it is in that case obviously convenient and proper to register him at once, and so save expense in the survey, while fitting him for the work he will have to do later on. But in case you elect for maintenance of the record otherwise than through the patwari, then I am not greatly concerned to press you to register your patwaris under the Regulation. If you elect to have the work done through the more expensive agency of amins to the exclusion of the patwari altogether, I shall not contest your choice, though I may regret it on the grounds of economy. All I would insist on is that you make a definite choice one way or the other.

Gentlemen, there or other important points connected with this subject which I have to discuss with you or your representatives, but I do not think that it is necessary for me to say more on the present occasion. I am going to Muzaffarpur with the object of discussing all these matters with you, and I trust our discussion may result in an agreement equally satisfactory to you, to the raiyats, and to the Government. I wish to meet you in a friendly spirit, and with the desire to adjust differences of opinion amicably, and so far as the best interests of zamindars and raiyats will permit; for, apart from the general well-being of the Province and the people, the Government itself has no interest, pecuniary or otherwise, in the matter. As the Governor-General in Council said in his Despatch of 21st March 1892 to the Secretary of State in connexion with this very question of the record of rights in Bihar: "We seek no fiscal advantage, but the prevention or diminution of human suffering." I would remind the landlords—and in that term I include the Indigo Planters of Bihar—that we are now engaged with no question of organic change in the Tenancy Act, but in giving effect to those provisions of that Act which were specially made in the interests of Bihar. The task ought not to be difficult to those approaching it in a fair and reasonable spirit. Gentlemen, I do hope that between us the rights of all parties will be attended to and secured, and that we shall prevent this great measure, conceived in the best interests of the classes most connected with the soil, from proving as prejudicial to them as some well-intentioned enactments—the *Haftam* and *Panjam*, for instance—before now have done. It only now remains for me, gentlemen, to thank you for the attention with which you have listened to me, and to bid you for the present farewell.

ENCLOSURE II.

(1) *Memorial presented to the Lieutenant-Governor at Muzaffarpur, on the 4th August 1893, by the Bihar Indigo Planters' Association, and enclosure.*

(2) *His Honour's reply thereto.*

[These documents are referred to in paragraph 4 of the Minute.]

(1.)

MOST RESPECTFULLY SHEWETH—

That Your Memorialists desire most sincerely to welcome Your Honour on your visit to the Province of Bihar. Your Memorialists feel that it is a great privilege to be brought into personal contact with the ruler of the Province; and Your Memorialists will therefore avail themselves of this opportunity of respectfully submitting for Your Honour's consideration the following representations in connection with the administration of the Province.

2. That Your Honour is aware that Sir Charles Elliott directed that a cadastral survey should be made of that part of the Province of Bihar which comprises the districts lying to the north of the river Ganges. One of the

great inducements held out to the landed proprietors of Bihar to compensate them for the harassment and expense which a Government survey necessarily involves was that on the completion of the survey the patwaris, who are admitted to be notoriously corrupt, should cease to be Government servants, and that it should be optional with the zamindars, who paid them, to retain them or not as they pleased for the purposes of collection. The second inducement held out to the zamindars to consent to the survey was that the survey would be obviously to their advantage, as all excess land found in the possession of the raiyats would be assessed with rent, and instances were given in official papers, published in the *Calcutta Gazette*, of several estates which had been surveyed by the Government, with the result that the rent-roll of the zamindars of those estates had been considerably increased owing to the assessment of this excess land which the raiyats had annexed to their holdings. That a further inducement was also held out to Your Memorialists that on the completion of the survey the Government would give to the zamindars by a summary procedure increased facilities for the collection of their rents.

3. That moved by these considerations many of Your Memorialists submitted without remonstrance to the orders of Government. They trusted to the promises of Government that the patwaris should cease to be retained as Government servants, and that the excess land, misappropriated by the raiyats, should be assessed with rent; and that after the completion of the survey, a simple procedure would be provided, to enable them to realize the rents which the survey record might declare them to be entitled to.

4. That Your Memorialists now desire to bring to Your Honour's notice that so far none of these promises have been fulfilled During the survey operations of the present year in no case has excess land been assessed: and though Sir Charles Elliott said that the present survey would put an end to all litigation, Your Memorialists have been told that if they desire to assess the excess land held by the raiyats they must bring a separate suit either before the Revenue Officer or in the Civil Court for such assessment. The discovery of excess land by the survey officers is of no avail, if the survey measurements are not to be accepted as evidence of such excess, and if after all the trouble and expense of the survey the zamindars have to recommence proceedings afresh by instituting a separate suit against each raiyat The survey authorities, Your Memorialists submit, are bound to take cognizance of such excess, unless such excess is so small as can be accounted for by the increased accuracy of the present survey measurement as contrasted with the former chain measurement. Where this excess is apparent the onus clearly lies on the raiyat to show that he is entitled to hold the excess land without an increase of rent. This is all Your Memorialists ask for: and if this is not granted, Sir Charles Elliott's promises are simply illusory; and no possible advantage can be obtained by the zamindars from the present survey.

5. That Your Memorialists would next submit that nothing could be clearer than Sir Charles Elliott's promises with regard to patwaris. He accepted the universal opinion of the Bihar landholders that the patwaris as a body were thoroughly corrupt, and that they ought no longer to be retained as *quasi* Government servants. In direct opposition to this opinion and promise is the circular of the Director of Surveys No. 133R.B.T of the 5th June 1893. That circular is stated to have been issued under the orders of Government; and so far from abolishing patwaris as *quasi* Government servants, it is ordered that patwaris are to be professionally instructed to survey their own villages, to extract the areas of the raiyats' holdings, and generally to prepare the village record, and when the village record has been prepared, these same patwaris are to be retained as Government servants, to enter in the survey map and record any changes which may have taken place in the village holdings. Your Memorialists therefore would respectfully ask whether the promise of Sir Charles Elliott with regard to the abolition of patwaris is to be carried out or not.

6. That Your Memorialists would further observe, with respect to the Government orders of the 5th June alluded to in the last preceding paragraph, that in no part of Bihar, as far as their experience extends, have patwaris ever been placed in charge of survey work. When a survey of a village is made by the zamindar, it is always made by independent amins; never by a patwari.

The great object of a survey is to check the proceedings of the patwari: and Your Memorialists strongly object to the Collector being directed to employ their patwaris on survey work without their consent. The patwari is the zamindar's servant and is paid by him, and if the patwari is withdrawn from his legitimate duties to be employed as a Government amin, it is obvious that the collection of rents will be most seriously interfered with. Your Memorialists would further remark that they have been advised by eminent counsel in Calcutta that the Collector has no authority under Regulation XII of 1817 to take away the patwaris from their legitimate duties as village accountants to be employed on Government survey work. Your Memorialists beg to annex a copy of this opinion, and they would ask Your Honour to take into your consideration and pass such orders as to Your Honour may seem proper.

7. Your Memorialists have watched with satisfaction the evident desire of Your Honour's Government to reduce the cost of the survey to both landlords and tenants, but they fail to see how the cost of this survey will be in any way lessened to them by the employment of their registered patwaris on survey duties, unless it is thoroughly understood by the patwaris that such employment is not to excuse them from the fulfilment of their other and, to them, more important duties, and that should it be necessary to employ other agencies to carry on such duties, the extra expense will be met by Your Honour's Government or by the registered patwari whose duty it is to fulfil them.

8. That Your Memorialists would further ask Your Honour explicitly to declare what is the intention of Government with regard to the maintenance of the record of rights. In preparing this record of rights the Government are professedly acting under the procedure of the Bengal Tenancy Act. That Act makes no provision for maintaining the record when once complete. The record is a judicial record, and no changes can be made in it without the zamindar's consent or by an order of the Civil Court. To allow patwaris to make changes in a judicial record seems to Your Memorialists utterly indefensible, and Your Memorialists must respectfully protest against any power being given to the patwaris, or to any one else, to make alterations or changes in their rent-roll without their consent. To allow executive officers of Government or a patwari to make changes or alterations in a village rent-roll, would simply deprive the proprietors of all control over the management of their estates.

9. That Your Memorialists have further been informed that it is in the contemplation of Government to maintain a staff of Inspectors to keep up and maintain the survey records, and that a cess is to be imposed upon the zamindars to defray the expense of these establishments. Speaking from their practical knowledge of zamindari affairs, Your Memorialists are convinced that it is impossible for Government to devise any scheme by which they can, without a resurvey, ascertain and record the innumerable changes which take place in these small village holdings. Your Memorialists are further of opinion that it will be impossible to devise any scheme for keeping up the record that will not be inquisitorial and onerous in its methods until the law of transfer of occupancy holdings has been put upon a firmer and more satisfactory footing. At the same time Your Memorialists are aware that the Government attach great importance to the maintenance of the record, and they are prepared to consider any scheme by which this object can be effected with the minimum of interference and the minimum of expense.

10. That there is one further matter which Your Memorialists would respectfully submit for Your Honour's consideration. This survey, as Your Honour is aware, was ordered by the Government of its own motion. Neither the zamindars nor the raiyats applied for a survey. In other parts of India, including the permanently-settled districts of the North-Western Provinces, the whole expense of the cadastral surveys was borne by the Government. In Bihar the Government have decided to bear only ⅛th of the cost. As the survey is the act of the Government and is required for administrative purposes, Your Memorialists naturally are unable to understand why the province of Bihar should be treated less liberally than the permanently-settled districts of the North-Western Provinces, and they would respectfully ask Your Honour to take this matter into your serious consideration.

And Your Memorialists as in duty bound will ever pray.

OPINION ON THE EMPLOYMENT OF PATWARIS ON GOVERNMENT SURVEY WORK.

WE have before us a case stating the views of certain zamindars and planters as to patwaris and their present duties, the Blue Book of Bihar correspondence published and printed by order of the House of Commons on 17th May 1892, and a letter from Secretary, Government of Bengal, to Secretary, Board of Revenue, dated the 6th June 1893. The main questions are—

(1) Whether it is part of the customary duty of a patwari to make a survey of his village, cadastral or otherwise.

(2) Whether he can be compelled to learn professional or scientific surveying.

(3) Whether he can be compelled to do the work of a professional surveyor or of a survey amin.

(4) Whether he can be dismissed for refusing to learn scientific surveying or for refusing to make or fill in a map of his village on modern scientific principles or in any way.

(1) *As to the duties of patwaris*.—This question arises on section 16 of Regulation XII of 1817, clause 1:—"To keep such register and accounts relating to the village or villages to which he is appointed, in such manner and form as has hitherto been the custom, or in such other mode as may be hereafter prescribed by the Board of Revenue, together with such further registers and accounts as may be directed by those authorities respectively." . . . . "To perform all other duties and services which it has been customary for him to execute."

It is now proposed by Government that the Board of Revenue should order the patwaris to make or fill in the details of village maps by scientific survey, and to order that they should attend instruction in surveying, and should be dismissed by the Collector on the ground of "neglect of duty or other sufficient cause," under section 15, should they not qualify themselves in surveying and make the survey. *Primâ facie* it would not occur to any one that the making of maps and surveying was included in keeping "registers and accounts relating to the villages," and as regards customary duties, it must, we think be admitted that no patwari has from 1817 to the present time ever made a map as part of his duty as patwari. But we understand it to be stated by Government that under the rules of the Board of Revenue as at present existing, they are bound to make and keep a *register of the area of each raiyat's holding and of the amount of waste land, &c., in each village, and that for this purpose* they are bound to and are in the habit of *making a rough pole* or latakhatta measurement, *amounting to a rough survey of the villages.*

On this it is contended that it would not be beyond the power of the Board to order them to make, in addition to the measurement of the area of holdings, a map or sketch showing the relative position of the various plots mentioned in their register or account of areas, so as to render it readily intelligible.

It is further contended that if it be within the power of the Board to order them to make such rough measurement as *they are said now to make*, and further to embody it in a rough or a sketch map, it must be within their power to order them to make an accurate measurement and an accurate map. That this can only be done by a survey on modern scientific principles by means of a compass and by observing and recording angles in such a manner that the plots of land shown in the field book and map can be accurately laid down on the ground by competent surveyors as soon as any two points in the map are identified in the locality.

This is going a great way, and if this view be carried to its full extent, it will enable the Government to convert the ancient village accountants (which was the original function of the patwaris) into a trained body of scientific survey amins to be paid by the zamindars.

The zamindars in the case laid down before us contest the view held by Government as to the existing duties and actual work done by the existing patwaris in Bihar in zamindaris not owned by Government or worked through Government officials; they state that it has not been the practice for patwaris to measure, but only to record the measurement made by the zamindar's amins or register the areas according to his measurement, and that if in filling up the Board's form as to the area of each raiyat's field in details, the patwari writes out something like a khasra, it is not an independent measurement, but taken from the zamindar's measurement chittas. If this is so, an essential fact upon which the contention of Government rests being wanting, this contention would apparently have no basis to stand on. On this question of fact we can express no definite opinion. But it is to be noted that when it was stated by Mr. Finucane in his note of 2nd January 1891 (Blue Book, page 170) that "the survey of their several villages is admittedly one of their customary duties and one which they in fact now perform in every district in Bihar, though in a rough and unscientific manner," the Board of Revenue remarked (page 150)—"It is not clear, although patwaris now occasionally measure lands in the villages, that surveying is part of the customary duties"; and the Collector of Champaran says, "almost every patwari can roughly measure land, and they are often employed by the zamindars for this purpose" But the Collector evidently was not aware, nor was the Board, that patwaris were habitually being employed under the rules of the Board itself to make measurements as now asserted as part of their official duties. In Mr. Risley's letter it is put thus—A specimen of the village survey record as now proposed was produced at the meeting, and it was pointed out what it was proposed the patwaris should do. "This, it was pointed out, does not differ materially from the field measurement which admittedly forms part of his customary duties. It was also argued that the khasra or register of fields is such a register as the Board might reasonably prescribe, and *have in former years prescribed, as a register* to be kept by the patwaris under the

Regulation, and that the keeping of such a register necessarily involves and implies the preparation of a village map without which the khasra would be incomplete and unintelligible."

We have referred to the Board's Rules—Manual of Powers, &c., of Revenue Officers (1888), pages 37 to 41, and do not find this statement borne out.

Rule 14, page 38, provides that patwaris shall keep registers and accounts relating to the village in the forms annexed to the rules. Form No. 1 is headed "Annual account current of the village of ......"

It contains, amongst others, the following columns to be filled up:—

(a) Total quantity of land. (This, we take it, he is to get, like the Government revenue, from the existing records.)

(b) Quantity not paying any rent, arranged under different heads. (It does not appear from what sources he is to get the information, nor is it stated that he is to measure or produce or keep a measurement paper or khasra of these matters.)

(c) Quantity of land held by each raiyat, with detail of field B, C, D. *Name or number of field.*

(The last direction appears to mean that if the fields happen to be numbered, which they would be where a "khetbat" measurement existed, he was to record the number of the plot. If there was no such measurement, and the field had therefore no number, he was to give the name only. This rather rebuts the idea that he was to make a khasra measurement of his own for the whole village—certainly he is not expressly directed to do so.)

The result of this form is that he is nowhere told to make a khasra measurement, though it is possible that he might in some cases have to make rough measurements of separate holdings in order to ascertain the area, though if there was a patta he would, it may be supposed, take the area from that or from the jamabandi or the zamindar's chittas of measurement.

Rule XVII, which provides it shall be the duty of the patwaris to carry out any orders given by the Collector with reference to the survey or measurement of land by order of a competent court or officer, evidently refers to ordering the presence of the patwaris to give information, and is against the idea that the Collector could order the patwari himself to make an independent survey. Assuming, however, that patwaris, or some of them, have, for the purpose of keeping these accounts and registers in the prescribed form, been in the habit of making a rough measurement of holdings with a pole or rope, and calculating the area, this is quite a different thing from surveying, and particularly from the land surveying of modern days. The main object of a survey is not only to get the area of any particular plot, but so to describe each plot in reference to other plots, that the position on the earth's surface of that plot and all other plots in relation to each other shall be in future ascertainable by a scientific process by means of the map and field book of the survey as soon as any point in the map is identified with any existing mark on the land.

This scientific survey has been going on on a large scale under a regular Survey Department of the Government of India since the Act of 1847, and is now governed as to Bengal by the Survey Act of 1875. The patwaris have never been employed by Government as survey amins so far as we can learn. As to the older measurement that used to be made, there is no trace in Regulation XII of 1817 of any duty of patwaris in connection with measurements. Had it been the duty of patwaris to make measurement chittas or khasras of the villages, we should have expected to find such papers produced in courts of justice as entries made by an official in the course of his official duty or as official registers, and we are aware of no such case. It is noteworthy that it was the duty of the kanungo under Regulation V of 1816, section 7, clause 6, to "assist at all admeasurement of land, whether undertaken by the officer of Government in conformity with the Regulation, or by the landholder or raiyat, and to record the same." The opinion of the Advocate-General referred to by Mr. Risley appears to have been given orally at the Conference upon hearing the views and arguments then set forth, and assumes the accuracy of the statements and views laid before him. It is to be noted that the other members accepted the opinion as an exposition of the law, but it is not stated whether the members of the Board altered their views as to what the patwaris had actually been in the habit of doing.

Reviewing all the materials available to us, we are of opinion that unless it can be shown that surveying was one of the customary duties of patwaris by ancient and general custom, the new rules will radically alter the scope of the patwari's duties and cast entirely novel duties upon him and turn him into a survey amin—that such a change is not warranted by the Regulation and does not come under the head of "Keeping registers and accounts"—that the patwaris cannot legally be compelled to learn scientific surveying or discharge the duties of surveyors, though illegal pressure may be brought upon them to do so—and that the attempt to make the zamindars support a body of trained surveyors under the name of patwaris is not warranted by the existing law.

G. H. P. EVANS.
The 11th July 1893. W. C. BONNERJEE.

(2)

THE OFFICIATING LIEUTENANT-GOVERNOR'S REPLY.

GENTLEMEN,—I thank you for your welcome to Bihar. Though I come among you now for the first time as Lieutenant-Governor, you all know that

I am no stranger to the province. Some of you will even remember that I served here for seven years during times of difficulty, and that I then took an active interest in the questions to which you refer in your memorial. In returning to those questions now, I claim to speak, not as a novice in the law and custom of Bihar, but as one who has studied the subject carefully, and who has at least had exceptional opportunities for learning what the intentions of the Government and the Legislature were in respect of the Bihar land question when the Tenancy Act was under discussion. With these introductory remarks, gentlemen, I will proceed to examine the substance of your memorial.

The first statement which I have to notice is the following:—"One of the great inducements held out to the landed proprietors of Bihar to compensate them for the harassment and expense which a Government survey necessarily involves was that, on the completion of the survey, the patwaris, who are admitted to be notoriously corrupt, should cease to be Government servants, and that it should be optional with the zamindars, who paid them, to retain them or not as they pleased for the purposes of collection." Gentlemen, I have been unable to ascertain on what authority you base this statement. So far as I have been able to ascertain from the official records, it has never been, and it is not now, the policy of the Bengal Government to abolish the existing patwari system without substituting for it another agency to maintain the record. Such a policy as you impute to the Bengal Government would require the sanction of the Government of India, and I greatly doubt, having regard to the importance rightly attached in all other provinces to the correct maintenance of the record of rights, whether the Government of India would have countenanced it, even if recommended by the Government of Bengal. If you desire to abolish the patwari, your road lies through what Sir Charles Elliott described as "a complete and practical scheme of maintenance of the settlement record" by an agency other than that of the existing patwari.

The next statement which I have to consider is to the following effect:— "The second inducement held out to the zamindars to consent to the survey was that the survey would be obviously to their advantage, as all excess land found in the possession of the raiyats would be assessed with rent, and instances were given in official papers, published in the *Calcutta Gazette*, of several estates which had been surveyed by the Government, with the result that the rent roll of the zamindars of those estates had been considerably increased owing to the assessment of this excess land which the raiyats had annexed to their holdings." Here too, gentlemen, I must say that I have been unable to find in the records of the Government any evidence to bear out the statement made in the memorial. Indeed, gentlemen, there are certain important considerations conflicting with it to which I would beg your leave to invite attention. The various matters dealt with in a survey and record of rights are of two kinds—matters which the Government can deal with within certain limits by executive order addressed to the Settlement Officers; and matters fixed by substantive law, concerning which the Government is not competent to issue any orders at all. Now this question of land, said to be held in excess of that for which the tenant is paying rent, belongs to the latter class. It is regulated by law, and the interpretation of the law rests, not with the Executive Government, but with the Judicial authorities. In a recent case arising out of the settlement of the Burdwan estate—a case to which your attention has doubtless been drawn in connexion with this question—the High Court observed: "It is for the zamindar who seeks for a settlement of these lands to show that they are in excess of those for which rents are being paid, and to do this it is for him to show what those lands are, what were the terms of the original settlement, and whether it was by any, and if so by what, process of measurement." That decision gives an authoritative exposition of the law on the subject of excess lands, and the Government is unable, even if it were inclined, to do anything to alter it.

The procedure in the matter seems clear to me. The landlord who considers that his tenant is holding land in excess of that for which he is paying rent, may, while the settlement is still going on, apply to the Settlement Officer to fix a fair rent for the entire holding; and that application will be adjudicated on by the Settlement Officer acting as a Civil Court. Or he may wait till the settlement is over and file a suit for the assessment of the land alleged to be in excess. He will not, I am advised, be estopped

or hampered in these proceedings by the entry in the settlement record as to the rent of the holding, for that entry, even if allowed to go undisputed, will not be conclusive as between the parties.

It is suggested, however, by your memorial, that if on a comparison of the survey measurement with the area entered in the landlord's jamabandi, a tenant seemed to be holding more land than he was paying rent for, the Settlement Officer was bound *suo motu* to assess rent on the apparent excess, and the Government is, I presume, urged to direct him by executive order to do so. That opinion, gentlemen, struck me at once as erroneous. It seemed to me out of the question that Government should have the power by executive order to require the Settlement Officer to take judicial notice of the landlord's private papers, and more especially when the effect would be to shift the burden of proof from one party to the other, and thus to reverse one of the most important provisions of the substantive law. But in a matter of such importance I did not wish to rely upon my own judgment, and I therefore referred the question to the Law Officers of Government. I am now advised by them that the opinion I have referred to is without doubt erroneous, and that the burden of proof which the law imposes on the landlords cannot be removed from their shoulders by any order of the Executive Government. The Settlement Officer cannot proceed to assess rent on excess area unless it appears from legal evidence, which would ordinarily be adduced by the landlord in discharge of the burden of proof laid on him by the law, that the land for which rent is claimed is in fact in excess of that for which rent is being paid.

Gentlemen, I feel bound to add, though the opinion will hardly be welcome to some of you, that I entirely agree with the Law Officers, not merely on technical grounds, but in view of the general equities of the case. It is known to those with experience of Bihar—I refer especially to the more densely populated district—that in past years the enhancement of a raiyat's rent by the order of a landlord was not a matter of uncommon occurrence. Nor is the fact a remarkable one. Such things have been done in most countries in the world, where circumstances rendered them possible. But the practical effect of such enhancements was to impose an assessment on the excess area, and whenever this has occurred, the existing rent in Bihar is really a consolidated rent for the holding. Moreover, it must be remembered first that, under the indigenous system of measurement, the *ails* or partitions between fields were excluded from survey, while under the scientific system they are included; secondly, that under the scientific system of measurement now adopted the area brought out for a field is itself considerably in excess of what the area of the same field would be if obtained by measurement according to the native system. Taking these facts into consideration, it must, I think, be admitted that the question of dealing with lands claimed as excess is one which ought not to be disposed of by executive order, but demands careful judicial enquiry, in which the whole facts and history of the holding must be examined and the landlord must be content to discharge the burden of proof which the law has laid upon him. And if this be the conclusion justified by the equities of the case to which I have referred, is it not strengthened by the consideration that, according to the concurrent testimony of enquirers into the subject, the Bihar tenant's rent, even 10 years ago, was in many places a rack-rent? Since then population has increased, the competition for land has grown more intense, and as a natural consequence the agrarian situation has become more precarious. All these considerations point to the desirability of careful judicial examination before rents are fixed, and to the administrative necessity of giving the province rest and security by such a record of rights as the Government has now undertaken to effect.

The last statement which I have to notice in the second paragraph of the memorial is "that a further inducement was also held out to Your Memorialists that on the completion of the survey the Government would give to the zamindars by a summary procedure increased facilities for the collection of their rents." It is no doubt the case that in a speech delivered in the Governor-General's Council on the 25th March 1892, on the amendment of the Bengal Court of Wards Act, Sir Charles Elliott spoke as follows:—

"There is a provision now in the Tenancy Act, under which rent suits below Rs. 50 may be tried summarily like a Small Cause Court suit. But this provision has not been put into force hitherto, because rent suits generally have turned, not merely on the question whether the rent had been paid or not,

but on the question how much the rent really is, or whether rent is due at all. Whenever disputes of the sort have been cleared away, it seems probable that the provision referred to may be utilized, or even that some simpler procedure may be invented."

The Lieutenant-Governor then intended that the subject should be taken in hand at the earliest opportunity, and trusted that he "might be able to introduce a Bill of this kind." It was not, however, until the 17th September 1892 that Sir Charles Elliott found it possible to take any further steps in the matter, and in the official letter then written, great stress is laid on the fact that a summary procedure is only possible when "a regular survey and record of rights have been effected under the Tenancy Act, and the maintenance of the record is duly provided for." Gentlemen, I invite your special attention to these words: "when * * the maintenance of the record is duly provided for." I am not aware that much progress has been made towards inventing the simpler procedure referred to in general terms by Sir Charles Elliott. It may be that that problem "passes the wit of man." In any case, however, I may remind you here that it was this very demand for a summary procedure for the recovery of rent which stirred into active life the discussion which ended in the passing of the Bengal Tenancy Act. For seven years that demand was examined from every conceivable point of view by the keenest intellects, not of Bengal alone, but of all India. Their answer to that demand was the Act as you have it now. I repeat, gentlemen, what Sir Charles Elliott has already practically said, that the only road to the summary recovery of arrears of rent lies through a regular survey and record of rights under the Tenancy Act and adequate maintenance of the record up to date.

Two enquiries are made in your memorial which call for a definite answer. You ask to be informed as to the intentions of the Bengal Government regarding the maintenance of the record of rights and the employment of the patwari on the survey.

Both of those points were, I think, fully dealt with in my speech in Darbar, and you can, I think, no longer have any doubt as to what is proposed. My intention is—and in this I have the support of the Governor General in Council—to maintain the record. If you reject the patwari, and we can agree on an efficient plan of maintenance independently of Regulation XII of 1817, I shall propose to the Government of India to abolish that Regulation and release the patwari from Governmental control. If we cannot come to an agreement, I must only do what I can to protect you against yourselves and to secure the due maintenance of the record in the best interests of all concerned.

In regard to the right of the Government to employ patwaris on survey work, to which you refer in paragraphs 5 and 6 of the memorial, I am advised by the Law Officers of the Crown that beyond any doubt the Government has that power. I am aware that a contrary opinion has been given by eminent counsel; but I also know that the grounds on which the Government is proceeding, and on which the opinion of the Law Officers is based, were not placed before those gentlemen, who approached the question therefore at a disadvantage. I have no objection whatever to your seeing the entire Government case on this point. My wish is that our objects and the grounds of our action in this whole matter should be displayed and made public as completely as possible. The strength of the Government case lies in its being widely known and fully understood.

There remain only two matters which it seems necessary to notice at length. The first matter is your reference in paragraph 5 of the memorial to the circular of the Director of Surveys of 5th June 1893. That circular does not in some respects correctly represent my intention: and portions of it were cancelled shortly after it was issued. But reading the circular carefully—I hold it now in my hand—I cannot find that it contains the statement you allege, enjoining the retention of the patwaris as Government servants for the purpose of maintaining the record of rights. As a matter of fact, my plans for the maintenance of the record had not been matured when the circular was issued, and Colonel Sandeman, if he made such a statement, would have known my intention better than at the time I did myself.

The second matter I have to notice is your statement that the Tenancy Act makes no provision for maintaining the record of rights. On this point let me read you the following extract from a letter, dated 20th November 1884,

addressed by the Government of India to the Government of Bengal:—"It is hardly necessary to remark that the value of the survey and the record of rights will be incommensurate with the cost unless an efficient staff of patwaris and supervisors is organized. * * * If it be decided to commence operations in 1885 or 1886—and on this point the Government of India will expect to be advised hereafter by the Government of Bengal—His Excellency the Governor-General in Council trusts that no effort will be spared to obtain at an early date the requisite legal powers to organize the patwari staff, and that the work of organization will be vigorously prosecuted."

It was in pursuance of those orders that the Bengal Government actively took up the question of patwari reorganization. But the reorganization of the patwari staff in Bihar was from the beginning part and parcel of the scheme for amending the Rent law: and it always was intended that legislation on the patwari question should be undertaken as supplementary to legislation on the substantive Rent law. It is unnecessary for me to explain here why this intention has hitherto remained in abeyance: it will suffice to say that, until it is fulfilled, these provisions of the Tenancy Act, specially intended for the protection of the raiyats of Bihar, will remain ineffectual. In these circumstances, gentlemen, you will not be surprised, nor I trust angry with me, if I am doubtful of your title to speak on this matter in the name of the raiyats of Bihar, or to say that they are opposed to the survey and settlement. I am informed that they are as a matter of fact, whenever they understand the matter, in favour of a settlement fairly conducted. I have even seen it stated in the public newspapers by Sir William Hudson himself that they were willing to pay as much as one rupee per acre for it, while under arrangements they will, I hope, not have to pay a quarter of that amount.

Gentlemen, we are now face to face with the essential facts which underlie the whole burning question of the relation of landlord and tenants in Bihar Far more important to the raiyats is this question of the Record of Rights even than the recent change in the organic written law; for the written law, among an ignorant, struggling people, remains a dead letter—witness Act X of 1859—unless executive action steps in to do for the people that which they cannot do for themselves. This is the justification of Chapter X of the Tenancy Act, as it is of protective agrarian legislation wherever it has been undertaken. Gentlemen, I do entreat you to regard the question in a considerate and conciliatory spirit. I am here to discuss every point with you in a friendly and amicable way. I will do everything I can do within reason and the law to meet your wishes: and if only you will meet me in a similar spirit, as I feel confident you will, then I do think that between us we shall be able during the next few days to arrive at a reasonable understanding and a workable agreement on the matters that have to be settled between us. Gentlemen, I conclude by thanking you for giving me this opportunity of speaking my mind to you on these most important matters openly and frankly.

ENCLOSURE II A.

Opinion of the HON'BLE SIR G. H. P. EVANS, K.C.I.E., *on the position and duties of Patwaris.* [*Referred to in foot note to paragraph 57 of the Minute.*]

I HAVE had laid before me papers bearing on the position and duties of patwaris, which I had not before seen and which throw much light on the subject. They consist of (1) correspondence between the Board and the Government of India and the Directors of the East India Company ranging from 1811 to 1824, and the reports of Collectors during that period; (2) of the correspondence between the Local Government, the Board and various Collectors in 1880; (3) further information collected in 1893; and I have discussed with Mr. Finucane the nature of the duties the patwaris are now required to perform in respect of the present survey of Bihar under the Tenancy Act. Upon these materials, it appears that the reform of the office of patwari sought to be effected by Regulation XII of 1817 was connected with the restoration of the office of kanungo, and was to a great extent intended to provide the Government with such authentic information as to the area cultivated by each raiyat and the rent payable by him therefor in money and in kind and the amounts actually paid as should enable the Government to protect the raiyats from oppression so far as practicable; and generally to provide the fullest information as to the area and tenure and nature of the lands in each village.

With this view the Board in 1819 prescribed a form of account by which the patwaris were to record the length, breadth, and area of each plot held by each raiyat in the villages and the rent payable for his holding, as well as many other particulars, and were held liable for the accuracy of this return. Strenuous efforts were made to have complete returns made by the patwaris and checked by the kanungos and kept as records. These efforts were continued with more or less, but generally with very indifferent, success till 1824 or 1825, when the correspondence ceases.

The correspondence of 1880 shows that, though the system had apparently failed entirely in Bengal, it was still alive in Bihar, and that the returns prescribed by the Board of Revenue in 1876 (which are the same as now found in the Revenue Manual) were much the same as those originally prescribed in 1819, but that the registration of patwaris and the insistence on their returns being filed in the Collector's office had fallen very generally into disuse. The conclusion come to was that the patwaris should be registered and that the rules compelling them to keep the accounts should remain in force, but that the patwaris had so far become servants and sent collections of the zamindars, and were so ignorant and corrupt that the accounts prepared by them were worthless and misleading, and that it was not worth while to attempt to enforce the duty of filing them yearly in the Collector's office, and that things should be left as they were for the present.

In the course of this correspondence it was reported by several Collectors in Bihar that measuring land was one of the duties then performed by these patwaris, but the Collector of Saran did not mention this as one of their existing functions. It appears, however, from the report of the Settlement Officer in 1893, that the patwaris from Saran and Gaya who appeared before him stated that they had been in the habit of measuring land roughly with a luggi, but that they had never made maps.

On the whole history of the matter it appears that patwaris were compellable to measure the plots of the raiyats under order of the Board existing since 1819, and that to keep up the register shewing the length, breadth, and area of each plot was one of their duties, though it has been little, if at all, enforced during the last 60 years by Government, and that this duty was imposed mainly to supply information of what land the raiyats paid rent for, and how much they paid for each bigha.

Their registers and accounts were apparently intended in 1817 to form the basis for some kind of record of rights as to all the land in the village. That the original object has lamentably failed is clear, but the patwaris remain legally liable to perform their original duties, though after so long a disuse and under present circumstances there are great practical difficulties in carrying out the original scheme through their agency.

I think it is made out that patwaris can be called on to make and file measurement khasras of the lands of the raiyats, and for the purpose to measure the lands in such manner as patwaris have been accustomed to do; that is, in the old native style with a luggi. I think also that if the Government desire some improved but still simple means of measurement to be substituted and adopted by them (not requiring scientific instruments or the education of a professional surveyor), they could in course of time effect such improvement in the accuracy of the measurements by the powers they have as to the appointment of patwaris and by encouraging them to adopt the new method.

I also think that the duties prescribed for them as to recording all mutations of tenants, &c., would enable the Government to make use of them for the purpose of keeping up the record of rights when made, though it does not appear that they could safely be entrusted with such duties or any duties out of which they could make money unless there were an efficient check upon them.

But though the duties of patwaris appear to me to be as above stated—and it is evident that the Government has much greater rights to demand services from them in the way of measurement and otherwise than it has been in the habit of exacting—yet there are great difficulties in the way of any attempt at utilising the existing patwaris in the manner proposed for the present survey of Bihar under the Tenancy Act, viz.—

(A) A fresh qualification for the office has to be introduced suddenly. For though, as explained by Mr. Finucane, the work required from them is comparatively simple, and does not involve their being able to make scientific maps

as I had previously thought, yet it admittedly involves the acquisition of knowledge which neither they nor any of their predecessors have ever possessed. It is not, I consider, possible to force an existing body of officials, who are only subject to dismissal for neglect of duty or other just cause, to come away from their villages and attend classes for the acquisition of this new knowledge on pain of dismissal; nor is it possible to dismiss them if, having attended, they do not become proficient in the new art

(*B*) This survey is an exceptional thing ordered once for all under the Tenancy Act of 1885, and if the existing body of patwaris, though able to and compellable to, undertake measurements of raiyats' lands by the old method, are unfit to perform this special and unusual task which is demanded of them on this occasion, and which may never recur if the work is properly done and means taken for its being kept up, it is very difficult to hold that such a task is legally demandable from officials who admittedly are and always were unable to perform it. From the report it appears that none can perform it without a course of instruction, and that many, if not most, are incapable of acquiring sufficient proficiency to be able to fulfil the requirements.

(*C*) It is noteworthy that they have hitherto had nothing to do with maps, though possibly, considering the very extended meaning given by the Board ever since 1819 to the words "registers" and "accounts," it might not be *ultra vires* for the Board to prescribe some simple form of map which it was within their power to prepare.

If the old patwaris are to be dismissed, it must be for some other reason than the non-acquisition of the knowledge necessary for the survey. Difficulties will arise as regards fresh appointments, the nomination being in the first instance with the zamindar, and the Government power of appointment arises only on failure to nominate on nomination of an unfit person.

Assuming the zamindar to be hostile and to set up the patwaris to fight the point and provide them with funds, difficult questions will have to be decided, and it will be possible to question the action of the Board in the civil courts, unless the Government are prepared to work the change gradually. This would involve immense delay in carrying out the survey.

The zamindars will have a grievance from the fact that the patwari is now in many estates the only rent collector, and although they may have no legal right to insist on his collecting rents, unless it was a customary duty in 1816 of which I find no evidence, yet as his whole time will be taken up first in learning and then in doing survey work for a considerable period, there will be a great outcry at the sudden loss of what by long use the zamindars have come to consider as a right to his services.

My final conclusions are that the Government have a right to the services of the patwaris for the purpose of ascertaining and recording facts connected with the villages such as would be recorded in the record of rights, and possibly such as would be required for census purposes, and that this right, though fallen into practical disuse, still exists legally. That the enforcement of the right by Government will involve a great change in the present relations of patwaris and zamindars *That the Government is entitled, if they think fit, to employ patwaris to keep up the record of rights. That they are entitled to require the patwaris to give assistance and information in framing it and in ascertaining the identity and measuring the area of the various plots of land in the village to the extent of their ability, and in other matters.*

That the proposed scheme for their immediate utilization for the survey now in progress is not practicable, and in any event bristles with difficulties legal and practical, which it is not easy to see our way through, unless the zamindars agree to it.

That if time were no object it might be possible in the course of years to secure a set of patwaris who might be so used. But that it is most probable that the experience of the past would be repeated, and that the patwari serving two masters would mainly serve the one who paid him and who was nearest to him and mainly affected his daily life.

G. H. P. EVANS.

The 20th July 1893.

ENCLOSURE III.

(1) *Letter No.* 8264., *dated the* 14*th August* 1893, *from the* HON'BLE C C STEVENS, *Senior Member of the Board of Revenue, to the Secretary to the Government of Bengal, in the Revenue Department, to which are appended the Minutes of the Proceedings of two Conferences held at Muzaffarpur on the 3rd and 5th August* 1893, *and a letter, dated the 7th August* 1893, *from* BABU RAM DHARI SAHAI, *Honorary Secretary, Tirhut Landholders' Association, to the Secretary to the Board of Revenue, Lower Provinces.*

(2) *Government order, dated the* 15*th August* 1893, *addressed to the Board of Revenue.*

[These documents are referred to in paragraph 5 of the Minute.]

(1)

I HAVE the honour to make the following report on the Conferences which, under the instructions of the Lieutenant-Governor, I held at Muzaffarpur on the 3rd and 5th instant with the representatives of the zamindars and indigo planters of North Bihar, on the subject of the Bihar Survey and of the future maintenance of the Record of Rights.

2. Before these Conferences I informally met the Government officers employed in the tracts immediately concerned. The object of this meeting was merely to obtain such general information relating to the facts and to the wishes of those affected by the survey as the local officers could give and was not already known. No proceedings were recorded.

3. I submit full reports of the Conferences, but it is desirable that I should lay before Government a brief summary of what was said and done, and should state the points which appeared to me to have been made clear

4. I was assisted by the Hon'ble H. H. Risley, C.I.E., Secretary to Government in the Revenue Department, and by Mr. M Finucane, Officiating Secretary. to the Board of Revenue and permanent Director of Land Records and Agriculture, while Mr Lyon, Settlement Officer of Muzaffarpur, acted as Secretary. To all these gentlemen I am much indebted for their valuable help. The Commissioner of Patna, the Collectors of Muzaffarpur and Champaran, the Officiating Director of Land Records and the Director of Survey, and the Settlement Officer of Champaran were also present.

5. On the other side, the Maharaja of Darbhanga with his Manager, Mr Bell, the Maharaja's brother, Raja Rameshwar Singh, Mr. Gibbon, the Manager of the Bettiah estate, the Secretaries to the Bihar and Tirhut Landholders' Associations, Sir W. B. Hudson, K.C.I.E., President, and Mr. Macnaghten, Secretary of the Bihar Indigo Planters' Associations, together with several other influential European and Native gentlemen, represented the zamindars and indigo planters. I endeavoured to find some persons who might represent the raiyats; and it is a significant fact, in considering the conditions of North Bihar, that no adequate representation of this class could be obtained, and consequently the attempt had to be abandoned. There probably is not a single raiyat in Bihar of intelligence and education sufficient to enable him to take part in such a Conference; and the raiyats' feeling on the subject can only be ascertained by personal enquiries in their villages.

6. I opened the proceedings by saying that the intentions of Government must be understood to be unalterable on the following points, which were not therefore open to discussion:—

(1) The survey is to be made and record of survey and rights is to be maintained up to date.

(2) The record is to be a public document, the accuracy of which Government must guarantee, so far as may be practicable.

3) Since the Government is thus responsible, it must not be fettered in its discretion as to the period at which corrections of the record should be made.

(4) The work must be done by an agency under the complete control of Government, and independent of any interested party.

It was then explained that in order to attain these objects, the Government was anxious to know the views and to study the interests of these affected.

7. I then proceeded to sketch the two systems which had suggested themselves to Government, viz. (1) the patwari scheme, under which the unit would be the village, and the survey would be made, and the record kept up, by the patwari; (2) what might be termed the kanungo scheme, under which the survey would be made by amins, and the record for a circle of villages be maintained by an officer of higher qualifications and on higher pay. It was made clear that the former of these two plans would require legislation; the patwari would be a Government servant, appointed, controlled and paid by Government, and the cesses now collected from the raiyats for the payment of patwaris, under whatever name, must be taken in a legal and probably altered shape. The kanungo scheme was then sketched in outline following the note which had been, under the Lieutenant-Governor's orders, previously forwarded to the Indigo Planters and Landholders' Association.

8. A discussion followed, for which reference may be made to the detailed Minutes of the Proceedings appended to this report. It was apparent that the unofficial gentlemen present were hostile to any maintenance of the record at all. They pressed for information on many points of detail involved in either of the schemes laid before them, and to meet their wishes I distributed copies of the first draft of a Bill which had been prepared, embodying the Lieutenant-Governor's scheme of kanungos. This Bill, although prepared under the orders of the Lieutenant-Governor, had not yet been submitted to His Honour, and consequently he had had no opportunity of expressing his approval or disapproval of the draft. But since it was in general accord with his views, and there was an evident desire on the part of the unofficial gentlemen attending the Conference to be informed of the methods by which practical difficulties might be overcome, it was thought less inconvenient to produce the Bill somewhat prematurely than to reserve it till instructions could be taken.

9. It was not to be expected that any opinion should forthwith be given by the Conference; and it would have been manifestly unfair to press for criticisms without giving time for consideration. The Conference was then adjourned till the 5th, after the difference between the patwari and kanungo schemes had been again explained. No original plan was brought forward by the unofficial gentlemen present, but it was suggested that, instead of attempting to maintain a current revision of records, there should be a decennial revision. Since this suggestion was inconsistent with the principle that Government, being responsible for the accuracy of the record, cannot be fettered as to the periods of revision, I was unable to permit it to be discussed as a proposal, though I directed that it should be recorded as an opinion.

10. On the 5th instant the Conference re-assembled. The explanation given by Mr. Finucane of a remark made by him at the previous sitting led to a short discussion regarding the sanction proposed in the Bill for enforcing the communication of information as to transfers. The general feeling among the unofficial members was that the provision was open to objection, as giving the sub-kanungo a lever which he might use for purposes of oppression. It was obviously impossible to promise that no power of punishment for passive obstruction should be retained in the Bill, but it was explained that the details were open for consideration, and that any reasonable modifications which could be suggested were likely to be adopted.

11. I then read an extract from a letter written by Mr. Gibbon on the 24th October 1878, to the President of the Bihar Rent Committee. The advice given in this letter, as I pointed out, depended on the following principles:—

(1) It is right that Government should have at its disposal a local agency of contemporaneous record.

(2) That agency should have no connection with the collection of rents, but should be entirely at the service of Government, and should be nominated and paid by Government officers.

(3) It is reasonable that the zamindars should pay at least a share of the necessary expenditure direct into the Government Treasury.

(4) It is possible to secure, consistently with due economy, the services of efficient men.

(5) The areas to be dealt with by these record-keepers should be re-adjusted, and the district divided into convenient and fairly uniform circles considerably larger than those of the existing patwaris usually are.

(6) The present staff of patwaris should be placed at the disposal of the zamindars, to keep or to dispense with at their option.

These considerations, I pointed out, are exactly those on which the Bill under discussion is founded.

12. I regretted that Mr. Gibbon was not present, but I had mentioned to him personally my desire to bring his letter forward, and he was aware that I attached much importance to it. I have abstained from reading it on the first day, partly because I had feared that it might lead to irrelevent discussions, and especially because it seemed undesirable to take Mr. Gibbon at a disadvantage or to forestall and hamper him in anything which he might wish to say. After I had read the letter, Mr. Macnaghten, by Mr. Gibbon's authority, said that circumstances had changed since 1878, and that Mr. Gibbon claimed the right to change his opinions; Sir William Hudson further attributed Mr. Gibbon's change of opinions to the state of the law regarding the transfer of raiyats' holdings.

13. My object in reading the letter and laying stress on it was not to deny Mr. Gibbon the right to change his views, but to show that the scheme now brought forward was in precise accordance with that which had commended itself to one of the most valued unofficial advisers of Government, who even 15 years ago had had large practical experience. To me, I may remark in passing, it does not appear that the reasons given for a change from those views are adequate. The law as to transfers of occupancy rights has not been changed. If such transfers have become more numerous, surely the necessity for recording them has increased. And if the country is being surveyed and rights ascertained and recorded, it should be easier and less expensive to maintain the record. On the other hand, the interference of Government with the zamindars will be less under the Lieutenant-Governor's scheme than under the scheme which Mr. Gibbon proposed, since it is not now intended to register collections of rents.

14. The members of the Conference were next informed that His Honour the Lieutenant-Governor had now seen the Bill which was produced at the former meeting, and had accepted it as a provisional basis of legislation, with certain modifications which were read and explained, and will be found reproduced in the minutes of the Conference. Under the authority which had been given to me, I announced that Sir Antony MacDonnell would, if desired, be happy to come to the meeting and discuss any suggested amendments of the Bill. It was, however, considered unnecessary to trouble His Honour to do this.

15. I then asked whether the gentlemen present could now give me their opinion as to which of the schemes was to be preferred. The reply was given that, though those present could not bind absent interested persons, they were themselves of opinion that the kanungo scheme was the lesser of the two evils which were presented to them. This expression of preference, taken with the absence of any counter scheme of maintenance from the zamindars, was all that the Lieutenant-Governor asked for in his speech at the Bankipore Darbar; and under these circumstances I said that I was prepared, under the Lieutenant-Governor's instructions, to stop all further action in the direction of the registration and training of patwaris, and pointed out that the entire abolition of the patwari system is involved in the kanungo scheme. This announcement appeared to give satisfaction.

16. The discussion then fell upon the question of the area to be dealt with by the kanungos. It was desired that this should be as large as possible, that a superior class of men should be employed, and that the corrections should not be made annually. The landholders were assured that these expressions of opinion would have full weight given to them, and it was understood that Government would extend the area to the maximum consistent with efficient work. Speaking only for myself, I said that I could not advise that so large an area should be at first adopted as to produce any risk of failure. The work must first be made safe, and the details might afterwards be modified by the

light of experience. I declined to promise that the corrections should not be made annually, since it is a fundamental part of the scheme that this must be left to the discretion of Government.

17. The Maharaja of Darbhanga then asked that the Lieutenant-Governor's notes might be regarded as part of the proceedings, and that the zamindárs might be favoured with as full an exposition of the views of Government as could conveniently be given. This was assented to.

18. It was once more pointed out that, subject to the four principles stated in paragraph 6 above, which are insisted on by Government as fundamental, all details, however important, are open to discussion, and that His Honour the Lieutenant-Governor is most anxious to receive all the assistance which the practical experience of those interested can afford him, in order to make the working of the proposed arrangements as little inconvenient as possible. In breaking up the meeting, I then, on behalf of Government, thanked the gentlemen present for their attendance, and acknowledged the courtesy which had lightened my own labour.

19. As the Conference was rising, a further conversation took place between some of the members and Mr. Finucane on the subject of the provision by the zamindars of coolies for the survey, the Lieutenant-Governor having, it was understood, expressed the hope to several zamindars, at his interviews with them, that help in this direction might be given so as to lighten the cost of survey. The offers then made were subsequently confirmed by an official letter from the Secretary to the Tirhut Landholders' Association, a copy of which is appended to this letter.

20. The general results of the Conference appear to me to be these :—

(1) It was made perfectly clear that the Government would insist on the maintenance of the record of rights up to date as necessary to secure permanent benefit from the original operations. It was made clear that the record should be maintained by a Government agency independent of all parties, and that a revision at the end of five or ten years was an arrangement which the Government could not accept while remaining responsible for the accuracy of the record as representing existing facts

(2) It was evident that, though the interests of the zamindars and the indigo planters are not uniform, and perhaps in some instances conflict, both these classes object to the annual maintenance up to date of the record of rights. They would rather that the records should not be maintained at all. Next to this they would prefer a revision after long periods—say of five or of ten years.

(3) Of the two schemes suggested to them, they prefer that of the kanungo dealing with larger areas to that of patwaris dealing with villages.

(4) The announcement of this preference enabled us to make the immediate concession, that the existing patwaris shall not be made use of for purposes of the survey, and shall remain free for the performance of the zamindari duties. The concession was received with satisfaction by zamindars and planters alike.

(5) We were able to show that the adoption of the kanungo scheme would involve the repeal of the Patwari Regulation XII of 1817 (a measure which would probably be satisfactory to zamindar and planter); provided that an efficient mode of maintaining the record of rights can be brought into operation.

(6) I hope that it was made quite clear that the Government, while adhering to the principles laid down, will consider, and adopt, if possible, all reasonable proposals intended to meet the wishes, or guard the interests, of those affected.

21. The main objections put forward to the introduction of any scheme were (1) the interference, (2) the cost, and (3) the probable dishonesty and exactions of the establishments. As the kanungo will have nothing to do with the collection of rent, or recording such collection, or with the letting of land, but will only deal with the maintenance of the record as completed by the survey, whereby all parties will have a standard of right to which to appeal; and as,

besides, he will be closely supervised by superior officers, the interference will be reduced to a minimum, and it will be certainly less than that authorized by the existing patwari regulations. The landlord's share of the cost, though to large zamindars it may be considerable simply because they possess large property, will be small to other classes, and every effort will be made to avoid needless expenditure. Among other things it is under consideration whether the fees and fines under the Land Registration Act VII (B.C.) of 1876 may not be credited to a District Fund for the maintenance of these land records. And after all, though that part of the expense which will not be recovered by registration fees, &c., will have to be met by a cess, the amount so raised will be much less than that now levied with doubtful legality for or by the patwaris. At the present time a zamindar has a patwari in every village, it is understood. When the record of rights has been prepared and is maintained, the duties of the patwaris will be diminished; and it will probably be possibly for a zamindar to do with fewer men than he now employs. Sir William Hudson, who has an intimate knowledge of the needs and condition of the raiyats, has publicly stated his opinion that they will gladly pay a rupee an acre for copies of the original record relating to their holdings. If this be so, they are not likely to object to pay their share at the rate of half an anna or so per acre per annum for its maintenance. It is too much to hope that there will be no instances of dishonesty or exactions; but the landholders of North Bihar possess great power and influence, and are in no way deficient in energy and courage; so that we may confidently look to them to report all instances which may come to their knowledge of malpractices directed to the injury of their raiyats and themselves. I cannot but hope that on further examination the force of these objections will prove to be less than it at present appears to them.

Proceedings of a Conference held at Muzaffarpur on August 3rd, 1893.

PRESENT.

The Hon'ble C. C. Stevens, Member of the Board of Revenue, Lower Provinces (in the Chair).
The Maharaja Bahadur of Darbhanga, K.C.I.E.
Raja Rameswar Singh Bahadur
A. Forbes, Esq., Commissioner of the Patna Division
The Hon'ble H. H. Risley, C.I.E., Secretary to the Government of Bengal in the Revenue Department.
Sir W. B. Hudson, K.C.I.E., President, Bihar Indigo Planters' Association
Colonel Sandeman, Director of Bengal Surveys.
M. Finucane, Esq., Officiating Secretary to the Board of Revenue
T. Gibbon, Esq., C.I.E., Manager, Bettiah Raj.
Henry Bell, Esq., Manager, Darbhanga Raj.
L. Hare, Esq., Collector of Muzaffarpur.
W. D. Blyth, Esq., Collector of Champaran.
W. C. Macpherson, Esq., Officiating Director of Land Records and Agriculture, Bengal.
E. Macnaghten, Esq., Secretary, Bihar Indigo Planters' Association
Babu Guru Prasad Sen, Secretary, Bihar Landholders' Association.
Babu Ram Dhari Sahai, Secretary, Tirhut Landholders' Association.
Rudston Brown, Esq., Indigo Planter.
R. Macrae, Esq., Indigo Planter.
E. G. Colvin, Esq., Settlement Officer, Champaran.
Babu Parmeswar Narain Mahtha.
" Mungal Parshad
" Rameswar Narain Mahtha.
" Jamuna Pershad Sukul.
" Sukeswar Narain Mahtha
P. C. Lyon, Esq., Settlement Officer, Muzaffarpur (Secretary).

MR. STEVENS, in opening the Conference, said:—

I have been directed by the Lieutenant-Governor to meet you for the discussion of the best means of making and maintaining the survey and record of rights in North Bihar.

I may say frankly that it has come to my notice that two nearly opposite doubts have been expressed regarding the objects and procedure of Government in this matter. Some appear to think that the Lieutenant-Governor has come down with his officers, bringing schemes cut and dried, and determined to adopt them, merely asking for the assent of those interested. Others think that there is nothing definite before them, and that they run the risk of being required to commit themselves prematurely to an opinion on propositions of a vague and shadowy nature. Neither of these apprehensions is well founded

The points which may be taken at the outset as settled finally and definitely are (1) that the record of survey and of rights is to be maintained; (2) it is to be a public document, the authenticity of which the Government must guarantee, so far as this is practicable; (3) and since the Government is thus responsible, it must not be in any way fettered in its discretion as to the period at which correction of the record should be made; (4) and, lastly, this is to be done by an agency under the complete control of Government and independent of any interested party.

As to the best method of attaining these objects, His Honour the Lieutenant-Governor is anxious to know the views and to study the interests of those who will be affected. The key to his position is to be found in the last paragraph of his reply to the landholders' address:—"Gentlemen," (he said) "I do entreat you to regard the question in a considerate and conciliatory spirit. I am here to discuss every point with you in a friendly and amicable way. I will do everything I can do within reason and the law to meet your wishes; and if only you will meet me in a similar spirit, as I feel confident you will, then I do think that between us we shall be able during the next few days to arrive at a reasonable understanding and a workable agreement on the matters that have to be settled between us." These are not the words of a Government which is prepared to neglect or refuse advice.

Two plans have been under consideration, viz., (1) the use of the patwaris registered under Regulation XII of 1817 to make the survey and to maintain the record, and (2) the employment of amins for the survey and of a special agency for maintenance. As to the former, it may serve to clear away some misapprehensions if I say at once that the retention of the present patwari in his existing relations is not proposed. If retained at all, he would be made a Government servant, subject only to the orders of the officers of Government, and liable to transfer or removal by them. The extent of the area assigned to him would be reconsidered and re-adjusted. The cesses levied for the patwaris' remuneration, under whatever name, must be taken for him still, though in a legal and probably altered shape. It is recognized that Regulation XII of 1817 must be revised so as to secure the above objects, though the Government is advised that the Regulation as it stands gives it a right to the services of the patwari, for the purposes of ascertaining and of recording facts connected with the villages, such as would be recorded in the record of rights, and that this right (though fallen into practical disuse) still exists legally. The Government is entitled to require the patwaris to give assistance and information in framing the record and in ascertaining the identity, and measuring the area, of the various plots of land in the village, to the extent of their ability. The exercise of these powers under the Regulation as it stands, especially under the unfavourable conditions which have gradually grown up, would, however, be involved in difficulty; and the dual control which it recognizes would be adverse to efficiency, even were there no other objections. If, therefore, the patwari agency is to be employed, it must be under considerably altered conditions.

The other scheme which has been suggested is that there shall be an unit of area. The unit of area is the circle of villages—the circle will contain perhaps 20 villages—instead of the single village. The circle officer will be, not the patwari, but a more highly qualified and better paid Government official, and the information to be recorded will be reduced to the minimum necessary for supplying adequate information as to the actual occupation of each field, its area and soil quality, the status of the occupier, conditions of occupation, and the rent and rent-rate payable. The scheme leaves the question of rent payment to be settled between the tenant and landlord without any intervention on the part of the executive Government. There will be only one statistical statement maintained, the "jinswar," which is not directly concerned with the relations of landlord and tenant, and which may be said to have more of an administrative than a fiscal aspect. The following is an extract from the Lieutenant-Governor's note on this scheme:—

"The importance of careful supervision in such a scheme as that under notice cannot be over-rated. I would therefore group the sub-kanungos' circles into circuits (of, say, 20 circles), to be placed under a kanungo on Rs. 50 per month, whom I would include in the subordinate provincial service. The entire land record staff of the district I would place under a Sub-Deputy Collector. The following estimate of total cost for an average Bihar district is therefore tentatively proposed :—

	Rs.
120 Sub-kanungos	3,000
120 Chainmen muharrirs...	1,200
6 Kanungos	300
1 Sub-Deputy Collector	175
	4,675
Pensionary charges at one-fifth	935
Per mensem	5,610
Per annum	67,320
Tour expenses	2 500
Stationery and survey appliances	1,180
Total ...	71,000

"As establishments have a tendency to grow, and as it might be found desirable to employ senior officers as District Land Records Deputy Collectors, this estimate might in time be exceeded. But it ought, I think, never to go beyond Rs. 75,000 per annum." I may, to prevent all risk of misunderstanding, repeat in other words what I have already

said. The discussion must postulate the maintenance of the record. This is not an open question. The record will be a public document, the authenticity of which the Government must guarantee so far as this is practicable. The Government must therefore not be in any way fettered as to its discretion to have annual corrections of the record, if it so decides.

The agency by which the record is to be maintained may be an agency dealing with (*a*) individual villages, or (*b*) circles of villages. If the former be decided on, the unit of agency would be the patwari. If the latter be decided on, the unit of agency would be the circle kanungo. In either case, the officer would be a whole-time Government official entirely independent of any other control.

If the patwari is decided on, the control exercised through him by Government will be close and continuous; and he may be required to furnish any information or statistics required by Government in regard to his village for administrative, judicial or other purposes. The patwari will not be at the disposal or control of the zamindar for any purpose whatever. He will have nothing to do with the collection of rent. But all arrangements connected with the land or the tenants must be brought on his records.

His pay will be levied from the zamindar and raiyats. It is believed that no more will be needed than the raiyats now pay for this purpose in the shape of *neg* where the *neg* has not been already consolidated with the rent or than what they pay for the purpose, though disguised as an addition to the rent, where the *neg* has been incorporated with the rent.

The landlords must make their own arrangements for rent collection.

If the circle kanungo be decided on, the information to be brought on record, and the enquiries to be made into village economy from time to time, will of course be less. And in this case the pay to be given to the officer will be higher, and generally the status of the officer will be better. The control to be exercised over the circle kanungo will be constant, and such as the Government deems adequate for guaranteeing the accuracy of the records.

When the agency is settled, the character of the maintenance will have to be discussed. The principle to be insisted on here is that we shall make the map the basis, and that we shall work up from the occupancy of every field to the landlord.

In conclusion, Gentlemen, I would note that it is necessary for us to decide first by what agency the record is to be maintained, before we discuss what agency we shall employ to make it

Mr. Bell said he was not quite sure that he understood the proposal as regards patwaris. If it was intended that they should cease to do any work for the zamindar, how were they to be paid?

Mr. Risley said that the method that would very likely be adopted was the addition of ½ anna to the road cess now levied, calculated on the present road cess returns Where the patwari *neg* had not been consolidated with the rent, a share, probably a half, would perhaps be levied from the raiyats.

Mr. Bell said that, as far as he knew, no patwari *neg* was levied.

Mr. Gibbon said that Government appeared to be under a misapprehension as to the nature of the patwari *neg*. It seemed to be assumed that the zamindar collected this cess from the raiyats and paid the patwari from the proceeds. This was not the case. The patwari was the person who levied the cess, which was called by different names in different villages, and he collected the cess himself. In some villages he had recently taken to entering the amount of this cess as a footnote to the jamabandi, but the zamindar never fingered it. He believed that, whether Government took away collections from the patwari or not, he would continue to collect his cess from the raiyat.

Mr Finucane said that Mr. Gibbon's account of the cess might be presumed to be correct in reference to Champaran, but that this would make no difference to the scheme.

Mr Bell, on the other hand, considered that the point was a most important one. Although the zamindars were to get no benefit from the patwari, they were to have to pay for him. He asked why they should have to pay at all when no cess had been consolidated with the rent. They had no concern with mere matters of general administration which should be paid for by the whole community.

Mr. Gibbon protested that Government was still assuming that the raiyats paid the cess to the zamindar.

Mr. Risley said that the effect of the High Court judgment in the matter of patwari *neg* had been to give them a *tabula rasa*, and any scheme now proposed would have to be a wholly new one.

Mr. Bell said that the arrangements for payment would in fact amount to the imposition of a patwari cess.

Mr. Finucane concurred.

Mr. Bell said that the zamindars were not at present in a position to express any opinion on the schemes. His Honour the Lieutenant-Governor, in writing demi-officially to Sir William Hudson, had promised them a scheme combining the minimum of expense and the minimum of interference. At present they had no knowledge of the details of these schemes. How was the sub-kanungo going to perform his duties? What powers were to be given to him? Was he to be authorized to go into the villages, summon all the raiyats, call for papers and books, &c., &c.? It was most important that such points as these should not be reserved for future determination, but should be decided first. Again, what validity was to be given to these men's corrections? They had no information on these points, and would be glad to see the two schemes drawn up in bill form, and to be given time to consider those bills.

Mr. Risley enquired whether they were prepared to consider the schemes at once if they should be put before them in bill form.

Mr. Bell could not promise this, and said that the action to be taken now was too important to be hurriedly decided on, as any scheme now adopted would probably be extended later on to the whole of Bihar and to Bengal as well.

Mr. Risley then explained further the details of the second, or kanungo, scheme. He claimed that it prescribed the minimum of interference. The irreducible minimum of that interference was the year-by-year correction of entries affecting the possession, area, &c., of the fields in each village. The minimum of expense was secured by making the area to be dealt with by each sub-kanungo as large as possible. In the matter of legal validity, it was necessary to go back to section 119 of the Bengal Tenancy Act, and to consider what the legal validity was which was attached to the original entries made in the record. This was the starting point. The original entries were of two classes, (1) disputed, and (2) undisputed. The High Court had declared that the decisions arrived at in the matter of disputed entries were *res judicata*. The undisputed entries were merely presumed to be correct until the contrary was shown. The corrections would similarly be divided into disputed and undisputed entries. The undisputed corrections to which both parties agreed would stand on the same footing as the original undisputed entries, and the burden of proof that they were incorrect would lie on the person contesting them whereas, in the case of disputed entries, the statements made by each party would be noted by the sub-kanungo, and a contemporaneous record would thus be secured of the allegations made on each side, *valeat quantum*, admissible in evidence, but not creating any legal presumption whatever.

Mr. Bell contended that such entries could not be made evidence, as being *res inter alios acta*.

Mr. Risley went on to say that, if it was objected that no legal presumption should attach in any case to an unverified entry made by a sub kanungo, there was the alternative of having every entry made by him attested by an officer exercising the powers of a Revenue Officer under the Tenancy Act, during an annual revision. The officer in this case would be of equal rank with the Settlement or Assistant Settlement Officer who framed the original record, and it would be proposed to attach a legal presumption of correctness only to those entries which had been verified by him, and to attach no importance to unverified entries. But this development of the scheme would of course somewhat enhance the cost.

Mr. Bell said he would be glad to see all these proposals down on paper.

Sir William Hudson enquired whether the officials present were pledged to act on lines already laid down for them, or were free to give their own views on the schemes under discussion. He said that he and others with him required assistance in dealing with such administrative schemes, and that there were many non-officials who would give much weight to the opinion of officials who had had practical experience of the difficulties to be met with in the field.

Mr. Finucane pointed out that the two schemes were very similar, and that the choice lay merely between the employment of small men in small areas, and the employment of more important and better paid men in larger areas. Did the gentlemen present want large or small areas as units?

Sir William Hudson enquired whether Government was prepared to accept and debate any scheme other than those now proposed.

Mr. Risley replied in the affirmative, but added that Government would reserve the right to declare that any scheme that might be proposed did not amount to maintenance of the record at all.

Mr. Stevens repeated the limitations referred to in his opening speech, on which Government had determined, and said that the Lieutenant-Governor was anxious to receive the views of non-officials

Sir William Hudson said that the non-officials would be glad to have the opinion of officials of practical experience as to whether they believed in the present schemes and anticipated their success.

Mr. Forbes remarked that Government had had the benefit of the opinion of such officials before propounding the present schemes.

Mr. Stevens added that the present meeting had been called in order that Government might ascertain the facts and hear the opinions of non-official gentlemen interested.

Mr. Bell was afraid that time was being wasted, as no real discussion could be entered upon until the details of the scheme had been considered. There being no reporters present, mere verbal statements could not be accepted by the zamindars. Sir Charles Elliott had promised the abolition of the patwari.

Mr. Risley said that any such promise was conditional on the acceptance of the scheme then under discussion, which had been abandoned.

Sir William Hudson concurred

Copies of a draft Bill, with rules to be made under it, were then distributed to the gentlemen present as being a first sketch of the kanungo scheme.

Mr. Gibbon then enquired whether the sub-kanungo would not form some sort of court, how he was to compel the production of evidence, and what he was to do when evidence was persistently withheld from him. He contended that no case had yet been made out for the maintenance of the record at all, but that if it was to be maintained, they must choose whichever scheme appeared to them to be the lesser evil. How could they do this with no details before them? How was evidence to be taken? Would the sub-kanungo have power

to summon him (Mr. Gibbon) and to call upon him to produce papers? If he refused, was he to be fined?

Mr. Risley said that all these points would be provided for in a rule-making section, and that all rules drafted under the section would be published for criticism, and that all criticisms would be considered by the executive authorities.

Mr. Bell intimated that the zamindars would be more strongly opposed to the Bill if power were to be given to the executive to make rules to carry out its provisions.

Mr. Finucane said that all the points raised by Mr. Gibbon would be found to have been answered in the Bill and the rules drafted under it.

Mr. Gibbon enquired further whether the courts would accept the entries as evidence without the evidence of the man who made them

Mr. Finucane said that this was provided for, and proceeded to explain that a safeguard had been introduced into the scheme in the provision made for the filing of lists of changes to be made in the record in the sub-kanungo's office. In this way a zamindar would be able to place on record his opinion as to the alterations which the sub-kanungo should make. The Deputy Collector would go into every village and verify every entry in detail

Mr. Bell asked what would happen if no one appeared before the Deputy Collector or sub-kanungo, or if the raiyats and zamindars all agreed to conceal alterations and to announce that there were none to be made.

Mr. Finucane said that in such cases no changes would be recorded.

Mr. Bell contended that in that case the scheme would not secure the maintenance of the record, and said that in the North-Western Provinces raiyats and zamindars combined to deny the existence of changes in order to get rid of the harassment of the Government agent who was deputed to record them.

Mr. Risley and Mr. Finucane believed that the parties to changes would not adopt this attitude as soon as they appreciated the advantages that they would obtain by having the corrections made.

Mr. Finucane said, in answer to Mr. Gibbon, that all transfers of holdings or portion of holdings that were alleged to exist would be noted, even if they were illegal, but that such entries would in no way operate to legalise them.

Mr. Gibbon further enquired whether the record was to be binding as between zamindar and raiyat only, or as between raiyat and raiyat also. Were all mortgages, zar-peshgis, and the like to be recorded, even though they were illegal, without the zamindar's approval.

Mr. Finucane said that all these points were to be found in the Bill and the rules under it. All mortgages involving possession would be noted.

Mr. Bell enquired what difference there was between the two schemes.

Mr. Finucane said that any Bill and rules that might be drafted to give effect to the patwari scheme would be very similar to those in the hands of the gentlemen present. There would be a change in the area of the unit, in the personality of the agent, and in the method of realising the cost of the maintenance of the record. The patwari scheme would be the more expensive. Both schemes were purely tentative. Government would be prepared to accept any better scheme if one can be put forward.

Mr. Risley added that the tendency under the patwari scheme would undoubtedly be towards greater interference. The area dealt with by each patwari being small, he would be asked for more elaborate information about it, and would probably be called on for local reports in judicial matters, and for census and other statistical information useful for administrative purposes. It would be impossible to ask for all these statistics from men dealing with the larger areas that were to be given to sub-kanungos.

Mr. Bell understood that the zamindars were to have nothing to do with the patwari or his returns or his statistics, or indeed with his work in any way, but were to retain the privilege of paying for him.

Messrs. Risley and Finucane agreed that the zamindars would not be called upon for any returns or statistics of a general character, but added that the zamindars and raiyats alike would be benefited by the operation of the scheme, and would be asked to pay in equal shares for the benefit derived.

Mr. Gibbon then enquired whether Government would devise some summary procedure for the recovery of rent.

Mr. Risley said that it was impossible to devise any such procedure until the maintenance of the record had been secured.

Mr. Gibbon asked whether Government would promise to devise some such procedure, if the zamindars agreed to the proposals made for the maintenance of the record.

Mr. Risley said that no such promise could be given, and that Government could not go beyond Sir Charles Elliott's statement in Council that "he hoped it might be possible" to devise such a scheme.

Mr. Gibbon wanted to know what security they had that Government would not go beyond their present requirements in the matter of returns and statistics, and that interference would always be at a minimum. He contended that no one could pledge Government to this.

Mr. Finucane referred to the draft Bill, and pointed out that everything done under it must be confined to the record of transfers and to subjects connected with the maintenance of the record of rights. Obviously if any summary procedure could be devised at all it could not be till we got rid of disputes. The first step to shortening procedure is to minimise the possibility of there being matter left to dispute over; the record of rights, and the scheme for its maintenance, aim at effecting this object.

Mr. Gibbon feared that interference would certainly increase.

Babu Parmesvar Narain Mahtha cited as an example of increasing interference a recent addition to the road cess return form which required the entry of rates of rent—a completely new departure.

Mr. Bell thought that the instance showed the danger of trusting to the generalities that were being freely expressed.

Mr. Risley enquired what Mr. Bell would regard as an ideal method of maintaining the record.

Mr. Bell said that he agreed with Mr. Gibbon and Mr. Macnaghten that a periodical revision should be made at intervals of 10 years, and that no further attempts should be made to devise a scheme that it was impossible to work.

Mr. Stevens said that this could not be taken as a proposition, but merely as an opinion.

The Maharaja of Darbhanga said he could not express any opinion until the papers had been circulated among the members of the Bihar Landholders' Association and he had received their replies, but he would prefer Mr. Bell's suggestion for the periodical revision of the records if they were to be kept up at all.

Sir William Hudson agreed, but wished to add:—"Unless Government is prepared to give us a summary procedure for the recovery of rent."

Mr. Gibbon agreed, but wished to add:—"If Government insist, against our opinion, on the maintenance of the record by any other means, I would prefer the scheme suggested in the Government letter of June 30th, 1892."

Babu Ram Dhari Sahai agreed with Mr. Bell's suggestion.

Mr. Risley enquired whether, if Mr. Bell's suggestion could not be accepted by Government, the gentlemen present were prepared to offer an opinion on the schemes that had been submitted to them.

Mr. Bell and the Maharaja of Darbhanga expressed their inability to give a personal opinion on the point at present, as time was required to enable them to circulate the scheme among the members of the Bihar Landholders' Association

Mr. Stevens enquired whether the opinions that had been expressed preferring a decennial revision were also liable to modification after further consideration.

Sir William Hudson said that those opinions were a plain and clear answer to a definite question propounded by Mr. Risley.

The Maharaja of Darbhanga, in reference to his opinion on that point, cited the case of the records of his own villages which were surveyed in 1878, and had recently been resurveyed, and in which very few alterations were found to be necessary.

Mr. Bell gave some details of those changes.

Mr. Finucane pointed out that a record that had been left uncorrected for five years would be quite useless in the courts, and that legal validity could only be secured for the record by its proper annual maintenance. Unless this were secured it would be impossible to devise any procedure for the summary recovery of rents or for simplifying the evidence under the ordinary procedure.

Mr. Bell disagreed and expressed his opinion that the Government of India should not force the maintenance of the record on the Provincial Government when a gentleman of the vast experience of Mr. Gibbon had declared that it was impossible to secure it.

Mr. Risley enquired, with reference to the registration scheme preferred by Mr. Gibbon, what was to be done with the map. The papers could be kept up under that scheme, but not the map.

Sir William Hudson pointed out that 8 out of 10 per cent. (the figure adopted as representing probable alterations) would be succession transfers involving no alteration of the map.

Mr. Stevens then asked for an answer whether, if it be determined that the record must be maintained annually or concurrently, the patwari would be preferred to the sub-kanungo.

Mr. Finucane again explained the difference between the two schemes.

The Maharaja of Darbhanga said no answer could at present be given.

Mr. Gibbon enquired whether he was to continue to nominate additional patwaris, substitutes for unfit patwaris, and the like.

Mr Stevens said that Mr. Gibbon should formulate his question and send it up through the Collector of Champaran, but that in the meantime no change should be made in his present procedure.

Babu Ram Dhari Sahai enquired whether the registration of patwaris was to continue.

Mr. Stevens said that further orders would be subsequently issued on this point.

Messrs. Gibbon and Bell enquired whether the draft Bill and rules could be regarded as an official document.

Mr. Finucane said it was only a first draft not yet seen by the Lieutenant-Governor, but added that it had been prepared on the lines of His Honour's scheme.

Mr. Bell thought that the details of the scheme were of such importance that he would like to know, before he considered it, whether the Lieutenant-Governor approved of the draft.

As to a further meeting of the Conference, Sir William Hudson thought any such meeting would be unnecessary until at least a definite reply had been given to the suggestion that the records should be revised decennially.

After some discussion the Conference was adjourned to 8 A.M, on Saturday, the 5th August.

P. C. LYON,
Secretary.

Proceedings of a Conference held at Muzaffarpur on August 5th, 1893.

PRESENT:

The Hon'ble C. C. Stevens, Member of the Board of Revenue, Lower Provinces (in the Chair).
The Maharaja Bahadur of Darbhanga, K.C.I.E.
Raja Ramesvar Singh Bahadur.
A Forbes, Esq, Commissioner of the Patna Division.
The Hon'ble H. H. Risley, C.I.E., Secretary to the Government of Bengal in the Revenue Department.
Sir W. B. Hudson, K.C.I.E., President, Bihar Indigo Planters' Association.
Colonel Sandeman, Director of Bengal Surveys.
M. Finucane, Esq., Offg. Secretary to the Board of Revenue.
Henry Bell, Esq., Manager, Darbhanga Raj.
Babu Bepin Behari Bose, Manager, Hutwa Raj.
L. Hare, Esq.. Collector of Muzaffarpur.
W. D. Blyth, Esq., Collector of Champaran.
W. C. Macpherson. Esq., Offg. Director of Land Records and Agriculture, Bengal.
E R. Macnaghten, Esq., Secretary, Bihar Indigo Planters' Association.
E. G. Colvin, Esq., Settlement Officer, Champaran.
H Collingridge, Esq., Indigo Planter.
Rudston Brown, Esq., "
Rowland Hudson, Esq., "
A. Macrae, Esq., "
E. Stevens, Esq., "
Babu Ram Dhari Sahai, Secretary, Tirhut Landholders' Association.
Babu Ramesvar Narain Mahtha.
" Parmesvar Narain Mahtha.
" Sridesvar Narain Mahtha.
P. C. Lyon, Esq., Settlement Officer, Muzaffarpur (Secretary).

The minutes of the proceedings of the meeting held on August 3rd were taken as read and were agreed to, Mr. Bell and Sir William Hudson having previously read and considered them and admitted their accuracy. With reference to the remark made by him (see page 4 of the minutes) that in certain circumstances "no changes would be recorded," Mr. Finucane explained that he meant that no changes would be recorded by the sub-kanungo at that time. But the draft Bill provided for further action to compel information in cases of wilful obstruction or concealment. If it were found that information as to transfers was being kept back, and all other means of obtaining that information failed, the Collector would issue a notice calling for returns, and would insist on their being filed, imposing a fine for their non-production. And should the returns thus obtained prove incorrect, the zamindar would be liable.

Mr. Bell enquired whether the zamindar was to be held responsible for all inaccuracies in his returns discovered or alleged to exist by the sub-kanungo. In many cases he might be unaware of the existence of changes.

Mr. Finucane explained that it was only in cases of direct obstruction that the penal clause would come into play. The stages would be as follows: —

(1) The parties would or would not file returns. This was at their option.
(2) The sub-kanungo would go to the village and make enquiries as to changes after due notice of his intended visit to all parties concerned.
(3) If he could gather no information, and there was evidence to show that there had been changes, and that both zamindars and raiyats were combining to conceal them, the sub-kanungo would report accordingly.
(4) The Collector would then consider the report and, if he thought fit, call on both parties to file statements.
(5) Then, if the parties still refused to file statements, or filed false ones, the penal clause would come into operation.

Sir William Hudson said that he thought that self-interest would prevent the occurrence of such cases.

Mr. Finucane said that his long practical experience satisfied him that, as a matter of fact, neither zamindar nor raiyat was ever found to resist contumaciously any reasonable procedure of the Government, and he hoped and believed they would not do so in the matter now under consideration.

Mr. Risley said that a draft Bill must be consistent and complete to stand against criticisms in Council, and that even unlikely contingencies had to be provided against.

Sir William Hudson said that he and others objected to the penal clause, on the ground that it gave the sub-kanungo a handle against both zamindar and raiyat, and that it was by using this handle that he would be enabled to extort bribes and reap his harvest.

Mr. Finucane said that the provision was not essential to the Bill, and might perhaps be modified in Select Committee.

Mr. Stevens remarked that at the last meeting they had been asked what sanction had been provided for such a case.

Sir W. Hudson said that the enquiry had only been made to show that the last state of the zamindar would be worse than the first. He contended that the section would give the sub-kanungo power to harass.

Mr. Risley pointed out that he was to be checked by superior officers, among whom was the Collector.

Sir William Hudson said that the Collector must be omitted from consideration, as he could not be expected to exercise effective control.

Mr. Bell said that, as a matter of fact, the zamindars would never be disabused of their belief in the power of the sub-kanungos. They would be paid for making entries, and then, in order to avoid the payment, both zamindar and raiyat would combine to conceal changes. The sub-kanungo would also think that he could best justify his appointment and show zeal by harassing all parties for information.

Mr. Finucane said he had not wished to raise a discussion about details, but only to point out what procedure would be followed in the case of combination.

Sir William Hudson said that, if the zamindar and raiyat combined and were determined to conceal changes, no procedure could be devised to make them disclose them. They wished to have the provision omitted.

Mr. Stevens then said:—At the end of our last meeting it was remarked that perhaps no further meeting was necessary till the definite orders of Government should be given on the suggestion of quinquennial or decennial revisions. I had intended to make it clear that this suggestion could not be adopted. The Lieutenant-Governor is fully persuaded that the discretion of the Government, which will be responsible for the accuracy of the record, should not be fettered by any conditions as to the periods at which corrections should be made, and he cannot accept the proposals to make these periods quinquennial or decennial.

I regret that Mr. Gibbon is not with us to-day, not only because we shall miss the benefit of his present advice and criticisms, but also because I wish to read to you a part of a letter, to which I attach great importance, written by him on the 24th October 1878, to the President of the Bihar Rent Law Committee:—

"The patwari should be nominated by the district officers, be the servant of Government, paid by the Government: he should be, as originally intended, 'a record-keeper,' and nothing but a record-keeper, entrusted with no executive powers. He should have nothing to do with the village collections, granting receipts, giving pattas and kabuliyats, &c., &c.; the zamindar should be compelled to do all this through his own servants.

"The patwari being the record-keeper, the zamindar should be compelled to hand him copies in duplicate of the past year's rent-roll (*jamabandi*) and balance sheet (*wasil-baki*), the current year's ticca land accounts (*arsatta*) and instalments paper (*behri*), quarterly returns of all assessment papers (*khasras*), and also collections made (*seahas*), memoranda of lands relinquished by raiyats and new lands bandobasta with raiyats, with a list of pattas given and kabuliyats received.

"One copy should remain with the patwari, the other be signed by the patwari and returned to the landholder. The patwari should be a good accountant and know something of surveying, in case you think it necessary that all measurement of jotes should be made by the patwari. The raiyat should at all times have access to the patwari's papers, and the patwari be bound to afford him all information as to the state of his account.

"Instead of each petty village of from one to two hundred rupees rent-roll having a patwari of its own, the district should be divided into circles with rent-rolls of not less than Rs. 5,000, not more than Rs. 10,000. It should be optional with landholders to dispense with the present staff of men. Half the amount of money now expended by zamindars on the present staff, paid into Government treasuries, would be sufficient to secure the services of efficient men, and would be a saving to the zamindars, as it would enable them to get rid of the men who cannot afford to be honest on the small salaries they receive.

"All returns called for by district officers should represent the exact terms of the holdings, however ridiculous to them such terms may appear."

After our meeting on Thursday, I told Mr. Gibbon that I had thought of reading this letter to the Conference that day, but that I deemed it better not to do so, since I was afraid that the effect might be to lead to irrelevant discussion, and I might have added that I was unwilling to forestal him in anything he might wish to say. He replied that I might have read it, and that there was nothing in it regarding which he had changed his views as to the conditions which then existed, but that circumstances have since become altered: when the letter was written, there was no survey or immediate prospect of one. But the difference which this change has made seems to me to be at the most one of convenience rather than of principle. In other words, the suggestions then made were proper in themselves, though the survey now, in Mr. Gibbon's opinion, makes it unnecessary that they should be carried out. You will notice that the following considerations underlie those suggestions:—

(1) It is right that Government should have at its disposal a local agency of contemporaneous record.

(2) That agency should have no connection with the collection of rents, but should be entirely at the service of Government, and should be nominated and paid by Government officers.

(3) It is reasonable that the zamindars should pay at least a share of the necessary expenditure direct into the Government treasury.

(4) It is possible to secure, consistently with due economy, the services of efficient men.

(5) The areas to be dealt with by these record-keepers should be readjusted, and the district divided into convenient and fairly uniform circles considerably larger than those of the existing patwaris usually are.

(6) The present staff of patwaris should be placed at the disposal of the zamindars, to keep or to dispense with at their option.

These considerations, Gentlemen, are. you will perceive, exactly those on which the scheme now before you is based, and the only question is whether the survey has superseded them. In the opinion of Government it has not done so.

Just before we separated on Thursday, the very natural question was asked, whether the Bill then in your hands was to be taken as official, and as representing the views of the Lieutenant-Governor. You were told in reply that it was based on the Lieutenant-Governor's suggestions, but had not in its present form been considered by him. He has since seen the Bill, and I am authorized to tell you that he has accepted it as a provisional basis of legislation subject to the following modifications, on which he would like to be favoured with your opinion:—

(1) A section should be introduced (after section 12?) imposing on the transferee (or successor) of a tenure, rent-free holding, or occupancy right, the obligation (subject to penalty of fine?) to report the circumstance of transfer to the kanungo. A fee should be levied on each transfer, &c.

(2) The Collector and Registrar of Assurances should be bound to report to the kanungo all mutations, transfers, &c., under Acts VII (B.C.) of 1876 and III of 1877.

(3) The fees to be levied under clause (1) above to be credited to a Land Record Fund for the district. All copying fees and fines, &c., to be credited to the same Fund. [It is for consideration whether fees under the Land Registration Act VII (B C.) of 1876 should not be credited to the same Fund.]

(4) The "Land Record Cess" to be subject to a statutory maximum of ½ anna per rupee of rent, but the *rate* at which it is to be levied to be fixed annually, with reference to the estimated income from "Fees" and "Fines." The accounts of the Fund to be published annually.

(5) Omit the proviso to section 4 of the draft Bill.

(6) Consider whether the officer should not be called kanungo instead of sub-kanungo. The higher officers to have higher titles.

(7) The question of amending the Land Registration Act of 1876 and the Transfer of Property Act, with the view of relieving landholders from the obligation of effecting double registrations (*i e.*, in the Land Record and the Land Registration Offices), and of giving them the option of registering in the Registration Office alone, to be considered when the Bill is being prepared for submission to the Government of India, previous to introduction into Council."

I will say in conclusion that the strength of the supervising staff and the area of the sub-kanungo's jurisdiction are matters still open to consideration. If it be found possible for a better paid and higher class of official to cover a larger area, this may be subsequently arranged.

Mr. Macnaghten said that Mr. Gibbon had authorised him to say, with reference to the letter that had been quoted, that he claimed his right to change his opinions, that circumstances had altered since 1878, and that he did not adhere to the opinions expressed in the letter

Sir William Hudson said that the principal reason that had induced Mr. Gibbon's change of opinion was the state of the law as regards the transfer of raiyats' holdings. As long as that was in a fluid state he could not hold by that former opinion. He (Sir William Hudson) was personally of the opinion that in the raiyats' interest the right of transfer should be abolished.

Mr. Bell said that they preferred Mr. Gibbon's present opinions to those expressed 15 years ago.

Mr. Stevens said that he had not understood Mr. Gibbon to say that he had changed his opinions, but that the conditions on which those opinions had been based had been changed. The letter had been read from no desire to convict Mr. Gibbon of inconsistency, or to deny him the right to change his views; the object was to show that the Lieutenant-Governor's scheme was not a mere official invention, but was exactly consistent with the opinion once held by an esteemed unofficial adviser of Government of great experience.

Sir William Hudson said that he understood that the Lieutenant-Governor's remarks on the Bill were all dependent on the choice that might be made by them.

Mr. Stevens agreed, and said that he was authorised to say that the Lieutenant-Governor would be quite prepared to come down to the meeting and discuss any particular points or amendments to the Bill.

Mr. Bell thought it was not necessary to trouble the Lieutenant-Governor to come.

Mr. Finucane said that the Lieutenant-Governor's note consisted of a series of concessions that he believed would be acceptable to the zamindars.

Mr. Stevens then asked whether the gentlemen present could now give him an opinion as to which of the schemes was to be preferred.

The Maharaja of Darbhanga said that he could not give an authoritative reply, as he had not had time to consult the members of the Bihar Landlords' Association, but that personally, as a choice of evils, he preferred the scheme in which the agent was to have a larger area and be better paid

Sir William Hudson concurred, and asked that the complete scheme for the employment of sub-kanungos might be circulated for criticism. He then asked what executive orders were now to be issued respecting the registration and training of patwaris.

Mr. Stevens said that if the sub-kanungo scheme was the one preferred by them, he was prepared, under the Lieutenant-Governor's instructions, to stop all further action in the direction of the registration and training of patwaris. The entire abolition of the patwari system formed part of the kanungo scheme.

Mr. Finucane said that the Lieutenant-Governor was prepared to consider any reasonable modifications of the provisions of section 17 of the draft Bill when it went into Select Committee. It would not be put forward as a Government proposal to be necessarily passed in its present form.

Mr. Stevens added that in all matters of detail His Honour would be prepared to consider any reasonable proposals.

Sir William Hudson said that the question of the amount of interference was of great importance to them. Many of them thought that an extension of the area of the circles, and of the period of each revision, would diminish the amount of interference. He believed that three-quarters of the transfers would be succession transfers, involving little alteration of the records, and that the work in an area of 25 square miles would be light, especially if it should not be deemed necessary to recognise as transfers petty family arrangements, by which members of the same family privately divided up their lands amongst themselves. He was of opinion that the area might be extended, and that, if the period were also extended, a sub-kanungo might do the work of 100 square miles.

Mr. Finucane understood that the principle that Government would follow would be to extend the area to the maximum consistent with efficient work. Experience would show what that maximum was.

Sir William Hudson asked if Government would say definitely that no extension of time could be granted.

Mr. Stevens replied that this could not be said. Government could not bind itself as to the period of revision. In the matter of area, his personal opinion was that it would be dangerous to start by giving the sub-kanungo too large a charge, as this would involve risk of failure, but the general wish to have larger areas and fewer men, and those of a higher class, would be borne in mind; and if experience should show that larger areas could be adopted, it would be easy to make a change.

Sir William Hudson remarked that if we began with small areas, it was improbable that those areas would afterwards be enlarged.

Mr. Risley asked whether biennial corrections would not be of less value from a landlord's point of view in Civil Court suit than annual corrections.

Mr. Stevens thought it was unnecessary to discuss these details at the present time.

The Maharaja of Darbhanga asked that the Lieutenant-Governor's remarks might be put on the minutes of the proceedings, and that the zamindars might be favoured with as full an exposition of the views of Government as could conveniently be given.

Mr. Risley said that the Bill and rules would be circulated for criticism, and would doubtless form the nucleus of a vast amount of literature and discussion.

Mr. Stevens said that on Thursday he had laid before them, on behalf of Government, the four principles which the Government insisted on as fundamental. The details to be found in the draft Bill and rules and in the Lieutenant-Governor's remarks were on a different footing altogether. In reference to these, the Government was not only willing but anxious to obtain advice and help. It was completely recognised that the gentlemen present were in possession of a practical knowledge of facts which few officers of Government could acquire, and it was highly probable that even those gentlemen themselves could not fully appreciate the interests of other classes not represented at the meeting. He thanked the gentlemen present for their attendance; and on his own behalf he thanked them for making his labours easy by the friendly and courteous manner in which their discussions had been conducted.

The meeting then adjourned.

P. C. LYON,
Secretary.

Dated Muzaffarpur, the 7th August 1893.

From—Babu Ram Dhari Sahai, Hony. Secy., Tirhut Landholders' Association,
To—The Secretary to the Board of Revenue, Lower Provinces.

With reference to the supply of coolies by zamindars, I am directed to state as follows:—

2. The zamindars are willing to give the services of three coolies at their own cost to accompany each amin that will be deputed to survey their entire and partitioned villages, it of course being understood that they will be employed by the amins solely on survey work and for such length of time only as the survey will continue; their employment will be contemporaneous with the continuance of the survey, and it will cease on the evening of the day it is completed. The amins should be directed to give a receipt to each zamindar, specifying the date, time, and the number of coolies that have been placed by him at their disposal. The zamindars should have the option, on receipt of the notice proposed to be given to them by the Survey Office, as to the probable date of the commencement of the work, and the estimated number of days for which the coolies would be required, either to supply coolies or pay in a lump sum of money to the Survey Office sufficient to cover their wages. We consider that Re. 1-13 per 100 bighas would sufficiently cover them, calculating

their wages at Rs. 3 a month. On payment of such sum of money, all responsibilities of the zamindar to provide for coolies shall cease.

3. As regards co-parcenary villages, any zamindar giving coolies shall be entitled to recover the amount jointly and severally from the pottidars. I am aware that there is no legal provision to that effect, but consideration might be made for it in the apportionment of costs, and on this subject I shall address you later on.

4. I may add that the advantages of the present offer would only be complete with the co-operation of the amins. As we have every desire to reduce the cost of the survey and meet the wishes of Government, we have made the offer; but as it will go to reduce a considerable amount of the profit which is now being made in the supply of coolies, you must be prepared to face considerable obstacles and opposition from the interested quarter.

5. I am directed to say that His Highness the Maharaja Bahadur of Darbhanga, Raja Rameshwar Singh, Bahadur, and Mr. Rott, Manager, Narhan estate, fully agree with the above.

6. I may add that a large number of zamindars have signed a declaration form undertaking to supply coolies for each amin while the survey is going on or to pay in their wages to the Survey Office in a lump sum at Rs. 3 a month.

---

(2)

Government order, dated the 15*th August* 1893, *addressed to the Board of Revenue.*

I AM directed by the Officiating Lieutenant-Governor to acknowledge the receipt of the Hon'ble Mr. Stevens' letter No. 826A., dated 14th August 1893, with its enclosure. Mr. Stevens' letter and the Minutes of Proceedings give a clear account of the deliberations of the Conference held with the representatives of the zamindars and indigo planters of Bihar on the subject of the cadastral survey and maintenance of the record of rights in North Bihar, and of the results of that Conference. Briefly stated, the results are that the influential and representative gentlemen who attended the Conference, while re-affirming their opposition to the survey and maintenance of the record altogether, but regarding the contingency that such opposition might prove fruitless, have admitted their preference for a system of maintenance through kanungos; that is, on the lines of the scheme proposed for criticism by His Honour the Officiating Lieutenant-Governor. This preference implies the rejection of the system of maintenance through village patwaris. The expression of this preference has been accepted by His Honour as decisive between the several schemes of maintenance, and orders will be at once issued to suspend the registration of patwaris under Regulation XII, 1817, or their utilization for survey purposes. The Lieutenant-Governor understands that this decision, which has already been communicated to the zamindars and indigo planters, has afforded them gratification.

The results of the conference are satisfactory to the Officiating Lieutenant-Governor, as clearly defining the situation, enabling Government to act with greater freedom and effect, and leading to the immediate removal of all those difficulties and uncertainties as to the agency by which the survay should be made and the record subsequently maintained, which had been gathering round the operations in North Bihar. These operations will now be prosecuted with vigour to a well-defined end by officers under the complete control of the Government alone, and subject to the checks and guarantees for accuracy of work which have been sanctioned by the Officiating Lieutenant-Governor at his interviews with the Hon'ble Mr. Stevens and the Settlement Officers, and Messrs. Carey and Craddock of the Central Provinces' Commission.

Measures will also be taken now to procure the necessary legal sanction to the creation of a land record agency on the lines indicated in the draft scheme and which were laid before the conference.

Sir Antony MacDonnell desires me in conclusion to convey his thanks to the Hon'ble Mr. Stevens for the judicious and effective way in which the proceedings were conducted by him. His Honour fully endorses the praise given by Mr. Stevens to the gentlemen, official and non-official, who attended the Conference. In his reply to the Tirhut Landholders' address on the 7th instant at Muzaffarpur, Sir Antony MacDonnell acknowledged the practical and helpful manner in which, always on the assumption that the record was to be maintained, the zamindars had co-operated with the officers of Government during the discussions, and the assistance they promised the Survey Department in the shape of unskilled labour free of charge.

ENCLOSURE IV.

(1) *Letter from* Babu Ram Dhari Sahai, *Honorary Secretary, Tirhut Landholders' Association, dated the* 21*st August* 1893, *to the Secretary to the Government of Bengal, Revenue Department, forwarding two Resolutions of the Tirhut Landholder's Association.*

(2) *Letter No.* 896*T—R., dated the* 1*st September* 1893, *from the Officiating Secretary to the Government of Bengal, Revenue Depatrment, to the Honorary Secretary, Tirhut Landholders' Association.*

[Resolution I is referred to in paragraph 5 of the Minute.]

(1)

I am directed to have the honour to enclose herewith two Resolutions which have been passed by the members of the Tirhut Landholders' Association, with a request that you will be pleased to lay them before His Honour the Lieutenant-Governor of Bengal for His Honour's information.

Tirhut Landholders' Association, Muzaffarpur.

Resolution I.

Proposed by Babu Parmeshwar Narayen Mahtha, seconded by Babu Ram Dhari Sahai, that the thanks of the zamindars of this district be communicated to the Hon'ble Sir A. P. MacDonnell, Officiating Lieutenant-Governor of Bengal, for withdrawing his recent orders regarding the registration of patwaris in this district—an order which has given great relief to us at present.

Resolution II.

Proposed by Babu Bhugwati Churn, seconded by Babu Vishnath Pershad Mahtha, that thanks be communicated to the various officers of the Government, who have spared no pains to apprise the Government of the inconvenience to which the zamindars would be put to by the registration of patwaris and its following consequences.

Ram Dahari Sahai,
Honorary Secretary, Tirhut Landholders' Association.

(2)

I am desired by the Officiating Lieutenant-Governor to acknowledge and thank the Tirhut Landholders' Association for the copy of the Resolutions adopted by that body in connection with the suspension of the registration of patwaris in Bihar. The registration of patwaris was undertaken with two objects, namely, with the immediate object of reducing the costs of survey, and with the ultimate object of providing an agency for maintaining the record when the survey had been made. The zamindars were, however, averse to their patwaris being registered and employed on either duty, and preferred a scheme of maintenance through officers of a superior status, which had been submitted by the Lieutenant-Governor as an alternative plan for their consideration.

In view of this prefererce, and of the reluctance of the zamindars to allow their patwaris to be brought under clear Government control, His Honour agreed to suspend the registration of patwaris and to propose the abolition of the Regulation XII of 1817, should the alternative scheme for maintaining the record be legalized. He is glad to learn from the Resolution forwarded with your letter that this decision on mature consideration continues to be approved by the zamindars of Tirhut. These zamindars have already agreed to assist the Lieutenant-Governor in reducing the cost of the survey by supplying unskilled labour free of cost, and His Honour is sure that this conciliatory spirit on the part of the Tirhut landholders will evidence itself in still further acts of helpfulness during the progress of the operations.

In conclusion, I am to say, with reference to the second Resolution, that the Tirhut Landholders' Association is labouring under a misapprehension of facts in attributing His Honour the Lieutenant-Governor's action on this matter to information received from local officers. As a matter of fact, no information was received by Government which induced any change in the Lieutenant-Governor's plans, or excited any doubt as to the suitability in the circumstances of the action taken under His Honour's orders.

ENCLOSURE VI.

Minute by Mr. Henry Colebrooke, *Member of the Board of Revenue, dated November* 1814, *referred to in paragraph* 17 *of the Minute.*

On the subject of the reference of Government contained in the Chief Secretary's letter of 21st ultimo, I wish to record my sentiments previous to taking leave of the Board, although the many avocations incident to my approaching departure from India render it impracticable for me to do so as fully and with such explanation of the grounds of my opinion as I should have been desirous of doing if time permitted.

I have no hesitation in saying that I am entirely convinced, after the experience of more than 20 years, that the abolition of the office of kanungo was a radical error in the Code of Regulations framed at the close of Lord Cornwallis' Government, no office of registry and record calculated to supply its place being then substituted in its room. The Regulations in question did, indeed, provide for the formation of certain registers of land by officers of the revenue, which, it seems to have been supposed, would collect and preserve all information which Government might have occasion for. The expectation entertained from these and from the further registry enjoined by a subsequent Regulation have been entirely disappointed. It must be acknowledged they were ill-devised; and they have also been very imperfectly kept; and those which have been executed are of little utility. In every view, therefore, no doubt can now, I conceive, remain as to the expediency of rescinding all the Regulations concerning them, and of only requiring from the revenue officers an annual statement, in the manner of an account settlement, readily prepared in a simple form.

But had the proposed registers been more practicable, and been actually and regularly prepared in the prescribed form and within the enjoined period, and were they even effectual for purposes that concern the special interests of Government, still they were totally inapplicable to supply the kanungo's place in regard to such of his functions as concerned individuals and as affected their private interests. That point in particular which has been brought under the notice of Government, and is the subject of the present reference to this Board, is an instance conspicuous and important, as it has led to consequences affecting more than one department of the Administration, and to evils which urgently call for remedy.

At the period of the decennial settlements, subsequently declared permanent, the rights of zamindars and raiyats, as well in relation to Government as to each other, underwent much discussion, of which a great portion is to be found recorded on the proceedings of this Board. Among many important points not unconnected with the present subject one, especially, being immediate relation to it, which was then distinctly admitted, was that certain classes of subordinate tenants, and chiefly those denominated dependent talukdars and khodkasht or chupurbund raiyats, possessed certain rights and immunities, which it was just and expedient to uphold, but for which end (the zamindar's property in the soil being recognised, and he being permanently interposed between the Government and the raiyat) it has become necessary to make special provision for the security of subordinate tenures and maintenance of the rights of the tenants. With this view rules were framed, which were introduced into the amended Code of Regulations for the decennial settlements, from 52nd to 71st Articles of the Code, passed on 23rd November 1791 and re-enacted with other clauses interspersed in them in 51st and following sections of Regulation 8 of 1793.

At the date of this re-enactment of those rules, the permanency of the settlements and assessments of the land revenue having been in the meantime proclaimed, it was thought necessary to make particular provision for the protection of the resources of the public revenue from any permanent diminution through the improvidence of the landholders; and for this purpose chiefly a Regulation was then passed (44 of 1793), restricting the zamindars from granting pattas or leases, or otherwise entering into engagements fixing the payments of their tenants for any period exceeding ten years, and declaring all engagements between the zamindar or landholder and the tenants, however strictly conformable to Regulation, void and cancelled from the day of sale, in the event of the lands being sold by public sale for the discharge of arrears of assessment due by the zamindar, at the same time providing that the purchaser should be at liberty to collect from the tenants whatever the former landholder would have been entitled to demand according to the established usage and rates of the pargana or local division, had the engagements so cancelled never existed. It was subsequently declared by Regulation 4, 1794, that tenants whose pattas might be cancelled or might otherwise determine should not be required to take new pattas at higher rates than the established rates of the pargana for lands of the same quality and description, but should be entitled to have pattas renewed at the established rates.

When it is recollected how large a proportion of the lands of Bengal changed masters in a few following years, it will be easily conceived how prodigiously numerous must have been the cases in which engagements between landlord and tenant were annulled by sales for arrears due by the landlord to Government

Other clauses of the same Regulation last cited show that extreme difficulty had been already experienced in the adjustment of the land rents between the zamindar and raiyats under the previous rules of the permanent settlement, which entitled the tenants to receive pattas at the established rates of the pargana. Yet not only were no means devised for arranging and preserving a record of those rates and of the rules by which they were

regulated, but an existing institution, the only one in which information could be then found and might be expected to be preserved, was unrelentingly abolished. It cannot be wondered that the consequence should have been, as is now generally acknowledged, that (with rare exceptions, which, owing to special circumstances, a record of the rates exists in the Collector's office, and of course with the exception of Benares and the ceded and conquered provinces, where a reformed sarishta founded on the kaunngo's office has been kept up) the courts of justice which are by Regulation required to decide according to established pargana rates all disputes that arise between the raiyats and their landlords regarding the rates of the pattas which they are entitled to are unable to procure any evidence of those rates or any other satisfactory information to guide their decisions. Consequently the provisions contained in the general regulations for the permanent settlements designed for the protection of the rights of the raiyats or tenants are rendered wholly nugatory, and it has been repeatedly urged by many of the most judicious officers who witness the practical operation of the existing laws through the country, as it is now urged by Mr. Cornish, that it would be better for the tenants to declare them destitute of all immunities and of any right but such as may be specifically conveyed to them by the express terms of the engagements which they may be able to arrange with their landlords, rather than to suffer them to be misled by a vain confidence in supposed or acknowledged rights in which the courts of justice for want of definite information are unable effectually to support them. And certainly there appears to be no complete remedy, but either the sweeping one of abrogating the illusory privileges of the tenantry, or the arduous task of rendering their undoubted rights distinct and palpable, and furnishing the means of upholding them by now doing what should have been done in the first instance for the purpose of ascertaining and preserving the rules by which subordinate tenures should in the various parts of the country be regulated according to ancient and established usage as it subsisted or was understood at the period of the decennial settlement.

There can hardly be any hesitation as to the choice in this alternative. Entertaining, however, but a slender hope of the adequate accomplishment of the latter object, which is now become from lapse of time difficult of attainment, I proposed some time since a palliative remedy which was adopted in Regulation 5 of 1812, but which I fear, is but an insufficient relief of a serious and inveterate evil, more especially as the remedy provided applies only to individual cases as they arise, and does not operate with much effect to obviate future recurrence of disputes between other individuals.

I am disposed therefore to recommend, late as it now is, that measures should be taken for the re-establishment of fixed rules, as nearly conformable to the anciently established ones as may be yet practicable, to regulate distinctly and definitely the relative rights of the landlord and the tenantry

The power of making laws for the protection and welfare of the tenants in the several classes of dependent talukdars, raiyats and other cultivators of the soil was expressly reserved to Government by an article of a Proclamation enacted into Regulation I of 1793, and rules with correspondent rates may be sanctioned by Government in prosecution of those measures, and in virtue of that power, without any apprehension of violating faith, if they should differ in some degree from the ancient usage, under the difficulty which must now attend the research and which will impede a perfectly exact ascertainment of it. Still, however, it is due to all parties interested that the best practicable means should be used to make the ascertainment as perfect as it is capable of being rendered.

Section 8, clause I.

But if Government should be unwilling to interpose its legislative authority for the purpose of furnishing clear and definite rules, by which the relative rights of zamindar and raiyat may be determined, and which would close an abundant source of mutual grievance and injury, and consequent disputes and litigation, the next best measure is to do what is yet practicable towards collecting and preserving such evidence and information as can be yet recovered; and placing it where persons having an interest therein may inform themselves concerning the existing evidence of their rights; and where courts of justice, when called upon to decide such questions, may find the information requisite to their investigation of the matter.

In either view or for either purpose the re-establishment of the kanungo sarishta or the institution of some analogous office of registry and record appears highly expedient. It would materially assist the recent as well as the earlier enactments of the Regulations designed for the protection of the tenant; it would greatly assist the adjustment of numerous disputes of every sort between landlord and tenant which actually arise, and would sensibly tend either to obviate their occurrence or at least to accommodate them at an early moment, perhaps without previous recourse of either party to a law-suit. But the most important of the objects for which the re-establishment of the office is desirable, no doubt, is the retrieval of a knowledge of these rules and rates, by which all questions between zamindars and tenants are by Regulation to be determined, and without which the relative interests of those parties can no way be settled, unless Government, as before suggested, will enter upon the task of fixing them by fresh enactments of law.

If it be indeed practicable to retrieve the requisite information by any means, it is most likely to be done through an office instituted on the basis of that in which formerly is was expected to be recorded and preserved. Such of the records of the ancient sarishta as yet exist would of course be transferred to the revised office; and the fittest among the persons formerly employed in it would naturally be engaged at the re-establishment

of it. Their recollection, or the means of enquiry which they would possess, would be most promptly serviceable to the recovery of such written records as yet remain, and to the collecting of information from various quarters, to supply the defect of records that are imperfect or the want of those which are lost.

On this account, joined with the consideration of the general utility of the office in the affairs of the land revenue as experienced in the provinces under the Board of Commissioners, it appears to be highly expedient that an officer on a footing similar to that of the reformed kanungo of Benares and the ceded and conquered provinces should be established in Bengal, as has been already recommended by the Board for Bihar, and as would have been at the same time recommended by us for the entire province of Bengal, had not the Board been withheld by the apprehension that the expense (no fund being suggested to defray it) might be an insuperable objection.

The general functions of the office would be the same with those of the ancient kanungo and of the reformed sarishtas of the ceded and conquered provinces and district of Benares. Their special duty, with reference to a principal object of the revived institution, would be to prepare a statement of the rates, or the rybundee, durbundee, or by whatever other name known, for the pargana or other local division, as they stood in the Bengal year 1197 (the first year of the permanent settlement), together with the abwab established previously to that year as well as the rules by which those rates were regulated and applied, ascertaining them from the records and old accounts which they may be able to collect, and from the best accessible sources of information where records may be deficient.

They should be further instructed to prepare statements of the actual rates according to existing engagements and present collections and payments between landlord and tenant. To enable them to execute this essential duty, the patwaris should be required to furnish all necessary information, and to allow them to inspect documents and accounts for which they may have occasion, and supply them with copies of accounts and papers wanted for records.

It does not occur to me to be necessary to state more particularly in this place the rules and instructions which it might be proper to prescribe for the guidance of pargana sarishtadars in the execution of these and other duties of their office.

Concerning the expediency of the institution, I shall only add that my recollection of the judicial duties both in a zilla and in a court of appeal in the province of Benares after the pargana sarishtas were there established on the basis of the kanungo, and in zillas of Bengal and Bihar before the abolition of the office in those provinces, enables me to affirm that disputes between zamindar and raiyat were less frequent and more easily determined than they now are in the Lower Provinces, and I am assured from more recent local experience and personal observation of other gentlemen, who have communicated their sentiments to me, that in Benares particularly, when the rybundee of a specific year is by Regulation prescribed and is forthcoming in the subsisting sarishtas of the parganas, the controversies between zamindar and raiyat, when any so arise, are by no means difficult of adjustment. The effect of this in lightening the burden of the administration of justice, and in the very important point of promoting the mutual good understanding and consequent ease and happiness of two principal classes of the community—the landowner and the husbandman—requires no elucidation.

H. C.

ENCLOSURE VII.

Extract from a letter from the Court of Directors, dated 12th July 1820, to the Government of India, Territorial Department, referred to in paragraph 19 of the Minute.

PARA. 10. In re-establishing the office of a kanungo you began with the districts of Bihar and Benares, and in these districts the re-establishment was at last effected. Correspondence had also taken place with the Collectors and Board of Revenue preparatory to its re-establishment in Hidgelee, Midnapore, Cuttack and certain districts of Bengal. The actual re-establishment, however, was still confined to Bihar and Benares. By this time you must have had some experience of the revived institution in these districts, and we need not tell you how much anxiety we feel to be speedily and fully apprised of its effects.

11. In the operations connected with the re-establishment of this office, the circumstance of principal importance is the resumption of lands. Anciently the kanungos were paid, as almost all civil functionaries in India were paid, by lands held exempt from the Government assessment. In Bihar and Benares the lands which had been so appropriated and were still held by the families of the ancient kanungos could be distinguished and ascertained.

12. These lands, you have informed us, it is your determination to resume, and upon the principle that the service being discontinued its payment ought to cease.

13. If this was intended to be established as a universal principle, the foundation does not appear to us to be quite sufficient for that important practical conclusion which you have erected upon it. Cases may exist in which it is proper that a payment should continue, even after the service to which it was at first annexed is no longer required. We trust, therefore,

that your determination to resume the lands of the ancient kanungos has been formed cautiously and upon a full conviction, after examination of the circumstances of this peculiar case, that no such right was created in favour of their existing descendants. We are aware that by Regulation IV of 1808, the revenue of the lands held by the kanungos in the ceded and conquered provinces was declared liable to resumption. But we do not conceive that the rule which was then followed ought to govern in future as a precedent, and every case of resumption should depend for its jurisdiction upon its own peculiar merits. We require that not only all reasonable claims of right should in those cases be respected, which is justice, but that the considerations of humanity should meet with their due share of attention.

14. The province of Benares was included in the provisions of Regulation IV, 1808, which organized the kanungo office for the ceded and conquered provinces, and rendered the lands held by the kanungos liable to resumption. Mr Deane reports that "in pursuance of the rules contained in that Regulation, several alterations appear to have been made in the appointments of mufassal kanungos in the province of Benares, and such of the nankar lands of the kanungos as has not been resumed by his predecessors were attached and settled by the late Collector, Mr. Salmon." From this we conclude that the whole of these lands in that province are now resumed. Mr. Deane continues "No report, however, of the grounds on which the new officers were selected, or the former incumbents removed, nor any particulars of the nankar lands comprising 373 villages and assessed at a jama of Rs. 15,176-15-15, have been submitted to the Board of Commissioners or laid before Government, nor have any of the official records of the kanungos been deposited with the Collector in consequence of the investigation." Various things of importance which ought to have been done have thus been left undone without notice or complaint. You state what may be in part an apology for the successive Collectors, when you say that the business is too great for a single functionary; but we deem it an apology only in part, because it is surely not fit for the Collector to omit any part of his duty at pleasure without reporting upon it explicitly and declaring the causes of any omission which he may be obliged to make. But if you have stated an apology in part for the Collector, you have offered nothing in the way of apology for the Superintending Board, whose duty it was to call for those reports and statements, and not to overlook a remarkable dereliction of duty in the public officers under their charge. We are sorry to observe that a chain of neglect, continued from the inferior to the superior, should have existed so long without making itself known to the Supreme authority; it might, for aught we see, have continued to exist for any length of time, had it not been for the appointment of Mr. Deane.

15. In the correspondence respecting the re-establishment of the office in the Hidgelee mahals, in Midnapore, Cuttack, and certain districts of Bengal, we see nothing which very strongly calls for remark, except the proposed resumption of lands. As the same considerations apply to that measure in these cases as in the case of Bihar and Benares, it is only necessary here to press them again upon your attention. In these several places more difficulty was anticipated in establishing the office than had been experienced in Bihar and Benares, where a kanungo had belonged to every pargana, and where in consequence it had been practicable to select persons for the revived office from the families of the ancient kanungos. In other districts this had not been found practicable, because there a few sadar kanungos had formerly performed the business of a whole district, by the aid of subordinates. We cannot, however, imagine that the difference between a descendant of an ancient kanungo and another person is so great in this case, where very simple duties are imposed, as materially to increase the difficulty. Where new measures are to be introduced, and new labour to be undergone, there is a great temptation to raise imaginary difficulties, and though we do not pronounce that those here alleged are altogether of this description, it is highly incumbent upon you to be on your guard against so natural and dangerous a propensity.

16. With regard to patwaris, the office did not require to be re-established, for it continued in existence, and the maintenance of a patwari for every village was imposed as an obligation upon the zamindars by the terms of the perpetual settlement. It had been found, however, that the accounts which were kept by those patwaris were altogether unworthy of trust, and were so framed as to promote the sinister interests of the zamindars, by whom they were paid, both in defrauding the Government and in oppressing the raiyats. When we turned our attention to the means of rendering the ancient accounts of the country subservient to the affording of that knowledge, which might enable us more perfectly to secure both the interests of the Government and those of the raiyats, it was necessary of course to consider the means of obtaining true instead of false accounts from the patwaris. For this purpose it appeared to us to be absolutely necessary to remove them from all dependence upon the zamindars. We accordingly give you explicit directions to make them servants of Government, by transferring the choice, the pay and superintendence of them wholly to the Collectors.

17. Your communications to us upon this subject are almost entirely confined to your determination not to follow the plan prescribed by us, but to substitute another of your own. We do not mean to command the repeal of the Regulation which you have passed for this purpose. We are willing that what you have begun, and which no doubt by this time is in full operation, should not be abruptly interfered with, but should now at least have an adequate trial.

18. Having come to this decision, we do not think it necessary to enter into any minute consideration of your plan. It is proper, however, to inform you that the reasons which you

have adduced for considering as impracticable the measure which we recommended, have by no means convinced us, and we see too many reasons for apprehending that the expedients which you have adopted will very imperfectly accomplish the end. We shall merely state as shortly as possible a few considerations which may elucidate the view which we take of the subject, and point out the inconveniences and dangers against which you ought to provide in carrying your scheme into execution.

19. Your objections to place the patwari in dependence upon the Collector are, that this would be a change of system; that the zamindars would be offended; that it would be inconsistent with the spirit of the permanent settlement; that the Collectors would be incapable of making a proper choice of patwaris, or of making them discharge their duties; and that a mode of paying them would not be easily found.

20. That it would be a change is implied in the very idea of an evil to be removed, or an advantage to be gained. But we are by no means of opinion that it is a change the inconvenience of which would not be overbalanced by the attainment of the end we have in view.

21. We expect that the zamindars will be offended by any plan we can adopt which will deprive them of a present advantage, whether derived from defrauding the Government or oppressing the raiyats. It is the loss rather than the mode of losing by which they will be irritated. In the mode by us proposed we see nothing peculiarly calculated to act painfully upon their feelings.

22. That it is contrary to the spirit of the permanent settlement to make the patwaris dependent upon the Collectors, or to take any other measures that may be necessary for protecting the Government from the frauds and the raiyats from the oppression of the zamindars, we cannot possibly admit. We cannot indeed forebear expressing a considerable degree of surprise that you should have entertained such an opinion You know that in enacting the perpetual settlement Government reserved to itself—that of which no Government can lawfully divest itself—all the powers necessary for maintaining justice between one class of its subjects and another.

23. When you state as another objection the inability of the Collectors to make a proper choice of patwaris, or sufficiently to control them, we do most anxiously hope that you have exaggerated the difficulty; for, if not, the objection extends much farther than to the modes of appointment. You have in various places declared, in the strongest terms you could employ, that the control of the Collectors over the patwaris was the only ground of hope from their services, and here you seem to affirm that the Collectors will be unable to control them.

24. We cannot imagine that you lay great stress as an objection upon the difficulty of paying the patwaris. It was not intended to prevent the patwari from keeping the same accounts for the zamindar which it was formerly his duty to keep. It was only intended to use means for making him keep true accounts. As he would have rendered all lawful services to the zamindar in the same manner as before, it appears to us that the zamindar was bound by the very terms of the perpetual settlement to afford the pay in the same manner as before. However, if this had been found to be a point particularly objectionable to the zamindars, a compromise might have been devised.

25. In the plan which you have adopted, several of the expedients for counteracting the influence of the zamindars and preventing it from operating upon the patwaris to the production of false accounts appear to be judiciously devised. But the immediate dependence of the patwari upon the zamindar, which you have allowed to remain, is a source of evil against which it will require an increased and very peculiar degree of vigilance to guard. This, we confess, is the source of our apprehension. Every idea of benefit from this attempted reform is by yourselves attached to the control of the Collectors. But it is impossible we should not be deeply impressed with the evidence which you have forced upon our attention that a control sufficient for the objects in question is, in the present state of the revenue service, hardly to be expected. Your immediate attention ought to be directed to what it may be possible to obtain from such a control, and generally to render the superintendence of the Collectors more efficient for protecting the raiyats and preventing frauds upon the Government.

26. Unless the Collectors have some ready means of detecting errors in the accounts of the patwaris, it is more than probable that they will abound with errors. We are fully convinced that additional expedients for this purpose are still required, and that under the present system of checks, unless in the rare instances of extraordinary vigilance and penetration combined in the Collector, an understanding to very pernicious purposes may subsist undetected between the patwaris and zamindars.

27. We are not perfectly sure that the old system of patwari accounts, though in general not ill-adapted to the circumstances of the case, yields the whole of the information which that class of accountants might easily afford. One thing is peculiarly important, that their accounts should contain the whole of the payments which under any claim whatsoever are made by the raiyats to the zamindars, and the strongest securities ought to be taken for preventing any payment which they do not record. For ascertaining whether by any addition to the present accounts or any other change you can render them more conducive to the end in view, important information might be received by fit questions addressed to the most intelligent of your revenue servants. The rule which you have prescribed for summoning the patwaris before the Collector, with all their accounts and making them

answer questions upon oath, may be attended with advantage, and we trust that you will insist on its being uniformily obeyed.

28. The examination should take place at least once a year, at that period at which the accounts of the year may be considered complete. It ought to be done by the Collector in person in as many cases as possible, where it is possible, and by persons selected by him for that purpose. In all those cases, too, in which it is done by other persons than the Collector, it would be useful that a report containing at least the material points of the examination should be presented to the Collector. If this examination would be useful, it is evidently of importance that it should be made to take place in those circumstances which afford the greatest security for the truth of the answers. The presence of persons acquainted with the facts is the best security applicable to the case, and these are respectively the raiyats of the villages. The proceeding, therefore, should be attended with publicity. The examination should take place in the presence of the raiyats, who should be invited to contradict the statements of the patwari, as often as they knew them to be false, and to suggest questions by which the full truth may be disclosed.

29. We have entered thus far into details respecting this examination, because we are fully convinced that, unless the Collectors effectually descend into details, you will never obtain accurate information, and because we are equally convinced that, unless you prescribe specific details, the Collector will never undertake them, but will continue to perform the duties of their office in that summary and superficial way of which there is too much reason to complain. We are aware, however, of the disadvantages under which, at this distance, we endeavour to conceive a process of detail, and leave all suugestions of this kind fully open to your deliberation.

30. In the duties which are prescribed to the kanungo, provisions of considerable efficiency are made for detecting the frauds of the zamindars upon Government, but we see very little in those duties which has any tendency to afford protection to the raiyats. We have no doubt that this is a part of your arrangements which will be found susceptible of very great amelioration, and we trust that by this time your experience will have added to your means of rendering the measure complete. The great end of the kanungo office is to make the accounts of the patwaris useful. This is not to be done by merely receiving and preserving them. Two previous conditions are necessary—that the accounts of the patwaris contain all the requisite points of information, and that it be true information. The information which the patwari accounts ought to contain is simple; it is information of what is due and what is paid by the raiyats to the zamindars, and of what is due and what is paid by the zamindars to Government. To find securities for making this information is true, is, as it has been justly described by you, most difficult. You are of opinion that much advantage may be derived for this purpose from the agency of the kanungos; and if the fidelity of the kanungos can be secured, and if an appropriate line of duty is prescribed to them, there can be no doubt of the fulfilment of your hopes. These two, therefore, are the objects to which your most strenuous attention is required, and the abilities of your most experienced servants should be called in to your aid in devising a system of means for the accomplishment of so important an end.

ENCLOSURE VIII.

MR. CHAMBERLAIN'S *letter, dated 18th April 1819, to Board of Revenue; Board's letter, dated 18th May 1819, to* MR. CHAMBERLAIN; *and Board's Resolution, dated 11th June 1819, regarding the salary of, and forms of accounts to be kept by, patwaris.*

[These papers are referred to in the foot-note to paragraph 19 of the Minute.]

Dated Dinajpur, the 18th April 1819.

From—R. CHAMBERLAIN, ESQ., Secretary, on deputation,
To—GEORGE WARD, ESQ., Secretary to the Board of Revenue, Fort William.

THE offices of kanungo and patwari being so intimately connected with each other, that the beneficial results looked to from the re-establishment of the former must in great measure depend on the degrees of efficiency and success with which the reforms in the latter may be carried into effect under the provisions of Regulation XII of 1817, extended to the province of Bengal by Regulation I of the current year, I beg to submit the following remarks on the subject of the patwari office for the consideration of the Board of Revenue.

2. The Regulation above quoted clearly points out the situations and manner in which patwaris are to be appointed, and judiciously guards against any material innovation on established usage either in regard to the nomination of these officers, or to the mode in

which their salaries or other allowances and emoluments of office are to be paid; but it may be satisfactory to the Board to know in what mode, by whom, and on * * * what scale patwaris are usually paid, and to establish, as far as may be practicable, uniformity in their forms of account.

3. In the Western Provinces, including Benares and Bihar, the expense of the patwari more generally falls on the raiyats; sometimes it is exclusively borne by the landholder, and often mutually by both; if paid by the raiyats the amount is usually levied by a cess of half, three-quarters, or an anna on every rupee of revenue paid by them, or when paid in kind, by one seer of grain on each maund produced, or by five seers at each harvest on every plough in the village. If the patwari be paid by the landholder, it is either by land or a monthly salary, and sometimes both, the raiyats usually presenting a small present (optional) either at the harvests, or on receiving the farkhuttee (annual acquittal). When both parties contribute to the expense, the preceding modes of payment prevail, but in a lighter degree on each The amount of salary or other emolument receivable by the patwari depends of course on the extent of resources of the village he may superintend, but from Rs. 2 to Rs. 5 monthly may generally be calculated on, or a charge of from three to five per cent. on the amount collections

4. In Bengal or in those districts in which I have had opportunities of making inquiry, the patwari appears to be paid by the landholders almost generally either by a fixed monthly salary, or by commission on the amount collections of the estate under his superintendence, receiving from each raiyat a small present in cash or kind, either at the time of executing the patta or giving the annual acquittal; this, however, is entirely optional with the latter, though usually observed.

5. From my own inquiries in 35 estates taken indiscriminately in this district, and situated in the parganas of Noorpoor, Punjra, Deora, Suntose, and Sooltanpoor, I find the patwaris are paid exclusively by the several landholders, by a commission of three per cent. on the amount collections in eight villages, and three-and-a-half per cent. in 27 villages. The collections from these estates, respectively, amounting to from Rs. 600 to Rs. 1,800, yield a monthly allowance to these officers of from Re 1-8 to Rs. 4-8, exclusive of their fees from the raiyats. Some patwaris, however, have the superintendence of much more extensive estates, keeping muharrirs to assist them. In such cases their receipts and allowances are of course proportionately great.

6. Patwaris, as far as I have yet ascertained, appear to be kept up almost generally in this district, and from the simple mode in which they are usually paid, I should conceive the Acting Collector will meet with no difficulty in regulating, according to pargana usage, the amount of salary or commission to be received by such officers in villages to which they may yet remain to be nominated.

7. The forms of account used by the patwaris here appear by no means so perfect as they should be; for instance, the total quantity and descriptions of land comprising each village are not stated, only an account raiyatwar of such lands as are in cultivation. I therefore beg to submit, for the approval of the Board, the accompanying forms of account in Persian and Bengali, which correspond with those used in the ceded and conquered provinces in Benares and Bihar, and which I think may be introduced gradually in the districts of Bengal with great advantage. The accounts are quite simple and perfect, and are as follows:—

1st.—First Rukhabundee, or statement of the total quantity and descriptions of land comprising the village.

2nd.—Pymaish Nugdee Asameewar (supposing a part of the village pays in kind and a part in cash, which commonly occurs). A statement agreeably to measurement of the quantity of land cultivated by each raiyat, for which cash payments are made, with the descriptions of cultivation and produce.

3rd.—Hissaub Nugdee Asameewar. A statement of the rates per bigha and total demand against each raiyat for the lands in statement the second.

4th.—Seah Amudunee Asameewar. Statement showing the daily payments made by each raiyat on account of the demand in statement the third.

5th.—Teriji Khuttaunee Wussoolee Nugdee Asameewar. Statement exhibiting the dates and total amount paid by each raiyat on account of the demand in statement the third.

6th.—Jama Wassil Baqee Nugdee Asameewar. The demand receipt and balance against each raiyat on account of the land in statement the second.

7th.—Khasra Buttaee Fusl Bhudwe Asameewar. A statement exhibiting the quantity of land cultivated by each raiyat which pays in kind, with the description, quantity, and division of produce.

8th.—Khasra Buttaee Fusl Khureef Asameewar. A corresponding statement to the preceding of the khureef cultivation.

9th.—Khasra Buttaee Fusl Rubee Asameewar. A corresponding statement to the preceding of the rabi cultivation.

10th, *11th* and *12th*.—Similar accounts to the preceding of the several harvests of two dependent villages, taluks.

13th—Hissaub Saltamaum Asameewar. Annual account of each raiyat's cultivation of lands which pay in kind, as stated in Nos. 7, 8 and 9, specifying the description and amount of produce at each harvest, with the nirik or price at

which the proprietor's share of produce is commuted for cash payments At the back is the khuttaunee or account of the total of each item.

14*th*.—Jamabandi Terij Saltamaum. An account of the annual produce of the village, both nugdee and bhualee, with the amount of each harvest.

15*th* and 16*th*.—Similar accounts to 13 and 14 of the dependent villages.

17*th*.—Jamabandi Terij Saltamaum. An account of the total annual produce of the original and dependent villages, nugdee and bhualee, with the amount of each harvest.

18*th*.—Jamakhurch Saltamaum. An account of the annual collections and disbursements of the whole village.

8. The only alteration necessary to adapt these forms to the several districts in Bengal is to insert the names of the Bengal seasons in lieu of those of Bihar, and which I believe has been done in the counterparts in Bengali.

Dated Dinajpur, the 18th May 1819.

From—GEORGE WARD, ESQ., Secretary to the Board of Revenue, Fort William,
To—R. CHAMBERLAIN, ESQ., Secretary, on deputation.

I AM directed to acknowledge the receipt of your letter, and its enclosure, of the 18th ultimo, and to acquaint you that the Board entirely approve of the forms of the patwaris' accounts which you propose for general adoption. You will be pleased to furnish the Acting Collector of Dinajpur with copies of them, together with such suggestions with respect to their introduction and for the modes of remunerating the patwaris in cases where the appointment of them may become his duty, as may appear to you expedient with reference to the usage of the parganas in which he may have to nominate them.

The several Collectors under the Board's authority will be furnished with copies of the forms of patwaris' accounts, with instructions to report whether they can be introduced in their several districts, and in what respects they differ from those already in use. They will likewise be required to supply information with respect to the modes and rates of remuneration of the village officers of account now prevailing.

Circular with the exception of Higlee.

As the reformation of the office of patwari under the provisions of Regulation XII of 1817 is in progress in those districts in which the establishment of the kanungos has been in a great measure effected, and as the Collectors of other districts will be required to introduce the prescribed measures under those provisions as soon as the latter institution shall have been established in their respective districts, the Board of Revenue deem it proper to provide all the Collectors under their control with copies of the orders of Government of the 2nd instant, and also with an extract from their resolutions on the proceedings of the Collector of Higilee on the subject of the office of patwari, for their information and guidance.

2. In communicating the above proceedings, the Board resolve that those Collectors in whose districts the office of kanungo has been established, be required to conform generally to the principles elucidated in the above-mentioned documents, and to comply without loss of time with the following instructions; and that the others, in whose districts it has not been established, conform to them whenever the kanungo arrangements shall have been completed.

3. The malguzars should be required to furnish a statement, of the nature of that alluded to in the annexed resolutions of the Board, of their present private establishment of village accountants; and they should be informed that such requisition is for the purpose of reconciling, as far as may be consistent, the difficulties they may urge with respect to expense. After the delivery of such statement, the Collectors might show to the malguzars all the forms of patwari accounts that will be required to be constantly kept up as permanent records of the patwari's dufter, and to obtain from them categorical answers whether the number of persons now employed by them will be sufficient to perform all the requisite duties of the patwari establishment without much increasing their expenses. In such cases, after having seen and examined the persons to be appointed patwaris, and satisfied themselves of their qualifications, the Collectors might report the circumstances to the Board.

4. In the commencement this might be adopted as as experiment, without pledging its continuance; if it should be found adequate, the public interests would not require more; if it be proved insufficient, the malguzars would have the less reason to complain of the alteration.

5. The forms of accounts to be kept by patwaris adopted by the Board will be transmitted with these instructions to those Collectors who have not yet been provided with them, together with a copy of a letter from Mr. Chamberlain on the subject of those accounts.

FORMS OF ACCOUNT REFERRED TO IN BOARD'S LETTER DATED 18TH MAY 1819.

ENCLOSURE IX.

Letter from the Members of the Board of Revenue, No. 2199, *dated the* 11*th May* 1827, *to the Hon'ble Vice-President in Council referred to in paragraph* 22 *of the Minute.*

No. 2199, dated Calcutta, the 11th May 1827.

From—Members of the Board of Revenue,

To—The Hon'ble the Vice-President in Council.

We have at length the honour to submit, for the consideration of Your Lordship in Council, a report upon the kanungo and patwari sarishtas in the several districts under this Board, as far as the information we have as yet obtained from the several Collectors enables us to ascertain the progress made in compiling the records in those departments.

From the records of this office it appears that on 15th July 1825 the senior Member and the late third Member recorded their opinion that the reports of the Collectors which had then been received did not contain information of a useful tendency, and that the only mode of acquiring a satisfactory insight into the progress hitherto made in re-establishing the kanungo and patwari system, and of ascertaining the decree of practical utility experienced by the revival of those offices, would be to depute one of the Members of the Board to make full enquiries in every district. From those opinions our second Member dissented, recording his minute to that effect, which was forwarded with the letter of the senior and late third Member, though both have since been returned to this office. They are now resubmitted in the appendix marked as per margin.

Board's address to Government dated 15th July 1825, with Mr. Money's Minute.

After a deligent perusal of all the documents having reference to the kanungo and patwari system noted in the margin,* we are of opinion that although the replies of the seven Collectors noted in margin† to the queries proposed in Mr. Secretary Mackenzie's letter of the 13th April 1821, and forwarded by us on 15th May of the same year, and the statements of those who answered our two circulars of the 29th July 1823 and 16th July 1824 (the first relative to the jurisdictions of the kanungos, the second communicating the Resolutions of the Government, dated 25th June 1824, with reference to extracts of the despatch from the Hon'ble Court of Directors, dated 18th February 1824), do not contain materials for a succinct report upon the system, which is still in its infancy. Yet many of the reports, particularly those of Mr. Barwell, Mr. Armstrong, Mr. Tulloh, Mr. R. Nisbett, and the Hon'ble Mr. Elliott, will be found to contain information of great importance. We therefore have the honour to submit them in original, together with a separate abstract of their contents for the deliberate consideration of Government.

* *Vide* Collector's replies to Board's circulars, dated 15th May 1821, 29th July 1823, and 15th July 1824, as per accompanying lists marked A. B. C. D.

† Midnapore. Murshidabad. 24 Parganas. Jessore. Mymensingh. Burdwan and Dinajpur.

From the documents in question Your Lordship will collect that to the 15th July 1825, the date of the latest communication of any information worth noticing, the kanungos, except in Midnapore and Burdwan, had effected but little towards the attainment of the main object of their appointment; they had prepared lists of malguzari and lakhiraj estates, parganawari statements of kismats and mauzas, registers of proprietors of partition and of transfers of property in their respective divisions; they assisted in investigating particulars relative to char and other lands liable to assessment, and reported on matters connected with khas mahals, but had made little or no progress in acquiring materials for the compilation of a record of the extent and capabilities of the possessions of the malguzar and lakhiraj proprietors, and none which could afford an insight into the details of village management or into the rights and interests of the agricultural community.

The most intelligent of the Collectors are of opinion that labours of the kanungo establishment when properly directed cannot fail to prove highly advantageous to the State, and will be far from prejudicial to the interests of the agriculturists, but all deplore the repugnance of the zamindars and the lakhirajdars to the measures dictated by Regulation XII of 1817, and the systematic oppositition they have experienced througout.

It is but too apparent that the zamindars and lakhirajdars are so decidedly averse to any arrangements having for their object the acquisition of information regarding the land tenure of the country and the produce of the soil, that they have long systematically opposed every obstacle, legal or illegal, to the attempts of the Revenue officers to obtain any knowledge on the subject Their most effectual procedure with this view will appear to have been the abolition of the ancient office of village patwari and the substitution of gumashtas, creatures of their own, for those servants of the public. On being called on to furnish a list of their patwaris they delayed compliance with the orders or evaded them

altogether, and when eventually officers of this description have been appointed by them, or by the Collectors, they either did not permit them access to the real records, or refused to pay their allowances, or dismissed them without ceremony. In one district—Burdwan —the Collector reports that, with the view of evading the penalties for a non-compliance with the rules prescribed for the delivery of accounts and the registry of patwaris, purchasers of land have not entered their own names in the register of mutation, but those of persons altogether unconnected with the land.

A very general failure in procuring patwari records has been experienced throughout the country, and the compilation of those records which relate to the extent of proprietary rights, the quality of the soil, the quantity of produce, and the rate of land tax paid by the lower orders of agriculturists, has been delayed in consequence. The officers of the Collectors of Midnapore and Burdwan, Messrs. Barwell, Elliott and Armstong, appear to have made the greatest progress in this department of their duty, for they have been able to obtain village accounts for a large portion of their districts, notwithstanding the obstacles opposed to them. This partial success is entirely attributable to the strenuous exertions of their Principals, but it is questionable after all whether the sources whence these details of village management have been drawn are sufficiently pure to warrant the adoption of the accounts as authentic records, especially when it is recollected that at present there exist no means of verifying their contents.

Under the provisions of Regulation XII, 1817, the patwaris are responsible for the production and for the authenticity of the papers required by the kanungos, but the patwaris, if any are appointed, are entirely at the mercy of the landholders, who for a long period of years past have placed the whole record of management in the hands of their gumashtas and agents, who are able to provide spurious accounts as well as true ones, and when the interests of their employer, co-extensive as they are with their own, are to be affected by their procedure, no doubt can be entertained as to which of the documents, the true, or the false, they will make over to the patwari to be filed in the kanungo's office. It is scarcely possible that the patwari should be able to swear to the validity of the records which he thus delivers, and if he should be aware of their falsity, it is not very probable that he will avow his knowledge. He knows but too well that he is completely in the power of his task-master, the certain consequences of whose wrath are infinitely more to be dreaded than the remote probability of punishment for perjury. His own fears, combined with the little idea of moral guilt, attached by the Asiatics to the crime, will operate to remove all scruples against attesting the validity of the document by his oath, and as his defence would be that he received it from the gumashtas as a true account, and could not prove that it was otherwise, few law officers will be found who would give a fatwa sentencing him to punishment in the law courts. Those patwaris who may be appointed by the Collectors on the recusancy of the zamindars will not be found in any respect superior to the non-effective men set up to avoid the penalty by the proprietors. Poor, and without influence or support, they are easily corrupted into an acquiescence in the zamindar's arrangement, or deterred from opposing them by the fear of his displeasure. The power of a zamindar in the interior of the country to do mischief to one who has offended him is almost without limits. The people well know this to be the case, and are cautious of exciting it into action. Authentic information in respect to the land tenure, the produce of the soil, and the portion of it which, as representing tax or land rent, is available to the zamindar, is not, in short, to be excepted under the present system from the patwaris. The zamindars will never allow them to give it.

If the motives of the zamindars for withholding the statistical particulars which are so much required were rigidly investigated, they would be found to originate less in their alleged apprehensions that a new assessment of their lands would be the result of their compliance than in their well-grounded fears that any scruting into local usages and rights will end, not only in their illegal actions upon the cultivating classes being prevented, and in the rights of these latter being protected, but in eliciting the discussion of the validity of their own titles to exclusive proprietary possessions, which they are aware, are by no means indisputable. This being the case, it is questionable whether, in the event of their being now declared responsible for the fidelity of the accounts and records for which the local officers are dependent on the patwaris, a closer and correcter view of the actual state of things would be thereby ensured. If on the first introduction of the kanungo system, the landholders had been declared responsible for the fidelity of the accounts and papers required, and if any instance of delay and recusancy had been met by a severe and summary punishment, most of the advantages anticipated for the institution of the office of kanungo would in all probablity have been realized; but the Regulations did not permit this, and the people were perfectly well aware that the authorities were directed to proceed with the utmost mildness and caution, and being, it should seem, themselves incapable of appreciating instructions of such a tendency, they immediately concluded that the power to enforce them with severity and strictness was wanting, they have acted accordingly.

After a careful consideration of the subject in all its lights and bearings, we beg to submit our opinion for Your Lordship's consideration, that the obstacles opposed by the zamindars and lakhirajdars to the kanungo system have hitherto rendered records of the kanungo office useless as matter of judicial reference; for instead of affording information, they appear better calculated to mislead those who require it; that the advantages realised from the establishment under its present constitution are by no means commensurate with the expense of keeping it up; and that until means are devised for ensuring the authenticity of the documents furnished, whether they relate to accounts, mensuration or raiyatwar assessments, the office of kanungo will mislead instead of giving any useful information.

RESOLUTION ON THE BOARD'S LAND REVENUE ADMINISTRATION REPORT FOR THE YEAR 1892-93.

REVENUE DEPARTMENT—LAND REVENUE.

Darjeeling, the 16th October 1893.

RESOLUTION No. 1320T—R.

READ—

The Report of the Board of Revenue on the Land Revenue Administration of the Lower Provinces for the year 1892-93.

The report has been submitted by the Hon'ble Mr. Stevens a few days late, but this delay has been satisfactorily explained. Maps have been attached to the Report, showing the survey and settlement operations recently completed, in progress and in contemplation, and an index to these maps has been furnished, as desired by the Lieutenant-Governor in the Resolution on last year's Report.

2. The Lieutenant-Governor has observed with satisfaction the various changes introduced during the year under report in accordance with the instructions issued by Government. The principal among them are—

(*a*) alteration in the standard percentages for current collections for the different classes of estates as shown below:—

99 per cent. for estates in class I, *i.e.*, permanently-settled estates.
95 ditto ditto II, *i.e.*, temporarily-settled estates.
90 ditto ditto III, *i.e*, estates held direct by Government.

(*b*) transfer of the administration of the zamindari dâk cess from Magistrates to Collectors, so far as the demands and collections are concerned.

(*c*) the placing under the collectorate nazir of the establishment for serving revenue processes of all kinds, with the exception of that maintained for the collection of water-rates in the irrigation districts of Cuttack, Midnapore, Patna, Gaya and Shahabad, and the supervision by him of the service of criminal processes, with the exception of warrants of arrest, in all districts.

COLLECTION OF THE LAND REVENUE.

3. The current demand on account of the land revenue in Bengal for the past five years is shown in the following table:—

CLASS OF ESTATES.	1888-89.	1889-90.	1890-91.	1891-92.	1892-93.

III.—Estates held direct by Government.			31,84,778	32,38,128	33,97,627
Total ...	3,81,13,105	3,81,02,828	3,81,67,697	3,81,62,175	3,83,72,332

The total exhibits an increased demand of Rs. 2,10,157 in all three classes, mainly due to increases in class III on account of the general settlement of the Western Duars in Jalpaiguri, and resettlements in Angul, in the Kalimpong estate in Darjeeling, in Backergunge, Tippera, and Chittagong.

4. The demands, collections, remissions, and balances for the same five years are exhibited in the following statement:—

Year.	Demand.			Collections.			Remissions.	Balances.			Percentage of total collections to total demand (column 7 on column 4).	Percentage of total collections to current demand (column 7 on column 2).	Percentage of current collections on current demand (column 5 on column 2).
	Current.	Arrear.	Total.	Current.	Arrear.	Total.		Current	Arrear.	Total.			
1	2	3	4	5	6	7	8	9	10	11	12	13	14
	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs	Rs.	Rs.	Rs.			
1888-89 ...	3,81,13,105	20,44,566	4,01,57,671	3,54,46,974	17,32,244	3,71,69,218	30,882	26,73,265	2,84,210	29,57,571	92·56	97·52	92·97
1889-90 ...	3,81,02,828	29,20,128	4,10,22,9[illegible]6	3,62,05,567	24,60,255	3,86,65,822	96 349	8,79,868	3,80,917	22,60,785	94·25	101·5	95·02
1890-91 ...	3,81,67,697	22,46,426	4,04,14,123	3,67,33,458	18,52,435	3,85,85,891	43,066	14,30,852	3,54,312	17,85,164	95·47	101·8	96·2
1891-92 ...	3,81,62,175	17,09,912	3,98,72,087	3,69,87,653	13,52,750	3,83,40,403	50,166	11,67,045	3,14,473	14,81,518	96·15	100·46	96·92
1892-93 ...	3,83,72,332	15,04,778	3,98,77,110	3,70,21,735	11,46,319	3,81,68,054	86,556	13,33,767	2,88,733	16,22,500	95·71	99·46	96·48

Collections, balances and remissions.

5. As already noticed, the current demand was Rs. 2,10,157 more than that of the previous year, the current collections were Rs. 24,082 higher, but the percentage of current collections on current demand fell from 96·92 in 1891-92 to 96·48 in 1892-93. The total collections were Rs. 1,72,349 less than in 1891-92. From the figures in columns 9 and 10 of the above statement, it will be seen that the arrear balances showed an improvement and the current balances a falling off at the close of 1892-93. The remissions amounted to Rs. 86,556, of which Rs. 80,071 were granted in estates held direct by Government.

Permanently-settled estates.

6. The total demand, current and arrear, from estates in class I was Rs. 3,29,07,436, of which Rs. 3,21,26,521 were collected. The percentage of the collections on the demand, after excluding from the demand sums in suspense during the year, and adding to the collections the sums collected but not credited during the year, was 97·86 against 98·41 in the previous year. The current collections fell short of the standard of 99 per cent. in 12 districts, of which, however, six collected more than 98 per cent. Of the six remaining districts, Rs. 1,48,088 and Rs. 1,58 281 respectively were due in Shahabad and Patna, in which the ratios of collections to demand were 88·76 and 90·17. The Lieutenant-Governor desires that the Collectors of those districts and the Collector of Purnea, where the collections amounted to only 89·86 of the current demand, may be asked to furnish full explanations with regard to those balances. The Lieutenant-Governor observes that the collections in Patna and Shahabad were also very bad in the previous year. The explanation offered, that arrears are due to the fact of the last kist falling due on the 28th of March, is one that applies to all districts alike, and had as much force in 1884-85, when the collections in Shahabad amounted to 98·32 of the total demand, current and arrear, as now, when they amount to only 89·66. Neither does the shortness of the rabi harvest appear to the Officiating Lieutenant-Governor to be an adequate excuse for failure to realise the Government revenue in districts like these in which the revenue is only a small fraction of the rent.

The total arrear balance amounted to Rs. 71,057 against Rs. 75,827 in the previous year Eight districts collected less than 99 per cent. of the arrear demand, but the balances were small in all of them excepting Champaran, where, owing to the tauzi frauds, they amounted to Rs. 62,981. A report showing the result of the enquiries into these frauds, has just been received from the Board, and is under the consideration of this Government. An arrear amounting to Rs. 1,07,134 was due from permanently-settled Wards' Estates, but of this a sum of Rs. 97,776 was realised after the close of the year. The greater part of the arrear was due from the Khagra estate in Purnea, which was recently taken charge of by the Court of Wards, but the amount of Rs. 19,978, which was outstanding from the Tikari estate, might, were it not for discreditable mismanagement, have been paid up within the year.

Temporarily-settled estates.

7. The total demand, current and arrear, from estates in class II was Rs. 29,56,421, of which Rs. 27,23,884 were collected. The percentage of the collections on the demand, after excluding from the demand sums not actually recoverable, and adding to the collections sums realised but not credited during the year, was 93·33 against 92·74 in the previous year.

The following table shows the results of collections in each subdivision of class II estates for the two years 1891-92 and 1892-93 :—

Classification of Estates.	Years.	Percentage of current collections on current demand.	Percentage of arrear collections on arrear demand.	Percentage of total collections on total demand.
1	2	3	4	5
(a) Settled with proprietors ...	1891-92	97·06	90·74	96·80
	1892-93	95·72	89·96	95·53
(b) Private estates leased to farmers ...	1891-92	70·91	41·59	61·31
	1892-93	83·74	73·36	80·62
(c) Government estates leased to farmers	1891-92	81·97	82·70	82·12
	1892-93	85·70	77·21	84·10
Total ...	1891-92	93·02	78·81	91·64
	1892-93	93·21	80·24	92·13

As compared with last year there is a falling off in every respect of temporarily-settled estates settled with proprietors—an improvement in private and Government estates leased to farmers.

The current collections reached or exceeded the prescribed standard of 95 per cent. in all classes of temporarily-settled estates in the following districts, viz., Birbhum, Nadia, Rajshahi, Pabna, Balasore, Lohardaga, Singhbhum, and Manbhum. In all other districts there was a failure to collect up to that standard under one or more of the three heads the collections in Government and private estates leased to farmers being generally very bad. As the percentage on the gross assets allowed to farmers for cost of collection is more than the cost of management and remissions taken together in estates managed direct by Government, the Officiating Lieutenant-Governor concurs in the remark made by the Board that this farming system of management has little to recommend it other than the facilities it ought to afford in realising the Government demand, and that failure to realize the lesser net demand in these leased estates with punctuality is inexcusable. His Honour is glad that the Board have called the attention of local officers to the matter.

Particulars of estates held direct.

8. During the year 1892-93 there were altogether 2,281 estates held direct by Government, of which 2,042 were Government estates and 239 private estates managed by Government for various reasons.

The following statement shows the numbers of these estates by divisions, the demands, cost of management, and total collections during the year :—

Division.	Government estates.		Private estates.		Total.		Cost of management.	Percentage of cost on current demand.	Current collections.	Percentage of current collections on current demand.
	Number	Current demand.	Number.	Current demand.	Number.	Current demand.				
1	2	3	4	5	6	7	8	9	10	11
		Rs.		Rs.		Rs.	Rs.		Rs.	
Burdwan ...	412	66,763	5	2,24,974	417	2,91,737	21,431	7·3	1,69,508	58·1
Presidency ...	207	3,30,347	44	14,004	251	3,44,351	30,868	8·9	2,85,871	84·01
Rajshahi ...	99	5,53,788	34	10,767	133	5,64,555	32,181	5·7	4,90,869	86·9

Chittagong ..	212	5,89,672	26	12,928	238	6,02,604	55,033	9·2	5,64,309	93·6
Patna	179	2,03,131	16	17,372	195	2,20,503	23,581	10·6	1,66,427	75·4
Bhagalpur ...	125	2,73,821	6	12,347	131	2,86,168	8,190	2·8	2,48,542	86·8
Orissa ..	32	3,98,366	5	73,326	37	4,71,692	21,812	4·6	4,39,497	91·05
Chota Nagpur ...	175	74,404	1	17,793	176	92,197	2,429	2·6	89,958	97·5
Total ...	2,042	28,92,697	239	5,04,930	2,281	33,97,627	2,25,167	6·6	29,39,758	86·5

Estates held direct by Government.

		Rs.
* Current	...	33,97,627
Arrear	...	6,15,626
Total	...	40,13,253
Deduct amount included in the demand, the recovery of which was in suspense	...	54,657
Total	...	39,58,596

		Rs.
† Current	...	29,39,758
Arrear	...	3,77,891
Total	...	33,17,649
Add collections made in the year, but not credited in the accounts of the year	...	62,753
Total	...	33,80,402

9. After excluding demands not due during the year, and including collections realized but not credited, the net demand from estates in class III was Rs. 39,58,596,* and the collections Rs. 33,80,402,† so that the percentage of total collection on total demand was 85·39 as against 84·10 in Government estates leased to farmers. The following statement compares the percentage of actual recorded collections with those of the previous year in each subdivision of this class:—

Sub-class.	Years.	Percentage of current collections on current demand.	Percentage of arrear collections on arrear demand.	Percentage of total collections on total demand.
1	2	3	4	5
(a) Managed for proprietors ...	1891-92	70·38	68·05	69·50
	1892-93	72·64	50·	65·25
(b) Owned by Government ...	1891-92	90·47	73·08	87·99
	1892-93	88·94	68·87	86·66
Total ...	1891-92	87·24	71·01	84·14
	1892-93	86·52	61·38	82·66

Compared with last year, these figures show an improvement in current collections in estates managed for proprietors, and a falling off in the arrear collections in those estates, and in both current and arrear collections in Government estates leased to farmers.

In 15 districts the standard of 90 per cent. for current collections was reached or exceeded under both sub-classes (a) and (b), and in eight other districts under one or other of the two sub-classes.

In Midnapore both current and arrear balances were heavy, as in last year. They were as follows:—

			Rs.
Current balances ...	Sub-class (a)	...	1,03,326
	Ditto (b)	...	12,415
Arrear ditto ...	Ditto (a)	...	83,580
	Ditto (b)	...	3,728

The largest balances were as usual due from estates Jalamutha, Majnamutha, Bhawani chak, and Jalamutha Jalpai in Midnapore. As regards the difficulties experienced in realising rents in the khas mahals of Contai, the Board quote the Subdivisional Officer, who writes thus:—

"Certificates were filed on requisitions prepared by tahsildars on reference to the jamabandi papers. In the majority of these cases it is found that the tenant whose name was originally recorded in the zamindari sarishta and against whom a certificate is filed has mortgaged a portion of his holding, sold another portion, which again the vendor has mortgaged to a third party, and so on. Thus a holding which originally stood in the name of one tenant is now found to be split up and in the possession of a number of persons whose names cannot of course be ascertained without repeated enquiries. This necessarily takes a long time and proves very harassing."

The Board add—

"This affords a forcible illustration of the difficulties and inconveniences that arise, looking at the matter from the landlord's point of view, from failure to keep the settlement records

corrected up to date so as to represent the facts of the present day. Here, though the landlord has at his disposal the weapon of the certificate procedure, yet the procedure cannot be enforced, because annual records of mutations have not been made. In order to obviate the difficulties which have arisen in the way of enforcing certificates, the Commissioner has, after consultation with the Legal Remembrancer and with the Board's approval, issued instructions to sue tenants in the Civil Court instead of having recourse to the certificate procedure."

In Jalpaiguri the large current balance of Rs. 63,390 is accounted for by the fact that the rent-roll of the recent settlement, which yielded a large increase of revenue, could not be got ready until the 14th February; but the Lieutenant-Governor observes with pleasure that the increased demand due to resettlement was realised without difficulty or opposition after the close of the year. It is also noticed with satisfaction that in Angul, which was recently resettled, the collections amounted to 99·72 per cent. of the current demand.

Road and public works cesses.

10. The Board submit a separate report on the road and public works cess operations. The statistics for the last quinquennial period are shown in the following statement:—

Year.	Demands.			Collections.	Remissions.	Balances.	Percentage of balances on gross demand.
	Current.	Arrear.	Total.				
1	2	3	4	5	6	7	8
	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	
1888-89 ..	76,19,896	17,20,662	93,40,558	74,86,777	20,925	17,98,942	19·2
1889-90 ...	76,60,539	18,04,134	94,64,673	77,54,684	76,885	16,58,728	17·5
1890-91 ...	78,38,927	18,35,056	96,73,983	76,84,012	12,661	19,33,855	19·9
1891-92 ...	79,67,933	19,44,615	99,12,548	80,61,032	25,453	18,35,454	18·51
1892-93 ..	80,91,015	16,58,356	97,49,371	82,76,738	13,207	14,86,741	15·24

The total collections amounted to Rs. 82,76,738, or 84·8 per cent. on the gross demand. There was a satisfactory improvement in respect of both collections and balances, which the Lieutenant-Governor hopes will grow in future years.

Revenue and rent money-orders.

11. The system of payment of revenue and cesses by money-order continues to grow in popularity and to work satisfactorily. The Lieutenant-Governor is awaiting a report from the Board on the question of amending the form of revenue money-orders, and on the other questions raised in Mr. Macpherson's Tauzi Report. His Honour will consult the Postmaster-General, Bengal, on the suggestion made by the Collector of Murshidabad that the postmasters of branch and sub-post-offices should be directed to assist illiterate remitters in correctly filling up the forms.

The following table shows the progress of these transactions during the last six years:—

Year.	Number.	Amount of revenue paid.	Average value of each order.
		Rs.	Rs. A.
1887-88 ...	47,248	2,07,156	4 6
1888-89 ...	92,402	6,60,800	7 2
1889-90 ...	139,535	11,11,353	7 15
1890-91 ...	160,892	15,64,268	9 11
1891-92 ...	167,229	14,68,037	8 12
1892-93 ...	183,403	16,35,409	8 14

These figures show a steady increase both in the number of orders and in the amount remitted.

The payment of rent by money-orders was authorised from 1st July 1891 in all districts in which the Bengal Tenancy Act is in force. The following table shows the working of the system in the Divisions in which it was in force during the years 1891-92 and 1892-93:—

Divisions.		Number of money-orders issued for rent.	Amount	Number of such orders refused.	Amount.
1		2	3	4	5
			Rs.		Rs.
Burdwan	1892-93	12,645	1,15,270	4,360	28,555
	1891-92	12,917	1,17,682	4,[illegible]75	32,858
Presidency	1892-93	5,294	64,896	2,113	22,848
	1891-92	5,862	95,537	2,372	25,773
Rajshahi	1892-93	5,761	1,26,196	2,833	33,026
	1891-92	6,832	1,36,021	1,757	26,734
Dacca	1892-93	3,778	40,565	1,487	12,346
	1891-92	3,798	48,787	1,406	12,398
Chittagong	1892-93	9,010	58,244	1,439	17,542
	1891-92	3,815	44,368	699	10,849
Patna	1892-93	4,956	82,1[illegible]7	1,023	9,404
	1891-92	3,369	38,717	1,40[illegible]	11,169
Bhagalpur ...	1892-93	1,258	32,451	478	8,475
	1891-92	1,351	27,207	535	7,372
Total for 1892-93 ...		42,702	5,19,669	13,783	1,32,196
Total for 1891-92 ...		37,944	5,07,819	12,544	1,27,153

The figures given for the first four Divisions are for two full years, but for the remaining three Divisions the figures for 1891-92 are for nine months only. There was a falling off both in the number of money-orders issued and in the amount covered by them in the first four Divisions (in which only the data for comparison are available), due, it is said, to the fact that while the raiyats take advantage of the procedure only when their relations with their landlords are strained, or when there is a dispute as to the amount of the rent, the zamindars avail themselves of every plausible or technical excuse for refusing the money-orders, in order, as the Judge of Birbhum says, to be in a position to rush into Court with a plaint the first day of the next quarter. In this connexion the Board make the following observation—

"According to the provisions of section 58(3) of the Tenancy Act, a landlord who contumaciously refuses to give a receipt for rent duly remitted by money-order (which is a legal tender) and to prepare and retain a counterfoil or copy of the receipt or statement of account with the deliberate intent of harassing his raiyats by rushing into Court with suits on the first day of the next quarter is liable to fine."

This point will be further considered by Government.

Operation of the Sale Laws

12. During the year 960 whole estates and 395 shares, bearing an aggregate revenue of Rs. 1,38,912, were sold, as compared with 1,368 estates and shares bearing a revenue of Rs. 1,52,802 in the preceding year. The Sale Law appears to have been administered with moderation. The percentage of defaults on estates and shares is highest in Saran, being 14·5, next comes Muzaffarpur with 12·1, then Mymensingh with 9·9, then Patna with 5·7, and last Chittagong with 3·4. The percentage of sales on defaults is highest in Chittagong, being 26·7, where it is observed the percentages of collections on demands are in every class of estates above the standard, while they are lowest in Shahabad, where the collections are worst. The facts seem to afford support to the opinion expressed in the Lieutenant-Governor's Resolution on the Board's Report of 1890-91, that the policy of leniency may be carried too far where Government revenue has not been paid with punctuality. In only two districts (Bankura and the 24-Parganas) were the orders, enjoining that the sales for a kist should be effected

before the date for the next kist comes round, not carried out. There were great delays in holding sales for arrears in Patna, Saran, Bhagalpur and Cuttack.

After the close of the year under report, revised draft Bills to amend the existing Revenue Sale Law and Public Demands Recovery Act were prepared and submitted to the Government of India, who have desired that the Bills be introduced in the Bengal Legislative Council.

Working of the Public Demands Recovery Act VII (B.C.) of 1880.

13. The following statement shows the number of certificate cases instituted and disposed of during the year under the different classes of demands:—

	Number pending from last year.	Number filed during the year.	Total.	Disposed of during the year.	PENDING— More than six months.	PENDING— Less than six months.	PENDING— Total.
1	2	3	4	5	6	7	8
Demands of all kinds under section 5	419	1,650	2,069	1,602	97	370	467
Arrears of rent due to Government, clause 6, section 7.	4,577	16,904	21,481	15,121	3,626	2,734	6,360
Embankment dues, section 50, Act VI (B.C.) of 1873.	1,392	6,853	8,245	5,755	216	2,274	2,490
Water-rates, Act III (B.C.) of 1876	5,620	9,228	14,848	13,498	125	1,225	1,350
Cesses Act, IX (B.C.) of 1880	50,418	78,952	129,370	89,607	15,569	24,194	39,763
Demands of the Court of Wards, clause 7, section 7.	10,064	9,906	19,970	12,033	6,753	1,184	7,937
All other demands under section 7	10,793	23,079	33,872	21,906	3,942	8,024	11,966
Total ...	83,283	146,572	229,855	159,522	30,328	40,005	70,333
Last year ...		159,7 0	.....	154,225	28,3 4	55,636	84,000

The figures show a satisfactory decrease of 13,128 in the number of certificates filed, as compared with the number filed in the previous year; and the Lieutenant-Governor is glad to see that the total number of pending cases also decreased. Institutions in the water-rate collection department during the last three years were as follows:—

	FILED IN— 1890-91.	FILED IN— 1891-92.	FILED IN— 1892-93.
Districts of the Orissa Division	13,596	8,634	7,991
Do. of the Patna „	4,908	3,167	2,914
Do. of the Burdwan „	7,739	3,427	1,237

During the year water-rate certificates in the Orissa Division were transferred from the Collector's Office to that of the Special Deputy Collector in charge of Canal Revenue.

The number of certificates filed for the recovery of cesses was 78,952 against 87,507 in the previous year, and certificates for the realisation of rent due to Government decreased from 18,304 to 16,904. A similar decrease also occurred in the number of certificates filed for the recovery of the demands of the Court of Wards. The difficulty experienced in enforcing certificates for recovery of khas mahal rents in the Contai subdivision for want of annual records of mutations has been already noticed.

Compulsory measures for realization.

14. The number of cases in which actual sale was had recourse to rose from 3,552 to 6,380, the cases in which demands were paid upon service of notice increased from 48,199 to 52,047, while the number of persons imprisoned, who were eventually released without payment of the debt, decreased from 71 to 44. The number of persons imprisoned for not paying Government demands was 20 against 45 in the previous year.

Administration of the Land Revenue.

Estates under direct management.

15. The principles and rules affecting the funds for the management, improvement and protection of estates under the management of Government were explained in paragraph 15 of this Government's Resolution for the year 1891-92. Of the 12 per cent. deducted from the collections from those estates—

(*a*) 1 per cent. is devoted to purposes of education.

(*b*) 1½ per cent. to communications.

(*c*) 2 per cent. to sanitary improvements.

(*d*) 7½ per cent. to (1) management proper, and (2) miscellaneous improvements.

In addition to the above fund—

(*e*) A separate grant (known as the Agricultural Public Works grant) is made yearly by Government for such works as irrigation, drainage, or embankments necessary for the increase or maintenance of the land revenue from Government or temporarily-settled estates.

From the proceeds of head (*a*) primary schools are maintained in Government estates; but the 1½ per cent. contribution for improvement of communications to and within these estates is everywhere amalgamated with the general District Road Fund.

The allotments and expenditure under the heads (*c*), (*d*), and (*e*) during the year under report are shown below:—

	Allotment. Rs.	Expenditure. Rs.
(*c*) 2 per cent. for sanitary improvements	3,51,158	46,087
(*d*) The 7½ per cent. for (1) Management proper.		(1) 2,25,167
(*d*) The 7½ per cent. for (2) Miscellaneous improvements.		(2) 79,042
		3,50,296
(*e*) Agricultural Public Works grant ...	80,000	63,501
Total ...	4,31,158	4,13,797

It will be seen that the expenditure on agricultural public works fell short of the allotment by Rs. 16,499. As remarked by the Board, the local officers should see that the allotments made are fully utilized, and that no portion is allowed to lapse. A manager of a Government or Ward's estate, who is at all fit for his post ought to have no difficulty in suggesting and carrying out suitable works of improvement so far as funds will permit. He may have difficulty in obtaining funds, but failure to spend what is provided usefully and well can only arise from inefficiency or want of interest in his work. The Officiating Lieutenant-Governor is glad to observe that successful efforts have been made to introduce new staples in the Government estates in Jalpaiguri, and will be glad to learn whether tube-wells can be utilised for the purpose of obtaining pure drinking-water in Government estates, as suggested by Mr. Oldham.

Inspection of accounts.

16. Of the nine Commissioners, Mr. Forbes inspected 8, Mr. Nolan 4, Mr. Cooke 3, Mr. Oldham 2 khas tahsil offices, and Messrs. Power, Beames, Luttman-Johnson, and Greer (when officiating as Commissioner of Chittagong) inspected one khas tahsil office each No inspection was made by the Commissioners of Bhagalpur and Chota Nagpur. Of the Collectors, Messrs. Slack, Macpherson, Savage, Growse, Hopkins, Fiddian, and N. K. Bose made the largest number of inspections. Of the Subdivisional Officers, Mr. Syud Nurul Huda, Subdivisional Officer of Nawada in Gaya, Babu Surjya Kumar Sen, Subdivisional Officer of Supaul in Bhagalpur, and Mr. M. H. W. Mackenzie, Subdivisional Officer of Alipore in Jalpaiguri, made the largest number of inspections. The Lieutenant-Governor agrees with the Board that these inspections are very important, and thinks that as the chief safeguard against the occurrence of malpractices and the misappropriation by the subordinate collecting agency of sums collected from the raiyats is in the examination by Managers, Collectors, and Assistant Collectors of the raiyats' receipts, and in comparison of the amounts entered in them with those credited in the tahsil books, all Collectors should give attention to these matters in the course of their tours. Since the close of the year, instructions have been issued to the Board to take security from all officials who handle public money, including managers or tahsildars in khas mahals, and the Board have been requested to submit for the approval of Government

draft rules to give effect to them. The condition of the raiyats in Government estates is said to be generally better than that of their neighbours under private zamindars. The Officiating Lieutenant-Governor hopes that this is so.

Surveys.

17. As most of the principal surveys and settlements in progress in Bengal are reviewed by Government in a separate Resolution, they are only referred to briefly in this Resolution. The survey of the town of Calcutta under Colonel W. H. Wilkins was continued during the year. The survey work proper had been finished, and it remained to complete the maps after the decision of all boundaries and title disputes. It is hoped that the whole work may be finished by April 1894.

During the year the Director of the Department of Land Records and Agriculture was relieved generally of supervision of smaller settlements under the Bengal Tenancy Act, and it has been decided that as a general rule such settlements should be carried out by District Officers in direct subordination to the Commissioner of the Division. With a view to ensure correct procedure and steady progress in regard to this class of work, the Board have been requested to prepare a plain manual for the guidance of District Officers. The following table shows the progress made in the settlements of Government and temporarily-settled and private estates under the control of the Director of Land Records during the year:—

Government and Temporarily-settled Estates.

Name of estate or tract under settlement.	Estimated area in square miles.	Total number of villages.	Area surveyed during the year under report.	Area surveyed up to the end of the year under report.	Number of villages of which attestation has been completed.	Number of villages of which the final records of rights have been published under section 105 (2) of the Tenancy Act.	Cost during the year.
1	2	3	4	5	6	7	8
			Sq. miles.	Sq. miles.			Rs.
All temporarily-settled estates and four permanently-settled estates in Cuttack	2,325	4,079	1,316	2,206	2,133	...	5,55,868 (for these three rows)
All temporarily-settled estates in Puri	985·90	1,957	..	985·90	1,940	...

Total Private Estates	2,008·53	3,310	...	1,058·90	180		3,04,637

The total area of Government and temporarily-settled estates professionally surveyed was 2,775 square miles, and the total expenditure on survey Rs. 4,45,765, or 4 annas per acre.

The following table shows the progress made in smaller settlements under the Tenancy Act under the supervision of the Commissioners of Divisions during the year:—

	Estimated area in acres.	Total number of villages.	Area surveyed during the year.	Total area surveyed up to the end of the year.	Number of villages in which record of rights has been completed.	Cost during the year.
1	2	3	4	5	6	7
	A. R. P.		A. R. P.	A. R. P.		Rs. A. P.
Government estates in the districts of Midnapore, Pabna, Dacca, Faridpur, Tippera and Shahabad.	42,297 0 0	148	8,305 0 0	37,250 0 0	133	4,052 0 0
Private estates (excluding Wards' Estates) in the districts of Bankura, Midnapore, 24-Parganas, Jessore, Nadia, Murshidabad, Rangpur, Dacca, Faridpur, Backergunge, Mymensingh, Noakhali and Champaran.	92,474 3 23	283	28,411 2 11	63,777 1 22	112	52,795 11 5

The Officiating Lieutenant-Governor notices with pleasure that the increased revenue resulting from the settlements of Angul, Banki and Jalpaiguri, has been realised without friction or difficulty, but regrets to notice that the work of attestation done in Orissa during the year was so imperfect. Now that the talukdars of Chittagong have been authoritatively declared to be tenure-holders, His Honour hopes that the settlement of Ramu in Chittagong will be completed without further delay.

Land Registration.

18. The following statement exhibits the number of interests registered under initial registration, and the number of applications for mutation filed during the year:—

1	2	3			4	5	6
Divisions.	Total number of interests registered under initial registration (section 38).	Number of applications under section 42 filed during the year—			Percentage of column 3 (c) on column 2.	Percentage during 1891-92.	Percentage during 1890-91.
		(a) On account of succession by inheritance, whether under will or otherwise.	(b) On account of succession by purchase, gift, or otherwise.	(c) Total.			
Burdwan ...	50,044	1,626	1,637	3,263	6·5	6·7	6·9
Presidency ...	62,926	1,965	1,350	3,315	5·2	5·1	4·3
Rajshahi ...	26,925	1,155	733	1,888	7·0	7·2	6·3
Dacca ...	99,431	3,899	4,334	8,233	8·2	7·7	7·7
Chittagong ...	184,565	3,652	4,009	7,661	4·1	6·9	7·3
Patna ...	287,642	9,505	8,997	18,502	6·4	6·1	6·2
Bhagalpur ...	96,614	1,595	2,137	3,732	3·8	3·9	3·1
Orissa ...	160,694	2,998	3,832	6,830	4·2	3·4	3·3
Chota Nagpur ...	2,356	64	19	83	3·5	3·4	2·9
Total	971,200	26,459	27,048	53,507	5·5	5·7	5·7
Total for 1891-92 ...	971,150	28,815	27,478	56,293			

The percentage of mutations, or initial registrations, is lower than in previous years. The total number of cases disposed of was 59,037, against 61,425 during 1891-92.

Partitions.

19. The following statement gives particulars of the number of cases instituted, disposed of, and pending in the three heaviest Divisions—Patna, Bhagalpur, and Dacca—the partition work elsewhere being little more than nominal:—

Division.	Pending at close of—		Instituted during—		Total.		Disposed of during—		Pending at close of—	
	1890-91.	1891-92.	1891-92.	1892-93.	1891-92.	1892-93.	1891-92.	1892-93.	1891-92.	1892-93.
1	2	3	4	5	6	7	8	9	10	11
Patna ...	1,680	1,679	446	338	2,126	2,017	447	472	1,679	1,545
Bhagalpur	127	119	41	39	168	158	49	57	119	101
Dacca ...	452	463	136	92	588	555	125	114	463	441

There was an improvement in the number of cases disposed of in the Patna and Bhagalpur Divisions, but the number disposed of in the Dacca Division was less than in the previous year. The Collectors have been directed to utilise the survey records in partition proceedings, and to bear in mind that whenever a record of rights and settlement of rents have been made under the Tenancy Act, the rentals recorded are binding on all parties so long as they are in force, and must be accepted as the basis of partition. In districts where a notification has issued proclaiming any area for survey, no measurement has been allowed other than the survey measurement. This order applied to the districts of Muzaffarpur, Darbhanga, Saran, Champaran, Cuttack, Puri, Balasore, and Chittagong.

With a view to diminish the great delays which now characterise partition proceedings, and to put a check to the growing number of cases, a draft Bill for the amendment of the existing law has been prepared, and the Board have been requested to circulate it for the opinions of all Divisional and District Officers. In the meantime the Board have issued certain instructions for the guidance of all officers employed on partitions, which it is believed will to some extent expedite work.

20. The following table shows the quantity of land acquired during the year under Act X of 1870, and the cost of acquisition, as well as the department for which it was acquired:—

Land Acquisition.

For whom acquired.	Area of land acquired.	Abatement of Government revenue.	Cost of acquisition.
	A. R. P.	Rs. A. P.	Rs. A. P.
Government	466 3 1	265 8 5	1,57,981 11 10
Irrigation	790 0 9	391 14 7	1,13,187 10 10
Municipalities	84 2 28	21 14 8	1,81,615 0 4
Railways	4,068 3 11	787 13 2	10,60,173 0 1
District Boards	593 3 34	7 2 1	56,469 15 4
Chaukidars' jagir lands ...	18 1 33	0 0 3	1,668 15 4
GRAND TOTAL ...	6,022 2 36	1,474 5 2	15,71,096 5 9

Of the lands acquired for Government, the most important projects were those for the extension of Police Court premises in Calcutta, extension of Lebong cantonment land at Darjeeling, and the Bengal Veterinary Institution at Belgatchia.

The great differences in the cost per acre paid for land acquired for public purposes, in different districts, and in different parts of the same district, as shown in Appendix No. XIV, suggest the conclusion that sufficient check is not exercised over expenditure incurred in acquisition of land. As land-owners cannot recover a higher rent for land than that entered in the cess papers, unless they can show that the rents have been lawfully enhanced since the returns were filed, Deputy Collectors employed in the acquisition of land have been directed by the Board always to refer to these papers in determining the rental to be taken as the basis of their calculations for awarding compensation. Sir Antony MacDonnell approves of these instructions, and hopes that the Board will see they are complied with.

The revised Bill for the amendment of the Land Acquisition Act X of 1870 is now pending in the Legislative Council of the Government of India.

Kanungos and patwaris.

21. In Orissa the majority of the kanungos and the patwaris continued to be employed on settlement work. After consulting the Hon'ble the Advocate-General, the Officiating Lieutenant-Governor at first decided to enforce the registration of Bihar patwaris in the Collectors' offices, so as to bring them under official control, before utilising them for the purposes of the Bihar survey. But it has now been decided to abandon the project of employing the patwaris of Bihar in the survey operations for reasons which were given in the papers published in the *Calcutta Gazette* of 15th August last, as it was found that the landlords preferred that a more highly paid agency should be employed both in the preparation and in the maintenance of the record. Sir Antony MacDonnell has lately submitted to the Government of India a draft Bill for establishing such an agency for the maintenance of records of rights made under Chapter X of the Tenancy Act.

Advances under the Land Improvement Loans Act.

22. Out of the sum of Rs. 1,32,400 allotted for advances under the Land Improvement Loans Act, XIX of 1883, Rs. 70,730 only were disbursed, and of this Rs. 24,050 were advanced in Gaya for village embankments and minor irrigation works. With regard to the very large difference between the sums allotted and those actually given out by Collectors, these officers generally explain that failure to expend the allotments was due to (1) insufficient security furnished by the applicants, (2) want of adequate establishment to make the enquiries, and (3) the fact that many of the applications having been received towards the end of the year, the enquiries connected with them could not be completed within the year. The Lieutenant-Governor agrees with the Board in thinking that more might have been done than was done during the year, and that so many applications should not have been left undisposed of at the end of it.

The following were the demands, collections and balances on account of advances under the Land Improvement Loans Act during the year:—

Outstanding advances.	Demand (principal + interest) falling due during the year.	Collections (principal + interest) during the year.	Percentage of collection on demand.	Remission.	Balance at close of the year.
Rs. 2,75,487	Rs 88,594	Rs 57,967	65·4	Rs 6,978	Rs 23,649

Advances under the Agriculturists' Loans Act.

The sum of Rs. 1,93,070 was advanced under the Agriculturists' Loans Act during the year. Owing to the scarcity prevailing in parts of the Patna Division at the beginning of the year under report, Rs. 77,750 were advanced to the cultivators in the several districts of that Division, except Patna and Champaran. Of this sum, Rs. 25,616 were distributed in Muzaffarpur and Rs. 33,012 in Darbhanga. In the Bhagalpur Division Rs. 69,961 were issued in the districts of Monghyr, Bhagalpur, Purnea, and Sonthal Parganas to raiyats whose crops had suffered from deficient rainfall. In Puri Rs. 12,537 were advanced, as the raiyats, especially those of the Government Estate Kodha, because of indifferent crops in 1891-92, were in want of money for the purchase of seed.

The demands, collections and balances on account of advances under the Agriculturists' Loans Act during the year were as follows:—

Outstanding advances.	Demand (principal + interest) falling due during the year	Collections (principal + interest) during the year	Percentage of collection on demand.	Remission.	Balance at close of the year.
Rs. 4,66,731	Rs. 2,24,248	Rs 1,46,480	65·3	Rs 319	Rs. 77,450

RENT.

Relations between landlord and tenant

23. The relations between landlords and their tenants have, with the exceptions noted below, been on the whole fairly satisfactory throughout the Province, the exceptions indicated in some districts the existence of ill-feeling in particular localities. The relations between Messrs. Watson and Company and their raiyats in taraf Paschim and pargana Silda in the Midnapore district are still unsatisfactory, owing, it is said, to the straining by the firm, to the utmost, of their legal rights against any one who refuses to grow indigo. The Collector is trying to make an amicable arrangement by securing for the raiyats free pasturage in certain demarcated areas, and the right of taking spontaneous forest products. The Lieutenant-Governor regrets to learn that the relations between Raja Peary Mohun Mukerji and his tenants in the Ulubaria subdivision of the Hooghly district were also somewhat strained.

In the Khulna district the practice of one landlord buying up the rights of the under-tenants of another is said to be a fruitful source of ill-feeling and the cause of serious riots. In Faridpur the naib of a zamindar was murdered by some of the raiyats. In Backergunge the relations of landlord and tenant are reported to be strained in one-fourth of the district, while in Mymensingh their relations are reported to be those of sullen discontent. In the Patna Division disputes arising from enhancements of rent on the one side, and withholding of rents on the other, culminated in breaches of the peace in the Bihar subdivision of Patna, in Bhojepur in Shahabad, in Sitamarhi in Muzaffarpur, in the Madhubani subdivision of Darbhanga, and in Sewan.

The Board observe that—

"Proceedings under chapter X of the Tenancy Act have settled protracted and obstinate disputes in Dubalhati, in the Sujamutha estates of the Burdwan Raj, in the Srinagar-Banaili estates of Bhagalpur, in the Dakhin Shabazpur estates of Backergunge, in the Mollaipur estate in Birbhum, and may be expected to have similar results wherever they are conducted with discretion and in conformity with the law."

Operation of the Tenancy Act

24. It is reported that in many districts the tenants have not yet become familiar with the provisions of the Tenancy Act made in their favour. Sections 3 to 5, 19 to 38, 41 to 49, 53 to 75, 80, Chapter X, and sections 189 to 191, have been extended to the Orissa Division. The extension of the Act to the Chota Nagpur Division is still under consideration.

The following statement shows the operation in the various Divisions of some of the most important sections of the Act:—

1	2			3	4	5	6	7	8	9	10	11	12
	TRANSFER OF TENURES.												
DIVISIONS	(a) Voluntary section 12 (3).	(b) By sale in execution of decree sections 13 (2) and 14	(c) By succession, section 15	Commutation of rent payable in kind section 40.	Appraisement or division of produce where rent is paid in kind, sections 69 and 70	Registration of improvements, section 80.	Certificates of Collectors as to acquisition of land for building or other purposes, section 84	Notices of resumption of land by landlords, section 87 (2)	Written permission to landlords to measure land, section 90	Applications by Collector for appointment of common managers, section 93	Applications made for the survey and record of rights (under Chapter X).	Applications made for survey and record of proprietors private lands (under Chapter XI).	Local enquiries held by order of a Court, section 158
Burdwan	4,759	141	72	20	6	87		14			12	1	1
Presidency	6,525	240	167	...	3	18		5			14

Patna	1,475	9	.	23	306	91	...	889		.	1	.	8
Bhagalpur	1,266	87		1	73	14		108			1	3	2
Total for 1892-93	21,789	2 115	650	44	388	294		1,034	1		54	4	81
Do. for 1891-92	25,104	2,451	454	45	324	352		158		...	52	1	84

Fifty-four applications were made for survey and settlement under Chapter X of the Act, of which 6 related to Government estates, 4 to Wards' estates, and 44 to private estates. With regard to the operation of the provisions of the Act relating to giving of receipts, the Commissioner of Patna observes—

"I have frequently brought to notice the almost universal disregard by Civil Courts of the provisions of sections 56, 57, and 58. In no district that I have served in have I ever known of a Civil Court reporting a landlord for punishment under the third clause of the last-mentioned section, although the offence referred to constantly comes to the notice of every rent-suit Munsif in Bengal."

There was a remarkable increase in the number of notices of re-entry under section 87 (2) in the Champaran and Darbhanga districts, due, it is said, to the landlords seeing the advantage of complying with the law in this respect. But though, as the Board remark, this may be a sufficient explanation from the landlord's point of view, it is not a satisfactory explanation of the fact that 667 raiyats in Champaran and 116 in Darbhanga had so little interest in their holdings that they voluntarily abandoned them.

Rent suits.

25. The number of suits before Revenue Courts under the rent laws for the years 1891-92 and 1892-93 is shown below:—

DISTRICTS.	Number of cases instituted.		Increase.	Decrease.
	1891-92.	1892-93.		
1	2	3	4	5
Darjeeling ...	20	21	1	...
Jalpaiguri ...	4,050	4,690	640	......
Cuttack ...	2,952	2,674	......	278
Puri ...	2,035	2,112	77	......
Balasore ...	2,207	2,172	......	35
Angul ...	......	......	......	......
Hazaribagh ...	2,333	2,974	641	......
Lohardaga ...	9,937	8,627	......	1,310
Singbhum ...	458	395	......	63
Manbhum ...	6,605	6,321	......	284
Palamau ...	...	172	172	......
Total ..	30,597	30,158	1,531	1,970

In the Chota Nagpur Division the necessity for promptly disposing of rent suits and avoiding frequent adjournments has been impressed on the district officers and their subordinates. Only 183 applications for distraint were made in all of the districts in which the Bengal Tenancy Act is not in force taken together, as against 2,877 of the districts to which it has been extended. As the Board observe, the comparative fewness of applications in the former districts gives ground for suspicion that in them the system of "roking" of crops, or illegal distraint, is still had recourse to.

MISCELLANEOUS.

Collector's business statement.

26. There were 367,067 miscellaneous cases instituted against 365,795, and 390,450 disposed of against 355,901 in the previous year. The form of Collectors' business statement was revised and improved during the year.

Working of the Zamindari Dák Cess Act VIII (B.C.) of 1862.

27. As stated in paragraph 2 of this Resolution, the working of the Zamindari Dák Cess Act, so far as demand and collections of zamindari dák cess are concerned, has been transferred from the Magistrate to the Collector subject to the control of the Board. The rates of cess and the dates of payments of the half-yearly instalments have been fixed for the several districts for the next five years, commencing from 1st January 1893.

Out of 169,924 estates borne on the revenue rolls of the several districts, only 75,229, or 44·2 per cent., are assessed to zamindari dák cess as having a revenue of Rs. 50 and above. The total receipts of the year were Rs. 3,73,744, as noted below:—

		Rs.
Zamindari dák cess	...	3,39,568
Fines imposed under Act VIII (B.C.) of 1862 ...	...	27,239
Process fees	...	6,937
Total	...	3,73,744

The total cost of the zamindari dák was as follows:—

		Rs.
Cost of head-quarters establishment	...	52,139
Cost of process-serving and other collecting establishment	...	26,267
Wages of dák-runners and other expenses ...	...	2,77,452
Total	...	3,55,858

Merits of officers

28. The Board think it needless and invidious to attempt to distinguish between the respective merits and services of Commissioners, one and all of whom have given them able and willing assistance. The paragraphs relating to the conduct of officers will be communicated to the Appointment Department. The thanks of Government are due to Mr. Stevens for his able and efficient administration of the Land Revenue Department during the year, and Sir Antony MacDonnell desires to tender to both Members of the Board his hearty acknowledgments for the willing co-operation and valuable assistance which they have given him since he assumed charge of the administration of these Provinces.

By order of the Lieutenant-Governor of Bengal,

M. FINUCANE,

Offg. Secretary to the Government of Bengal.

Rainfall, Weather, and State and Prospects of the Crops.

BENGAL—*concld.*			
12	Chittagong ...	...	Report not received.
CHITTAGONG DIVN. 13	Noakhali ...	...	Report not received.
14	Tippera Oct. 21, '93	4·3	Weather—seasonable. Transplantation of *aman* paddy nearly finished. Prospects of crops not very hopeful. Recent rain has done some good to paddy. Price of rice has fallen a little. Fodder not sufficient.
15	Chittagong Hill Tracts. ...	...	Report not received.
DACCA DIVN. 16	Dacca Oct. 21, '93	2·30	Weather—hot with occasional rain. Harvesting of jute finished and that of paddy commenced in some places. Prospects of *aman* favourable. Mustard, *mug* and *kalai* being sown. Common rice selling at from 7 to 10 seers per rupee. Fodder available. No cattle-disease.
17	Faridpur .. 21, '93 Goalundo ... Madaripur ..	1·21 1·45 1·39	Weather—cloudy and fine with occasional slight rain. Prospects of standing crops good. Early *aman* being harvested and sowing of *kalai* commenced. Water subsiding rapidly. Price of rice 9 to 11 seers per rupee. Cattle-disease in some parts of Bhedorganj and Palong thanas in the Madaripur subdivision.
18	Backergunge „ 21, '93	2·09	Weather—hot with occasional rain. Nights getting cool. Prospects of standing crops fair. Common rice sells from 8 to 9 seers and coarse rice 10 seers per rupee. Fodder and water sufficient.
19	Mymensingh „ 21, '93	5·30	Weather—hot with occasional rain. Prospects of standing crops good. Common rice selling at 9 to 10 seers per rupee. Condition of cattle good. Supply of fodder sufficient except in the Kishorganj subdivision.
RAJSHAHI DIVN. 20	Dinajpur „ 21, '93 Thakurgaon ...	1·83 1·82	Weather—seasonable with slight showers. Outturn of winter rice expected to be 16 annas. Lands are being ploughed for *rabi* crops. Condition of cattle good. Price of rice at Sadar and Thakurgaon stationary. Supply of fodder and drinking water ample.
21	Rajshahi „ 21, '93 Nator ..	2·48 1·79	Weather—cloudy and rainy. Prospects of crops good. The rain has done much good to the standing rice crop. No cattle-disease reported. Water and fodder-supply ample. Price of rice stationary.
22	Rangpur „ 21, '93 Nilphamari .. Gaibandha ... Kurigaon ...	1·24 0·50 1·01 0·15	Weather—seasonable. Lands under preparation for cold-weather crops. Peas, mustard and *kalai* being sown. Prospects of *aman* very favourable. Price of common rice 9 to 10 seers per rupee.
23	Bogra „ 21, '93 Sherpur ... Naukhila ...	1·32 3·25 2·73	Weather—seasonable. Paddy and sugarcane doing well. Price of common rice stationary. Fodder and water sufficient.
24	Pabna „ 21, '93	1·86	Weather—cloudy and rainy. The late rain has done good to paddy. Mustard, *khesari*, and hemp are being sown. Rice sells at 10 seers per rupee in Pabna and Rs. 4-8 to Rs. 4-12 per maund in Sirajganj. Jute sells at Rs. 6-8 to Rs. 7-3 per maund. Fodder and water-supply sufficient.
25	Darjeeling „ 21, '93 Siliguri ...	5·47 1·8	Weather—cloudy and wet at beginning of week; fine at its close. *In the hills:—Haimanti dhan, bara marua, phaphur, kalai*, and potatoes progressing favourably. *Toree* being planted. *In the Terai.*—Prospects of *haimanti* favourable. Rain has done much good to standing crops. Outturn of jute and *bhadoi* estimated at 16 annas and 15 annas respectively. Prices of coarse rice :— Srs. Hills ... ... 9 } per rupee. Terai ... ... 11 }
26	Jalpaiguri „ 21, '93	2·70	Weather—seasonable. Prospects of standing crops good. Steeping of jute continues. Price of common rice stationary. Fodder and water sufficient. No cattle-disease.

	No.	District and date of return.	Rainfall at Sadar Station in inches.	Character of the weather and state and prospects of the crops.
BIHAR.				
Bhagalpur Divn.	27	Monghyr Oct. 21, '93 Begusarai ... Jamui ...	1·98 1·23 2·18	Weather—cloudy and rainy, hot in day, and cool in night. Prospect of winter rice very' promising. *Kurthi*, indigo, and sugarcane doing well. *Rabi* sowings commenced. Fodder and water sufficient. Cattle-disease towards Nawadih and Sekundra. Prices of common rice :— Srs. Sadar ... ... 11 to 14 } Begusarai ... ... 12 } per rupee. Jamui ... ... 12½ }
	28	Bhagalpur „ 21, '93 Banka ... Madhipura ...	2·76 1·00 0·55	Weather—seasonable. Sowing of *rabi* crops going on. Prospect of winter rice good. Cattle-disease is reported to be prevailing in the Sultanganj thana of the Sadar subdivision.
	29	Purnea „ 21, '93 Kishanganj ... Araria ...	3·46 0·75 1·05	Weather—cloudy with heavy rain towards the middle of the week. Cool in the morning and foggy. *Aghani* doing well. Cultivation for *rabi* progressing favourably. Fodder and water plentiful. No cattle-disease. Prices of rice :— Srs. Sadar ... ... 12 to 18 } Kishanganj ... ... 12 to 13 } per rupee. Araria ... ... 18 }
	30	Malda „ 21, '93	4·18	Weather—fair; rather warm for the time of the year. Rain has done good to winter rice which is coming into ear, but retarded indigo sowing. Sowing of *rabi* crops commenced. Ordinary rice selling from 11 to 16 seers per rupee. Fodder and water-supply sufficient.
	31	Sonthal Parganas „ 21, '93 Deoghur ... Godda ... Jamtara .. Pakur ... Rajmahal ...	1·15 1·93 2·43 2·10 2·61 2·10	Weather—sultry with partial rain in heavy showers; clearing up now with north wind. There has been almost too much wind and rain. Rice will be a bumper crop. Lands are being prepared for winter crops. Fodder-supply good.
Patna Division.	32	Patna „ 21, '93 Bihar ... Dinapore ... Barh ...	6·13 1·77 11·06 1·14	Weather—now fine after a most cloudy week. The rice crop is not believed to have suffered from the heavy rain in the north-west of the district, and in the east it has had sufficient rain to still more improve its prospects. Potatoes have suffered in Dinapore and Sadar. Prices of common rice:— Srs. Sadar ... ... 16 } Barh ... ... 12½ } Bihar ... ... 17 } per rupee. Dinapore ... ... 13 }
	33	Gaya „ 21, '93 Nawada ... Jahanabad ... Aurangabad ...	1·67 2·11 2·93 3·21	Weather—stormy most of week: now clear and cool. Crop prospects much improved by rain. Paddy crop excellent, and prices of rice fallen to— Srs. Gaya ... ... 14½ } Aurangabad ... ... 14½ } Jahanabad ... ... 15 } per rupee. Nawada ... ... 17 } Fodder and water-supply ample.
	34	Shahabad „ 21, '93 Buxar ... Sasaram ... Bhabhua ...	3·60 8·44 5·60 3·19	Weather—cool and cloudy with alternate sunshine. Prospect of paddy continues to be promising except in the Sasaram subdivision. *Rabi* already sown is reported to have suffered on low lands. Reaping of *serha* and *sathi* paddy practically over. Prices stationary.
	35	Darbhanga „ 21, '93 Madhubani ... Samastipur ...	9·32 4·75 2·67	Weather—cloudy and rainy. The rainfall of the week has done immense good to the rice crop generally. It has, however, injured the *rabi* already sown. Fine weather is now much wanted to facilitate cultivation for *rabi* sowings. Fodder for cattle sufficient. Prices remain stationary.
	36	Muzaffarpur „ 21, '93 Hajipur ...	11·80 6·14	Weather—rainy but fair since yesterday (20th). Rice doing well. *Rabi* sowings retarded on account of heavy rain. Fodder plentiful.

	No.	District and date of return.	Rainfall at Sadar Station in inches.	Character of the weather and state and prospects of the crops.
BIHAR—*concld.*				
PATNA DIVISION—*concld.*	37	Saran Oct. 21, '93 Siwan ... Gopalganj ...	4·23 8·81 1·53	Unusual amount of rain for the season. Prospects of crops excellent. Fodder and water plentiful. Prices of common rice:— Srs. Ch. Chapra ... ... 15 12 Siwan ... ... 15 8 per rupee. Gopalganj 16 14
	38	Champaran „ 21, '93	8·40	Weather—was very foul during the first three days of the week with constant showers. It has cleared up from yesterday (20th). Prospects of *aghani* good. Prices almost stationary. Fodder and water sufficient.
ORISSA.				
ORISSA DIVN.	39	Cuttack ...	...	Report not received.
	40	Puri Oct. 19, '93 Khurda ...	7·17 5·34	Weather—stormy with frequent showers. *Sarad* rice growing well. *Laghu* rice in ear. Miscellaneous crops doing well. General prospects good. Prices of common rice:— Srs. C. Srs. C. Sadar ... ... 14 7 to 15 12 per rupee. Khurda ... ... not reported.
	41	Balasore „ 21, '93	4·40	Weather—seasonable. The recent rainfall has been most beneficial to the crops, especially on high lands.
CHOTA NAGPUR.				
South-West Frontier Agency.				
CHOTA NAGPUR DIVN.	42	Hazaribagh Oct. 21, '93	4·45	Weather—stormy and very wet; fine since 20th. Prospects of winter rice very good; 16-annas outturn expected. Sugarcane doing well. Sowings of *rabi* crops about three-fourths completed. Fodder and water ample. Prices stationary.
	43	Lohardaga ...	...	Report not received.
	44	Palamau Oct. 20, '93	2·93	Heavy rain and wind, which cleared off to-day (20th). Heavy rain throughout the district has greatly benefited the paddy which will now be a full crop. The rain has damaged the *rabi* lately sown, but there is plenty of time for resowing where necessary, and prospects are extremely favourable. A little cattle-disease reported. Prices still stationary. Fodder and water ample.
	45	Singhbhum „ 21, '93	0·76	Clouds have nearly dispersed. Cold weather has decidedly set in this morning. Crops continue to thrive, and the late showers have improved the prospect. Cattle-disease reported from Baharagora.
	46	Manbhum „ 21, '93	1·98	Weather—stormy with heavy rain, not favourable to the crops. Low-land crops are suffering from excessive moisture. Rice sells from 10 to 13 seers per rupee. Fodder and water sufficient

* Mean of 5 days. † Mean of 6 days.

Explanation.—Summary.—The normal means of air pressure and temperature are the arithmetical average or means of the reading during the same period
The *humidity* of the atmosphere is expressed at percentage, saturated air being presented by 100. A clear sky is denoted by 0 and an overcast sky by 01
rainfall the normal mean are the numerical means or average of the rainfall in that district determined from the returns sent in by the subdivisional station
district, *i.e.* from total rainfall at the subdivisional stations in the district sending in returns divided by the number of stations. A rainy day is one of

for the week ending Saturday, the 21st of October 1893.

Variation from normal mean.	Mean 8 A.M. temperature.	Average humidity at 8 A.M.	Average cloud amount at 8 A.M.	Rainfall of week at observing station.	DISTRICT OBSERVATIONS. — Of week — Mean for district.	Normal mean.	Average number of rainy days.	Normal number of rainy days.	Rainfall. — Since 1st of month. — Mean for district.	Normal mean.	Variation.	Since 16th October 1893. — Mean for district.	Normal mean.	Variation.	District.

Explanation.—... indicates that no rain has fallen. If the return for any day has not been received, the corresponding space is left blank. If any of the returns are wanting, the corresponding spaces in the total rainfall columns are left blank. With reference to the column of rainy days, the definition of a rainy day is when at least 0·1 inch of rain has fallen.

CALCUTTA, *the 24th October* 1893.

SUMMARY OF THE METEOROLOGICAL AND RAINFALL OBSERVATIONS TAKEN IN BENGAL, AND OF THE METEOROLOGICAL OBSERVATIONS TAKEN IN ASSAM, FOR THE WEEK ENDING 8 A.M., SATURDAY, THE 21ST OF OCTOBER 1893.

THE easterly wind circulation which was a prominent feature of the weather during the previous week continued without a break during the present one, and was accompanied by continuous showery weather in all districts. The low pressure in the west of the Bay, to which this was due, intensified, and a shallow depression developed in the early part of the week off the coast of the Circars. The depression was never of great depth, the difference from the normal being only ·16 inch when the area of lowest pressure drifted across the coast in a westerly direction, but its influence was well marked in two respects—(1) in causing squally weather in the Bay, (2) in leading to the unusually heavy rainfall in the western districts, and especially in North Bihar. The depression became noticeable on the first day of the week, though pressure was then rising except at Coconada and Masulipatam, and it was well defined on the fol g day. Though there was no large change of pressure on that day, the moderate fall in the west of the Bay and the brisk rise in Burmah and Assam led to considerably steeper gradients from west to east and a well-defined cyclonic circulation over a wide area. General rain then fell in all districts, but especially in the western half of the province, and temperature was above the normal only in North Bengal and Bihar. The depression moved to the west into Central India, but as a well-defined trough of low pressure lay north and south, the area of lowest pressure afterwards took a northerly direction, passing over the North-Western Provinces and breaking up on reaching the adjacent part of the Himalayan range. In consequence of this northerly direction of motion, showery weather continued in Bengal on the 17th and 18th, and on the 19th, the day after the depression had disappeared, general unsettled weather with numerous local thunderstorms and very heavy rainfall prevailed along the hills and in the adjacent plains. Most of the stations in North Bihar reported between 5 and 10 inches on that date. In the Darjeeling Hills the rainfall was not so heavy, the average fall being between 3 and 4 inches.

On the 17th and 18th conditions in the south-east of the Bay again became unsettled, but there was no definite disturbance till the 19th, when stormy weather developed rather rapidly to the west of Diamond Island. A depression of no great extent but of much greater depth and intensity nearer the centre than the one in the early part of the week moved rather rapidly into the centre of the northern half of the Bay on the 21st, the last day of the week. Though a diffused low pressure area was then shown by the observations taken at the coast stations, there was no sign of stormy weather except at Diamond Island up till the end of the week, and the depth of the depression or the character of the resulting storm could not be estimated.

Pressure has been slightly below the normal in the western districts owing to the shallow depression which affected the weather in the province and the west of the Bay during the first half of the week. Changes were seldom more than ·05 inch except on the 17th and 18th, when there was a fairly rapid rise in Orissa and the Circars. After the original depression broke up on reaching the hills on the 19th, a slight residual low pressure area moved eastward across North Bihar and North Bengal, where it was fairly well defined on the 20th, but on the 21st it had entirely disappeared.

Temperature.—In the early part of the week mean temperature was above the normal over the whole province by amounts varying from 1° in the southern districts to 4° in the west of Bihar. As the unsettled rainy weather developed and spread northwards, temperature fell, and by the middle of the week there was defect at most stations, but chiefly in the day readings. When the heavy rain fell in Bihar there was a large fall of temperature, defect in maximum readings being more than 10° in places. In Assam and the eastern half of the province the mean for the week is about half a degree above the normal, but in the other districts there is defect, greatest in Chota Nagpur and Orissa where it is 1°.

Rainfall.—As stated above, almost general rain fell in all districts except on the last day of the week, when the indraught towards the low pressure area which had then formed in the east of the Bay gave northerly instead of the easterly winds hitherto prevailing. The heavy fall in Orissa is due to the continued moderate rain during the first five days, and the similar amounts in Chota Nagpur and Bihar to the northerly direction taken by the disturbance which commenced on the 17th. The average fall in Orissa is 5·5 inches, in North Bihar 5·2 inches, the latter being about twelve times the normal; Chota Nagpur and South Bihar received between three and four inches, or more than six times the normal; while in the other districts excess was smaller, varying from ·6 inch in Lower Bengal to 1·6 inches in North Bengal.

The following table gives the summary of the temperature and rainfall data of each of the seven meteorological divisions of the province for the week ending Saturday, the 21st of October 1893:—

Meteorological Divisions.	Temperature.						Rainfall.									
	Highest observed during week.	Lowest observed during week.	Averages for week.			Average mean of week above or below normal mean of week.	Of week.			Rainy days.			Since 1st of month.		Since 16th May 1893.

The total fall from 1st January to 21st October 1893	85·20
The average fall of the corresponding period for 24 years, Surveyor-General's Office	62·57

The mean pressure, temperature, &c., are deduced from the traces of the Barograph and Thermograph and from observations made at 6h, 10h, 16h, and 22h.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed open at the sides and are suspended four feet above the ground.

The barometer readings are corrected approximately to those of the standard, Newman's No. 86, formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed in the Meteorological Office, and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground.

o, overcast; g, gloomy; d, drizzling rain; p, passing temporary showers; t, thunder; lr, lightning reflection; △, dew.

RESOLUTION ON THE ANNUAL GENERAL ADMINISTRATION REPORT OF THE PATNA DIVISION FOR THE YEAR 1892-93.

GENERAL DEPARTMENT.—MISCELLANEOUS.

Darjeeling, the 28th October 1893.

RESOLUTION.—No. 688T.—G.

READ—

The General Administration Report of the Commissioner of Patna for 1892-93.

Read also—

The Administration Report for 1891-92 and Resolution thereon.

Mr. D. R. Lyall was in charge of the Division from 1st April to 24th May, and was succeeded by the late Mr. Worsley, whose much lamented death occurred a fortnight later. Mr. Hopkins was in charge from the 6th to the 23rd June, and Mr. Forbes, by whom this report is submitted, for the rest of the year.

Tours and inspections.

2. Under existing orders, Commissioners are required to be on tour at least four months in the year, to spend at least a fortnight in each district, and to inspect every Collector's office and every sub-divisional office. The Commissioner of Patna was on tour for the prescribed period, but was unable to inspect the Saran district offices and the sub-divisional offices of Jahanabad, Barh, Dinapore, Siwan, and Gopalganj. Mr. Forbes says that the requirements of Government

in this respect cannot be fulfilled in his Division, in which distances are great and camp equipment and stores have often to be taken in bullock carts, thus causing serious waste of time. The Officiating Lieutenant-Governor admits that the inspection of all offices in the Patna Division is in average years difficult to accomplish consistently with the due despatch of the Commissioner's own onerous office duties at Bankipore. He has no doubt whatever that Mr. Forbes did as much as could, in the interests of general efficiency, be done in the way of inspection.

The Collectors of Patna, Gaya, and Shahabad, which are classified as large districts, should under the standing orders spend four months, and the Collectors of the other districts of the Division at least three months, every year on tour. Mr. Macpherson, the Collector of Gaya, complied with these orders and appears to have made useful tours and thorough inspections. The tours of the Collectors of Patna fell 10 days short of the prescribed minimum.

The Collectors of Shahabad were 124 days in camp; but out of this period a month was spent by Mr. Skrine at Dumraon in making preparations for an Agricultural Show. The Agricultural Show at Dumraon was not of such importance that it need have taken a month of the Collector's time to make preparations for it, and the Commissioner would have been justified in shortening the Collector's stay at Dumraon. The sub-divisional offices in this district were inspected only once in the year, which is unsatisfactory.

The Collectors of other districts spent more than the minimum prescribed periods in camp, and made biennial inspections of their sub-divisional offices; but it is not stated, except in the case of Mr. Hopkins, whether, as required by the Board's rules, they in the course of their tours inspected Government and Wards' estates and the settlements in progress in their districts. Such inspections are, in the Lieutenant-Governor's opinion, of great importance, and special reference should be made to them in future reports.

All Sub-divisional Officers appear to have complied with the orders of Government in regard to the duration of their tours.

Weather and crops.

3. The average rainfall for the whole Division (45·53 inches) was slightly above the normal, the fall in Champaran being considerably, that in Patna and Darbhanga slightly above, and that in the other districts a little below, the normal. The rainfall was not, however, well distributed, being less than a fourth of the normal in May, followed by a heavy fall in the second week of June, and by dry weather for the rest of that month. The monsoon did not really break before the end of June. July was normal, the rainfall in August was almost double the normal, there was an untimely cessation of the rains in September, and a general failure of the *hateya* rains in October.

The bhadoi crops, which were backward owing to the late setting in of the monsoon, were in many places drowned by the excessive rains of August. The failure of the *hateya* rains affected the winter rice, which promised to be a bumper one, but turned out, according to the Commissioner's estimate, to be only a 12 to 13 anna crop. A larger area than usual was sown under rabi crops, and on the whole these crops promised well to the end of February, when several days of abnormally wet stormy weather, followed in March by east winds and damp cloudy weather, caused much damage and reduced the outturn to about 12 annas, or three-fourths of an average crop. The outturn of indigo was only half that of the previous year, and opium yielded only a 14-anna crop. The Commissioner remarks that the total produce of all crops of the year was somewhat above the average, a remark which is a little unintelligible, seeing that the yield of each harvest and of each crop in turn is said to have been less than the average.

Prices of food and wages.

4. Though the price of food-grains has, owing to the opening out of railways and roads and other causes, risen greatly in this Division in the past twenty years, there yet appears to be no corresponding rise in the wages of unskilled agricultural labour. The wage of a common cooly is said to be now, as it was eighty years ago, $1\frac{1}{2}$ to $2\frac{1}{2}$ annas a day. This fact is all the more remarkable when it is remembered that in the districts of Dacca, Backergunge, Tippera, and Noakhali, which are almost as thickly populated as Bihar, nobody will work for less than 5 to 6 annas per day. The explanation probably lies in the facts that wages in

Bihar are still largely regulated by custom, that an element of compulsion still exists in some parts, and that many of the labourers hold patches of land which bind them down to the locality in which they live, "enabling them to exist upon smaller wages and to carry on their multiplication so much the further before reaching the point below which they cannot or will not descend."

Public health.

5. The year was a particularly unhealthy one. A widespread and malignant epidemic of cholera occurred during the hot weather months. The exceptionally early dry season is supposed to have given rise to malarial emanations from the drying up of lands which in other years remained covered with water, and the undoubtedly straitened circumstances of a large number of the population assisted, according to Mr. Hare, the Collector of Muzaffarpur, the spread of cholera, fever, and other diseases. The wells also ran low, and the water available for drinking was impure.

The rate of registered deaths was 36·5 per thousand as against 29·3 in the preceding year. Part of this increase is, however, attributed to improvements made in the system of registration of vital statistics.

Material condition of the people.

6. Much has been written as to the depressed condition of the masses of the people of this Division. The northern part of the Division is the blackest of the black spots in the famine map; wages are low; rents high, the population dense, poor and badly fed; distress and rumours of distress and starting of relief works are ever recurring characteristics of the local officers' annual reports. In the year under review, owing to widespread failure of the preceding year's rice and rabi crops, relief works had to be opened in the second week of March in Darbhanga and Muzaffarpur. By the middle of May no less than 22,000 people were on these relief works in Darbhanga, and 6,300 in Muzaffarpur, while by the end of the 1st week of June the numbers rose to 43,470 in the former and 14,147 in the latter district. Had the rains of 1891-92 not been favourable, as they happily were on the whole, "there is no doubt," Mr. Forbes remarks, "that famine would have at once crushed down upon these districts." The material condition of the people in Darbhanga and Muzaffarpur, especially during the first few months of the year, was, the Commissioner says, reduced to a low ebb, and their physical condition fell off in a marked degree, and this, Mr. Forbes adds, was particularly noticeable among the children. Though there were no deaths reported from actual starvation, the mortality among the old and infirm necessarily increased for want of proper nutrition. The Collector of Darbhanga, Mr. Williams, says "there can be no doubt that had the authorities not come to the rescue, the deaths from actual want of food would have been numerous." The state of things affords a sad commentary on the assertions which have been made that Government, in its endeavours to improve the agrarian system and impose some check on enhancements of rent in North Bihar, is unnecessarily interfering with private rights.

As bearing on the material condition of the people, Mr. Forbes notices that the registrations, sales, and mortgages of properties valued at Rs. 100 and upwards increased from 100,010 during the five years preceding the passing of the Tenancy Act to 157,130 during the five following years, while similar transactions in the case of petty properties valued at less than Rs. 100 increased from 57,466 to 197,489. As the Tenancy Act made no change in the previous law regarding the transfer of tenures and holdings, the increased number of transfers only indicates increasing indebtedness and poverty of the raiyats, and the greater necessity that there is for assiduous watchfulness on the part of Government and the local officers in protecting them in the exercise of their legal rights.

Emigration and Immigration.

7. The number of emigrants from the Division registered during the year was 2,695 to the Colonies and 1,211 to the tea districts —total 3,906—a number so insignificant that it may be safely asserted that emigration as a means of alleviating the condition of Bihar may, for the immediate future, be wholly left out of consideration. There is, apart from registered emigration, a considerable amount of unregistered emigration to the Duars and Assam, and a large annual exodus of labourers to the districts of Eastern Bengal for temporary employment. This annual migration, which resembles closely the annual migration to England of

harvesters from the congested counties of Ireland, is a source of much benefit to the people of Bihar. It has been fostered and faciliated by the improvements in road and railway communications which have made such great progress in recent years.

Manufacture, Trade and Commerce.

8. Omitting opium, the principal manufactures are indigo and saltpetre. The outturn of indigo was only 42,404 maunds as against 83,600 in the previous year, but the value was about Rs. 30,000 per 100 maunds against Rs. 18,000 in 1891-92.

Speaking generally, trade was dull. Owing to fairly good harvests the importations of food-grains were less than in the preceding year, while owing to previous depletion of local food-stocks, there was less available for exportation.

The exports of salt to Nepal increased from 36,373 maunds in 1890-91 to maunds 1,00,724 in 1891-92 and to 1,72,528 in 1892-93. The increase is said to be due to the fact that the Nepalese now obtain their salt from British territory instead of Thibet.

Civil Justice.

9. The total number of original suits disposed of by District Judges and Subordinate Judges was 2,898 against 2,870 in 1891-92.

The following table shows the working of the Munsif's courts:—

District.	Sub-division or chauki.	Description of Court.	Number of officers.	Number of original cases disposed of. Ordinary.	Small Cause Court.	Details of cases in columns 5A and 5B. Money.	Rent. * The fraction means that an officer was employed for the fractional part of the year.
† Disposed of by the Subdivisional Officer of Bhabua.

The number of money suits shows an increase of 1,485, and that of rent suits a decrease of 607 as compared with the previous year. With a population of 15,811,014 persons, mainly agricultural, the total number of rent suits was 17,140, or little more than 1 per thousund of the population, or say one suit for every 200 holdings, while the Chittagong Division shows 31,237 rent suits, with a population of only 4,189,886, or 7 per thousand of the population, or one case for every 28 holdings. The great disparity in these figures indicates clearly either that rents are easily paid in Bihar, or that other methods than recourse to the civil courts are resorted to in order to realize them. The probability is that the latter explanation is the true one.

Criminal Justice and Police.

10. The following tables exhibit the principal statistics relating to the criminal work of the Division:—

Statements of work done by Stipendiary Magistrates.

District.	Sub-division.	Class of officers.	Number of officers	Cases disposed of.	Persons disposed of.	Ratio per cent. of persons convicted to disposed of.	Number of witnesses examined.	Ratio per cent. of witnesses detained over two days to total number examined.	Ratio per cent. of decisions confirmed on appeal to total appealed.	Number of A cases disposed of.	Number remanded six times and more.	Average number of cases disposed of per officer.	Average number of witnesses examined in each case.	Ratio per cent. of column 12 to column 11.

		Total for 1891-92	35	14,152	15,788	76	13,188	1·8	66	182	10	404	1	5

The average number of cases disposed of by each Stipendiary Magistrate was 326, the smallest number being at Arrah. Five other courts also fell below 200 cases per officer, all but one of which were at head-quarters.

The ratio per cent. of witnesses detained by Stipendiary Magistrates over two days to the total number examined was 5·4 as against 5; and by Honorary Magistrates 3·35 as against 1·8 in the previous year. The Officiating Lieutenant-Governor regrets to have to notice a falling off in this respect, especially in Jahanabad, Hajipur and Barh, where 22·4, 16·8 and 10·7 per cent. respectively of the witnesses were detained for more than two days.

The number of cognizable offences reported increased from 32,946 in 1891-92 to 40,035 in the year under review, or by more than 21 per cent. The number of non-cognizable offences also increased from 17,922 to 18,920. The increase in cognizable crime was partly due to the prevailing distress in Gaya, Darbhanga, Muzaffarpur and Patna, and partly to the greater activity on the part of the police, District Boards, and Municipal Commissioners in prosecuting for public nuisances, and offences against bye-laws.

There were 18 cases of drugging during the year, of which 8 occurred in Saran, and 2 of these were committed with *datura*, the medium being tobacco, by a lad of 18 years, who was proved to have been at the trade for years. An alarming outbreak of dacoity occurred in Gaya, which, however, has been suppressed by an organised system of police patrols, and by requiring a number of the most dangerous bad characters to give security for good behaviour.

Of the Mugheya Domes, who are the most inveterate criminals of the Division, 91 absconded from their settlements, and 31 were convicted of house-breaking and theft. The total number of reported offences is 58,955 with a population of nearly 16 millions, or about 3½ per thousand.

11. The statement below gives the attendance of Honorary Magistrates by districts:—

District.	Number of Honorary Magistrates.	Number of times asked to attend.	Number of actual attendance.	Number of Absences		
				With leave or notice.	Without leave or notice.	Total.
1	2	3	4	5	6	7
Patna ...	66	2,972	2,131	361	527	888
Gaya ...	71	800	583	97	120	217
Shahabad ...	57	1,017	748	111	158	269
Muzaffarpur ...	40	1,757	1,248	250	259	509
Darbhanga ...	82	1,364	729	175	460	635
Saran ...	16	401	336	48	17	65
Champaran ...	16	286	211	7	68	75
Total ...	348	8,597	5,986	1,049	1,609	2,658

The attendance of the Honorary Magistrates has been fairly satisfactory, though there is room for improvement.

12. The following table shows the working of the Sessions Courts:—

	Districts.							
	Patna.	Gaya.	Shahabad.	Muzaffarpur.	Darbhanga.	Saran.	Champaran.	Total.
1	2	3	4	5	6	7	8	9
Number of cases committed during the year ...	60	60	38	42	52	49	52	353
Number disposed of	63	43	33	44	54	48	50	335
Number in which conviction obtained ...	45	23	26	28	33*	38	44	232
Of above, in which sentence was modified or reversed by High Court.	5	6	3	...	3	5	......	22
Number of cases acquitted by Sessions Judge ...	18	20	7	16	20*	15	6	102

* 1 One otherwise disposed of.

The percentage of cases in which convictions were obtained was 69·2 against 66·6 in the previous year.

13. The fines imposed and realized were as follows:—

	Districts.							Total.
	Patna.	Gaya.	Shahabad.	Muzaffarpur.	Darbhanga.	Saran.	Champaran.	
1	2	3	4	5	6	7	8	9

In Saran alone was the balance at the end of the year less than at the beginning.

Registration.

14. The following table shows the number of registrations in each district:—

District.	Class of Registration office.	Number of offices.	Number of documents registered.	Average number of documents registered.
1	2	3	4	5
Patna	Special	1	6,513	2,332
	Rural	5	7,484	
Gaya	Special	1	4,192	1,599
	Rural	4	3,807	
Shahabad ...	Special	1	5,666	2,836
	Rural	4	8,515	
Muzaffarpur ...	Special	1	6.651	3,916
	Rural	6	20,763	
Darbhanga ...	Special	1	4,282	2,499
	Rural	7	15,711	
Saran	Special	1	8,076	3,196
	Rural	6	14,297	
Champaran ...	Special	1	5,818	4,145
	Rural	4	14,911	
Total ...	Special	7	41,198	5 885
	Rural	36	85,488	2,374
Total for 1891-92 ...	Special	7	72,396	10,342
	Rural	32	42,410	1,325

The number of documents registered increased from 114,806 in 1891-92 to 126,686 in the year 1892-93. This increase is shared by all districts except Saran, where there was an unusually large number of registrations in 1889-90, and is no doubt largely due to the advancing popularity of the system. There was a marked increase in Darbhanga, "owing mainly," the Collector says, "to the prevalence of scarcity and to the registration of cultivators' leases in favour of the Maharaja of Darbhanga, the Mohant of Panchbari, Rai Gunga Pershad, and the Babus of Madhubani, probably in anticipation of the cadastral survey operations about to begin in the district." The Officiating Lieutenant-Governor has lately had one of these so-called leases, or *sharanamahs*, submitted to him in connection with a question of stamp duty, and regrets to have to notice that some of the conditions contained in it were wholly inconsistent with the law.

Land Revenue and Cesses.

15. The following statement shows the demands and collections, land revenue and cesses of the districts of the Division:—

District.	Class of demand	Class of estates.	Number of estates.	Demand. Current.	Demand. Arrear.	Collections of 1892-93. Current.	Collections of 1892-93. Arrear.	Balance on 1st April 1893. Current.	Balance on 1st April 1893. Arrear.	Remarks.

The current collections of revenue in permanently-settled estates, class I, for the Division as a whole amounted to only 95·3 per cent on the current demand. The prescribed standard, 99 per cent, was only reached in Darbhanga and Champaran, while in Patna the realizations on account of the current year's demand amounted to only 88·7, and in Shahabad to 90·17 per cent of the current demand. These results cannot be said to be satisfactory. The short collections are attributed to the bad rabi harvest; but seeing that the Commissioner reports that the harvests on the whole were little if at all below the average, the Lieutenant-Governor considers that no sufficient reason has been given for failure to realize the Government revenue. The attention of the Board of Revenue will be specially drawn to the matter.

The arrear collections were also below the prescribed standard in Gaya, Saran and Champaran. In the last-named district there is a large outstanding balance owing to embezzlements now under enquiry. In the case of estates temporarily settled (class II), the collections were in every district below the standard of 95 per cent., and were particularly bad in both Government and private estates leased to farmers. The Officiating Lieutenant-Governor does not understand why there should be any difficulty in realizing Government dues from these farmers, and does not see what merits there can be in this system of management if it does not secure the punctual payment of the revenue.

The realizations in estates managed by Government direct (class III) were also far below the standard prescribed for this class, which is 90 per cent., the collections for the Division as a whole being only 67·46 per cent. in estates managed for proprietors, and 76·40 in estates owned by Government as proprietor. In Darbhanga alone was the standard reached, while in Saran the collections amounted only to 58·31, and in Gaya 66·44 of the demand.

Taking the Division as a whole, the demand of land revenue, current and arrear, was Rs. 87,16,831, and the collections Rs. 81,57,728, leaving an outstanding balance, after deducting remissions, of Rs. 5,13,966, or Rs. 24,690 in excess of that of the previous year. This is not satisfactory, and calls for the special attention of the Board of Revenue.

Road and Public Works Cesses

16. Out of a gross demand of Rs. 31,95,446, a sum of Rs 25,76,807 was realized and Rs. 6,031 remitted, leaving a balance at the close of the year of Rs. 6,12,608. Compared with the previous year there was an improvement, except in Darbhanga and Champaran; but it is curious to note that Shahabad, which fell so far short of the prescribed standards in the realization of the Government revenue, alone reached that standard in the collection of cesses. The Lieutenant-Governor will be glad to know whether in the Shahabad district there was any priority given to cesses in the crediting of moneys paid in.

Sales

17. Eight thousand and eight estates and shares of estates became liable to sale, but of these 337 or 4·2 per cent. were actually sold. It is clear that the Sale Law was worked with leniency.

Certificate procedure.

18. The following statement shows the working of the Certificate Department:—

District.	Department.	Number pending at beginning of year.	Number issued during year.	Total for disposal.	Amount of certificates.	Number disposed of during year.	Amount realized.	Number pending at close of year.

* This total does not agree with the grand total for 1891-92 given by the Commissioner.

The total number of certificates issued increased from 36,505 to 44,146. It was only in Muzaffarpur and Gaya that the disposals kept pace with the institutions. The bulk of these certificates were issued for the recovery of cesses under Act IX of 1880, and the Lieutenant-Governor is glad to observe that the issue of certificates for recovery of rent in Wards' and Government estates was sparingly resorted to.

19. The disposals exceeded the institutions in all districts except Gaya.

Partitions. Sir Antony MacDonnell trusts that the orders recently issued by the Board, under Sir Charles Elliott's instructions, will cause partitions to be carried on in a systematic

manner, and that care will be taken that these proceedings are not allowed to be abused, as they hitherto have been, for the purpose of bringing about illegal and improper enhancements of rent.

Working of the Tenancy Act.

20. Under this head the Commissioner notices that 889 notices were given by landlords under section 87 of the Act of their intention to treat holdings as abandoned; 116 of these were in Darbhanga and 667 in Champaran, against 6 in the former and none in the latter during the previous year. This is by no means a satisfactory feature of the year's report, for the voluntary desertion of their holdings by tenants indicates either that they had no substantial interest in their lands, or that they were so heavily embarrassed that they found it necessary to go away by stealth. This "absconding" of tenants, which is one of the well-known results of scarcity in North Bihar, should be closely watched by the local officers.

Excise, Stamps, and Income-tax.

21. The excise revenue increased by Rs. 1,43,266, that from stamps by Rs. 17,899, and the demand for income-tax by Rs. 11,827. The following table gives the excise statistics of the year:—

District.	Country Spirits.				Ganja and Bhang.				Opium.				Tari.

Total of Division, 1892-93 ...	24,86,232	2 6
Total of Division for 1891-92 ...	23,41,744	2 5

The comparatively high rate of incidence per head of the population in Gaya, is noticeable, as Gaya, owing to the prevalence of the *baouli* or *metayer* rent system, is in a depressed condition. But undoubtedly Darbhanga is very wretched, and this is indicated by the inability of the people to afford any luxuries. The insignificance of the revenue from opium in the great opium-producing area is remarkable. Either the people are not opium-consumers, or they manage to secrete from the produce of their fields sufficient for their wants. The Lieutenant-Governor thinks the people of Bihar are not opium-consumers to any considerable extent. There may be some secretion of opium, but the opinion is that it cannot be considerable.

Education.

22. The following table gives the principal Educational statistics of public institutions in the Division:—

District.	Class of schools.	Number of schools.	Number of pupils on the rolls.	Cost. Provincial.	District Board.	Municipality.	Fees.	Other.	Total.	Cost per head of pupil.	Population of the district.	Number of boys of school-going age at 15 per cent. of male population.	Percentage of boys at school to total boys of school-going age.

NOTE.—Percentages in column 14 include boys in private institutions.

The total number of public schools in the Division fell from 6,389 to 6,025 and of pupils from 158,431 to 151,293. The decrease was principally in the lower primary schools in Gaya, Shahabad, and Saran, and is attributed to the agricultural distress, the withdrawal of fixed stipends from several schools under the system of payment by results, and to the subordinate inspecting staff having rigidly enforced the new rules regarding the grant of rewards.

The percentage of boys at schools, public and private, to the total number of a school-going age, in the Division as a whole, is 15·2, while in Muzaffarpur, Darbhanga, and Shahabad not one boy in every nine is at school who ought to be there. Primary education is miserably backward in these districts, and does not appear to be making any substantial progress.

The cost of education per head ranged from Rs. 27-0-7 in Patna to Rs. 16-3-9 in Darbhanga in high schools, from Rs. 12-10-8 to Rs. 9-13-7 in middle schools, and in primary schools from Rs. 2-13-10 to Re. 1-11-9. In primary schools, the average cost per pupil for the whole Division was Rs. 2-5-3, or nearly double as much as the average cost (Re. 1-6) in the Chittagong Division.

Comparing the totals for the entire Division with those for Chittagong, it appears that in the whole of the Patna Division, with a population nearly four times as large as that of Chittagong, the number of boys at school was actually smaller in the former than in the latter Division, while the expenditure from Provincial Revenues, District Boards and Municipal Funds, and the receipts from fees, were nearly double as much again as in the Chittagong Division. The remarkable disparity in the relative numbers of pupils and the cost of educating them in these two Divisions is a matter that should engage the attention of the Educational authorities. No effort should be spared to push on education in Bihar, both of the secondary and primary kind. The Officiating Lieutenant-Governor has noticed with great regret how few natives of Bihar are holding judicial or executive appointments of dignity or emolument in their own Province. The number he believes is actually less now than it was some years ago. This is not as it should be, and if the backwardness of the Province in this respect is due to educational disadvantages, an effort should be made to redress the grievance.

Dispensaries.

23. The following statement gives the statistics of dispensaries:—

District.	Number of dispensaries.	Income from—					Daily average patients—		Ratio per cent. of out-door patients to total population.
		Government.	District Board.	Municipality.	Subscriptions.	Total.	In-patients.	Out-patients.	
	2	3	4	5	6	7	8	9	10
		Rs.	Rs.	Rs.	Rs.	Rs.			
Patna	11	335	3,753	17,888	1,219	23,195	2,867	71,700	4·0
Gaya	7	611	5,677	6,582	7,336	20,206	1,671	34,047	1·1
Shahabad	8	2,101	1,900	7,183	5,555	16,739	1,184	67,431	3·3
Muzaffarpur	4	78	1,700	4,590	4,347	10,715	1,049	45,359	1·6
Darbhanga	6	118	691	4,969	12,549	18,327	1,072	86,938	3·1
Saran	10	210	5,984	7,892	9,041	23,127	952	122,560	4·9
Champaran	4	1,259	800	4,479	3,080	9,618	1,041	56,216	3·0
Total	50	4,712	20,505	53,583	43,127	1,21,927	9,836	484,251	21·0

Though the Division is most backward in the matter of education, it takes a high place in respect of dispensaries and medical aid. Great zamindars, such as the Maharajas of Darbhanga and Hutwa, and the Maharani of Bettiah, keep up dispensaries at their own expense, and District Boards and Municipalities are also very liberal in supporting such institutions. The total number of patients treated was 494,087, or more than three times the number of pupils at school; the total expenditure being Rs. 1,21,939, equal to nearly four times the expenditure on dispensaries in the Chittagong Division.

The Lady Dufferin Female Hospital at Darbhanga was efficiently managed, and the Dufferin Hospital at Bettiah was opened by the Lieutenant-Governor shortly after the much lamented death of the late Maharaja of Bettiah, who also made grants for four dispensaries in the interior of his estates. Dr. Miss Grace Mackinnon and her assistant, Miss Gregory, have established a private charitable dispensary in the heart of the city of Patna, and are building a hospital. The Officiating Lieutenant-Governor is informed that Raja Rameswar Singh has also taken steps to establish a women's hospital in his estate in the north of the Darbhanga district.

Local Self-Government Institutions—Municipalities, District Boards, Honorary Magistrates' Benches.

24. The Gaya, Muzaffarpur, Champaran and Saran Municipalities are reported to have worked satisfactorily. A scheme for the supply of filtered water to the Arrah Municipality at an estimated cost of Rs. 4,17,786 was sanctioned by Government during the year. The general working of the Darbhanga Municipality has for some time been anything but satisfactory. The Magistrate writes: "None of the Commissioners take any

interest in its affairs. "The work of revision of assessment was done in a perfunctory manner. The taxes have not been collected. The establishment is too large and does nothing, and it is impossible to imagine the chaos into which things have drifted." The matter has been taken up by Mr. Williams, the present Magistrate, and the Officiating Lieutenant-Governor hopes that he will insist on these abuses being remedied without delay.

Sir Antony MacDonnell is glad to observe that District Boards have on the whole worked satisfactorily and smoothly, and that the Commissioner is in a position to report that many of the members who sit in the various Committees are assiduous in the discharge of their duties, and transact public business conscientiously and well.

The Commissioner gave much attention during his tours to the work of most of the Benches in the Division, but on the whole was not favourably impressed with them. The chief fault he found was irregularity of attendance, resulting in frequent remands, causing much harassment to litigants. He recommends that appointments to the rank of Honorary Magistrates should, following the rule of other Local Self-Government institutions, be made for a term of years, and that the continuance of the honour should depend on the honest fulfilment of the duties of the office. The matter will be considered separately.

Public feeling. Social and political institutions.

25. In connection with the state of public feeling, the Commissioner writes that the relations between indigo planters and raiyats have been satisfactory; and from his previous knowledge of Bihar, Sir Antony MacDonnell attributes this improved condition of things to the influence of the Indigo Planters' Association, which has been used as much in the interests of the Government as of the industry itself.

On the general condition of public feeling in the Division, Mr. Forbes writes as follows:—

"I remarked in last year's report that the Gorakshini Sabha is in theory a humane and harmless institution, having for its object the protection of the lives of cattle. At Gaya, Shahabad, Muzaffarpur, Patna, Darbhanga, and possibly other places,—though the reports are silent on this point,—pinjrapoles have been established, in which a considerable number of neglected and starving cattle are housed and cared for. If the operations of the Society ended here, it would be entitled to our full sympathy and support. But unfortunately that is not the case. There is a tendency in some places among its promoters to promulgate its doctrines in an ostentatious and aggressive manner, with the result of exciting much ill-feeling between the Muhammadan and Hindu communities. Action of this kind is most unwise, in the interest of the society itself, and also seriously endangers the public peace. If the object of the propagandists solely be to put a stop to cow-slaughter and in no way to foster religious animosity, they have singularly failed in their intention. As might have been expected, the result, wherever feeling has run high, has been to incite the Muhammadan community to retaliate by sacrificing, at the Bakrid festival, more cows than ever. If the members of the Sabha are wise, they will in future be careful to confine their attention to purely practical measures, such as the establishment and support of pinjrapoles, and they will firmly discountenance any attempt at propagandism. It is useless to disseminate doctrines among the Hindus which they already religiously hold, and the only possible result of any agitation of the kind referred to will be to excite ill-feeling on the part of their Muhammadan fellow-countrymen.

"Unfortunately the above advice has not, until quite lately, been attended to. On the contrary, the promoters of the Sabha, especially in the Gaya and Patna districts, throughout the year under review, permitted the agitation * * * to continue unchecked. The result has been a series of riots, chiefly in Gaya, on the estates of certain landlords, whose names need not be mentioned here. The first of these riots occurred on the 16th April of the present year close to thana Masourhi in the Patna district, where a convoy of nearly 300 cattle in charge of an agent of the Commissariat Department, Dinapur, and several butchers, escorted by three constables from the Gaya reserve, were attacked on their way to the cantonment by a large and excited mob of Hindus, as they were about to cross the Poon Poon river. They managed to escape with the drove back to the thana, with the loss of one head of cattle only, which the rioters carried of, and which has not been heard of since. The District Magistrate was informed by telegram of the occurrence, and immediately despatched a Sub-Inspector of Police to enquire into the case. The Sub-Inspector, accompanied by a head-constable and a force of constables, accordingly proceeded to the spot, and made 18 arrests on the identification of the Commissariat Agent and his companions; but as he was returning with the prisoners to the Masourhi thana, the whole of the villages which had joined in the previous day's riot again turned out, and two large mobs armed with lathis, each several hundred strong, came down from different directions upon the convoy, with shouts of "Gow gohar!" severely assaulted the Sub-Inspector and one of his constables, and forcibly rescued all the 18

prisoners. It being evident that strong measures were necessary, the District Magistrate on the following day despatched the District Superintendent of Police with a body of armed police, accompanied by Mr. Assistant Magistrate Carey, with instructions to hold a judicial enquiry on the spot. On their arrival the whole of the guilty villages were foun[d] deserted, the inhabitants having absconded, taking their women, children, cattle, ——— with them. All the zamindari amla, who had been present on the preceding day, had al[l] disappeared. On a house-to-house search, however, being made, some 20 men in all were found in various hiding-places, of whom 10 were satisfactorily identified as having taken part in the second attack. These 10 were eventually convicted and sentenced to one year's rigorous imprisonment each, which was upheld in appeal. Of the original prisoners none have yet been re-arrested.

"I have given a full narrative of this case, as it shows the turn which the agitation had taken, and the lengths to which, if unchecked, it would eventually have gone. There can be no doubt but that the ignorant Hindu masses, in endeavouring to prevent kine-slaughter, are swayed by a strong religious feeling. But there can equally be no doubt that they would, as in other matters, have had the sense to understand that they are not responsible for sins committed by others, and would under this consideration have accepted the position quietly, as they have hitherto done, had not the propagandist preachers and their supporters persistently fanned the flame, until the movement had assumed the form not merely of a threatened widespread rising of one class of Her Majesty's subjects against another, but also of open revolt against the constituted authorities.

"Following upon the outbreak at Masourhi, similar riots occurred in quick succession in several places in the Gaya district. In each case a full report of the facts were submitted to Government, with the result that bodies of additional police have been immediately quartered under section 15, Act V of 1861, for one year at the expense of the inhabitants, at Masourhi, in two places in the Gaya Sadar subdivision, in three places in the Aurangabad sub-division, and in one place in the Jahanabad subdivision

"It is to be observed that all these outbreaks bore the same characteristics. Large crowds of Hindus, in a dangerously excited state, suddenly rising against their Muhammadan fellow-subjects in order to forcibly prevent their sacrificing or slaughtering kine for food. In none of the cases referred to were there any signs of an attempt to wound Hindu religious feeling. On the contrary, care was invariably taken that all sacrifices should be performed out of public sight, in strict privacy, this being a matter that has always been strictly insisted on by the authorities.

"All the occurrences referred to above took place shortly before the late Bakrid, the last Government notification under the Police Act, section 15, being dated the 13th June 1893, barely a fortnight before the date for the festival. Fortunately the firm action taken by Government, followed up by the warnings of the local authorities, had the effect of opening the eyes of the responsible parties to the danger of the course they were pursuing. A notorious agitator, Gopalanand Swami, who had come secretly to Gaya a few days before (on the 4th June), after being released from a 2½ years' sentence for heading an anti kine-killing riot in Shahabad, was denounced and ordered off. The President and the Vice-President of the Gaya Gorakshini Sabha resigned office. The Sabha published a circular disclaiming propagandist principles. Finally, the Magistrate of Gaya, who throughout acted with much tact and firmness, was able to obtain the unanimous support, in the interests of order, of the leaders of both sides, Hindu and Muhammadan, and the Bakrid festival passed off without any disturbance throughout the Gaya district. It is only to be hoped that the supporters of the Sabha will continue in their present mind, and beware in future of permitting any further agitation—an agitation which, to say the least, is certainly calculated to do the cause of the Society an immense deal of harm."

The agitation connected with kine-killing has, since the date of the Commissioner's report, led to further rioting and outrage of a serious nature. The efforts of the Government have been directed towards the preservation of the peace, the punishment of offenders, the collection of accurate information in regard to the agitation, its causes, objects, methods, promoters and fomenters, and, where possible, towards the mitigation of acerbities between Hindus and Muhammadans. But Sir Antony MacDonnell has been concerned to find that a spirit has manifested itself in certain portions of Bihar, which seeks to suppress the slaughter of kine for food or sacrificial purposes altogether, and to effect this suppression by coercive measures, temporal and spiritual, of much severity. In other words there are symptoms in certain tracts of the establishment of a system of terrorism. Among the Muhammadans in these tracts, there are indications of the formation of societies for defence or attack.

Reverence for the cow, it is well known, is a deeply-rooted and immemorial sentiment with all orthodox Hindus; but the acute phase of this sentiment which now presents itself, and the intolerance of non-Hindu customs which attends it have not arisen spontaneously among the people of Bihar, who are by nature docile and industrious. They have been excited by men from without, who by a species of propagandism (which, so far as His Honour knows, is, in

such circumstances, foreign to Hindu polity) appeal to the religious fervour of the masses, while creating an organization for propagating their objects, and collecting funds which are not all expended on the maintenance of kine asylums. There is reason to believe that the exhortations of these propagandists have occasionally merged into incitements to misconduct. And it is not by Hindus alone that inflammatory appeals have been made and funds collected: in certain localities Muhammadans have also been blameworthy in this respect, and have irrited Hindus into reprisals. Thus a spirit of mutual provocation and embitterment has been excited which has had the worst effect. This agitation, if begun by strangers, has been fomented and encouraged by local residents of standing and education, some of whose names are known to the authorities, and from whom far different conduct was to be expected. The Hindus of Bihar have Sir Antony MacDonnell's sympathy in their endeavours to secure kind treatment for kine, and they may be assured of the support of Government in all legitimate efforts to restrict within the customary limits the slaughter of kine by non-Hindus, if these limits have been transgressed, and to assure that kine-slaughter shall not be effected, no matter what past practice may have been, in a way to outrage Hindu feeling. Already some progress has been made in this direction, with the cordial assistance of the leaders of the Muhammadan community. But nothing except evil can come from an attempt to coerce non-Hindus into submission to ultra-Hindu views in this matter, or from methods of agitation which are incompatible with the maintenance of law and order in the localities concerned.

The participators in riots can be punished by the Criminal Courts. The fomenters of disturbance and their dupes can be held to security for their good behaviour, though the law in this respect is somewhat defective. The public tranquillity in a tract which is in a disturbed and dangerous state may be preserved by quartering additional police in it, and the Officiating Lieutenant-Governor has been compelled to adopt this latter course in regard to the tract of country about Koath in the Shahabad district, in which, although several rioters on both sides were convicted and punished, the state of feeling is still so disturbed and dangerous that a fresh outbreak may at any moment occur. But His Honour is conscious of the imperfections of this procedure, which, as the law now stands, does not sufficiently discriminate between the innocent and the guilty so far as the apportionment of costs goes. In most of the great zamindaris which are controlled by proprietors of high position, loyalty and intelligence, the authorities experience small difficulty in connexion with this agitation. Those zamindars throw their influence into the scale in favour of law and order, and justify the relaxation of those onerous police duties which were imposed on the proprietors of land by immemorial custom and the decennial settlement, but of which they were partially exonerated by the earlier Regulations. Some large proprietors, however, have not deserved so well, while outside the great zamindaris the subdivision of landed property in Bihar has gone very far. Proprietary rights have fallen largely into the hands of persons who, though grown rich under British rule, seem to have forgotten the duties which attached to the proprietary status under the customary law of the land. It is in these estates and in the towns that agitation is most prevalent and threatens to be least manageable. The question of local responsibility in towns must be separately considered: here His Honour will say that without the active co-operation of the smaller landlords, who form the bulk of the proprietary body in Bihar, it is difficult for the authorities to check the growth of disturbing influences; and as the law at present stands, this co-operation cannot in all cases be enforced.

There is another aspect of the question which deserves consideration. The Cow-Protection movement in some degree bases its claims upon economic grounds. I lays stress partly upon the diminution and deterioration which are alleged to be taking place in the agricultural cattle of India, as a result of the encroachment of cultivation upon the old village pastures, and partly, it is stated—though this allegation seems to be unfounded—of the heavy duty levied on salt. This seems to point to improvements in the breed, pasturage, and treatment of cattle, as promising some relief from the evils complained of, and opening up a prospect of some mitigation of the agitation. This of course must be a work of time, and it would be premature for the Government to attempt to forecast at

the present moment the precise measures which may be found necessary. Dr. Voelcker's Report on Indian Agriculture, which deals with the subject at length, is still under the consideration of the Government of India, and no final decision has been arrived at regarding the action to be taken upon it. Nevertheless the Officiating Lieutenant-Governor hopes that some form of Government action will be devised with the object of promoting the welfare of cattle in India, and if the Cow Protection societies would associate themselves with the Government in an endeavour to secure throughout the province the better treatment of cattle, the joint effort might be productive not only of material good to the country, but might lead to some means of allaying the embittered conflicts which now embroil the two main sections of the population in certain portions of Bihar.

27. Apart from the excitement connected with the kine-killing agitation, the principal subjects discussed by the educated classes were the abolition of the jury system, the election of members to the Provincial Legislative Council, and the Cadastral Survey. On the latter subject the Collector of Muzaffarpur has the following remarks, in which the Commissioner of the Division generally agrees:—

"Although the measure is yet unpopular, especially with the zamindars, the advantages of a record of rights are now better appreciated by all classes. The spirit of opposition and consequent agitation, which existed before the introduction of the measure, has disappeared, and, as far as I have been able to ascertain, the action of the Government is now regarded as beneficial to all parties interested in the land, as likely to place the present unsettled relation of landlord and tenant on a better footing * * * *

"the comparatively low condition of the raiyats and the peasantry in these parts is due largely to the want of an accurate record of each tenure and each raiyat's holding within an estate, and of the status of every one who has rights in the land and of the rent paid by each raiyat to the tenure-holder. That the object of the Government is simply to supply this want is now understood by the tenants and landlords alike."

The Survey and Record of Rights in Bihar has occupied much of the Officiating Lieutenant-Governor's time and attention, and he has now, with the consent of the Government of India, published a full expression of his views on the whole subject, both in its past and future aspects.

Conduct of zamindars.

28. The conduct of zamindars on the whole is reported to have been satisfactory, except in certain localities where their action in connection with the spread of the agitation on kine-killing was not such as to merit commendation.

Only the briefest mention is made of the relations between indigo planters and the raiyats, which are said to continue to be peaceable. An aggravated case of assault by some villagers on a European planter occurred in Champaran, but this is stated to have been the outcome of a personal grudge, and to have had nothing to do with indigo.

The district of Champaran suffered a great loss during the year in the death of the Maharaja Sir Herandra Kishor Singh Bahadur, of Bettiah. "He was," as Mr. Forbes remarks, "a kind and considerate master; as a landlord he was universally loved and respected by his tenantry." In this eulogium Sir Antony MacDonnell entirely concurs; for personal and public reasons he deeply regrets the Maharaja's early death.

29. The Officiating Lieutenant-Governor thanks the Commissioner for his full report. The successful administration of the Patna Division is always an onerous and anxious task, to be entrusted only to one of the most energetic, able, and prudent officers of this Government, and Sir Antony MacDonnell congratulates Mr. Forbes on the way in which he has acquitted himself of the task during the year under review.

30. The remarks made on the character of the officers will be communicated to the Appointment Department. Among District Officers, Messrs. Bourdillon, Blyth, Hare, and Macpherson, among Sub-divisional Officers and Joint-Magistrates, Messrs. LeMesurier, Levinge, Cumming and Oldham, and among Deputy Magistrates and Collectors, Babu Saroda Prosad Chatterjea, Babu Jagdam Sahoy, and Maulvi Syed Majibur Rahman deserve special commendation.

By order of the Lieutenant-Governor of Bengal,

M. FINUCANE,

Offg. Secretary to the Govt. of Bengal.

Rainfall, Weather, and State and Prospects of the Crops.

Statement showing Rainfall, Weather, and State and Prospects of the Crops in the different districts of Bengal, as reported to Government, during the week ending the 28th October, 1893.

Division	No.	District and date of return.	Rainfall at Sadar Station in inches.	Character of the weather and state and prospects of the crops.
BENGAL.				
Burdwan Divn.	1	Burdwan Oct. 28, '93 Kalna ... Katwa ... Raniganj ...	0·04 0·95 0·11 0·02	Weather—seasonable. *Aman* rice doing well. Prices of common rice :— Srs. Burdwan ... ... 10 to 13 } Kalna ... ... 9 to 13 } Katwa ... ... 12⅛ } per rupee. Raniganj ... ... 12½ }
	2	Bankura „ 28, '93 Vishnupur ...	Nil 0·41	Weather—seasonable. Fine weather has facilitated cultivation for *rabi* sowings. Prospects of *aman* very favourable; outturn expected to be 16-annas. Water and fodder sufficient. Common rice selling at 15¼ seers per rupee at Sadar and 12½ seers at Vishnupur.
	3	Birbhum „ 28, '93 Rampur Hát ...	Nil 0·99	Weather—fair and getting cold at night. Early paddy ripe for harvesting. Winter rice continues good, but prospects of sugarcane not favourably reported. Common rice sells from 10 to 15 seers per rupee.
	4	Midnapore „ 28, '93	0·09	Weather—fine. Cold weather setting in. Prospects of standing crops continue good and hopeful. No cattle-disease. Fodder and water sufficient. Prices of common rice :— Srs. Sadar ... ... 12 } Contai ... ... 12½ } per rupee. Tamluk ... ... 11 } Ghatal ... ... 11 to 12 }
	5	Hooghly „ 28, '93 Serampore ... Jahanabad ...	0·07 0·65 1·00	Weather—seasonable: hot during day, cool at night. Harvesting of *aus* completed except in Jahanabad subdivision. *Aman* paddy doing well. Prices of common rice :— Srs. Sadar ... ... 10 } Serampore ... ... 10 to 11 } per rupee. Jahanabad ... ... 11 to 12¾ }
	6	Howrah „ 28, '93 Ulubaria ...	Nil 0·28	Weather—seasonable. *Aman* paddy doing well. *Aus* harvest nearly finished. Price of common rice 10 seers per rupee. Fodder and water sufficient.
Presidency Divn.	7	24-Parganas „ 28, '93	0·05	Weather—seasonable. Ploughing for *rabi* crops going on. Prospects of crops fair everywhere except in the Bankipur thana. Rice sells at— Srs. C. Sadar ... ... 9 to 10¾ } Basirhat ... ... 9 13¼ } per rupee. Diamond Harbour ... ... 11 0 } Barasat ... ... 11 0 }
	8	Nadia „ 28, '93 Kushtia Meherpur ... Chuadanga . . Ranaghat ..	0·56 0·62 Nil 0·07 0·35	Weather—fair and slightly cooler. Prospects of winter rice very good in Ranaghat, fair in Sadar and Meherpur, and poor in Kushtia. *Rabi* seed is being sown. Fodder and water plentiful.
	9	Khulna „ 28, '93 Bagerhat ... Satkhira ...	0·15 1·58 Nil	Weather—fine and cool. Prospects of *aman* good. Fodder sufficient.
	10	Jessore „ 28, '93 Jhenida ... Magura ... Bangaon ...	0·27 0·28 Nil 0·05	Weather—seasonable. *Aman* crop doing well. Lands being prepared and sown with winter crops. No cattle-disease reported. Rivers have risen a little again. Fodder and water sufficient. Prices steady.
	11	Murshidabad „ 28, '93	Nil	Weather—seasonable. Lands are being prepared for *rabi* crops and sowings commenced. Mulberry and *aman* paddy doing well. Fodder and water sufficient. Common rice sells at 12 seers per rupee.

Division	No.	District and date of return.		Rainfall at Sadar Station in inches.	Character of the weather and state and prospects of the crops.
BENGAL—*concld.*					
CHITTAGONG DIVN.	12	Chittagong	Oct. 28, '93	4·08	Weather—alternately cloudy and hot. A storm passed on the 22nd instant. Paddy crops damaged to some extent. Lands being prepared for *rabi* crops. Prices have somewhat risen. Condition of cattle generally good. Fodder sufficient.
	13	Noakhali	„ 28, '93	6·86	Weather—cyclonish on 21st and 22nd and fine since. A cyclone of considerable intensity passed over the district on 22nd instant. In the littoral tracts of the mainland crops have suffered much from inundation. In Hatiya and Sandeep the damage is not so serious as might have been expected. In Feni, Lukhipur, Begamganj, Raipore, and Ramganj the damage has been slight. Extent of the damage in annas cannot, however, be ascertained now. Loss of cattle in churs has been rather serious. Fodder and water available. Price of rice at Noakhali 8 seers 4 chitaks and at Feni 9 seers per rupee.
	14	Tippera	„ 28, '93	3·00	Weather—seasonable. There was a storm on Sunday (22nd), which did some damage to paddy and houses. Harvesting of jute going on. Prospect of *aman* good. Damage by insect reported from Kotwali and Nasirnagar thanas. Price of rice stationary.
	15	Chittagong Hill Tracts.	„ 27, '93	3·98	Weather—rainy and cloudy throughout the week. Gathering of late *jum* paddy continues. Plough-paddy progressing. Lands are being ploughed for mustard. No cattle-disease reported. Common rice being sold at 9 seers per rupee.
DACCA DIVN.	16	Dacca	„ 28, '93	0·55	Weather—seasonable. Harvesting of paddy commenced. Prospects of *aman* favourable. Mustard, *mug* and *kalai* being sown. Common rice selling from 7 to 11 seers per rupee. Fodder available. No cattle-disease.
	17	Faridpur Madaripur	„ 28, '93 ...	0·05 1·06	Weather—fine; warm during day, cool at night. Early *aman* harvest and sowing of pulse on high lands continue. Rice sells from 10 to 12 seers per rupee.
	18	Backergunge	„ 28, '93	3·28	Weather—seasonable, except on the 22nd and 23rd. A severe cyclone in Bhola and Doulatkhan on the 22nd. Prospect of standing crops fair. Early *aman* has been damaged in the Bhola and Patuakhali subdivisions by the cyclone. Common rice selling from 7 to 10 seers per rupee. Fodder and water sufficient.
	19	Mymensingh	„ 28, '93	0·28	Weather—seasonable. Prospects of standing crops good. Common rice selling at 9 to 10 seers per rupee. Condition of cattle good. Supply of fodder sufficient except at Kishorganj.
RAJSHAHI DIVN.	20	Dinajpur Thakurgaon	„ 28, '93 ...	Nil 0·83	Weather—cool in the morning but hot during midday. Prospects of standing crops continue good all over the district. Ploughing for *rabi* going on rapidly. Price of rice both at Sadar and Thakurgaon stationary. Condition of cattle good. Supply of fodder and drinking water ample.
	21	Rajshahi Nator Naugaon	„ 28, '93	Nil 0·78 1·80	Weather—seasonable; getting cold in the mornings. Crops on all high lands good, in some places very good. In low lands there has been considerable damage; but on the whole, condition of all crops generally good. No cattle-disease. Water and fodder-supply ample. Rice selling from 9 to 11 seers per rupee.

* Mean of 6 days.

Explanation.—Summary.—The normal means of air pressure and temperature are the arithmetical average or means of the reading during the same period

The *humidity* of the atmosphere is expressed at percentage, saturated air being presented by 100. A clear sky is denoted by 0 and an overcast sky by 01

rainfall the normal means are the numerical means or average of the rainfall in that district determined from the returns sent in by the subdivisional station

district, i.e. from total rainfall at the subdivisional stations in the district sending in returns divided by the number of stations. A rainy day is one of

for the week ending Saturday, the 28th of October 1893.

Variation from normal mean.	Mean 8 A.M. temperature.	Average humidity at 8 A.M.	Average cloud amount at 8 A.M.	Rainfall of week at observing station.	DISTRICT OBSERVATIONS. Of week. Explanation.—... indicates that no rain has fallen. If the return for any day has not been received, the corresponding space is left blank. If any of the returns are wanting, the corresponding spaces in the total rainfall columns are left blank. With reference to the column of rainy days, the definition of a rainy day is when at least 1 inch of rain has fallen.

CALCUTTA, *the* 31*st October* 1893.

SUMMARY OF THE METEOROLOGICAL AND RAINFALL OBSERVATIONS TAKEN IN BENGAL, AND OF THE METEOROLOGICAL OBSERVATIONS TAKEN IN ASSAM, FOR THE WEEK ENDING 8 A.M., SATURDAY, THE 28TH OF OCTOBER 1893.

It will be remembered that at the end of the previous week a small but intense storm had formed in the neighbourhood of Diamond Island, and at 8 A.M. on the morning of the 21st was near the centre of the northern half of the Bay. It was then giving few indications of its existence at the meteorological stations, and none of its intensity or direction of motion. After moving in a north-westerly direction it appears to have changed gradually towards the north-east, and on the morning of Sunday, the 22nd, rushed with great rapidity towards the mouth of the Megna, the centre of the disturbance probably passing close to Noakhali. At 8 A.M. on the 22nd pressure fell more than a quarter of an inch at Chittagong, Noakhali and Barisal, the wind blowing with moderate strength from east at the first station and from north-east at the other two. The centre was then probably to the south of the line joining Chittagong and Barisal and equally distant from them, but as its rate of motion appears to have been unusually high, it must have passed over Noakali some time during the next two hours. At 11 o'clock pressure was rising at Chittagong, and the storm-wave which accompanied the depression was then reported to be passing up the river there. From Noakhali no information has been received regarding the passage of the disturbance. That hurricane winds blew over the north-east of the Bay and in East Bengal to some distance from the coast is shown by the fact that the Mutlah light-ship broke loose from her anchorage, and much damage was done to the shipping between Naraingaunj and Chittagong. Wind velocity rose to 25 miles at Chittagong on Sunday, but as the storm was of small extent and soon reached the hilly ground to the east of Tippera, it was very shortlived after passing inland. Pressure rose rapidly and the rough weather as quickly moderated. So far very little appears to be known regarding the storm-wave which washed over part of the islands at the mouth of the Megna. There is, however, sufficient to show that it must have devastated the parts near the coast, causing great destruction to property and probably loss of human life.

General heavy rain fell in East Bengal on the first two days of the week, and light scattered showers in other parts of Lower Bengal and Orissa, but except near the centre of the depression weather continued fine, and the only change was in the light cloud disappearing after the rapid rise of pressure mentioned above. From the 22nd onwards till the end of the week fine clear weather with northerly winds prevailed over the province. In the south of the Bay, however, an apparently immediate result of the recovery of pressure in the north-east of the Bay was the beginning of another which caused cyclonic winds at the Burma stations. Judging from reports received from the shipping, it must have commenced near the centre of the Bay, because squally weather was experienced about longitude 88° and latitude 16° on the 24th. Its course from the start very probably was to the north-east, and it struck the coast of Burma, moving in this direction about the end of the week, at no great distance to the north of Diamond Island. Pressure changes were small everywhere, but a regular cyclonic circulation of winds prevailed over the whole Bay area. Wind velocity steadily increased at Diamond Island, till on the 27th an average of 50 miles was reported for the 24 hours preceding 8 A.M. on that date. It soon after crossed the coast and, as in the case of the one at the beginning of the week, diminished much in intensity on encountering the hilly ground near the coast. The stormy weather which accompanied its advance soon passed away.

As this disturbance did not approach the north coast of the Bay, its influence in Bengal was very slight, being shown only in the increase of cloud in the southern districts, and in a few light showers. The northerly winds increased somewhat in strength, but soon fell off as the pressure distribution became normal.

Pressure changes have been small except during the passage of the depression at the beginning of the week, when there was a large fall at stations in East Bengal and a rapid rise afterwards. In the middle of the week the small oscillations characteristic of settled weather obtained, but during the last two days, while the second depression was developing in the east of the Bay, a steady slow fall prevailed over the province. The mean pressure for the week is above the normal in all districts by about ·03 inch in East Bengal, and ·05 inch elsewhere.

Temperature.—Day temperature has generally been below and night temperature above the normal, at times by several degrees. Means are below the normal everywhere: by less than half a degree in North Bihar and North Bengal; by between half and one degree in South Bihar, South-West Bengal and East Bengal; by 1·3° in Orissa, and by more than 2° in Assam and Chota Nagpur.

Rainfall.—The only rain of importance reported during the week fell on the 21st and 22nd in East Bengal while the disturbance was crossing the south-eastern districts. The falls were heavy on both days at some stations, but especially at Noakhali, Daulatkhan, Cox's Bazar and Chittagong. The average for the whole district is 2·14 inches more than double the normal. Light showers fell in parts of Orissa, South-West Bengal, North Bengal and South Bihar, but no rain fell in North Bihar and Chota Nagpur.

The following table gives the summary of the temperature and rainfall data of each of the seven meteorological divisions of the province for the week ending Saturday, the 28th of October 1893:—

Meteorological Divisions.	Temperature.						Rainfall.									
	Highest observed during week.	Lowest observed during week.	Averages for week. Of highest of each day.	Averages for week. Of lowest of each day.	Averages for week. Of mean for each day. The total fall from 1st January to 28th October 1893 .	85·20
The average fall of the corresponding period for 24 years, Surveyor-General's Office	64·33

The mean pressure, temperature, &c., are deduced from the traces of the Barograph and Thermograph and from observations made at 6h, 10h, 16h, and 22h.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed open at the sides and are suspended four feet above the ground.

The barometer readings are corrected approximately to those of the standard, Newman's No. 86, formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed in the Meteorological Office, and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground.

o, overcast; g, gloomy; ⌓, dew.

METEOROLOGICAL OFFICE, GOVT. OF INDIA;

CONTENTS.

RESOLUTION ON THE ANNUAL GENERAL ADMINISTRATION REPORT OF THE ORISSA DIVISION FOR THE YEAR 1892-93.

GENERAL DEPARTMENT—MISCELLANEOUS.

Darjeeling, the 2nd November 1893.

RESOLUTION No. 698T.—G.

READ—

The Annual General Administration Report of the Orissa Division for 1892-93.

Read also—

Government Resolution on the General Administration Report of 1891-92.

Mr. Toynbee was in charge of the Division from the 1st to the 9th April, and again from the 28th June to the 16th November, the late Mr. Veasey from 10th April to the 27th June, and Mr. Cooke, by whom this report is submitted, for the rest of the year.

Tours and Inspections.

The Commissioners, as required by the orders of Government, spent more than four months on tour, and inspected all the district and subdivisional offices and treasuries, and the Collectors and Subdivisional Officers of the Division also were in camp for more than the prescribed period.

Weather and Crops.

3. Though the rainfall was, except in Puri, short of that of the previous year, which was itself below the average, the outturn of winter rice—the most important crop of the Division—is reported to have been far better. The Commissioner suspects that in

the reports of estimated outturn of crops, 16 annas is treated as a bumper instead of being regarded as an average crop. This is a point to which the attention of the Director of the Agricultural Department has already been directed.

Public health.

4. The public health was bad, the death-rate increased from 25·0 per mille in 1891 to 39·0 in 1892, the increase being shown in all districts. Deaths from cholera rose from 7,035 to 46,212. The increased mortality is attributed to long-continued drought, brackishness of drinking water resulting from the cyclone-wave of 1891, and to unwholesome food, but is, the Commissioner thinks, in no way caused by the influx of pilgrims. The number of recorded deaths from small pox increased from 4,926 in 1891-92 to 6,551 during 1892-93, while the number of persons vaccinated decreased from 95,994 to 43,875. The Lieutenant-Governor will await the explanation called for by the Commissioner regarding this remarkable falling off in vaccination.

Condition of the people.

5. The Collectors of the Division are of opinion that the unusually high prices of food-grains caused hardship to the poorer classes, resulting in a considerable increase of thefts and house-breaking. In Cuttack the Collector says that the landlords and mahajans between them took practically all the raiyats' crops in satisfaction of their demands; in Puri the throwing open by Government of waste land for *toila* (temporary) cultivation greatly assisted the aborigines without injuring the forests; while in part of Balasore considerable distress was felt among the poorer classes, some advances were made to cultivators for purchase of seed-grain, and small but sufficient relief works were opened by the District Board.

The Commissioner (Mr Cooke) has the following remarks regarding the condition of the people:—

"I have been frequently impressed with the tendency, everywhere observable, for Orissa to pose as a pauper Division. I personally have seen nothing to warrant this view. On the contrary, prices are lower here than elsewhere; the people are sturdy and well-nourished as compared with Bengalis; their pleas for abatements and remissions in khas mahal and wards' estates and applications for advances receive a more ready hearing than such applications receive in Bengal; they are provided with a costly system of irrigation for which they have not hitherto paid; the protective embankments of the Division are a charge on the province, and are not supported, as elsewhere, by local imposts. * * * It is a received article of faith among the natives of Orissa that their country is miserably poor, and that they are entitled to the indulgences of the sickly child of the family. From what I have gathered from Settlement Officers I do not think their claims are made out; but by force of iteration the view of the people has become the view of the officials, and all crop returns appear to support it. There were not wanting the usual vicissitudes to crops in this Division during 1892-93. The rainfall is said to have been deficient at sowing time, both in the case of early and late rice, and in Cuttack excessive in July, resulting in floods, which did some damage. There was also the not unusual visitation of caterpillar-blight in Cuttack. The only district in which there was any failure of crops necessitating official interference was Balasore, where there was a complete failure of crops in some villages, which was effectually dealt with by Mr. Cornish, without, I believe, the expenditure of much money in relief. The matter was of so trivial a nature that the District Officer does not relate how the scarcity was met. It is worthy of note that in spite of this the two main rice crops are reported to have been more favourable in Balasore than in either of the other districts. I can only repeat that I believe that the correct conception of an average crop is not understood in Orissa, especially in the Cuttack and Puri offices."

The daily wage of a common agricultural labourer varies from 1 anna 6 pie to 3 annas a day in Balasore, 2 annas 6 pie to 3 annas in Cuttack, and was 4 annas in Puri, which, though not so low as in Bihar, is considerably less than that which prevails in most of Bengal.

Manufactures, Trade, and Commerce.

6. The principal manufacture is that of salt, which is made in the islands of the Chilka lake, under the supervision of the Salt Department. The system of direct manufacture was introduced during the year, and worked satisfactorily. There was a decline of 16 per cent. in the total value of the sea-borne trade, which is attributed partly to decreased demand from Madras ports, where most of the previous year's rice went from Puri, and partly to the opening up of the Bengal-Nagpur Railway, which carried rice that would otherwise have been exported *via* Cuttack.

Civil Justice.

7. The following statement shows the work done by Munsifs:—

District.	Sub-division or chauki.	Description of Court.	Number of officers.	Number of original cases disposed of. — Ordinary.	Number of original cases disposed of. — Small Cause Court.	Details of cases in columns 5A and 5B. — Money.	Details of cases in columns 5A and 5B. — Rent.	Details of cases in columns 5A and 5B. — Title.	Number of witnesses examined.	Ratio of witnesses detained over two days per cent. of witnesses examined.	Ratio of cases pending at end of year per cent. of cases disposed of.
1	2	3	4	5A	5B	6	7	8	9	10	11
Cuttack	Sadar	Munsif	1½	785	2,032	2,668	.....	149	1,062	9	14
	Kendrapara ...	Do.	1	517	1,470	1,917	......	70	2,253	1	4
	Jajpur	Do.	1¼	911	1,455	2,111	.....	255	2,156	16	12
Puri	Sadar	Do.	1	1,219	1,243	2,296	......	166	1,735	15	18
Balasore	Do.	Do.	1¼	771	1,308	1,848	......	231	3,197	31	12
		Total ...	6	4,203	7,508	10,840	.....	871	11,293	16	18
		Total* for 1891-92 ...	7	3,978	9,407	12,632	......	753	†33,308	18	15

* Includes the figures for Judges and Sub-Judges.
† Shows the number of witnesses who attended.

The ratio of witnesses detained over two days to the total number examined was 31 to 100 in the Balasore Munsif's court, where, however, the number of witnesses examined was very large, against only 1 to 100 in Kendrapara.

The total number of rent-suits (which in Orissa are tried by Deputy Collectors) disposed of during the year was 3,387, or less than one per thousand of the population. Of these, 749 were contested, 339 withdrawn, and 2,239 decided *ex parte*, while 301 cases were pending at the end of the year. The number of contested cases disposed of per officer was 45. In the Cuttack and Puri districts registers of witnesses not having been kept before the beginning of the year 1893-94, it is not possible to say what percentage of witnesses were detained for more than two days. The number of contested rent-suits is remarkably small.

Criminal Justice.

8. The following statement gives statistics of the working of the Criminal Courts:—

District.	Sub-division.	Class of officers.	Number of officers.	Cases disposed of.	Persons disposed of.	Ratio per cent. of persons convicted to disposed of.	Number of witnesses examined.	Ratio per cent. of witnesses detained over two days to total number examined.	Ratio per cent. of cases confirmed in appeal to total appealed.	Number of A cases disposed of.	Number remanded six times and more.	Average of cases disposed of per officer.	Average of witnesses examined per case disposed of.	Ratio per cent. of columns 12 to 11.

		Total for 1891-92	8½	2,049	2,304	68	5,095†	2	74	128	15	248	3	11

* Includes one Special Magistrate who evidently was also engaged with other work.
† These figures show the number of witnesses who attended.

The total number of cases disposed of by Stipendiary Magistrates, the average number of cases disposed of per officer, and the ratio of cases confirmed on appeal to the total appealed, were all larger than in the previous year, while the ratio of witnesses detained more than two days was 3 per cent., the same as in the previous year. The Lieutenant-Governor regards these results as satisfactory. There was an increase of 1,042 offences reported, cognizable and non-cognizable, the increase in the former being due to the high prices that prevailed and consequent distress among the landless classes, and in the latter to fluctuations in miscellaneous cases under the different special Acts.

9. The following statement shows the attendance of Honorary Magistrates:—

DISTRICT.	Number of Honorary Magistrates.	Number of times asked to attend.	Number of times actually attended.	NUMBER OF TIMES ABSENT—		
				With leave or notice.	Without leave or notice.	Total.
1	2	3	4	5	6	7
Cuttack ...	32	832	646	120	66	186
Puri ...	16	1,234	830	26	378	404
Balasore ...	21	525	421	63	41	104

It would appear from the above statement that the attendance was on the whole regular, and the Officiating Lieutenant-Governor notes with satisfaction "that the Commissioner thinks Honorary Magistrates gave material help in the administration of criminal justice, and are entitled to the thanks of Government, the number of cases disposed of by them being nearly one-third of those disposed of by Stipendiary Magistrates." The percentage of decisions of Honorary Magistrates confirmed on appeal was, however, less, and the ratio of witnesses detained over two days more than in the previous year.

Registration.

10. The following table gives the number of registrations:—

DISTRICT.	Class of Registration office.	Number of offices.	Number of documents registered.	Average per office.

The collections in all classes of estates were well above the prescribed standards, being 100 per cent. on the demand in permanently-settled estates, 99·6 per cent. in temporarily-settled estates, and 92·2 per cent. in estates managed by Government direct. The collections in Banki, which was recently resettled, amounted to 99·6 of the new settlement demand. The total demand, current and arrear, under all heads on account of land revenue, road-cess, and zamindari dâk cess, amounted to Rs. 21,93,193. The collections amounted to Rs. 21,25,828, a result which the Officiating Lieutenant-Governor considers very satisfactory and creditable to the local officers.

Survey-Settlement.

12. The survey and settlement operations in progress throughout the Division will be separately reviewed in connection with the Annual Reports of the Directors of Survey and of Land Records.

Issue of Certificates.

13. The following statement shows the working of the Certificate Department:—

DISTRICT.	Department.	Number pending at beginning of year.	Number issued during the year.	Total for disposal.	Amount of certificates.	Number disposed of during year.	Amount realized.	Number pending at close of year.

It is noticed with satisfaction that though the number of institutions has slightly increased, there was an improvement in the promptitude with which cases were disposed of, and that the number pending at the end of the year was 3,183 less than at the close of the preceding year.

14. The following statement exhibits the consumption and income under the heads of country spirits, ganja and opium:—

Excise.

Districts.	Country spirits.				Ganja and Bhang.				Opium.

Revenue from all sources.		Rate per head of population.
	Rs.	A. P.
Cuttack	2,61,915	2 2
Puri . .	1,01,963	1 8
Balasore .. .	1,97,[illegible]99	3 8
Total ..	5,60,977	2 4
Total for 1891-92	5,51,459	2 3

There was an increase in the total excise revenue of the Division from Rs. 5,51,459 in 1891-92 to Rs. 5,60,977 in the year under review. The Collector of Cuttack thinks that the ganja revenue is much affected by the introduction of Gurjat ganja by consumers without licenses. This is a matter which should be separately considered in the Financial Department.

Stamp revenue and income-tax.

15. There was a net decrease of Rs. 2,413 in stamp revenue and an increase of Rs. 2,736 in the revenue from income-tax.

Payment of revenue by money-order.

16. The number of payments of revenue by money-orders increased from 10,933 to 12,977, and the amount remitted from Rs. 1,11,121 to Rs 1,35,977. The Collector of Cuttack remarks:—

"The system has one great drawback as compared with direct payment, viz., that the form of the money-order coupon or chalan is a composite one, in which land revenue and cesses remitted are required to be entered in one and the same coupon. It frequently happens that the ignorant mufassal remitters confound the headings, and enter land revenue against road and public works cesses, or dâk cess against road and public works cesses, and so on, which causes them no little inconvenience and the office much trouble in making subsequent adjustments. It is also not infrequently the case that on account of such mistakes estates are brought into the sale list. Such confusion is not possible in the case of direct payments, as a special chalan form is provided for each, *i.e.* for land revenue, road and public works cesses, and dâk cess, and credit is made in the presence of the payer himself, who can, if need be, be consulted. If issuing sub-postmasters would give more assistance to remitters in making correct entries in coupons, many of their mistakes might be avoided Improvement in the form of coupon has been suggested by Mr. Macpherson in his Tauzi Report."

The matter will be referred to the Board of Revenue for consideration.

Education.

17. The number of pupils at State aided schools, the cost and percentage of boys at school to the total number of a school-going age, are shown in the following statement:—

District.	Class of schools.	Number of schools.	Number of pupils on rolls.	Cost. Provincial.	District Board.	Municipality.	Fees.	Other.	Total.	Cost per head of pupils.	Population.	Number of boys of school-going age.	Percentage of boys at school to boys of school-going age according to Director of Public Instruction's Report for 1892-93

	Total for 1891-92	7,181	113,704	40,167	50,775	3,266	2,32,852	95,715	4,22,775	3 11 5	.....	......	40·5

The percentage of boys at school on the total number of a school-going age in the Division as a whole is, according to these figures, 35·9; in Balasore district it is as high as 48, while in Puri it is only 27·8. Remembering that the wages of an agricultural labourer is said in the latter district to be double that prevailing in the former, that the incidence of income-tax is nearly the same, and that there is no great difference between the two districts in point of general material prosperity, it is difficult to account for the great disparity in educational progress otherwise than on the theory that it is due to differences in the degree of interest taken in the subject by the local Educational and District Officers. Looking to the Division as a whole, it appears that, in education as in material prosperity, it takes an intermediate place between Eastern Bengal on the one side and Bihar on the other, being neither so advanced as the former nor so backward as the latter. The total expenditure on education in this Division, with a population of 3,877,294 persons, Rs. 3,64,586, is more than half that in Patna Division, with a population more than four times as great.

There was a falling off of 12,880 in the number of pupils, due to the agricultural depression caused by the cyclone-wave and the prevalence of fever and cholera of an epidemic type. As noticed in other Divisions, the proportion of Muhammadans at school relatively to the total Muhammadan population was higher than that of Hindus. There were 125 special girls' schools attended by 2,933 pupils, the total number of girls at school, inclusive of those at mixed schools, being 6,099, or about one in every fifty of a school-going age.

Dispensaries and Hospitals.

18. The number of dispensaries, the amounts contributed to their support, and the number of patients attending them, are shown below:—

District.	Number of dispensaries.	Income from— Government.	District Board.	Municipality.	Subscriptions.	Total.	Daily average patients— In-patients.	Out-patients.	Ratio per cent. of out-door patients to total population.
1	2	3	4	5	6	7	8	9	10
		Rs.	Rs.	Rs.	Rs.	Rs.			
Cuttack	8	2,601	1,024	2,736	14,[illegible]	21,093	50·76	296·27	2
Puri	5	879	681	4,089		8,250*	19·89	88·01	1·5
Balasore	6	351	995	726	5,012	7,084	21·32	158·13	2

* Includes contributions from the Lodging house Fund.

The number of dispensaries, the contributions to them, and the number of patients receiving medical aid, are all remarkably small, a thing which is the more to be regretted in that there is annually a great influx into the Division of pilgrims who require medical treatment. In the whole of the Puri district, through which many thousands of pilgrims pass every year, there are only five dispensaries, costing only Rs. 8,230 per annum, all of which is contributed by Municipal and District Boards and Government, while private individuals do not contribute anything whatever.

Local Self-Government.

19. The Commissioner remarks that he fears it is but too true that Local Self-Government has not taken root in Orissa. With some notable exceptions, the work is done by the executive officers of the Boards or Committees, but the faults of the local bodies are more those of omission than commission.

Mr. Cornish writes that the general working of the Board of his district has been most satisfactory; but in the Balasore Municipality the factions that disgrace the town led to public scandals in connection with municipal government during the year under review. While finding fault, however, with the displays of reckless party spirit made by either party towards their opponents, he adds that the wants of the town as regards roads, drains and conservancy were carefully attended to.

Public feeling.

20. With regard to the state of public feeling, the Commissioner makes the following remarks:—

"It may be said that the uneducated classes have no opinion on public questions unless such questions affect them personally. With the educated classes it is different. They take an interest in much the same questions that interest similar classes in Bengal and elsewhere; but, so far as I have been able to ascertain, their attitude is one of singular moderation. It is characterised by a constant faith in the justice and benevolence of the Government, and this they share with the humbler members of society."

Mr. Cooke thinks that the Uriyas not only live better, but that they spend more on religious and social ceremonies than the natives of Bengal, that the country has made rapid strides in prosperity in recent years, and hopes that with the opening up of communications and the introduction of new cereals for which the soil is suited, the Division has a bright future before it.

The settlement operations are progressing without any serious disturbance of the ordinary relations between landlord and tenant.

Conduct of Zamindars

21. The conduct of zamindars in Balasore and Cuttack is reported on the whole to be good, but in Puri the relations of landlords with their raiyats are unsatisfactory, the estates of the Raja of Puri are said to be mismanaged, the Raja of Parikud has had litigation with his raiyats, while the Mahunts of Dakhinpara math and Utterpara math are involved in debt.

22. The Officiating Lieutenant-Governor thanks Mr. Cooke for his careful report and for the attention both Mr. Toynbee and Mr. Cooke have paid to the administration of the Division.

23. The remarks made on the character of officers will be communicated to the Appointment Department.

By order of the Lieutenant-Governor of Bengal,

M. FINUCANE,

Offg. Secretary to the Government of Bengal.

RESOLUTION ON THE REPORT ON THE ADMINISTRATION OF THE EXCISE DEPARTMENT FOR THE YEAR 1892-93.

FINANCIAL DEPARTMENT—SEPARATE REVENUE—No. 627T.—F.

Darjeeling, the 31st October 1893.

RESOLUTION.

READ—

The Report of the Commissioner of Excise for the year 1892-93, with the observations of the Board of Revenue thereon.

Administrative changes.—The appointment of Excise Commissioner in Bengal had up to the year under report been only a tenative measure, but its permanent retention was sanctioned by the Secretary of State in his despatch dated the 15th February 1892. Under the revised arrangements the Excise Commissioner, the pay of whose appointment has been reduced, is to work under the general supervision of the Board of Revenue; but at the same time, as it has been thought inadvisable altogether to dissociate Divisional Commissioners from the administration of the excise in their Divisions, orders have been given that annual and other periodical reports of importance should be submitted though them, and that they should also be consulted at the discretion of the Board on other questions of moment.

2. *The Excise Commissioner.*—Mr. Westmacott was in charge of the office of Excise Commissioner at the commencement of the year under report, but on the 8th April 1892 he went on furlough and Mr. Samuells acted in his place. On the 29th August Mr. Westmacott rejoined his appointment and held it until the 3rd March 1893, when he made over charge to Mr. Krishna Govinda Gupta. These three officers spent altogether 116 days on tour, during which they visited 35 out of the 46 districts in the province, the districts of the Patna Division, and also Bhagalpur, Monghyr and Khulna, being twice visited. No explanation is given of the smallness of the total, though it is short of the prescribed minimum by 34 days. The apparent want of system in the tours is said to be due to the change of officers, and also to the fact that the western districts, which were twice visited, are among the most important in the province from an excise point of view.

3. *Subordinate staff.*—As in the previous year, Special Excise Deputy Collectors were employed in eighteen districts, besides two as Inspectors of Excise and one as Personal Assistant to the Excise Commissioner: thus the full number sanctioned by the Secretary of State was entertained. In last year's Resolution the Excise Commissioner was requested to state more fully in future how these Special Deputy Collectors were employed, but these orders have not been carried out: from paragraph 179 of his report, however, it appears that in eleven districts these officers were out on tour for periods varying from 120 to 260 days (the highest limit being reached by Babu Prokash Chunder Roy of Patna), and in the remaining seven districts the tours occupied from 61 to 118 days. The Lieutenant-Governor observes with satisfaction that out of the twenty-two districts in which Deputy Collectors in the regular line were engaged on excise work, in only four districts was the minimum of 60 days' touring not reached or exceeded.

4. The Excise Commissioner laments the fact that owing to the comparative unpopularity of the department, the special officers appointed to it are wont to leave it just at the time when, having mastered the details of their work, they have begun to be useful, and urges the necessity of including the higher paid appointments also in the cadre of a close Excise Department.

But, as the Board point out, except in the very heaviest districts, the administration of excise, even when combined with the supervision of income-tax work, does not occupy the full time of one officer, and therefore if Mr. Gupta's scheme were adopted, it would be necessary to appoint one officer to have charge of excise work in several districts—an arrangement which would involve confusion of jurisdiction and would tend to take out of the hands of Collectors the supervision of excise in their districts—a result highly to be deprecated. Some of the difficulties pointed out by the Excise Commissioner would no doubt be mitigated if the special officers could be relieved as far as possible of magisterial duties, and on this subject the Board promise a further reference. The whole question has the continual attention of the Lieutenant-Governor, who is well aware of the merits and demerits of the present system, but as at present advised considers that the former outweigh the latter.

5. At the commencement of the year under report there were fifteen special Sub-Deputy Collectors in charge of distilleries, but owing to revision of establishment and to the abolition, since the close of the year, of the Hooghly and Manicktolla distilleries, the number has now been reduced to ten. The Special Excise Sub-Inspectors employed on the Railway succeeded in detecting some cases of opium-smuggling, but the Board are not satisfied with their work on the whole, and are of opinion that they should be placed under the orders of the Inspector-General of Police. A separate report should be submitted on the subject. From the 1st July 1892 the grade system was introduced into the Excise Ministerial establishment, which was made Provincial and divided into three branches, viz., Executive officers, Distillery officials, and Office establishment. The scheme will not come completely into force at once, but is to be carried into effect as vacancies and promotions take place.

6. *Financial results.*—In the following statement are set forth the revenue and expenditure of the Excise Department during the last five years:—

PERIOD.	Revenue.	Charges.	Net revenue.	Percentage of charges.
	Rs.	Rs.	Rs.	
1888-89	1,08,88,973	4,32,765*	1,04,56,208	3·9
1888-90	1,04,73,413	5,31,382*	99,42,049	5·07
1890-91	1,04,60,932	6,47,112*	98,13,820	6·1
1891-92 ...	1,11,29,813	6,67,792†	1,04,62,021	6
1892-93	1,15,92,665	6,60,242	1,09,32,423	5·7
Difference of the past two years	+4,62,852	—7,550	+4,70,402	—·3

* These figures will not agree with those in the previous year's report, as they were incorrectly given there through a clerical mistake.

† Revised figures.

The final estimates for the year were as follows:—Receipts Rs. 1,09,50,000 and Disbursements Rs. 6,82,000, giving an estimated net revenue of Rs. 1,02,68,000, but the actual net revenue for the year exceeded the final estimate by Rs. 6,64,423, and was larger than in any of the four preceding years. This result cannot but be regarded as satisfactory, for as far as can be judged no stimulus has been given to consumption, while in the case of distillery liquor, country rum, ganja and bhang, the increase in revenue has been obtained concurrently with a decrease in consumption. The charges were Rs. 7,550 less than those for 1891-92. The main decrease occurred in the expenditure on rewards and on petty construction and repairs, while on account of travelling allowance to officers there was a further increase of Rs. 8,570 on last year's figures.

7. In accordance with the orders of Government communicated to the Board in May last, a statement has been given in the report under review, comparing the actual net receipts in each Division in 1891-92, after excluding advance collections: the figures are given below. The Presidency Division takes the first place, as its figures include those of Calcutta, and the Chittagong Division is at the other end of the list. The greatest actual advance is shown by the

Patna Division, followed by that of Chota Nagpur; the decrease in the Bhagalpur and Burdwan Divisions are due to scarcity and bad crops:—

Division.		1891-92.	1892-93.	Difference + or —
		Rs.	Rs.	Rs.
Burdwan	...	11,23,464	11,57,563	+ 34,099
Presidency	...	31,09,898	32,14,635	+ 1,04,737
Rajshahi	...	8,85,663	8,81 122	— 4,541
Dacca	...	8,16,348	8,12,196	— 4,152
Chittagong	...	2,55,767	2,68,588	+ 12,821
Patna	...	22,43,901	24,27,767	+ 1,83,866
Bhagalpur	...	12,47,985	12,09,638	— 38,347
Orissa	...	5,47,065	5,56,069	+ 9,004
Chota Nagpur	...	7,42,917	8,37,861	+ 94,944
Total	...	1,09,73,008	1,13,65,439	+ 3,92,431

8. *Revenue classified*—The fluctuations in the revenue derived from the various exciseable articles are compared in the following statement:—

Articles of Excise.	Revenue.					1892-93 compared with 1891-92.	
	1888-89.	1889-90	1890-91.	1891-92	1892-93.	Increase.	Decrease.

Miscellaneous ..	4 131	6,430	6,671	7 973	10 413	2 440	..
Total .	1,08,88,973	1,04,73,431	1,04,60,932	1,11,29,513	1,15,92 665	5,31,804	68,952
					Net increase	4,62,852	

It will be seen that there has been an increase under every head excepting imported liquor, tari, madak, chandu, and opium, the largest increase occurring under country sprits, followed by rum and ganja. The fluctuations are discussed in detail under each separate head. The total increase in net revenue over that of the previous year amounted to Rs. 4,62,852, and the incidence of excise taxation on the population was 2 annas 7 pies per head as compared with 2 annas 6 pies in the previous year. In Bombay the incidence of taxation amounted in 1891-92 to 8 annas and 1 pie and in Madras to 5 annas 5 pie. The demand for the year was well realized, for out of a gross demand of Rs. 1,16,96,017, Rs. 1,15,92,665, or 99·1 per cent., were realized during the year, Rs. 9,856 were remitted as irrecoverable, and the balance at the close of the year amounted to Rs. 93,496, or only ·7 per cent. of the whole.

9. *Current settlements.*—The settlements for the current year are again satisfactory, as they promise to yield a net increase of Rs. 2,30,352 over those of 1892-93, all the Divisions contributing to the result, except Dacca, Chittagong, and Patna.

10. *Country spirit.*—No source of excise revenue is more important than this. As the term implies, country spirit constitutes the ordinary stimulant of the people prepared for the most part by native methods; its preparation employs a considerable section of the population, it demands, whether in the shape of distillery liquor or under the outstill system, the chief share of the attention of the excise authorities, and it brings in more than two-fifths of the excise revenue of the province. To this branch of excise administration more than any other are directed the efforts of Government to decrease consumption and enhance revenue. The following table shows the increase in the revenue from country spirits during the last two years under the two systems of outstills and central distilleries:—

A.

Outstill Revenue.

11. The advance in the revenue from country spirits which occurred last year has been maintained during the year under report, the total increase from both sources being Rs. 2,08,774. The outstill revenue showed an increase of Rs. 1,70,209, the number of shops being 161 greater than in the previous year. The increase in the number of shops indicates an abandonment of the policy of fixing beforehand the upset prices to be demanded for them, and allowing no deviation therefrom. Experience has, it is stated, shown that an inelastic system of this kind is not conducive to any substantial decrease in consumption, while it is extremely detrimental to Government, since the only persons who benefit by shops remaining unlet are the neighbouring licensees, who obtain thereby an altogether unintended and unearned profit. The Officiating Lieutenant-Governor is not quite convinced of this, and views with suspicion an increase in the number of shops, unless justified by exceptional reasons of special and not of general application. No figures are supplied by the Board

to show the amount of country liquor issued from outstills, and it is therefore impossible to compare the amounts consumed year by year, but in the circumstances stated above, it is claimed that the increase of shops does not necessarily mean a corresponding increase of consumption. But the onus of proving this lay on the excise authorities, and it has not been discharged. It is satisfactory to observe that the revenue from distilleries showed an increase of Rs. 38,565, or 1·6 per cent., while the issues of distillery liquor fell from 814,432 to 736,107 gross gallons, or by 9·6 per cent. It is clear that to some extent a stronger liquor is being distilled, which is, however, it is believed, diluted before sale, and the figures quoted fully justify the recent action of Government in altering the manner of levying the distillery fee.

12. In last year's Resolution the following points were specially noted and discussed:—

(1) The restriction of still and vat capacities.
(2) The issue of liquor at fixed strength.
(3) The fixing of minimum retail prices.
(4) The rate of distillery fees.
(5) The desirability of distilling weak liquor at Government distilleries.

The first point has been disposed of by an order of Government doing away with all restrictions on vat capacity from the beginning of the current year, and allowing Collectors, with the sanction of the Excise Commissioner, to permit the use of stills of any size. There is abundant evidence to show that these restrictions were frequently evaded, and that in comparison with the trouble and harassment which they involved, the advantages they were believed to secure were quite insignificant The expedient of fixing a minimum retail price below which distillery liquor should not be sold at the licensed shops was condemned in the Resolution last year, and has now been given up; but as regards outstills, it is reported that the system has not yet been altogether abandoned. The Lieutenant-Governor is unable to understand in what manner the Excise Commissioner expects effectually to carry out such an order in the case of outstills, and a report should be submitted on the point. In regard to the distillery fee, the question was discussed during the year whether a fee on stills, or a fee on each gross gallon of liquor distilled, or a fee on each gallon of London-proof liquor, was the most advisable. After the close of the year the Board suggested the total abolition of the fee, but in the event of that course not being adopted, they recommended the levy of a higher fee on each gallon of London-proof liquor. The Lieutenant-Governor accepted the latter suggestion, and approved of the levy of a fee of 2½ annas calculated on each gallon of London-proof spirits; at the same time, in view of the inducements to illicit manufacture arising from the high price of distillery liquor in certain specified districts, orders were passed that in those districts the present system should be maintained and a fee of 1 anna per gross gallon be levied as now. The second and the last of the questions raised above were dealt with by the issue of instructions that the distillation of strong liquor was not to be encouraged, but that the abkars were to be allowed to distil liquor to suit the taste of their customers, and District Officers have accordingly been asked by the Excise Commissioner to report what reduced strengths they would propose with a view to carrying out these orders The Excise Commissioner does not press distillation or the issue of liquor at fixed strengths, because he says such an order would be inoperative unless supplemented by others forbidding the dilution of liquor before sale. If the only benefit anticipated from such a measure be that it will facilitate the detection of illicit liquor offered for sale under cover of a license, no doubt the game would be hardly worth the candle; but Sir Antony MacDonnell has in other Provinces found the system tend to smooth distillery administration, and neither hurtful to the people nor to the Government revenue.

13. The revenue derived from country spirits in the Burdwan Division decreased during the year from Rs. 3,38,233 to Rs. 3,33,172 The decline occurred in the districts of Burdwan, Midnapore and Hooghly, and is ascribed to the increase in the price of liquor, to the enhancement of duty, to the high rate of license fees, and to the failure of crops. The following statement compares the revenue in this Division from country liquor, tari and pachwai in the years

1887-88, when the revenue from country liquor was at its highest, and in the year under report:—

District.	1887-88.				1892-93.			
	Revenue form—			Total.	Revenue from—			Total.
	Country spirits.	Tari.	Pachwai.		Country siprit.	Tari.	Pachwai.	
	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.
Burdwan	1,51,728	4,379	58,419	2,14,526	78,045	7,745	1,04,360	1,90,150
Bankura	53,620	67	10,121	63,808	23,032	73	15,139	38,244
Birbhum	20,427	1,154	62,110	83,691	15,873	1,618	95,323	1,12,814
Midnapore	75,006	1,105	2,838	78,949	59,809	4,817	5,706	70,332
Hooghly	1,51,803	22,134	1,366	1,74 803	1,23,268	30,496	2,171	1,55,935
Howrah	29,586	19,984	.. ..	49,570	33,145	27,967	.	61,112
Total ...	4,81,670	48,823	1,34,854	6,65,347	3,33,172	72,716	2,22,609	6,28,587

	1887-88.	1892-93.	Increase.	Decrease
	Rs.	Rs.	Rs.	Rs.
Country spirits	4,81,670	3,33,172	......	1,48,498
Tari ..	48,823	72,716	23,893	......
Pachwai ...	1,34,854	2,22,609	87,845	......
Total	6,65,347	6,28,587		36,760

The Excise Commissioner says that the falling off in the revenue from country spirit is no doubt due to the substitution of distillery shops for outstills during the period under consideration, the high-priced distillery liquor being beyond the means of the average consumer. As a consequence of the high prices, illicit distillation appears to have been prevalent, and it was found necessary to reintroduce outstills in certain wild tracts of Bankura and Midnapore. The statement above shows that as the revenue from spirits has declined, so has that from tari and pachwai risen; so that the ultimate loss to Government has only amounted to Rs. 36,760.

14. There was an increase of revenue in all the districts of the Presidency Division except Murshidabad. The advance was greatest in Calcutta and the 24-Parganas, and in both instances it is ascribed partially to the equalization of the duties on rum and country spirits, and so far the increase caused no actual profit to Government. Few cases of smuggling were detected, but the Collector of Nadia thinks that outstill liquor is brought into the district from Pabna and Rajshahi, and both smuggling and illicit distillation are suspected in Murshidabad, though no cases were detected. As usual, the districts of Purnea and Malda, belonging to the Bhagalpur Division, are considered along with those of the Rajshahi Division, to which geographically and ethnologically they pertain. In this tract there was a decrease in the number of outstills from 375 to 371, and the revenue declined by Rs. 6,982. In Darjeeling the falling off is said to be due to the abolition of two outstills: pachwai shops were opened in their stead, and the increase of revenue from pachwai more than compensated for the loss on country spirits. In Dacca the distillery system continued to be in force throughout the Division: the number of shops increased from 209 to 213, and the revenue from Rs. 2,05,172 to Rs. 2,18,698. All the districts of the Division show an increase, except Mymensingh, where the decrease is ascribed to the high price of food and to consumption of country rum and imported liquor in place of country spirits. It is said that rum and imported liquor are extensively sold in the Dacca district under the combined licenses which it has now been decided to separate. In the Chittagong Division the outstill system holds the field: the revenue was Rs. 2,895 greater than in the previous year: the demand for liquor throughout the Division is very small.

15. With the seven districts of the Patna Division may be classed the three districts of Monghyr, Bhagalpur and Hazaribagh. In this tract the dual system continued in force, under which there is one central distillery in each district for the supply of the town area, while the rest of the district is supplied from outstills. The revenue from outstills rose from Rs. 14,05,808 in 1891-92 to Rs. 15,12,941 in the year under report, and the number of outstills increased by 158. As explained in paragraph 10 above, the increase under the latter head is due to modifications being allowed in the upset price, and does not necessarily imply a larger consumption. The increase in revenue is

shared by all districts except Shahabad and Darbhanga. The revenue from distillery liquor, on the other hand, decreased by Rs. 10,311. The decline is generally ascribed to the high price of food and to the reduction in the duty on distillery liquor. The former cause will not bear a moment's investigation in view of the concomitant increase in the revenue derived from outstills, but the latter no doubt contributed somewhat to the decrease.

16. The Excise Commissioner gives the following statement to show that the system of central distilleries has not been a financial success in Bihar:—

	1887-88.	1892-93.	Percentage of decrease.
	Rs.	Rs.	
Outstill revenue	15,09,399	13,65,120	9 5
Distillery revenue	4,99,177	3,20,395	35·8
	20,08,576	16,85,515	

From these figures it appears that the revenue from outstills has nearly recovered the decline that occurred in 1890-91, but not so that from distilleries. The Excise Commissioner urges that distillery liquor can never successfully compete with that from outstills until some means are devised for taxing them equally (and hitherto all attempts to do this have failed), and yet distillery areas are surrounded on all sides by outstills, and outstill liquor cannot be entirely prevented from competing with that from the distilleries. Tari also joins in the struggle, and either it has become so popular, or the revenue has been so well collected during the last few years, that the income derived from it goes some considerable way to making up for the loss that has occurred since 1890-91 in the revenue from country liquor. A comparison of the receipts in the year under report and in 1887-88, the year of the highest revenue, will illustrate this:—

	1887-88.	1892-93.	Percentage of difference.
	Rs.	Rs.	
Country liquor	20,08,576	16,85,515	—16
Tari	4,65,397	6,26,345	+34 5
Total	24,73,973	23,11,860	

The Lieutenant-Governor is not satisfied that the causes of the alleged high price of distillery liquor have been thoroughly explored, and he desires to suspend his judgment till the report on the whole question promised by the Board has been received and considered.

17. The difficulty of the competition of the distilleries and outstills was encountered in the Central Provinces, and Sir Antony MacDonnell there adopted the plan of abolishing the outstills and substituting for them bonded warehouses which drew their supplies from the distillery. This plan was so successful in the district (Nimar) in which it was tried, that its extension to other districts has been decided upon. The Board of Revenue are requested to place themselves in communication with the Excise Commissioner, Central Provinces, with a view to trying the system in a selected area in Bengal.

18. All the districts of the Bhagalpur Division have been dealt with in the above remarks except the Sonthal Parganas. The distillery system only was in force in this district during the year, and the revenue decreased by Rs. 1,677. There were 49 cases of illicit distillation, and this large number is said to be due to the facilities for the malpractice afforded by the use of pachwai. In the Orissa Division there was an insignificant decrease in the revenue: the distillery system continued as hitherto, but since the commencement of the current year some outstills have been sanctioned in certain jungly parts of Cuttack. The smuggling of outstill liquor from the Gurhjats is said to be rife in all three districts of the Division. In the Chota Nagpur Division, excluding Hazaribagh, which has already been discussed, the outstill system is everywhere in force, except that in Manbhum there is one distillery. There

was an increase of revenue in all the districts of the Division, which amounted in all to Rs. 66,073.

19. The Excise Commissioner sums up the situation thus—

"The revenue from country liquor attained the highest figure in 1887-88, when it stood at 52 lakhs. In the following year it declined to a little less than 51 lakhs, and dropped further to 47 lakhs in 1889-90. The bottom was reached in 1890-91 with 45¼ lakhs."

"The largest decrease took place in Bihar, which was mainly due to the gradual decline of the distillery revenue, and to changes in excise policy connected with the measures taken to regulate the production of outstills and increase their taxation. There was likewise a heavy fall in the Burdwan Division, which was chiefly caused by the general abolition of the outstill system. In the past two years, 1891-92 and 1892-93, much of the lost ground has been regained, and the total country liquor revenue of the past year amounted to nearly 50¼ lakhs, or 1¾ lakhs less than in 1887-88, but 5 lakhs more than in 1890-91. In Bihar the revenue from outstills has made great strides towards recovery, but the distillery revenue continues to suffer from insufficient protection against smuggling and from disparity between the prices of outstill and distillery liquor. The taxation on tari, too, requires to be put on a proper footing. As regards the Burdwan Division, in view of the prevalence of illicit distillation and of the difficulty of preventing it, a change of system is required in Bankura. In this Division pachwai yields a large revenue and is capable of further development."

In all his efforts at improvement the Excise Commissioner should never lose sight of the central principle that an increase of excise revenue needs justification as not being absolutely satisfactory unless accompanied by a decreased consumption of exciseable articles.

20. *Country rum.*—The following table shows the principal figures of the year for country rum:—

Year.	Consumption.								Duty levied.				Remarks.
	Bengal rum.		Shahjehanpore		Aska rum.		Total.		Bengal	Shahjehanpore rum.	Aska rum.	Total.	
	Gross gallons.	L.P. gallons.	Gross gallons.	L.P. gallons.	Gross gallons	L.P. gallons.	Gross gallons.	L.P. gallons.	Rs.	Rs.	Rs.	Rs.	
1891-92	16,755	21,379	43,544	56,879	17,184	23,283	77,483	101,541	85,516	30,001	93,141	2,08,658	Discrepancies between consumption and duty have been explained in table VI.
1892-93	9,386	12,008	36,162	47,979	14,597	20,189	60,145	80,176	60,040	2,39,332	1,00,949	4,00,321	
Increase or decrease ..	−7,369	−9,371	−7,382	−8,900	−2,587	−3,094	−17,338	−21,365	−25,476	+2,09,331	+7,808	+1,91,663	

The decrease in consumption shown under each class, amounting in all to 17,388 gross gallons, is owing partly to actual decrease of consumption, the result of the increase in the rate of duty from Rs. 4 to Rs. 5 from the 1st April 1892, and partly to the large clearances made at the close of the year 1891-92, in order to avoid paying the enhanced duty. The large increase in the duty obtained from Shahjehanpore rum was due to the fact that during the greater part of the year, under the notification of Government, dated 5th April 1892, it was imported into Bengal only under bond, and paid duty to this Government on issue, instead of to the North-Western Provinces as formerly. In February 1893, however, under the orders of the Government of India, the notification was withdrawn, and the rum is now as before imported duty-paid from Shahjehanpore, but by a special arrangement the importers are paying to this Government the difference of Re. 1 per gallon London-proof in the duty chargeable on country rum in the North-Western Provinces and in this Province. In last year's Resolution the sudden increase in the consumption of country rum led to a discussion whether country rum was underselling country spirit. The Excise Commissioner made enquiries during the course of the year, the result of which were duly reported to Government, and are now embodied in his report. His ultimate conclusion is that country spirit is slightly dearer than country rum when the latter is obtained direct from the agents, but considerably cheaper when the rum is obtained from wholesale dealers. He adds that there is little ground for the apprehension that country rum is ousting country liquor from the market; the latter can probably be trusted to hold its own everywhere except in and near Calcutta, owing to the preference which native consumers show for it, but the sale of both kinds of spirit should be carefully watched.

21. During the year, the practice of issuing combined licenses in the mufassal for the sale of country spirit, country rum, and imported liquors was discontinued under the orders of Government, and licenses for the sale of imported liquors are now to be issued in the mufassal only when the existence of a real demand is established. The object of these orders was to prevent the formation or development of a taste for the cheap and deleterious liquors which are imported from Europe and manipulated in this country so as to various kinds of wines and spirits.

22. *Imported spirits and wines.*—There was an increase of 3 in the wholesale licenses, and a decrease of 48 in the general retail licenses, as the following statement shows:—

YEARS.	LICENSES.						REVENUE.
	Wholesale.	Retail.				Total.	
		Hotel.	Railway refreshment room.	Steamer.	General.		
							Rs.
1887-92 (average)	225	58	21	16	521	841	2,25,148
1891-92 ..	209	54	24	13	479	779	2,23,644
1892-93 ...	212	51	20	22	431	736	2,07,092

The decrease in revenue is ascribed to the extended issue of the combined licenses, which, as mentioned above, have now been prohibited in the mufassal. The scale of fees for licenses, both wholesale and retail, was revised during the year, and was in most cases considerably enhanced, but as the orders did not take effect until the 1st April 1893, the question is not discussed at length in the report.

23. *Tari.*—The number of licenses for the sale of tari during the year under report was reduced from 16,920 to 15,675, by the elimination of small and unprofitable shops. The revenue, which has shown a steady increase during the last six years, declined to a small extent (Rs. 7,707) during the year under report, but still exceeded that of any year except 1891-92. Of the tari revenue, 97 per cent. is contributed by twenty districts, lying in Bihar, Orissa, and the neighbourhood of Calcutta, while the remainder only provide 3 per cent. of the total. The Patna Division, as usual, contributed by far the largest proportion, amounting this year to 57 per cent. of the whole tari receipts of the province. All the districts of the Division, except Patna and Gaya, showed a decrease, which in the case of Saran amounted to Rs. 9,043, being ascribed to agricultural depression and to the enforcement of the system of paying fees direct into the treasury instead of through Excise officers. The Excise Commissioner discusses the tree-tax system, which is on its trial in Cuttack and Patna. The theory of the system is that every tree yielding tari should pay a tax according to a fixed rate. Mr. Gupta is not hopeful that the experiment will result in any great expansion of the tari revenue, but both he and the Board of Revenue are of opinion that it should not be abandoned, because, owing to the intimate connexion and the competition between the consumption of tari and of country spirits, the administration of the latter cannot be put on a sound basis until the former is more highly taxed and properly regulated and controlled. It is beyond controversy that in this matter Bengal is at a disadvantage as compared with Madras and Bombay in not possessing the subordinate revenue agency and the village establishment which in those provinces are available to assist the Excise officials: the complete introduction of the scheme therefore into Bengal must necessarily be costly in its inception, and hardly less so in its maintenance; but the Lieutenant-Governor agrees that the experiment, which is still in its infancy, should be given a further trial.

24. *Pachwai.*—Pachwai is a preparation from fermented rice or millet or other such grain. It is the favourite drink of the aboriginal tribes and is largely consumed in Burdwan, Birbhum, Bankura, and Murshidabad, as well as in the insolated district of Darjeeling. The number of licenses increased by 22, and the revenue by Rs. 29,043 or over 10 per cent. The increase occurred in Birbhum, Burdwan and Darjeeling, and is ascribed in the two first-named districts to the substitution of pachwai as a stimulant for the high priced distillery liquor, and in the latter district to the opening of six new shops. Besides the above, licenses for home-brewing were granted in 1,229 instances to headmen of villages inhabited by aboriginal tribes. The Excise Commissioner and the Board are of opinion that pachwai is not sufficiently taxed, and an attempt is being made to ascertain the consumption of materials in each shop, in order that the fee may bear some proportion to the sales.

25. *Ganja.*—The ganja crop of February and March 1892, which came into the market for consumption in 1892-93, was remarkable for the poorness of its outturn. Though the estimated quantity of land under cultivation was nearly three times as great as in the previous year, the average produce per bigha was 50 per cent. less, so that the ultimate outturn was only slightly greater than in the previous year. The high prices realized by the drug in 1891-92 stimulated over-production, with the result that the raiyats were unable to cultivate their lands properly: it is observed that the average produce always falls off with increased cultivation. The number of retail licenses granted rose from 2,578 in 1891-92 to 2,672 in the year under report. The number of licenses issued, the consumption, and the revenue derived from duty during the last three years in the case of each kind of ganja are as follows:—

	Quantity consumed.				
	Chur.	Round.	Flat.	Gurhjat.	Total.
	Mds.	Mds.	Mds.	Mds.	Mds.
1890-91 ...	899	1,917	3,279	......	6,095
1891-92 ...	424	1,795	3,455	3	5,677
1892-93 ...	1,369	1,760	2,317	5	5,451

Revenue from duty.

	Rs.	Rs.	Rs.	Rs.	Rs.
1890-91 ...	2,51,653	4,67,613	5,90,608	......	13,10,085(*a*)
1891-92 ...	1,18,685	4,38,233	6,90,747	400(*b*)	12,48,065
1892-93 ...	3,84,488	4,29,839	4,65,706	538	12,80,631

(*a*) Including Rs. 211 credited in March 1891 on account of ganja issued after the close of the year.
(*b*) This includes Rs. 150 realised on account of confiscated Gurhjat ganja and credited under this head.

though there has been a decrease in the gross amount of ganja consumed, it is to be noticed that there has been a large advance in the consumption of *chur* ganja, which contains a far smaller proportion of wood and other useless matter than the other kinds. At the close of the year the duty on each kind of ganja in Bengal, Bihar and Orissa, including Gurhjat ganja, was raised by Re. 1, and a further adjustment of duty between the different kinds of the drug has been submitted for the approval of the Government of India. In January last Dr. Prain, the Curator of the Herbarium at the Royal Botanical Gardens, Sibpur, was deputed to make an enquiry into the cultivation and use of ganja. His report, which is full and exhaustive, was submitted after the close of the year, and is still under consideration. The appointment of the Hemp Drugs Commission since the close of the year under review has drawn further attention to the use of this drug.

26. *Sidhi, bhang or sabzi.*—The number of licenses for the sale of sidhi, bhang or sabzi, which are synonyms for the same substance, prepared from the leaves of the hemp plant, rose from 271 to 288, and the revenue from Rs. 48,464 to Rs. 53,558, but the consumption actually decreased. The Excise Commissioner remarks that there can be little doubt but that duty is paid on only a small fraction of the amount of bhang that is consumed, since the wild hemp plant grows in almost every district: an attempt was made during the year to extirpate it, but under the orders of Government this has been abandoned as impracticable.

27. *Opium.*—The particulars in regard to excise opium, which is that offered for sale in these provinces, and is not to be confounded with provision opium prepared for export, are thus given in tabular form—

		Quantity sold.	Revenue.
		Mds.	Rs.
1890-91	...	1,942	19,95,312
1891-92	...	2,005	21,18,825
1892-93	...	1,934	20,85,116

28. The Superintendent Excise Revenue in Calcutta again insists that the smuggling of opium from the Bihar districts to Calcutta continues, and cites in proof of his statement the case of a railway mail service peon who was convicted for this offence. In this connection the question has arisen whether the treasury price of opium in the opium-producing tracts can be safely raised so as to lessen the great variations in price that now exist in different districts of the province, and the temptations to smuggling which they imply. Some correspondence has taken place on the subject with the Chief Commissioner of Assam and also with the Commissioner of Excise of the North-Western Provinces, and final orders have not yet been passed on the representations of the latter.

29. *Offences against the Excise and Opium Laws.*—The number of arrests for offences against the Excise laws decreased from 4,800 in 1891-92 to 4,634 in the year under report, but the percentage of convictions (84·8) is a little better. The arrest of 1,976 persons was effected by the police and 2,657 by Excise officers. There appears to have been during the last few years a falling off in the activity of the police in excise cases, and the observations of the Excise Commissioner will be communicated to the Inspector-General of Police for consideration. The number of licensees prosecuted for breach of license was considerable, amounting to 635. A large number of these prosecutions were for non-payment of fees on the due date, and such prosecutions have now been prohibited by the Board; but the Lieutenant-Governor is doubtful whether the prohibition should be absoloute, for constant and chronic failure to pay on the due date can only be cured by prosecution in the last resort. The names of the officers mentioned by the Excise Commissioner as having done good work will be noted in the proper department.

30. The Lieutenant-Governor offers his thanks to Mr. Krishna Govinda Gupta for his careful report, and to Messrs. Westmacott and Samuells for their successful administration of the department during the year, upon which he thinks that the Board may look back with satisfaction. The revenue has increased by nearly 5 lakhs of rupees, and this result has been achieved concurrently with a decrease in the consumption of distillery liquor, country rum, ganja and bhang: some vexatious restrictions have been removed, and some useful departmental reforms have been carried out; so that Sir Antony MacDonnell hopes that a distinct step in advance has been taken towards the ideal of good excise administration, which is attained when drinking is discouraged and consumption reduced by the increase of revenue to a point which is just short of taxation which would encourage smuggling and illicit manufacture.

By order of the Lieutenant-Governor of Bengal,

J. A. BOURDILLON,

Offg. Secretary to the Govt. of Bengal.

RESOLUTION ON THE ANNUAL GENERAL ADMINISTRATION REPORT OF THE BHAGALPUR DIVISION FOR THE YEAR 1892-93.

GENERAL DEPARTMENT.—MISCELLANEOUS.

Calcutta, the 8th November 1893.

RESOLUTION No. 2499

READ—

The Annual General Administration Report of the Bhagalpur Division for the year 1892-93.

The Annual General Administration Report of the Bhagalpur Division for the year 1892-93 is submitted by Mr. Wace, who received charge after the close of the year. Mr. Quinn held the post of Commissioner throughout the year.

Tours and inspection.

2. Mr. Quinn spent 124 days on tour, during which he inspected all the district and sub-divisional offices and treasuries and many of the settlements in progress in the division, finding evidence of good work and of careful supervision on the part of the District Officers in every district. In Bhagalpur Mr. Wace, Mr. Coxe and Mr. Marindin were between them on tour for 115 days. The prescribed number of days for District Officer's touring for this district is 120, but Mr. Marindin was prevented from going into camp at the end of March by a meet of the Bihar Light Horse held at Bhagalpur with the object of starting volunteering in the district. In the Sonthal Parganas Mr. Carstairs was on tour for 154 days; but the important duty of making half-yearly inspections of his own office suffered. The Collectors' tours in the remaining districts of the Division were sufficient, Mr. Faulder's tour in Purnea being specially well arranged and distributed, and all the Sub-divisional Officers fully complied with the requirements of the rules on the subject.

Weather and crops

3. The weather conditions throughout the Division approached the normal. The bhadoi harvest was generally good except in Purnea, where, however, the jute crop is said to have given a magnificent return. Owing to the early cessation of rain, the winter rice crop was not generally so good as at one time was expected, but in no district did the outturn fall much below the average. The want of moisture at the beginning of the cold weather retarded the rabi crops, but on the whole, from an agricultural point of view, the year may be regarded as favourable.

Public health.

4. The Commissioner is of opinion that the year was unfavourable to public health, though cholera diminished after the outbreak of the previous year. The mortuary returns, though admittedly inaccurate, show an increased mortality in Monghyr, Bhagalpur and the Sonthal Parganas; while in Purnea and Malda the recorded death-rate sank to about the normal level after the excessive mortality of 1891-92.

The following table shows the total annual number of deaths in each district for the last three years:—

DISTRICT.	Population by Census of 1891.	Total number of deaths.		
		1890-91.	1891-92.	1892-93.
1	2	3	4	5
Monghyr	2,036,021	54,036	59,003	67,010
Bhagalpur	2,032,696	55,801	57,899	66,927
Purnea	1,944,658	44,125	81,031	46,270
Malda	814,919	17,667	37,123	22,345
Sonthal Parganas	1,754,196	24,608	30,887	35,284
Total ...	8,582,490	196,237	265.943	237,836
Total for the calendar years ...	.....	187,679	251,102	263,834

5. The famine relief operations which were undertaken in January 1892 in Monghyr, Bhagalpur, and Purnea continued into the year under review. They were brought to a close in Purnea towards the end of May, in Monghyr in July, and in Bhagalpur not till September. The report on these operations has been separately reviewed by Government. The effect of a period of distress on the material condition of the people is always difficult to gauge, but it would appear from the remarks of the District Officers, which the Commissioner quotes, that in this instance the strain was considerable, especially in Bhagalpur, of which Mr. Marindin writes:—

Famine relief and material condition of the people.

"The failure of the crops in 1891-92 caused widespread distress, especially in the Supaul sub-division, and necessitated relief measures. These measures were effective so far as preventing deaths from starvation, in giving employment and food to the labouring and destitute classes, and assistance in advances of grain and money to the cultivators. With a good September and winter harvest, the people have now returned very much to their normal condition, at least as far as outward appearances go. All of the cultivating classes have not suffered in the same degree. The larger and more well-to-do cultivators were able, by selling their surplus stock of grain, to make a profit out of the famine; and the way in which rents, current and arrear, have been paid up in the last six months of the year is really surprising. At the same time, I believe that the strain has been a very severe one, and that many of the raiyats will take some time in recovering from it, while others never will. The zamindars, most of them, postponed their collections in 1891-92, and in the latter part of this year have been collecting the entire arrears for the previous year, with 12 or 14 annas of the current year. The raiyats have had to find this, as well as to pay the mahajans, and many have felt extreme difficulty in meeting these demands, and a large number in order to do so have been compelled to sell their holdings or a portion of them. The registration offices furnish ample evidence of this.

"The number of sales of raiyats' holdings this year has amounted to 4,618. This is 1,388 in excess of the number sold last year. More than half these sales, 2,623, occurred in the Supaul sub-division, where the distress was most severe. Out of the holdings thus sold, 1,787 passed into the hands of mahajans. It must be remembered that such sales are for the most part forced, and only resorted to as a last measure, when the raiyat is unable to satisfy his creditor in any other way; and they indicate the state of indebtedness reached by a still larger class, who have not yet been compelled to part with their lands. The large landless class in North Bhagalpur have also no doubt suffered severely. The zamindars also suffered as a class. The zamindars of this district are very much in debt, especially in the north and south.

"The really progressive class seem to be the money-lenders, including in that category those who lend money in addition to some other business or profession, as well as the professional money-lender. These as a class are literally adding house to house and field to field; the larger and most successful among them buying up zamindaris, and the small ones purchasing jotes, and are thus every year tightening their grasp on the land."

In Malda the labouring classes are said to be still depressed, but in Monghyr, Purnea and the Sonthal Parganas there are indications that the people have recovered their normal condition of prosperity. Mr. Faulder writes of Purnea:—

"It is at any rate satisfactory to know that all rent-receivers, traders, cultivators, and day-labourers made up the ground lost in 1891-92, if they did not make any positive progress in their material condition."

"Labour is much dearer than in Bihar, and the Purnea labourer can afford to be notorious, both for his independence and his inefficiency."

As regards prices the Commissioner remarks:—

"Prices generally ruled high owing to depletion of stocks and brisk demand for export, and, as usual, the fall has not been at all commensurate with the improvement of agricultural outturn. Every scarcity seems to leave its trace in a slight permanent rise in food-grains.

"Prices of labour have changed but little: what slight movement there has been of late years has tended to give the lowest labourer of each class a rise in wages. That the rise has not declared itself more clearly is of course due to the system by which village labour, even when skilled, is still paid in grain. The wage of a common agricultural labourer vary from two annas a day in Monghyr to three annas in Malda and the Sonthal Parganas."

6. As usual, there was little permanent emigration from any of the districts of the Division, except the Sonthal Parganas. Free recruiting in this district continues to replace the registration system, and abuses continue to exist; but it is satisfactory to note that prosecutions for offences connected with emigration fell from 20 in 1891-92 to 12 in the year under review, while the percentage of convictions rose from 20 to 33, and the Commissioner remarks that, given some simple rules for tracing

Emigration.

the movements of emigrants and bringing the operations of recruiters more under official supervision, there is no reason why free emigration should not be the boon to the aboriginal classes which it is meant to be, and generally is. Increased powers of supervision are the more necessary, seeing that the mal-practices of some European and Eurasian recruiters, and of the agents of others, are beginning to destroy the good feeling of the Sonthals towards Europeans, and a first step in the desired direction has been taken in the recent extension of Act I (B. C.) of 1889 to the Sonthal Parganas. 1,119 coolies were recruited in the Sonthal Parganas for Government service in Chittagong. In Monghyr there was a slight increase in the number of coolies registered, but emigration from that district is still in its infancy.

Manufacture, trade and commerce.

7. Trade throughout the Division was better during the year under report than in the previous year, when it suffered from the prevailing scarcity. Monghyr and Bhagalpur showed least recovery. English piece-goods continue to supplant locally manufactured cloth, except in the Sonthal Parganas, where the aboriginal tribes still wear country cloth. In Purnea an export trade in mats has grown up owing to the opening of the railway to Kishanganj. The export of *sabai* grass from the Sonthal Parganas for use in paper manufacture still flourishes. The outturn of indigo was poor throughout the Division, but high prices partly compensated for this. The stone and slate quarries in the Dharhara hills in Monghyr continue to be worked, and in the Sonthal Parganas stone-quarrying, encouraged by the lowering of the rates of railway freight, is a large and growing industry. A trade in buffalo horns seems to be springing up in this district and that in bones is increasing.

Civil Justice.

8. The following statement shows the work done by the Civil Courts during the year:—

District.	Sub-division or chauki.	Description of Court.	Number of officers.	Number of original cases disposed of. Ordinary.	Small Cause Court.	Details of cases in columns 5A and 5B. Money.	Rent.	Title.	Number of witnesses examined.	Ratio per cent. of witnesses detained over two days to total number examined.	Ratio per cent. of cases pending at end of year to total disposed of.

* In Rajmahal only.

† Includes the figures for Judges and Sub-Judges.

‡ Ditto ditto.

§ These figures show the number of witnesses who attended.

As in the preceding year, the work of the Munsifs at Jamui and Banka was very light. Madhipura shows the largest number of cases disposed of. The detention of witnesses was greatest in the Monghyr district and in the Sadar station of Bhagalpur. In Purnea, where work was heavy, witnesses were released very

promptly. The Witness Attendance Register has been opened only at Rajmahal of the Courts in the Sonthal Parganas. The proportion of cases pending at the end of the year was highest at Banka and Jamui, the two Courts where work was lightest.

The percentage of appeals in which the original order was confirmed varied from 49·09 in Monghyr to 61·1 in Purnea.

Crime and Criminal Justice.

9. The influence of settlement operations under Chapter X of the Tenancy Act on the relations between landlord and tenant is illustrated by the following remarks which are taken from the Commissioner's Report:—

"The Collector of Monghyr notes that the settlement and record of rights in the estates of Banaili and Srinagar have been attended with excellent results. Of the 700 rent suits instituted in the Sadar sub-division during the past year by the proprietors of these estates, only a small percentage were contested. There was little or no dispute about the rate of rent. The raiyats appeal to the settlement papers as their title-deeds. The Collector of Bhagalpur draws attention to an abnormal increase of 2,597 suits in the court of the Munsif of Madhipura during the past year, rent suits having nearly doubled in number, and Small Cause Court suits more than doubled. A large proportion of the former came from the Banaili-Srinagar zamindari. The settlement records have placed these zamindars in a better position than they have been of late years to press claims for arrears, and this, coupled with mufassal mismanagement on the Srinagar side, probably forced this large resort to the courts."

A large increase in cognizable crime is reported, the number of offences being 14,673 in 1892 against 12,584 in 1891. To this increase which consists chiefly of offences against property, stimulated by the prevailing scarcity and the consequent high prices, all districts except Malda contributed.

The number of rioting cases increased in Monghyr, but decreased elsewhere, while there was an increase of dacoity in all districts except Malda, the increase being serious in Purnea and the Sonthal Parganas. The amount of cognizable crime was less in all districts except Bhagalpur, where the total is swelled by activity in prosecuting breaches of special laws. The decrease elsewhere is commonly noticed in years of scarcity.

The following table illustrates the state of criminal justice in each district:—

Stipendiary Magistrates

District.	Sub-division.	Class of officers.	Number of officers.	Cases disposed of.	Persons disposed of.	Ratio per cent. of persons convicted to disposed of.	Number of witnesses examined.	Ratio per cent. of witnesses detained over two days to total number attended.	Ratio per cent. of cases confirmed in appeal to total appealed.	Number of A cases disposed of.	Number remanded six times and more.	Average of cases disposed of per officer.	Average of witnesses examined per case disposed of.	Ratio per cent. of column 12 to 11.

† These figures show the number of witnesses who attended.

The above table does not accurately exhibit the comparative amount of work done by the Magistrates of the different districts, because the number of petty cases under special laws, which give little work, varies greatly. Excluding such cases, the average number of cases disposed of per officer in each district is—

Sonthal Parganas	171·3
Monghyr	157·03
Malda	145·6
Purnea	133·8
Bhagalpur	59·4

A general and satisfactory improvement is observed in regard to the detention of witnesses in the courts of Stipendiary Magistrates, which is due not only to witnesses being more promptly examined in compliance with the orders of Government, but also to more care being taken by Magistrates in the arrangement of their files. In contrast to the excellent results attained elsewhere, the Stipendiary Magistrate of Beguserai in Monghyr detained 14 per cent. of his witnesses over two days, and at Madhipura in Bhagalpur as many as 32 per cent. of the witnesses were so detained.

Much improvement is still possible in this respect in the Courts of some Honorary Magistrates. At Madhipura 41 per cent. of the witnesses examined by the Bench were detained over two days; at Beguserai the percentage was 40, and at Bangaon 36; while at Amarpur, Malda and Purnea it was over 20. On the other hand the Honorary Benches at Monghyr, Shaikpura, Bhagalpur, and Nawabganj examined a considerable number of witnesses with much promptitude.

As regards the percentage of convictions and the percentage of decisions confirmed on appeal, the following remarks of the Commissioner are of interest:—

The percentage of convictions in each district compares thus for the two past years—

	1891.	1892.
Monghyr ...	47·4	49·8
Bhagalpur ...	63·8	73·3
Purnea ...	43·4	50·2
Malda ...	59·8	57·9
Sonthal Parganas ...	41·6	55·5

It is only in Bhagalpur that the ratio of convictions has risen markedly, and there it is probably explained by the large percentage of cases under special laws noticed above. There has been a decided rise in convictions in the Sonthal Parganas, but even now it stands at only 55·5, which is certainly low. I draw attention to these figures, because it has been alleged that the recent movement designed to quicken work without impairing it has resulted in some sacrifice of independent judgment in weak Magistrates. There is nothing in the percentage

of decisions confirmed on appeal to indicate this or undue hurry. That has been best in Bhagalpur and Purnea, and worst in Malda, where it was 72·15 of the cases decided. The figures for two years in this respect compare thus—

		1891.	1892.
Monghyr	...	79·4	78·2
Bhagalpur	...	79·9	82·6
Purnea	...	72·4	82·8
Malda	...	69 4	72·1
Sonthal Parganas	...	79·8	81·52

10. The following statement shows the attendance of Honorary Magistrates:—

District.	Number of Honorary Magistrates.	Number of times asked to attend.	Number of times actually attended.	Number of absences.		
				With leave or notice.	Without leave or notice.	Total.
1	2	3	4	5	6	7
Monghyr ...	61	1,368	1,205*	94	364	458
Bhagalpur ...	125	1,720	1,012†	246	505	751
Purnea ...	40	323	157	39	127	166
Malda .	24	669	600‡	74	10	84
Sonthal Parganas	3	54	43	2	9	11

* Excess attendance 295
† Ditto 43
‡ Ditto 15

The attendance was very good in Malda, where, out of 669 requisitions, there were only 10 absences without notice—a very creditable result. In Purnea the absences after requisition were actually more numerous than the attendances. Attendance was also poor in Bhagalpur, where it is reported that the bulk of the work is done by a few energetic men. The Collector of Purnea writes that the Purnea Bench contains several Magistrates of long experience and high character, of whom he cannot make sufficient use. "The usual difficulty is felt: it is no compliment to ask them to try petty assault cases. If interesting cases are given to them, they cannot dispose of them at one sitting, and cannot afford time for two or three consecutive days' attendance. Honorary Magistrates will perhaps not be of much use to us until they are empowered to take up and dispose of cases in their own villages."

11. The following table shows the amount of fines imposed, collected, and remitted during the year under review:—

District.	Balance outstanding at commencement of the year.	Amount imposed during the year.	Total demand.	Amount collected during the year.	Amount remitted or written off during the year.	Total collected and remitted.	Balance outstanding at the end of the year.
1	2	3	4	5	6	7	8
	Rs. A. P.	Rs. A. P.	Rs. A. P	Rs. A. P	Rs. A. P.	Rs. A. P.	Rs. A. P.
Monghyr ...	7,244 3 1	20,109 13 6	27,354 0 7	14,989 12 5	4,427 4 0	19,417 0 5	7,937 0 2
Bhagalpur ...	8,812 0 0	16,719 0 0	25,531 0 0	14,317 0 0	1,745 0 0	16,062 0 0	9,469 0 0
Purnea ...	8,315 4 0	9,359 7 6	17,674 11 6	8,448 10 9	2,268 13 9	10,717 8 6	6,957 3 0
Malda ...	3,243 15 3	6,528 7 9	9,772 7 0	5,888 4 3	1,067 12 3	6,956 0 6	2,816 6 6
Sonthal Parganas.	11,274 4 1	17,159 12 3	28,434 0 4	15,486 2 10	561 12 3	16,047 15 1	12,386 1 3
Divisional Total	38,889 10 5	69,876 9 0	1,08,766 3 5	59,129 14 3	10,070 10 3	69,200 8 6	39,565 10 11

In Monghyr, Bhagalpur, and the Sonthal Parganas the closing balances were larger than the opening balances. In the Government Resolution on the last Divisional Report, attention was called to the increase in outstanding fines, and the progress made towards reducing the balances cannot be considered satisfactory. Even in Purnea the balance, though it is being gradually reduced, bears an unusually large proportion to the amount imposed during the year.

12. The following table shows the results of Sessions trials in each district for the year under review:—

District.	Number of cases committed, but pending at commencement of year.	Number committed during the year.	Total number for disposal.	Number disposed of.	Number in which conviction obtained.	Number of cases in which sentence was modified or reversed by High Court.	Number of cases acquitted by Sessions Judge.	Number of cases otherwise disposed of.	Percentage of cases resulting in conviction to total cases disposed of.
1	2	3	4	5	6	7	8	9	10
Monghyr	2	38	40	35	29	..	6	...	82·85
Bhagalpur	5	42	47	44	34	2	10	...	77·27
Purnea	2	37	39	34	26	3	8	...	76·4
Malda	10	18	33	28	24	.	4	...	85·71
Sonthal Parganas	..	15	15	15	12	2	3		80
Total for the Division	19	150	174	156	125	7	31	...	80·12

The percentage of cases in which convictions were obtained was over 80 for the Division, which indicates that committals are made with discretion, and enquiries carefully conducted both by the Police and the Magistrates.

13. The following table shows the registration work of the Division:—

District.	Class of Registration office.	Number of offices.	Number of documents registered.	Average per office.
1	2	3	4	5
Monghyr	Special	1	2,516	2,516
	Rural	7	11,302	1,615
Bhagalpur	Special	1	3,216	3,216
	Rural	6	18,415	3,069
Purnea	Special	1	3,826	3,826
	Rural	3	12,022	4,007
Malda	Ex-officio ...	1	2,584	2,584
	Rural	3	6,547	2,182
Sonthal Parganas ...	Ex-officio ...	2	2,912	1,456
	Rural	4	7,990	1,997
Total	Special	6	15,054	2,509
	Rural	23	56,276	2,447

In every district there was an increase in the number of registrations; the increase in the number of sales and mortgages registered was connected with the recent agricultural distress, as is shown by the fact that it was most marked in Purnea and the Supaul sub-division of Bhagalpur, where the distress had been greatest. The number of registrations per office was highest in Purnea; relatively to population, registration is most common in Malda and Bhagalpur.

14. Below are shown, district by district, the demand, collection and outstanding balance of revenue and cesses:—

District.	Class of demand.	Class of estates.	Number of estates.	Demand. Current.	Demand. Arrear.	Collections of 1892-93. Current.	Collections of 1892-93. Arrear.	Balance on 1st April 1893. Current.	Balance on 1st April 1893. Arrear.	Remarks.

		Total ...	.. ...	2,92,084	4,432	2,87,802	3,552	4,282	805	
		GRAND TOTAL .	... .	38,09,894	1,70,745	35,07,326	1,46,047	2,41,883	22,984	Rs. 2,399 remitted.
		GRAND TOTAL FOR 1891-92 ...	......	37,75,109	1,59,428	36,43,020	1,30,371	1,34,064	26,642	

The total current demand of Land Revenue was Rs. 33,70,022, and of this Rs. 31,87,009 was collected. The percentage of current collections to current demand was only 94·5 against 97·6 of the preceding year. The current and arrear collections together came to 94·46 per cent. of the total demand. The total balance of Land Revenue outstanding at the close of the year was Rs. 1,95,368. Those somewhat unsatisfactory results are mainly due to the bankruptcy of the proprietor of some very large estates in Purnea, resulting in his failure to pay revenue amounting to over a lakh of rupees at the last kist of the year. The amount has since been realized. The standard of 99 per cent. on the current demand in permanently-settled estates was reached in the Sonthal Parganas and was nearly reached in Malda, but in Bhagalpur the collections amounted to only 97·98 and in Purnea to 89·86 per cent., and in these districts the realisations in temporarily-settled estates were also far below the prescribed standard.

The collections in estates held direct by Government improved in Bhagalpur, but are still very bad in Monghyr and Purnea: in the Sonthal Parganas alone, where they were as usual excellent, was the prescribed standard reached. The outstanding balance of road cess diminished in every district except Purnea, where Rs. 19,491 were outstanding on a current demand of Rs. 1,03,704: the balance in Monghyr is still considerable.

Certificates.

15. The following statement shows the result of certificate work during the year:—

* These figures show the number of certificates filed during year.

The number of certificates remaining undisposed of at the end of the year was in every district less than the number at the beginning of the year. For the whole division the number fell from 5,202 to 3,271, a result which the Lieutenant-Governor regards as satisfactory.

16. The outturn of land acquisition work is shown below—

District.	Number of cases pending at commencement of year.	Number of cases instituted.	Total number of cases for disposal.	Number of cases disposed of.	Balance pending at end of year.	Date of oldest pending cases.
1	2	3	4	5	6	7
Monghyr ...	1	2	3	1	2	26th January 1893.
Bhagalpur ...	3	3	6	3	3	31st August 1892.
Purnea ...	62	24	86	37	49	1 case of 1888-89. 21 cases of 1890-91. 9 cases of 1891-92.
Malda ...	7	...	7	5	2	25th December 1891.
Sonthal Parganas.	7	2	9	5	4	7th December 1890.
Divisional Total	80	31	111	51	60	

The number of cases is small, except in Purnea, where there are some cases of long standing which should be disposed of as soon as possible.

17. The only settlement work undertaken during the year was in certain estates in the Dumka and Godda sub-divisions of the Sonthal Parganas, where two survey parties were at work.

Settlements.

18. The Excise revenue decreased from Rs. 12,51,755 to Rs. 12,17,947. The decrease is distributed over all the districts except Monghyr, and was mainly due to the prevalent scarcity. The incidence of Excise revenue was annas 2-3 per head of population. The following table shows the Excise statistics for the year:—

Excise.

District.	Country Spirits.				Ganja and Bhang.				Opium.

NOTE.—Percentages in column 14 include boys in private institutions.
* According to Director of Public Instruction ... 39,601
† Ditto ditto ditto ... 46,651
‡ Ditto ditto ditto ... 3,42,877

Besides the pupils shown in the above tables, 9,745 attended private institutions, but the state of primary education in the division generally is deplorably backward.

The following comments made by the Commissioner are quoted:—

It will be observed that the cost of education per head of pupil is generally higher in the Sonthal Parganas than in any other district in the Division, and it is therefore satisfactory to notice that the percentage of boys at school is higher there than in the two adjoining districts of Bhagalpur and Purnea. Malda, as most like Bengal, is most forward. The backwardness of the interior of Bhagalpur, when considered with the zeal shown in the cause of education at head-quarters by two large zamindars, has always been a puzzle to me, and I am disposed to think Government might divert some of the Provincial revenues, now spent in the Sonthal Parganas, to bring the northern tracts of this Division more forward. The District Boards do all they can with the limited funds placed at their command.

As regards the expenditure of Municipalities on education, it is noticeable that in all districts, except Monghyr, the expenditure on high and middle education is greater than the expenditure on primary education, to which, except in

Monghyr, very inadequate assistance is given. The Officiating Lieutenant-Governor regrets to notice that no attention appears to have been paid to the remarks made in the Resolution on last year's Report under this head.

The total number of girls under instruction was 4,594 against 4,264 in the previous year, showing an increase of 330 girls.

The percentage of Muhammadan pupils to the school population is, as observed in some other divisions likewise, higher than the percentage of the Muhammadan male population to the whole male population of the Division. The number of aboriginal pupils rose from 5,121 to 6,254, which is even higher than the number at school in 1890-91. The following figures relating to the Sonthal Parganas are of interest:—

Sonthal Parganas.

Of 5,759 aboriginal pupils in the Sonthal Parganas, 5,575 were Sonthals, 178 Paharias, 3 Dhangars, and 3 Kols. Of 170 schools for Sonthal education, stipends were given to 108 schools from the special Damin-i-koh grant of Rs. 7,500, called the Sonthal Education Fund, of which Rs. 6,419 only could be spent. Taking the population and the children of school-going age into consideration, there was one Sonthal in every 14·7 and one Paharia in every 52·7 at school.

Dispensaries and Hospitals.

20. The following table shows the working of the dispensaries and hospitals in the division:—

District.	Number of dispensaries.	Income from—					Daily average patients.		Ratio per cent. of out-door patients to total population.
		Government.	District Board.	Municipality.	Subscriptions.	Total.	In-patients.	Out-patients.	
1	2	3	4	5	6	7	8	9	10
		Rs.	Rs.	Rs.	Rs.	Rs.			
Monghyr	4	138	2,639	5,050	3,658	11,176	86·69	243·44	1·57
Bhagalpur ...	7	325	1,[illegible]51	9,922	5,072	10,670	40·12	228·25	1·25
Purnea ...	5	70	1,151	3,579	1,497	6,297	24·48	96·63	·65
Malda	4	106	600	1,738	4,344	6,788	17·45	165·08	2·75
Sonthal Parganas	13	1,708	...	2,856	8,341	12,905	21·48*	103·43	2·45

*This does not include figures for Benagoria Dispensary.

In-door patients are far more numerous in Monghyr than elsewhere. The proportion of out-door patients to the total population was greatest in Malda and least in Purnea, where it is only ·65 per cent. A dispensary, however, in the latter district, which is maintained by the Darbhanga Raj, is not included in the foregoing statement. Next to Malda came the Sonthal Parganas, which are well provided with dispensaries, there being six public and seven private institutions. The Lady Dufferin Hospital at Bhagalpur is still maintained.

Local Self-Government Institutions.

21. The interest of the members of the District and Local Boards in their work does not appear to increase. The general apathy in this respect is illustrated by the following remarks taken from the Commissioner's report which refer to the Bhagalpur district:—

The proportion of attendance at meetings was worse than in the preceding year in all the Boards, and the number of meetings adjourned for want of a quorum is lamentable. At Banka alone does the Board attempt to do its duty. Of the District Board the Collector writes—

"One or two members may be depended upon to offer good advice, but the majority take the least possible interest in what goes on, and attend as few meetings as possible. The Committees of the Board continue to do useful work, but the work which the Chairman does not do is falling into the hands of a few members. This, I believe, is a feature of county work in England also. The difference lies in this—*that occasionally* a Board at Home will wake up and exert itself to understand and grapple with a big question, and in the intervals of these efforts members keep themselves informed by papers of what is being done. In Bengal the record of our business in English renders this impracticable to a large majority, and they drift on, content with the honour of a seat and an occasional journey to head quarters, connected often as much with private business as with a meeting. District officers, however, though disheartened with this apathy, can at least thank Boards generally for a large measure of trust in what is done in their name, and a few public-spirited men for excellent advice and work, done often at some sacrifice of private business and convenience."

Among the municipalities, those of Monghyr, Jamalpur, Deoghur and Sahebganj are well spoken of; the latter especially is making great progress under the lead of Mr. Savi.

State of public feeling.

22. In Bhagalpur there is a certain amount of religious antagonism between the Sunni and Shiah sects of the Muhammadans and between Hindus and Muhammadans. The cattle-killing question is less prominent here than further west. The district is visited by travelling preachers from time to time of both religions, but their preaching had during the year under review produced no considerable manifestation of public feeling.

The Collector of Purnea says that there is no public feeling in his district upon subjects of a general nature.

In the Sonthal Parganas the only matter on which the Deputy Commissioner observes the existence of much feeling is the system of cooly-recruiting, which continues to excite bitter feeling among the people.

The Division as a whole is very peaceful. No newspaper is published in it, though presses exist in three districts; and the Calcutta papers have a very limited circulation among the more highly educated classes only.

Conduct of zamindars.

23. The Collector of Bhagalpur bears favourable testimony to the conduct of the zamindars of the district generally. In Sapaul and Madhipura, Maharaja Harbullab Narain Singh, C.I.E., the Banaili family, Babu Ganpat Singh, Babu Janardan Singh and other zamindars, gave alms or provided funds for relief works and earned thereby the thanks of the Lieutenant-Governor. The Raja of Barwari, the Panchgachia Zamindar and Babu Rash Behari Mandal, liberally postponed their rent demands. In Monghyr the Maharaja of Gidhour and the Raja of Khaira are reported to be always ready to co-operate with the district authorities. In Purnea the late Nawab Atta Hossein of Khajra was liberal and popular. But in some zamindaries in this district there are indications that the relations between landlord and tenant are somewhat strained. In the Sonthal Parganas the Raja of Pakour, the Zamindar of Moheshpur and the Ghatwals of Bamangaon and Sarath and Mr. Maling Grant are favourably spoken of.

Conclusion.

24. The Lieutenant-Governor desires to thank Mr. Quinn for his efficient administration of the division throughout the year. The Commissioner's report on the character of officers will be communicated to the Appointment Department. Among the Collectors, Messrs. Wace, Marindin and Carstairs, and among the other officers, Messrs. Duke, Wheeler, Smith and Babu Chandra Narain Singh have merited special mention.

By order of the Lieutenant-Governor of Bengal,

M. FINUCANE,

Offg. Secretary to the Govt. of Bengal.

RESOLUTION ON THE TRIENNIAL REPORT OF THE SANITARY COMMISSIONER FOR BENGAL ON THE WORKING OF THE VACCINATION DEPARTMENT DURING THE THREE YEARS 1890-91, 1891-92, AND 1892-93.

MUNICIPAL DEPARTMENT—SANITATION.

Calcutta, the 7th November 1893.

RESOLUTION No. 3391-S.

READ—

The Triennial Report of the Sanitary Commissioner for Bengal on the working of the Vaccination Department during the three years 1890-91, 1891-92, and 1892-93.

This is the second triennial report on the working of the Vaccination Department in Bengal, prepared under instructions contained in the Resolution of the Government of India, Home Department, No. 28-1579-95, dated 15th July 1887. It is submitted by Surgeon-Captain H. J. Dyson, Officiating Sanitary Commissioner, Bengal, in the absence, on furlough, of the permanent incumbent, Surgeon-Lieutenant-Colonel W. H. Gregg. The latter officer was in charge of the Department during the whole period under review, and Surgeon-Captain Dyson therefore labours under the disadvantage of having to write a report on operations which were carried on in a province of which he had no previous knowledge, and during a period when he saw nothing of the working of the Department.

2. The Lieutenant-Governor regrets that he is again compelled to notice the great unpunctuality with which this report has been submitted, for it was due to Government on the 15th June, but was not received until the 10th October. The explanation given of this delay is that, under the arrangements recently introduced, the returns had for the first time to be submitted by Civil Surgeons and other officers new to the work, and that much difficulty was experienced in obtaining the correct figures. The Lieutenant-Governor is aware that there have been exceptional difficulties in collecting the materials for the present report, but he observes that in 1891 and 1892 also the report was submitted after the due date, though not so late as in the present case. His Honour must insist on future reports being submitted without fail on the due date, and desires that the Sanitary Commissioner will forward for his information the names of those officers who were responsible for the delay under notice.

Working of the new system.

3. In the closing paragraph of last year's Resolution, some account was given of the reorganization of the Vaccination Department, which was finally sanctioned by the Government of India in Home Department letter No. 64, dated 26th March 1892. It is therefore only necessary to say that the main feature of the scheme consisted in the transfer of the executive supervision of the work of vaccination to Civil Surgeons, who were appointed *ex-officio* Superintendents of Vaccination in their respective districts. The various other changes in the subordinate and inspecting staff involved in the scheme may be gathered from the statement below, which shows the strength of the working staff in each of the past three years. It is as yet too soon to come to a definite opinion on the success of these changes, but Dr. Dyson points out as a defect in the scheme that, while Civil Surgeons are unable to inspect the remote portions of their districts, the small number of three Deputy Sanitary Commissioners is insufficient to supplement their deficiencies in this respect. It is possible that some modifications of the original proposals may eventually be required in this direction, but it seems too early yet to make any change: the Sanitary Commissioner is requested to pay special attention to this question, and to mention it in next year's report, unless he finds it necessary to make a definite recommendation in the meantime. Apart from this question, however, the increased number of operations that have been performed during the year may be fairly ascribed, in some measure at least, to the effect of the new scheme, the success or failure of which appears to depend largely on the energy or apathy of the Civil Surgeon of the district.

4. The strength of the supervising and operating staff during each of the three years under review is exhibited in the following statement:—

Strength of the establishment.

	Year.	Inspecting Staff.						Operators.				
		Number of Superintendents.	Number of Deputy Superintendents.	Number o. Inspectors.	Number of Sub-Inspectors.	Number of Head Vaccinators.	Total number of Inspecting officers.	Vaccinators: Government or paid.	Vaccinators: Licensed.	Apprentices: Government or paid.	Apprentices: Licensed.	Total number of operators.

The increase in the number of Superintendents and Sub-Inspectors and the decrease in that of Deputy Superintendents and Head Vaccinators in 1892-93 as compared with the two previous years is due to the changes in the Department described in the last paragraph.

5. The total number of vaccinations and the average number performed by each operator during the past three years have been as follows:—

Number of vaccinations.

Total number of vaccinations performed.					Average number of operations per man.				
1890-91.	1891-92.	1892-93.	Average of 1890-93.	Average of 1887-90.	1890-91	1891-92.	1892-93.	Average of 1890-93.	Average of 1887-90.
1,833,978	1,641,088	1,836,411	1,770,492	1,790,098	695	599	603	631	719

In last year's Resolution the Lieutenant-Governor expressed his opinion that none of the reasons given for the marked falling off in the number of operations were entirely satisfactory. The figures for the year under report confirm the opinion then expressed, for neither the material condition nor the health of the people have been much better in 1892-93 than in the year previous, yet the total number of operations during 1892 93 increased by 195,323. Whatever the cause of the falling off was in 1891-92, it would have been possible to hope that the recovery in the year under report would be permanent owing to the closer interest and more effective supervision that can now be exercised by Civil Surgeons, had it not been that this influence has been exerted in a very unequal manner in different districts. The statement in paragraph 5 of the report, which gives the number of operations in each district, shows great fluctuations from year to year in the same district, and extraordinary variations between districts believed to be not dissimilar in regard to population and general characteristics. The annual average of vaccinations, for instance, during the three years 1890-93 was in Jessore 26·6 per thousand of the population, and in the next district, Backergunge, only 16·3. Saran, again, has 26·7 and Champaran 17·5, and Pabna shows 34·8 to the 27·4 of Bogra.

6. The figures referred to above are those of total vaccinations in the past three years, embracing persons of all ages; but the Officiating Sanitary Commissioner has given a useful table showing for the year 1892-93, *i.e.*, since the reorganisation of the department was carried out, the extent to which the infants under one year of age were vaccinated in each district. The total number of infants of this age in the Province estimated to be available for vaccination in 1892-93 was 2,546,070, of whom 319,584, or 125·49 per mille, were successfully vaccinated. The Darjeeling and Lohardaga districts head the list with 544·73

Degree of protection afforded.

and 528·1 successful operations respectively, out of every thousand of the available infant population. Malda follows far behind with 397·76 per mille. At the bottom of the list we find Puri, Cuttack and the Chittagong Hill Tracts, with less than 10 per mille. The Officiating Sanitary Commissioner says in regard to those districts in which a falling off in the number of operations has occurred : "Generally speaking, it is to be ascribed to neglect or indifference on the part of the supervising officers. At all events, the excuse that is very generally made of paucity of subjects, in consequence of previous activity, cannot be accepted, for * * * * with the exception of Darjeeling, the Sonthal Parganas, Dacca, Nadia, Faridpur, and Tippera, in no district did the total number of vaccinations come up to the estimated number of infants available for vaccination." A further consideration of the figures gives ground for more general deductions, for it is clear that in districts inhabited by non-Aryan people the objection to vaccination is not strong, for with the exception of Malda the whole of the first eight districts answer to this description, while the well-known hostility of the Uriyas to vaccination is demonstrated by the fact that with the exception of Balasore all the districts of this Division, which are almost entirely Hindu, are quite at the bottom of the list.

7. In regard to the number of vaccinations per mille of total population during 1892-93, Bengal is far behind the other provinces of Upper India, for while the provincial average of Bengal is 25·14 per mille, the figures for the Punjab are 39·7, for Assam 39·18, and for the Central Provinces 36·49, the North-Western Provinces lagging behind with 23·79. The provincial reports, with the exception of that from the Central Provinces, do not afford statistics for a calculation of this kind in regard to the proportion of successful vaccinations per mille of infant population; but in the Central Provinces the ratio is more than six times as high as in Bengal, being 790·25 per mille as against 125·49.

Work of the vaccinators.

8. During the three years under review each paid vaccinator performed on an average 1,302 operations a year, and each licensed vaccinator 637, as compared with 1,578 and 671 respectively during the previous triennial period. The reason for the falling off in the average work of licensed vaccinators is said to be that there are now a larger number of apprentices employed, who, not being able to work as quickly as the more experienced men, reduce the general average. This may partially explain the fact, but there must be some further cause; for an examination of the figures shows that, even if the same number of apprentices had been employed in the earlier as in the later period, the number of operations remaining the same, the average work of each operator would still have been greater in the first triennial period Dr. Dyson suggests, with some show of reason, that the difference between the average number of operations performed by a Government vaccinator and by a licensed vaccinator is due to the fact that the former operates free of charge in new areas where there is no difficulty in getting subjects, and there is no doubt that the fee of 2 annas charged by the licensed vaccinator is strongly resented by most of those from whom it is demanded, since they consider it the insult of spoliation added to the injury of unnecessary pain.

9. During the year 1892-93 an average of 1,172 operations was performed by each paid vaccinator, which is 130 less than the triennial average. The falling off is partially explained by the fact that the seven vaccinators appointed for the Chitagong Hills Tracts, which were only brought under the control of the Sanitary Commissioner in February 1893, were unable, owing to the strong opposition they experienced, to attain to a higher average than 62 operations each. The average during the same year for each licensed vaccinator was about half, viz., 615.

10. These figures compare very unfavourably with the statistics for other provinces, for whereas in Bengal in 1892-93 the number of operations performed by each vaccinator of whatever class averaged only 632, the figures elsewhere were as follows:—Punjab 2,747, Central Provinces 1,837, North-Western Provinces 1,349, and Assam 927. Furthermore, the number of vaccinators bore the following ratio to every 100,000 of the population in each of the provinces quoted:—Assam 3·8, Bengal 3·7, Central Provinces 2·4, North-Western Provinces 1·7 and Punjab 1·4. These figures seem to show that the vaccinators in

Bengal and Assam did less work, man for man, than those in any other province, and lead to the inference that the outturn of work tends to be in inverse ratio to the relative number of operators.

Cost of vaccination.

	A.	P.
Assam	1	6½
Punjab	1	9
Central Provinces	2	0
North-Western Provinces	2	7
Bombay	3	0
Burma	4	2

11. The average cost of each successful operation during the three years amounted to 1 anna 6 pies, which apparently compares well with the cost in the other Provinces in India, as shown in the margin; but it is to be feared that the comparison is illusory, since a large number of the vaccinators in Bengal, viz., no less than 1,756 out of 3,039, are licensed vaccinators, who are paid by fees taken from the people, while 878 others were unpaid apprentices, whose operations swell the total without any cost to the State: apprentices seem to be unknown in other provinces.

Comparison between the death-rate from small-pox in each district and the proportion of protection.

12. Four diagrams are given in the report to illustrate the death-rate from small pox in each district as compared with the proportion of the population protected by vaccina tion during the last seven years. They lead to no very convincing deductions, probably because the phenomena recorded do not extend over a sufficiently long period. Puri and Cuttack, which in each year are well in the forefront of the list showing deaths from small-pox, are respectively eleventh and eighth from the bottom as regards protection: in these districts, however, all statistics are obscured by the annual concourse of pilgrims at Puri. Darjeeling, on the other hand, which is best protected, in no year shows a death-rate of more than ·13 per mille of the population. It would be advisable in future to show the proportion of protection and the number of deaths from small-pox in one and the same diagram. In the present instance, moreover, the usefulness of the diagrams is much impaired by the fact that the districts are not shown in the same order in each.

Vaccination operations in Dacca Jail.

13. The Officiating Sanitary Commissioner, as requested by Government, comments at some length on the result of certain vaccination operations in Dacca Jail. It appears that 3,465 prisoners were vaccinated, of whom 1,667 had been previously inoculated, 1,445 had been previously vaccinated, 197 had had small-pox, and 156 were unprotected. At first 2,719 operations were successful, and as an experiment 2,032 prisoners were again vaccinated, with the result that 1,303 cases took. Vaccination was also performed on 14 prisoners one month after their recovery from small-pox, with the result that six cases were successful. The Civil Surgeon of Dacca, in view of these results, suggests the necessity of frequent re-vaccination until susceptibility is stamped out. The gist of Dr. Dyson's reply is that if one attack of small pox does not necessarily confer immunity from a second attack, it is only reasonable that it should not necessarily render impossible a subsequent successful vaccination: still less will one successful vaccination necessarily prevent a second successful vaccination. Dr. Dyson quotes instances and statistics, which show conclusively that re-vaccination at the age of puberty practically grants complete immunity from small-pox, and he draws the conclusion that even, if continuous vaccination is theoretically correct, it is neither practicable nor necessary. He finally recommends that all school children of over ten years of age, and all Government employés, should bear the mark of successful re-vaccination. The first suggestion is less practicable than the second, which is akin to one which was made by Dr. Gregg in 1890, and again by Dr. Dyson in 1893, to the effect that, under the Factories Act (XV of 1881), all persons employed in factories should bear a similar mark. The proposal was brought to the notice of the Government of India in the annual report on the working of the Factories Act, and is under the consideration of Government in the General Department.

Extent of vaccination.

14. Vaccination is now practised throughout the Province: it is compulsory in municipalities, but optional in rural areas, save in certain portions of Rangpur, Bhagalpur, the Sonthal Parganas and Tippera. The Officiating Sanitary Commissioner recommends that those sections of the Bengal Vaccination Act (V of 1880) should be introduced which, without rendering vaccination universally compulsory, make it punishable for individuals, who have been duly served with a notice, to refuse to undergo, or to allow their children to undergo, the

operation. But the Lieutenant-Governor, while he recognises that Bengal is lamentably backward in this as in other sanitary matters, and that nothing short of compulsion will bring vaccination up to what it ought to be according to European standards, hesitates to adopt a measure which, even in its modified shape, must excite opposition. Sir Antony MacDonnell is not prepared to force upon the people a general measure, the importance of which they do not yet recognise, and to which in many districts ancient prejudice renders them hostile: for the present the extension of the practice of vaccination must depend on the spread of intelligence and sanitary knowledge among the people, and the influence that can be exerted by the executive officials. It was chiefly with the object of strengthening this influence that the Department was lately reorganised and its supervision localized, and the Lieutenant-Governor prefers for the present to await the results.

Attitude of the people.

15. The attitude of the people towards vaccination is described by the Officiating Sanitary Commissioner as one of passive acceptance, but in nearly every district there are sections of the community who openly or covertly refuse to submit to it, objecting not so much to vaccination in itself, as to the use of human vaccinifers who are usually of low caste, and to the payment of vaccination fees The difficulty of realizing the fees, he says, is undermining the whole system of licensed vaccination in Bengal: it tends to make the vaccinators overcharge the unsuspecting, and leads them to operate only on those who can and will pay. On the other hand, he urges that the cost of free vaccination would be small, amounting in a district like Burdwan to some 600 or 700 rupees only, which the District Board could well afford, and as a matter of fact the District Board of Puri, in pursuance of Dr. Dyson's recommendations, have since the close of the year voted a sum of Rs. 850 for this purpose. The Lieutenant-Governor is well aware of the many claims that are made on the resources of the District Board, and is averse to local funds being unnecessarily drawn upon; but vaccination is a matter of the greatest public importance, and is one of the legitimate objects to which the District Fund may be applied, and he would therefore, speaking generally, have no objection to District Boards whose funds are in a flourishing condition making some donation for this purpose; but much will depend upon the manner in which this contribution is expended, and before the Lieutenant-Governor can express a confident opinion, he desires that the details of the suggestion should be worked out and separately submitted.

The supply of lymph

16. Lymph was obtained during the year from the Calcutta and Darjeeling depôts. The former has been in existence since 1882; the latter was established in 1891. In last year's Resolution some account was given of the operations at the new depôt, and also of the process of preserving lymph by an admixture of lanoline. This system was successfully continued throughout the year, and lymph can now be preserved so as to remain active for long periods and under various changes of temperature. One of the main objects of the establishment of these depôts has thus been successfully achieved, but without largely increasing the number of depôts and the expenditure on them, it is impossible to attain the further object of supplying a sufficient quantity of lymph during the working season to enable arm-to-arm vaccination and its attendant evils to be entirely abandoned. To compass this object, Dr. Dyson suggests the introduction of the Punjab and Central Provinces plan of vaccination direct from the calf. Under this system a calf is first inoculated with lanoline lymph, and from this calf all the children of the village, as well as calves from neighbouring villages, are vaccinated These calves are returned to their own villages after vaccination, and when the lymph is ripe, a vaccinator proceeds to the village and vaccinates from the calves all the children as well as fresh calves from other villages. The operation causes the animals but little pain and no permanent injury, and as buffalo calves serve as well as cow calves, it is easy to avoid wounding any susceptibilities. Moreover, this system has this great advantage, that it obviates the sufferings to which arm-to-arm vaccination exposes the human vaccinifer, and removes the objections urged by some to vaccination from low caste, or possibly unhealthy, children. The introduction of the scheme has been sanctioned tentatively in twelve districts during the approaching cold weather. Since the close of the

year Dr. Dyson has been making experiments in goat and sheep vaccination, the results of which will shortly be reported.

Prohibition of unlicensed vaccination.

17. The Officiating Sanitary Commissioner urges the necessity of putting a stop to unlicensed vaccination, which he says does great harm by engendering a false sense of security among the persons operated on, by creating discontent among the licensed operators, and by discrediting the whole system in consequence of the indifferent manner in which the operations are performed. The recommendation is not new, having been pressed upon Government in 1890 and again at the commencement of the present year, and the Officiating Lieutenant-Governor is at one with his predecessors in thinking that it has yet to be shown that the evil has spread to any great extent, and that until this can be demonstrated there is no necessity to take any steps in the matter.

Inspections.

18. The Lieutenant-Governor regrets to observe that the duty of inspection has been inadequately performed during the year under review. Surgeon-Captain Alcock, of the Metropolitan and Eastern Bengal Circle, visited 84 villages and inspected 1,952 operations; Surgeon-Major Waddell, of the Northern Bengal Circle, visited 233 villages and inspected 3,305 operations; while the numbers for Assistant Surgeon N. N. Gupta are 715 villages and 7,569 operations. Dr. Alcock's time is said to have been much taken up with sanitary work, while Dr. Waddell was in bad health throughout the season. The amount of inspection done by Civil Surgeons varied exceedingly from district to district, as was perhaps to be expected during the first year in which the reorganization of the Department took effect, but there can hardly be adequate excuse for the extent of the deficiency in some districts. The Civil Surgeon of the 24-Parganas made no inspections whatever, and those of Howrah, Burdwan, Nadia, Tippera, Shahabad and Palamau inspected the results of less than 500 operations. It is clear that these officers have overlooked the orders of Government that their visits of inspection to dispensaries should be utilised for the purpose of supervising vaccination operations also. On the other hand, Dr. Cobb of Dacca and Drs. Nicholson and Bovill of Patna, in spite of heavy duties in the station, managed to get through a creditable amount of vaccination inspection, and Sir Antony MacDonnell is gratified to find that in addition nine other Civil Surgeons, whose names will be duly noted, have been selected for special commendation for their efforts to promote vaccination. The inspection work done by the District Inspectors and the Sub-divisional Sub-Inspectors has in most cases been ridiculously inadequate. The Lieutenant-Governor trusts that the earnest attention of Civil Surgeons and their subordinate inspecting officers will be drawn to this matter, for he is convinced that in the absence of compulsory vaccination, which for reasons stated above he is not prepared at present to introduce, the success or failure of the operations depends to a very large extent on the personal interest taken in them by the local officers.

19. The Lieutenant-Governor has to thank Dr. Dyson for an interesting and suggestive report, as well as for the zeal and energy he has thrown into his work, both as Superintendent of Vaccination and Sanitary Commissioner, during his deputation to Bengal.

By order of the Lieutenant-Governor of Bengal,

J. A. BOURDILLON,

Offg. Secy. to the Govt. of Bengal.

CONTRIBUTION MADE BY THE MAHARAJA OF DINAJPUR TOWARDS THE CONSTRUCTION OF A RESIDENCE FOR THE FEMALE DOCTOR ATTACHED TO THE WOMEN'S HOSPITAL IN THAT DISTRICT.

No. 3379Med., dated Calcutta, the 6th November 1893.

From—J. A. BOURDILLON, ESQ., Officiating Secretary to the Government of Bengal, Municipal Department,

To—The Commissioner of the Rajshahi Division.

I AM directed to acknowledge the receipt of your memorandum No. 640Jct., dated 20th October 1893, forwarding for information a copy of a letter from the Magistrate of Dinajpur, reporting an act of liberality on the part of the Maharaja of Dinajpur in having defrayed the entire cost, amounting to Rs. 2,700, of the residence of the female doctor attached to the Women's Hospital in that district, and in having contributed the sum of Rs. 1,000 for the hospital building itself.

2. In reply, I am directed to request that you will be so good as to convey to the Maharaja the thanks of His Honour the Lieutenant-Governor for his public spirit and liberality. The correspondence will be published in the *Calcutta Gazette.*

Rainfall, Weather, and State and Prospects of the Crops.

Statement showing Rainfall, Weather, and State and Prospects of the Crops in the different districts of Bengal, as reported to Government, during the week ending the 4th November, 1893.

	No.	District and date of return.		Rainfall at Sadar Station in inches.	Character of the weather and state and prospects of the crops.
BENGAL.					
Burdwan Divn.	1	Burdwan Kalna Katwa Raniganj	Nov. 4, '93	Nil Nil Nil Nil	Weather—still hot in day, cooler at night. Prospects of *aman* rice crop continue good. Lands being prepared for *rabi* crops. Prices of common rice:— Srs. Burdwan ... ... 12 to 14; Kalna ... ... 9 to 13; Katwa ... ... 14⅞; Raniganj ... ... 12¼ } per rupee.
	2	Bankura	„ 4, '93	Nil	Weather—generally fair. *Aman* paddy doing well *Rabi* is being sown. Water and fodder sufficient. Common rice is selling at 15½ seers per rupee at Sadar and 17 seers at Vishnupur.
	3	Birbhum Rampur Hát	„ 4, '93 ...	Nil Nil	Weather—seasonable. Harvesting of *aus* paddy commenced. *Aman* looks well. Price of common rice 10 to 16 seers per rupee.
	4	Midnapore	„ 4, '93	Nil	A little rain at Contai; none elsewhere. Weather clear and cold except in the middle of the day. Prospects of crops excellent except in a few small areas where it has been completely destroyed. Prices of common rice:— Srs. Sadar ... ... 12; Contai ... ... 13; Tamluk ... ... 13; Ghatal ... ... 13 } per rupee.
	5	Hooghly Serampore Jahanabad	„ 4, '93	Nil Nil Nil	Weather—seasonable. *Aus* paddy harvested. *Aman* paddy in ear, and doing well. Prospects of sugarcane good. Lands being prepared for *rabi* crop, and sowing has commenced in some places. Prices of common rice:— Srs. Sadar ... ... 11 to 12; Serampore ... ... 10 to 11; Jahanabad ... ... 11 to 12 } per rupee.
	6	Howrah Ulubaria	„ 4, '93 ...	Nil Nil	Weather—seasonable. *Aus* harvest finished. *Aman* crop doing well. Fodder and water sufficient. Price of common rice 10 to 11 seers per rupee.
Presidency Divn.	7	24-Parganas	„ 4, '93	Nil	Weather—seasonable. Prospects of crops fair except in the Baukipur thana. Ploughing and sowing of *rabi* crops going on.
	8	Nadia Kushtia Meherpur Chuadanga Ranaghat	„ 4, '93	Nil Nil Nil Nil Nil	Weather—slightly cool in the morning, but hot during day. Prospects of crops fair. Water and fodder sufficient.
	9	Khulna Bagerhat Satkhira	„ 4, '93	Nil Nil Nil	Weather—fine and cooler. Prospects of *aman* good. *Rabi* crops have been sown.
	10	Jessore Jhenida Magura Narail Bangaon	„ 4, '93	Nil Nil Nil Nil Nil	Weather—seasonable. Prospects of *aman* fair. Sowing of *rabi* crops going on. No cattle-disease. Supply of fodder and water sufficient. Price of rice stationary.
	11	Murshidabad	„ 4, '93	Nil	Weather—nights getting cool. Sowing of *rabi* crops continues, and that of indigo has commenced. Prospects of *aman* crop appear to be good. Fodder sufficient for cattle. Common rice selling at 12 seers per rupee.

Division	No.	District and date of return.		Rainfall at Sadar Station in inches.	Character of the weather and state and prospects of the crops.
BENGAL—*concld.*					
CHITTAGONG DIVN.	12	Chittagong	Nov. 4, '93	0·03	Weather—seasonable. Early *aman* in ear. Prospects fair. Lands being ploughed for *rabi* crops. Prices steady. Condition of cattle generally good. Supply of fodder sufficient.
	13	Noakhali	" 4, '93	Nil	Weather—seasonable. Lands are being ploughed for *rabi* crops. The average damage done to crops by the cyclone and inundation of the 22nd October is about 2 annas except in Companyganj, Hatia, and some parts of Sudharam, where the damage is estimated from 4 to 8 annas. Crops are maturing in some places. Price of rice stationary.
	14	Tippera	" 4, '93	Nil	Weather—seasonable. Prospects of *aman* good except in Brahmanbaria subdivision, from which extensive damage to crops by insects is reported.
	15	Chittagong Hill Tracts.	" 3, '93	Nil	Weather—cloudy during the first part of the week; foggy in the morning during the latter part; hot at noon throughout the week. Every indication of cold weather. Gathering of late *jum* paddy is nearly over and reaping of early plough-paddy has commenced here and there. Plough-paddy suffered a little from the storm of the 22nd October. Common rice sells at 8 seers per rupee. No cattle-disease reported.
DACCA DIVN.	16	Dacca	" 4, '93	Nil	Weather—seasonable. Harvesting of *aman* paddy commenced. Prospects favourable. Sowing of mustard, *mug*, and *kalai* nearly finished. Common rice selling from 7 to 11 seers per rupee. Fodder available with difficulty. No cattle-disease except in Narayanganj subdivision.
	17	Faridpur Goalundo Madaripur	" 4, '93	Nil Nil Nil	Weather—bright and cool. On high grounds early *aman* harvest and sowing of winter crops continue. Outturn of rice on high lands fair, on low lands very poor. Rice 10 to 12 seers per rupee. Fodder sufficient. No cattle-disease now.
	18	Backergunge	" 4, '93	Nil	Weather—seasonable. Prospects of standing crops fair. Common rice sells from 8 to 10 seers per rupee. Fodder and water sufficient.
	19	Mymensingh	" 4, '93	0·81	Weather—seasonable. Prospects of standing crops good. Common rice selling at 9 to 9½ seers per rupee. Condition of cattle good. Supply of fodder sufficient except in some places in the Kishorganj subdivision.
RAJSHAHI DIVN.	20	Dinajpur Thakurgaon	" 4, '93 ...	Nil Nil	Weather—cool. The prospects of the standing crops could not be better.
	21	Rajshahi Nator Naugaon	" 4, '93	Nil Nil Nil	Weather—seasonable. Prospects of standing crops reported to be good everywhere except in Boraigram thana. Steeping of jute going on. Condition of cattle good. Water and fodder-supply ample. Rice selling from 9½ to 13 seers per rupee.
	22	Rangpur Nilphamari Gaibanda Kurigaon	" 4, '93	Nil Nil 0·05 Nil	Weather—cool. Prospects of *aman* and sugarcane good. Cultivation of *rabi* crops is proceeding. Average price of rice 10 seers per rupee.
	23	Bogra Sherpur Naukhila	" 4, '93	Nil Nil Nil	Weather—fair. *Aman* progressing very favourably. Prospects of winter crops good. Common rice sells at 11½ seers per rupee. Fodder and water sufficient.
	24	Pabna	" 4, '93	Nil	Weather—seasonable. Prospects of *aman* good. *Khesari*, mustard, gram, hemp, and peas are being sown. Common rice selling at Rs. 4-4 to Rs. 4-10 per maund in the Sirajganj subdivision, and at 9½ seers per rupee in the Pabna subdivision. Fodder and water-supply sufficient.
	25	Darjeeling Siliguri	" 4, '93 ...	Nil Nil	Weather—seasonable: bright and cool. *In the hills:—Aghani dhan* coming to perfection. Potatoes, *marua*, *kalai*, *toree*, peas, and *phaphur* progressing favourably. Lands being prepared for wheat and barley. *In the Terai:—Haimanti dhan* ripening. *Kalai* and *til* doing well. Prices of coarse rice:— Srs. Hills ... ... 9 } per rupee. Terai ... ... 11 } per rupee.
	26	Jalpaiguri	" 4, '93	Nil	Weather—seasonable: bright and cool. Prospects of *aman* good. Lands are being prepared for tobacco. *Bhadoi* rice sells at 12 seers per rupee. No cattle-disease. Fodder sufficient.

No.	District and date of return.	Rainfall at Sadar Station in inches.	Character of the weather and state and prospects of the crops.
BIHAR.			
Bhagalpur Divn.			
27	**Monghyr** Nov. 4, '93 Begusarai ... Jamui ...	Nil Nil 0·29	Weather—fair and seasonably cool. Prospects of winter rice very promising. *Rabi* sowing is being delayed in some places owing to the soil being too moist. *Kurthi*, indigo and sugarcane doing well. Cattle-disease towards Nawadih and Sikandra. Fodder and water sufficient. Prices of common rice:— Srs. Sadar ... ... 12 to 15 } per rupee. Begusarai ... ... 12 to 14 } Jamui ... ... 14 }
28	**Bhagalpur** „ 4 '93 Banka ... Madhipura ... Supaul ...	Nil Nil Nil Nil	Weather—seasonable. Prospects of winter rice excellent. *Rabi* sowings going on. Common rice 15 seers 2 chitaks per rupee.
29	**Purnea** „ 4, '93 Kishanganj ... Araria ...	Nil Nil Nil	Weather—fine, getting cold. Paddy very promising. *Kurthi* and sugarcane doing well. *Rabi* sowings progressing favourably. Fodder and water plentiful. Rice decidedly cheapening.

* Mean of 6 days.

Explanation.—Summary—The normal means of air pressure and temperature are the arithmetical average or means of the reading during the same period
The *humidity* of the atmosphere is expressed at percentage, saturated air being presented by 100. —A clear sky is denoted by 0 and an overcast sky by 01
rainfall the normal mean are the numerical means or average of the rainfall in that district determined from the returns sent in by the subdivisional station
district, *i.e.* from total rainfall at the subdivisional stations in the district sending in returns divided by the number of stations. A rainy day is one of

for the week ending Saturday, the 4th of November 1893.

					DISTRICT OBSERVATIONS.										
					Of week.				Rainfall.						
									Since 1st of month.			Since 16th October 1893.			District.
Variation from normal mean.	Mean 8 A.M. temperature.	Average humidity at 8 A.M.	Average cloud amount at 8 A.M.	Rainfall of week at observing station.	Mean for district.	Normal mean.	Average number of rainy days.	Normal number of rainy days.	Mean for district.	Normal mean.	Variation.	Mean for district.	Normal mean.	Variation.

for the last ten years. The variations are *negative* when the mean for the week is less than the corresponding normal mean, and *positive* when greater. The numbers denoting cloud amount represents the part of the sky covered, the whole sky being denoted by 10. Under the head District observations of for the period in question during the past ten years. The means of the district are the numerical average of the rainfall returned received in the which at least a tenth of an inch fell.

Statement of Rainfall in Bengal for the week ending Saturday (8 a.m.), the 4th of November 1893.

Explanation.—... indicates that no rain has fallen. If the return for any day has not been received, the corresponding space is left blank. If any of the returns are wanting, the corresponding spaces in the total rainfall columns are left blank. With reference to the column of rainy days, the definition of a rainy day is when at least ·1 inch of rain has fallen.

CALCUTTA, *the 7th November* 1893.

SUMMARY OF THE METEOROLOGICAL AND RAINFALL OBSERVATIONS TAKEN IN BENGAL, AND OF THE METEOROLOGICAL OBSERVATIONS TAKEN IN ASSAM, FOR THE WEEK ENDING 8 A.M., SATURDAY, THE 4TH OF NOVEMBER 1893.

At the end of the previous week a depression in the east of the Bay was close to the Arakan coast between Diamond Island and Akyab, moving in a north-easterly direction. On the first day of the present week the area of lowest pressure was in Upper Burma, and as the disturbance had lost much of its severity in crossing the rough country near the coast it had practically ceased to affect the weather in the Bay or in Bengal except in East Bengal, where one or two light showers fell, and pressure was still below the normal. The rapid increase of pressure that had begun in the south of Arakan spread northwards, and the distribution underwent a material change. From being low in the east of the province, readings soon became highest in Assam and diminished steadily towards the south of the Bay. This arrangement continued throughout the week and was accompanied by fine settled weather, light northerly winds, and cloudless skies over the whole province. Temperature fell slowly from day to day and never differed much from the normal, being slightly above in some districts and slightly below in the others.

Within a day or two of pressure becoming lowest in the south of the Bay, unsettled conditions appeared both at the Burma stations and on the Madras coast. Wind velocity increased, and the sea was rough probably over the whole of the south of the Bay, but as pressure changes were small and irregular, there was no certainty that a storm had developed till towards the end of the week, when a low pressure area approached the South Madras coast. On the 4th November, the last day of the week, the centre of the depression was still at some distance from the coast. It passed inland near Cuddalore early on the morning of the 6th, and caused very stormy weather, especially between Madras and Cuddalore. Its influence was felt to a small extent over a wide area. The sky became overcast in Orissa, the Circars, and even in Lower Bengal, and probably over the whole Bay area, but the rough weather was confined to the south-west of the Bay.

Pressure fell slowly in Bengal on the first day of the week, but it soon recovered after the disturbance in the early part of the week broke up in Burma. Readings became very high, and the only subsequent changes were the small oscillations usual in settled weather. Means for the week are above the normal everywhere by amounts varying from ·06 inch to ·1 inch.

Temperature.—At the beginning of the week mean daily temperature was slightly above the normal in the central districts, and below in the east and west, in places by as much as 2°. After the northerly winds became prevalent a slow fall set in and comparatively cool weather was experienced over the whole province, but defect was nowhere large. Towards the end of the week temperature rose in the western districts, probably owing to the disturbing influence of the storm in the south-west of the Bay; excess, however, was rarely over 1°. The means for the large divisions are above the normal in North Bengal, East Bengal, and North Bihar, and below in other districts, the only difference of more than 1° being in Chota Nagpur.

Rainfall.—With the exception of one or two very light showers in East Bengal in the early part of the week, none has been reported.

The following table gives the summary of the temperature and rainfall data of each of the seven meteorological divisions of the province for the week ending Saturday, the 4th of November 1893:—

Meteorological Divisions	Temperature.						Rainfall.									
	Highest observed during week.	Lowest observed during week.	Averages for week.			Average mean of week above or below normal mean of week.	Of week.			Rainy days.			Since 1st of month.		Since 16th May 1893.	
			Of highest of each day.	Of lowest of each day.	Of mean for each day.		Average.	Normal average.	Variation.	Average number in week.	Normal average number in week.	Variation.	Average.	Normal average.	Average.	Normal average.

METEOROLOGICAL OFFICE, BENGAL,
The 7th November 1893.

C. LITTLE,
Offg. Meteorological Reporter to the Govt. of Bengal.

Abstract of the results of Meteorological Observations taken at the Alipore Observatory in the month of October 1893.

	Inches.	Date.	Hour.
The mean pressure of the month	29·822		
The average pressure of October from 24 years' registers ...	29·832		
The highest pressure in the month	30·030	30th	10
The lowest pressure in the month	29·589	3rd	16
The range of pressure	0·441		
	Hours.		
The total number of hours of bright sunshine during the month	224·3		
The maximum possible number of hours of sunshine ...	359·1		
	°		
The mean temperature of the month	80·1		
The average temperature of October from 24 years' registers	81·5		
The highest temperature in the month	90·2	3rd.	
The lowest temperature in the month	70·2	31st.	
The range of temperature during the month	20·0		
The mean daily range of temperature	11·4		
The greatest range of temperature in one day	13·7	24th.	
	Per cent.		
The mean humidity of the month	86		
The average humidity of October from 24 years' registers ...	79		
	Inches.		
The mean vapour tension of the month	0·877		
The average vapour tension of October from 9 years' registers...	0·854		
The mean cloud proportion of the month	4·09		
The average cloud proportion of October from 16 years' registers	4·01		
The total rainfall of the month	7·34		
The total rainfall indicated by a Beckley's self-registering rain-gauge (mouth of the gauge about 52 feet above the ground)	6·98		
The average fall of October from 48 years' registers ...	5·61		
The greatest fall in 24 hours	2·12	12th.	
	Days.		
The number of rainy days in the month	11		
The average number of rainy days in October from 24 years' registers	10		
The mean maximum equilibrium temperature of solar radiation during the month	° 145·1		
The mean difference of sun and air temperatures	58·8		
The greatest sun temperature	153·3	15th.	
The greatest excess of sun over air temperature	66·7	7th.	
The mean temperature of the nocturnal radiation thermometer on woollen cloth	71·8		
The mean depression of the nocturnal radiation thermometer below the minimum air temperature at 4 feet above the ground	3·2		
The greatest depression of the nocturnal radiation thermometer below the minimum air temperature	5·4	30th.	
	Miles.		
The mean movement of the wind per day	53·6		
The greatest movement of the wind in one day	158·0	22nd.	
The greatest movement of the wind in one hour	12	16th and 22nd noon to 1 P.M.	

The number of hours with winds from each of the 8 points—

N. 145, N.E. 42, E. 55, S.E. 52, S. 41, S.W. 55, W. 69, N.W. 68, Calm 217.

The results of observations at the Alipore Observatory are not rigorously comparable with the registers of past years (at the Park Street Observatory). The barometer is about 3 feet higher at Alipore, and, other things being equal, reads therefore ·003 lower. The diurnal range of temperature is also greater at Alipore, and the mean temperature apparently about 0°·8 lower; and, finally, the thermometer which furnished the record of temperature at the Surveyor-General's Office during 20 years and upwards is found to read 0·6 higher than the Kew standard thermometer, which is the standard of reference at the present Observatory.

J. H. GILLILAND,
For Meteorological Reporter to the Govt. of India.

The total fall from 1st January to 4th November 1893	85·20
The average fall of the corresponding period for 24 years, Surveyor-General's Office	64·70

The mean pressure, temperature, &c., are deduced from the traces of the Barograph and Thermograph and from observations made at 6h, 10h, 16h, and 22h.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed open at the sides and are suspended four feet above the ground.

The barometer readings are corrected approximately to those of the standard, Newman's No. 86, formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed in the Meteorological Office, and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground.

♎, dew; o, overcast.
